FOREWORD

This volume attempts to encompass the causes of the great conflict, the chief happenings of military and political importance during the bloodiest four years of the world history, and their results and their effects upon the nations involved. An earnest endeavor has been made to take the reader through the most important phases. The limitation of this work to one volume makes the giving of exhaustive details of every incident, every battle, every siege, every advance or retreat, an impossibility. But in this very limitation lies the book's greatest value.

To please a tactician, chapters might be devoted to the battles along the Marne, the Somme, the Yser, or to the struggle before Verdun or to the Russian campaigns. But for the reader who seeks a straightforward, circumstantial narrative of the great war, without its chief events being clouded and obscured by a multiplicity of subsidiary details, this book has been written.

Devotion of time to research has been given that its facts may be accurate. It contains no statements based on rumors, no accounts taken from unauthoritative sources.

The United States undoubtedly was the great determining factor in the overthrow and crushing of junkerism, and for that reason this volume should be of the greatest interest to Americans. Two million sons of America were in France. Their concentration and transportation was the greatest military feat in history. America's active share in the war, though it covered only a little over a year and a half, is the nation's most glorious achievement. With this in mind, painstaking effort has been made to do the fullest justice to recounting the events of the last eighteen months of the crusade to crush autocracy and militarism.

Entertaining visualization of the war is best attained through photographs. For this reason this book has been profusely illustrated and the hundreds of scenes photographed during the four years of campaigning on all the great fronts, in themselves tell the narrative in a convincing manner. These pictures were taken by the most skilled men attached to the fighting forces. Many of them are the official output of the bureau of public information in Washington. Others were taken by men who risked death for a "close-up."

The events of the war have been brought down to the present day. No vital episode of the struggle has been overlooked. The narrative is complete from the demolition of Liege to the signing of the terms of the armistice and the abdication of the German Kaiser. It is hoped that it will do full justice to the sacrifice, courage, steadfastness in the face of apparent defeat, of the tireless fighting men of Great Britain, France, Italy, Belgium, Serbia and the United States.

The Historic Palace of Versailles, near Paris, where the Supreme War Council of the Allies met and the terms of armistice were decided upon. The King of Prussia was proclaimed Emperor of Germany here in 1871.

DEDICATION

To Righteousness,

The Foundation of Peace;

To Freedom,

The Spirit of Peace;

To Democracy,

The Dwelling of Peace;

and to all Brave Men of whatever Clime or Creed,

Who for these things fought and suffered even unto death.

Pictorial History of The Great War

The Red Trail of Prussia

CHAPTER I

PRUSSIA UNSCRUPULOUS IN EARLY HISTORY—BISMARCK THE EMPIRE BUILDER—GERMANY VICTORIOUS OVER FRANCE IN 1870—HARSHEST TERMS IN HISTORY—PRUSSIA PREPARED CAREFULLY FOR ALL WARS—MIDDLE EUROPE EMPIRE PRUSSIAN AMBITION

About two centuries and a half ago the Mark of Brandenburg, formerly known as the Nordmark, came under the sway of Frederick William the Great Elector.

That was the beginning of Prussia as an ambitious, aggressive and unscrupulous state.

The first act of Frederick William was the abolition of the constitution. He made himself absolute monarch. His second act was to create a professional army to sustain him in absolutism.

He trained his army, disciplined it rigorously and equipped it as well as was possible in those seventeenth century days. Then he set forth to conquer his neighbors.

In this he was measurably successful. Other little marks and duchies were added to the territory of Brandenburg, and Berlin became the center of a considerable domain.

So Frederick William the Great Elector set the style for all Prussian rulers who should come after him.

The three fundamental principles of Prussianism were absolutism, military power and conquest. They remained the fundamental principles of Prussianism thru two centuries and a half, and until the allied democracies of the world undertook to destroy them in the World War.

The domain of the Great Elector was joined with East Prussia by his successor, and in 1701 Frederick III assumed the title of King of Prussia, placing the crown on his own head with his own hands—that being the nearest approach to actual coronation by the Almighty that he could devise.

Meantime the sway of the Prussian dynasty extended in all directions. Swedish Pomerania, Silesia and the Posen and West Prussian provinces of Poland were added in the period from 1720 to 1795. The fortunes of war fluctuated, it is true; Prussian arms were not always successful. Napoleon played havoc with Prussian dominions for a time, and the Hohenzollerns were stripped of territories and power; but the Napoleonic success was meteoric. At the Congress of Vienna, in 1814, Prussia recovered practically all that she had lost, and came into possession of several additional states that had hitherto escaped her rapacity.

However, before the yoke of autocracy was finally fastened upon the necks of the subject peoples of Prussia; before they were made the helpless and unthinking tools of a madly ambitious imperialism, there was a revolt against absolutism. The fires of democracy that had swept thru the American colonies, France and England in the late eighteenth and early nineteenth centuries were slow in kindling their torches in central Europe. But in 1848 and '49 Prussia heard the cry of popular defiance in the streets of Berlin, and saw the flag of insurrection raised in Baden and Saxony.

With brutal power she crushed the revolutionaries of her own domain. Those of Baden and Saxony might have fared better—the king of Saxony, indeed, was forced to hide himself—but Prussia sent her armies into her neighbor states and trampled ruthlessly under foot the brave men who sought to win freedom.

That is typical of Prussia. Always and everywhere she has been the enemy of

Archduke Franz Ferdinand, his wife and children. The Archduke and wife were assassinated.

freedom, the implacable foe of democracy. She has denied it to all people who came under her sway, and she has done her best to destroy it in the lands that she could not, or did not choose, to conquer.

The yoke securely fastened upon the necks of the people within her own realm and those of her neighbors; the revolutionary leaders exiled, imprisoned or slain, Prussia turned her thought and energy again toward the plans of aggression that were the chief concern of her rulers and statesmen.

Bismarck had come upon the scene—Bismarck the empire builder. His vision of Prussia dominant was challenged by the presence of a powerful rival in central Europe. The House of Hapsburg, rul-

sary preparation for war. When things were in readiness to strike a sharp, hard blow, he aggravated the dispute to the point of ruptured relations. The war he wanted followed. Prussia's armies, ready for action, were hurled into Bavaria and Austria, the former state having elected to take Austria's side in the quarrel.

The struggle was of short duration. In seven weeks Austria capitulated at the battle of Konigsgratz, or Sadowa. From that day Hapsburg never ventured to challenge Hohenzollern, or in any way to interfere with Prussian plans.

Bismarck, having cleared the field, went on with his work of building an empire. He welded the German states into a confederation under a constitution that

Serbian civilians hung by Austrians along the roadways.

ing Austria, had been often the ally of the House of Hohenzollern in expeditions of conquest and plunder. But Bismarck wanted no ally of co-equal strength, no possible competitor in imperialism. The Prussian conception of an ally is a vassal, compelled to play the game as Prussia pleases.

Hence it was necessary to eliminate Austria as a potential rival in order to assure for Prussia the place she desired.

Bismarck had no difficulty in finding a cause for friction. There was a dispute over Schleswig-Holstein that he carefully fostered. He encouraged the belief that all difficulties could be settled amicably and, in the meantime, made every neces-

was designed to fasten the Hohenzollern dynasty upon it forever, and to give to its successive monarchs autocratic control, supported by military power. It was provided in the constitution that it might not be amended without the consent of Prussia. This was the ultimate and absolute safeguard. Only Prussia could undo Prussia; only Hohenzollern could relax the grip of Hohenzollern upon the lives of the German people.

Bavaria, having suffered defeat with Austria in the Seven Weeks' war, came reluctantly into the confederation. She did not love Prussia and the Hohenzollerns. For years it was against the law to display the German flag in Bavaria.

Funeral of Archduke Franz Ferdinand and his wife.

She never became fully reconciled to her new status as the subordinate of Prussia in the family of Teutonic tribes.

Hohenzollern ambitions were not satisfied to rest with the consolidation of territory under the German empire. The King of Prussia had become German Emperor, and the new title merely quickened the inherent appetite for further conquest. Envious eyes turned toward France. The rich provinces of Alsace-Lorraine invited plunder and acquisition.

A comparatively short struggle resulted in a complete victory for Germany. It was another instance where preparedness prevailed over courage and devotion. Alsace-Lorraine was added to the German empire, and France was compelled to pay an indemnity of five billion francs in order to get the German army out of her territory.

This sketch of Prussian history is necessary in order that we may understand how wholly in keeping with the character

Serbian officers watching experiments with liquid fire.

Moreover France was a possible rival whose humbling was advisable in order to assure the dominant position of Europe.

Bismarck deliberately laid the foundation for war with France by provoking a quarrel thru the publication of a garbled telegram from the King of Prussia to the King of France. The wording of the telegram was made to carry an insult to the French monarch—and in those days there was only one way of dealing with insults.

and aspirations of the rulers and people of Prussia was the world war in which their ambitions culminated.

Prussia never blundered into wars unwittingly. She made them with deliberate purpose; prepared for them long in advance, and carried them thru to victory with only one intent—to increase her own power and territorial sovereignty.

The forty odd years of peace that followed gave the world time to forget Prussia's history. Moreover, Prussia, herself,

The ex-Kaiser, Crown Prince, Eitel Frederick, Prince Adalbert, Prince Oscar, Prince Augustus and Prince Joachim perfectly comfortable behind the line reveling in debauchery and having others do their bidding.

was camouflaged in the German empire, and people who had known the German tribes before they became subject to Prussian rule and guidance found it difficult to believe that the industrious, home-loving folk of Germany could have in their hearts ambitions that menaced the peace and happiness of neighbor nations. It is probable, indeed, that such ambitions were foreign to these tribes or states in their earlier history as a confederation, but they were never absent from the minds of their Prussian over-lords.

During those forty years Prussia did two things—she Prussianized the rest of the German people, and she built up a great army and a great navy for enterprises of conquest conceived on a vaster scale than ever before.

The story of these four decades of mis-education for the German people is one that merits a volume to itself. The secular and religious instruction given the youth of the land was definitely directed toward inculcating a vaunting pride of race and nation and a contempt for all other peoples. They were taught to believe that the Germans were the chosen of God, with a destiny to subdue the world to their own peculiar "kultur." The state, embodied in the kaiser and the general staff of the German army, became for them the voice of God. What the state decreed was right, no matter how it might violate individual conceptions of ethics. To live and die for the state, unquestioningly obedient to its commands—this was the supreme morality.

This education was part of the process by which the German people were made the docile tools of the Prussian dynasty, serviceable for the later execution of its

maturing plans.

Such is the general background of the World War.

As we draw nearer the fateful year in which Germany launched her long preparing thunderbolts against the world, one incident after another shows that the hour of action was no chance hour.

Wilhelm II dreamed thru the earlier years of his reign of the day when the resting German sword would be again unsheathed to continue the traditions of his dynasty and to carve from Europe and the continents beyond a domain greater in extent and incomparably richer in resources than any autocrat of history had ever ruled.

In accordance with his ambitions there developed in Germany an organization devoted to the creation of a great middle Europe state, including Austria-Hungary in its scope, and extending its frontiers thru the Balkans to Asia Minor and Mesopotamia. Maps that were printed and distributed in Germany twenty years before the World War began showed the greater empire, and swept within its boundaries Belgium and Holland on the west, and the Baltic States of Russia, Poland, and the Balkan countries on the east and southeast, as well as the dual monarchy. Leaders in this movement spoke of acquiring territory in South America, notably in the southern Argentine. It was boldly predicted that the whole civilized world would become either part of the empire, or subject to it in the relation of vassal to master.

In order to promote the project for a middle-Europe empire with an Asiatic annex, the Kaiser visited Constantinople, Damascus and Jerusalem. He addressed

Wm. Hohenzollern, ex-Kaiser of Germany, in the uniform of a Turkish officer.

a great audience of Turks in Damascus, and declared himself the friend of the Ottoman empire and the Mohammedan faith. His immediate reward was a concession from Turkey allowing Germany to construct the Bagdad railroad, and giving it a right of way in European Turkey, thru what was known as the Sanjat of Novibazar, thus creating the link thru the Balkans that has been often referred to as the Bagdad corridor.

Austria-Hungary played her part in these plans, doubtless with the knowledge and approval of Germany. She seized Bosnia and Herzegovina, border Balkan states. When her act aroused the anger of Europe, the Kaiser appeared as her champion, and declared that he supported the policy of his Austrian ally.

The Prussian plans were moving smoothly and swiftly toward the achievement of Prussian ambitions, when the Balkan war broke out. The utter defeat of Turkey deprived Germany of her right of way thru the Sanjat of Novibazar, which became Serbian territory, and closed the Bagdad corridor.

Bulgaria was prompted to renew the struggle in a second war by the intrigues of the central empires. They hoped by this means to recover the advantage they had lost in the Balkans—the necessary link of empire by which Hamburg would be joined to Bagdad. The plan failed. Bulgaria was defeated by her erstwhile allies.

And thus it was that in 1913 Germany

The Ex-Crown Prince of Germany whose flight showed his weak character.

found her ambitions checked. Serbia, enlarged in territory, lay squarely across her path to the east. Serbia was antagonistic to Vienna and Berlin. She looked to Petrograd—then St. Petersburg—for friendship and support. Germany realized that diplomatic efforts to open a way thru the Balkans could not succeed.

She knew only one way in which to realize her ambitions—and that was force. Force, for Prussia, was the normal and most desirable method of obtaining anything she desired.

Such is the trail of intrigue and bloodshed that leads up to the critical day in June 1914, when a deed of assassination furnished the pretext that Prussia needed for the execution of her designs.

The Spark in Europe's Powder Magazine

CHAPTER II

ASSASSINATION OF AUSTRIAN ARCHDUKE—AUSTRIA CHARGED ANTI-DYNASTIC PLOTS—ASSASSINATION IN FACT PLOTTED BY GERMANY—ULTIMATUM TO SERBIA—SERBIA MAKES CONCESSIONS TO KEEP PEACE—GERMANY AND AUSTRIA REFUSE TERMS—AUSTRIA DECLARES WAR ON SERBIA, GERMANY DECLARES WAR ON RUSSIA, BELGIUM AND FRANCE—AUSTRIA DRIVES ON SERBIA AND GERMANY INVADES BELGIUM—GREAT BRITAIN SENDS ULTIMATUM TO GERMANY—STATE OF WAR DECLARED BETWEEN GREAT BRITAIN AND GERMANY.

The Balkan wars were over, and with their settlement Europe heaved a sigh of relief. For a time a general conflagration had threatened the nations of the old world. The European war cloud, familiar in the headlines of the newspapers, had hung upon the horizon with low mutterings of thunder. But the crisis was passed safely, and men again began to talk as tho a great war were a thing impossible.

They pointed to the growing intercourse among nations; the spread of democratic institutions; the rising intelligence of the masses of the people; the multiplying of international peace treaties and agreements for arbitration. Had not the Hague peace tribunal been established, and were not many of the great powers of the world signatory to its conventions, in which they pledged themselves to regard international law, and to live with one another on a basis of reasonableness and humanity?

These things were all true.

And yet from all of these things men derived a false sense of security.

Germany ruled by responsible governments, controlled by the enlightened sentiment of their peoples, could not understand the peril that remained latent in the world's autocracies.

Prussia was rapidly completing her plans. We have learned from the disclosures made by Dr. Muehlon, a former Krupp director, and others who were in a position to know what was transpiring within the councils of the empire, that conspiracy against the world's peace was on foot in Germany. There were confer-

ences of the business men and the imperial chancellor, and the men of finance and industry were warned to set their affairs in order and to prepare for a great war.

Then came the spark that exploded the powder magazine of Europe.

The Archduke Francis Ferdinand, heir to the throne of Austria-Hungary, went with his wife, the Duchess of Hohenberg, on a visit of state to Serajevo, the capital of Bosnia.

Bosnia had been annexed by Austria-Hungary in 1908. There were many Bosnians who bitterly resented the Hapsburg interference with their national life. The state had its secret political organizations, its intrigues and plots, all concerned with frustrating Austrian rule and promoting Slav interests.

Serajevo was not a safe city for the heir to the Austrian throne to visit, and this fact must have been well known to the authorities. Yet, in spite of the perils that always beset royalty in Europe, and that were peculiarly acute in southeastern Europe; in spite of the known existence of enmities and conspiracies in Bosnia, practically no precautions were taken by the municipal officials of Serajevo to protect the lives of the imperial heir and his wife.

It was on Sunday, June 28, 1914, that the Archduke arrived at the Bosnian capital. He and his wife at once got into an automobile and were driven toward the town hall, where they were to be welcomed officially. The crowd that watched them pass thru the city streets showed little enthusiasm. Their automobile had not gone far before a man dashed from the throng on the pavement, and hurled a

Helgoland, the German Naval Stronghold.

bomb at the car. He missed the archduke. The bomb fell on the road, and exploded just as a second car passed over it, containing members of the archduke's staff.

The would-be assassin attempted to escape in the crowd, but was caught and put under arrest. He was a youth—21 years of age—named Gabrinovics.

Archduke Ferdinand was livid with fear and indignation when he reached the town hall, and, when the burgomaster

exposed the royal visitor to attack. On the way back from the town hall the imperial car passed a youth named Gavrilo Prinzip, standing on the curb, who calmly drew a revolver and fired twice. The first shot fatally wounded the duchess, the second pierced the neck of the archduke, severing the jugular vein. Both died without uttering a word.

Prinzip was arrested. He denied any knowledge of Gabrinovics, and declared that the first attempt at assassination was

German soldiers decorated for exceptional bravery during the Battle of Verdun.

These soldiers are being rewarded for making one of the many furious attacks on the Verdun front.

tried to read to him an address of welcome he interrupted with the angry exclamation:

"Herr Burgomaster, it is perfectly scandalous. We have come to Serajevo, and a bomb is thrown at us."

The burgomaster stammered an incoherent apology and went on with his address. But the archduke's sharp rebuke had no practical effect. Nothing was done to remedy the neglect that had

a surprise to him. He said he was a Serbian student, and had for long entertained the idea of killing some eminent person.

The Austrian authorities immediately promulgated the story that they had discovered an anti-dynastic plot, the source of which was in Serbia.

The circumstances of the assassination have led many people to believe that it was deliberately planned, not by Bosnians or Serbians, but by Austrians and

Picture of the German submarine mothership, Vulcan, taken in the Kiel Canal. On either side are seven German submarines and in front is a craft entering the "dock" ship.

Germans who desired a pretext for attacking Serbia as the initial step toward recovering the Bagdad corridor and opening the road to world conquest. It is assuredly true that the taking off of the archduke coincided exactly with the culmination of Prussia's preparations for war. It is, too, rather extraordinary that Prinzip, the youth who killed him, was sentenced to twenty years imprisonment instead of to death. In a country where the death penalty was common, twenty years imprisonment for the murderer of

ized that a serious situation had developed involving grave possibilities.

Early in July it was rumored in diplomatic circles that Austria-Hungary was planning drastic reprisals for what she alleged was a Serbian crime, committed, if not with the authority, at least with the sympathy of the Serbian government.

Then Count Tisza, at that time premier of Austria, reassured the capitals of Europe by a speech in the Austrian parliament in which he held out strong hope that there would be an amicable settle-

The Arch Conspirators—The Ex-Kaiser, Ferdinand of Bulgaria, the Ex-Sultan of Turkey, and the late Franz Josef of Austria.

the heir to the throne seems strangely lenient.

The world was slow to realize the significance of the Serajevo tragedy. People were horrified at the deed, and editorials were written denouncing anarchy; but no one seemed to see—at first—the figures of war and famine and pestilence walking in the funeral procession of the dead archduke.

In the chancelleries of Europe, however, there was much anxiety. In London, Paris, Rome and Petrograd men conversant with European affairs real-

ment of the whole matter. Apprehensions were allayed, and the world thought it saw the war cloud passing.

One week later Austria sent an ultimatum to Serbia, demanding a reply in 48 hours.

The ultimatum recited the facts of the assassination and alleged that the crime was due to Serbia's tolerance of propaganda and intrigue against the peace and territory of the dual monarchy. It demanded that the Serbian government should condemn this propaganda and utterly suppress it.

The German Offensive: The New Methods by Which It Was Pursued and How It Was Countered. The Germany made her advances on the Western Front. The new method was devised by the famous

a—This diagram does not represent any particular battle or area, but illustrates the principles by which Erdi, who was pooh-poohed for his ideas by the German General Staff at the outbreak of the war.

Count Von Bernstorff
The German arch conspirator and ex-ambassador.

The ultimatum then continued:

In order to give a formal character to this undertaking the royal Servian government shall publish on the front page of its official journal of the 26th June (13th July) the following declaration:

“The royal government of Servia condemns the propaganda directed against Austria-Hungary—i. e., the general tendency of which the final aim is to detach from the Austro-Hungarian monarchy territories belonging to it, and it sincerely deplores the fatal consequences of these criminal proceedings.

“The royal government regrets that Servian officers and functionaries participated in the above mentioned propaganda and thus compromised the good neighborly relations to which the royal government was solemnly pledged by its declaration of the 31st March, 1909.

Supersubmarine Deutschland which arrived at Baltimore after a trip across the Atlantic.

"The royal government, which disapproves and repudiates all idea of interfering or attempting to interfere with the destinies of the inhabitants of any part whatsoever of Austria-Hungary, considers it its duty formally to warn officers and functionaries, and the whole population of the kingdom, that henceforward it will proceed with the utmost rigor against persons who may be guilty of such machinations, which it will use all its efforts to anticipate and suppress."

This declaration shall simultaneously be communicated to the royal army as an order of the day by his majesty the king and shall be published in the official bulletin of the army.

The royal Servian government further undertakes:

1. To suppress any publication which incites to hatred and contempt of the Austro-Hungarian monarchy and the

Alfred Zimmerman, Germany's ex-foreign minister.

Bethman Hollweg, the weak-minded member of the Ex-kaiser's War Board.

general tendency of which is directed against its territorial integrity;

2. To dissolve immediately the society styled Narodna Odbrana, to confiscate all its means of propaganda, and to proceed in the same manner against other societies and their branches in Serbia which engage in propaganda against the Austro-Hungarian monarchy. The royal government shall take the necessary measures to prevent the societies dissolved from continuing their activity under another name and form;

3. To eliminate without delay from public instruction in Serbia, both as regards the teaching body and also as regards the methods of instruction, everything that serves, or might serve, to foment the propaganda against Austria-Hungary;

4. To remove from the military service, and from the administration in gen-

eral, all officers and functionaries guilty of propaganda against the Austro-Hungarian monarchy whose names and deeds the Austro-Hungarian government reserves to itself the right of communicating to the royal government;

5. To accept the collaboration in Serbia of representatives of the Austro-Hungarian government in the suppression of the subversive movement directed against the territorial integrity of the monarchy;

6. To take judicial proceedings against accessories to the plot of the 28th June who are on Servian territory. Delegates of the Austro-Hungarian government will take part in the investigation relating thereto;

7. To proceed without delay to the arrest of Major Voijs Tankositch and of the individual named Milan Ciganovitch, a Servian state employe, who have been compromised by the results of the magisterial inquiry at Serajevo;

8. To prevent by effective measures the co-operation of the Servian authorities

General Von Hindenburg, commander-in-chief, and his chief of staff.

This Photo was taken in 1914. The Crowds were Optimistic.

across the frontier, to dismiss and punish severely the officials of the frontier service at Schabatz and Loznica guilty of having assisted the perpetrators of the Serajevo crime by facilitating their passage across the frontier;

9. To furnish the imperial and royal government with explanations regarding the unjustifiable utterances of high Serbian officials, both in Serbia and abroad, who, notwithstanding their official position, did not hesitate after the crime of the 28th June to express themselves in interviews in terms of hostility to the Austro-Hungarian government; and, finally,

10. To notify the imperial and royal government without delay of the execution of the measures comprised under the preceding heads.

Immediately the terms of the Austrian ultimatum became known in diplomatic circles in Europe there was consternation. It was seen that Austria had imposed conditions no nation could accept without an utter humbling. The war cloud gathered

The Late Count George von Hertling, the Ex-Bavarian Prime Minister and Ex-Imperial German Chancellor.

Ukraine and Germany Signing Peace Pact. Germany and her allies on the one side and the newly created Ukrainian state on the other concluding a treaty of peace.

again, darker and more threatening than before.

We have since learned, through the disclosures made by Dr. Muehlon, the former Krupp director to whom I have already referred, that the kaiser had a hand in drafting this drastic document. He was consulted by Austria, and approved its form without consulting his advisers, according to the story that Muehlon had from Chancellor von Bethmann Hollweg.

telegraph and cable were carrying coded messages from ambassadors to their governments, and apprehension of the most serious results was everywhere felt.

Serbia's reply came within the allotted time. It amazed the world by its almost complete concession to Austria. Practically all of the eleven demands but one were accepted without modification. Serbia declined to permit the agents of Austria to prosecute investigations on Serbian soil, but agreed to carry out the required

Royal Family of Germany.

William II, Ex-Emperor of Germany and Ex-King of Prussia, married the Ex-Princess Victoria of Schleswig-Holstein-Sonderburg-Austenburg. He has six sons and one daughter. The Ex-Crown Prince Frederick William, married the Ex-Duchess Cecilie of Mecklenburg-Schwerin. The Ex-Emperor's sister, Sophia is the wife of Constantine, Ex-King of the Hellenes. Ex-Prince Henry, his brother, married his cousin, Ex-Princess Irene of Hesse, daughter of the late Ex-Princess Alice of England. The Ex-Emperor's mother was Princess Victoria of England, daughter of Queen Victoria.

The kaiser is said to have told the chancellor he was determined to go thru with his program, and that no one now could turn him back from his purpose. His resolution being thus declared he left for a trip on his royal yacht, a discreet maneuver designed to create the impression that he had no part in the matter.

Meantime the European chancelleries were vibrant with nervous agitation. The

investigations and to report progress in suppressing anti-Austrian propaganda to the representatives of the dual monarchy. In conclusion she offered, if Austria were not fully satisfied with these concessions, to submit the whole matter in dispute to The Hague or to any tribunal constituted by the Great Powers.

It was recognized by all impartial observers that a more complete acquiescence

could not be asked in reason.

The Austrian minister received Serbia's conciliatory reply at Belgrade on July 25, 1914, at 5:45 in the afternoon. He did not even wait to read it. His things were all packed and ready for departure. He put the manuscript in his dispatch box, and left Belgrade at once for Vienna, thus severing diplomatic relations without ceremony.

It was evident that Austria wanted trouble. The ultimatum had been designed not to obtain a settlement of difficulties, but to promote war.

Great Britain immediately took up the task of preventing an outbreak of hostilities. She proposed to Germany, on July 27, that the matters at issue between Austria and Serbia be submitted to a conference of representatives from Germany, France, Italy and Great Britain. Italy was then a member of the triple alliance, of which the two other members were Germany and Austria-Hungary.

Germany declined the proposal by which peace might have been preserved, alleging that the controversy between Austria and Serbia involved the honor of Austria and could not be submitted to adjudication by disinterested parties. Russia, Serbia's friend, opened direct negotiations with Vienna, and these were proceeding more or less encouragingly when they suddenly terminated, and Vienna refused to negotiate further. There is strong foundation for the belief that Germany intervened to prevent an understanding between Vienna and St. Petersburg.

Meantime Austria mobilized her armies and Serbia responded by like action. There was some talk of localizing the trouble, and permitting a punitive expedition against Serbia, but it ended in talk. Russia, realizing that her interests in the Balkans and in the Dardanelles were menaced by the threat of Austria to drive down toward the Aegean Sea thru Serbia, mobilized five army corps behind the Vistula. The mobilization was far from the

The Ex-Kaiser in Austrian Uniform. The Shriveled Left Arm Is Quite Noticeable.

frontiers of the central empires and constituted no immediate threat.

On July 28 Austria formally declared war against Serbia, and began an immediate movement of her forces toward the Serbian frontiers on the Save and Danube. Russia, alarmed by this indication that Austria was determined to conquer the little Slav monarchy that looked to her as protector, and that stood as a barrier between Germany and the east, at once began mobilization in her southwestern provinces.

Thus far there had been no direct threat to Germany, but the kaiser on the same day mobilized his fleet—an act that carried with it a very clear menace to Great Britain.

By July 29 the Austrian guns were bombarding Belgrade from the north side

Bismarck Making the Harsh Terms in History to the French Representatives in 1870.

of the Danube, and the world was aroused to the fact that the long predicted European war could be averted only by some miracle.

The semi-official *Lokal Anzeiger*, of Berlin, issued an extra edition about noon of July 30, announcing that a decree had been issued for the general mobilization of the German army. The news was flashed at once to St. Petersburg. The edition was promptly suppressed by the authorities, but it had accomplished its purpose. It may never be known whether it was originally printed with authority and in order to provoke a belligerent response from Russia, and then suppressed to complete the case for innocence that Germany hoped to lay before the world in convincing fashion.

Its suppression was followed by a peremptory demand from Berlin that Rus-

Capt. Boy-ed, ex-attache of Germany to U. S.

The German Offensive. The Guard Grenadier Regiment who were taken prisoners by the British.

The Kiel Canal, Which Unites the North Sea with the Baltic.

sia cease mobilization within twenty-four hours. But Russia, apprised that Germany was mobilizing, refused to accede to this demand and ordered a general mobilization.

The efforts of Great Britain had failed either to avert or to localize the war. France, alarmed by the swift movements of the central empires and their implacable spirit, was calling out her troops. She held them, however, at a discreet distance from the frontier, avoiding as far as possible needless provocation.

Realizing now that a general European war was inevitable; that France and Russia were certain to be involved with Germany and Austria, Great Britain made one last effort to avert the worst possible consequences—she addressed a note to Paris and Berlin, asking both governments to respect the neutrality of Belgium.

A prompt reply was received from France, agreeing unconditionally. Germany made no answer. Her plans were

already laid for the invasion of Belgium. It was the most convenient route to Paris, and Prussia considers nothing but her own interests.

On August 1 Germany formally declared war on Russia and made public her suppressed mobilization order.

Great Britain followed this action by informing France that her fleet would undertake to protect the French north coast against German invasion. On the same day the first hostilities opened the struggle on the west front when a German patrol crossed the French frontier at Cirey. The French immediately began the movement of their troops toward the frontier. Their preparations were made to defend the line from Luxembourg south to Switzerland, along the Alsace-Lorraine border. The invasion of Alsace was planned as a counter-stroke to the

Field Marshal Von Mackensen who led the Austro-German Forces on the Italian Front.

German threat.

They relied upon the neutrality of Belgium and Luxembourg as protection against invasion over an almost unfortified frontier.

But on August 3 Germany addressed a demand to Belgium for free passage across her territory. The little country did not hesitate. She returned a prompt refusal, and mobilized her small army to meet the menace that immediately overshadowed her. Her refusal was at once followed by a declaration of war against her. A like declaration was simultaneously made against France, and the armies of Germany began the attack.

On the afternoon of August 3 German troops entered the little Belgian town of Arion, while Chancellor Von Bethmann Hollweg explained to the reichstag that military necessity compelled Germany to commit a wrong against Belgium for which reparation would be made.

Clinging to an eleventh hour hope

Great Britain addressed to Berlin an ultimatum, allowing twenty-four hours for reply, in which she demanded that the neutrality of Belgium be respected.

The ultimatum was delivered by Sir W. E. Goschen, British ambassador to Berlin, on the afternoon of August 4. Herr Von Jagow, the German secretary for foreign affairs, received it in person, and gave an immediate answer in the negative. He said it was impossible for Germany to observe the neutrality of Belgium since her troops had already crossed the frontier. He argued that Germany had to take this course in order to prevent France attacking her thru Belgium. He ignored the fact that France had already given her word that she would observe the obligation of Belgian neutrality, and that Great Britain, had France broken her word, would have been compelled to deal with her as she later dealt with Germany.

The British ambassador asked if he might see the chancellor, unwilling to take Von Jagow's reply as final. He was granted permission. Von Bethmann Hollweg appeared much perturbed. He talked for twenty minutes, haranguing Great Britain's representative in tones pleading and upbraiding. He declared it seemed impossible that Great Britain was going to make war on a friendly neighbor merely for the little word "neutrality" that had been disregarded so often in history, merely for a "scrap of paper."

The interview ended unavailingly. Sir W. E. Goschen prepared at once to leave Berlin. That evening the British embassy was mobbed.

At midnight in London a vast throng gathered in Trafalgar Square, awaiting the issue of the momentous ultimatum. As the great clock in the tower of Westminster struck the fateful hour it was announced that a state of war existed between Great Britain and Germany.

There was a moment's silence. Then a great cheer went up, and the multitude melted silently away.

The Armies Are Unleashed

CHAPTER III

GERMANY AND AUSTRIA HAD TWO MILLION MEN READY — GREAT BRITAIN'S ARMY WEAK — FRANCE WELL PREPARED — BELGIUM AND SERBIA REASONABLY WELL EQUIPPED — GERMANY'S DRIVE THROUGH BELGIUM — ALLIED REVERSES — GERMANY'S ENORMOUS STRENGTH CRUSHES ALLIES.

Great Britain, Russia, France and Belgium were now embroiled in war with Germany. Austria-Hungary was at war with Serbia, and almost immediately became a belligerent against the other allies.

Germany had 25 first line army corps ready for action, numbering approximately 1,000,000 men; she had twenty-five additional reserve corps of like number. On the day that hostilities began there were at least 2,000,000 German soldiers available, and this number was soon increased by another 1,500,000.

Austria-Hungary had a first line army of about 1,000,000 well trained soldiers, with reserves of less number than those of Germany, but material that was rapidly converted which brought her total force up to approximately 3,000,000 before many weeks had elapsed.

Turkey, soon to enter the war as an ally of the central empires, was a nation of soldiers. In later years they had been trained by German officers. She is estimated to have had about 750,000 good soldiers subject to mobilization when the war began.

Bulgaria, whose decision to link her fortunes with Germany came only after much hesitation and a cool and calculated bargaining, had probably a little less than half a million men fit for the field.

Great Britain, whose reliance was placed upon her navy, was notably weak militarily. Her regular army, at home and in the colonies, numbered only 156,100 men. She had a territorial or militia force numbering 251,000. Her native troops in India and her volunteer soldiers of the overseas dominions, including cadets and members of rifle clubs, did not exceed half a million.

France, a military country, was in much better situation. She began the war with nearly 4,000,000 trained men between the ages of 19 and 48, of whom 2,500,000 belonged to the active army and its reserves, the remainder constituting the territorial army.

Accurate figures as to Russia's military strength have always been difficult to obtain. Her available man power was enormous. It is estimated that she had 28,000,000 men between the ages of twenty and forty-three who could be drawn upon for military service in August 1914. It is probable that at least twenty-five per cent of this number was called to the colors—or 7,000,000 men—before the war had continued many weeks. Perhaps one-half that number was sent to the long fighting front.

Italy, who came into the war on the side of the allies in the spring of 1915, had about 1,200,000 fully trained soldiers, 800,000 partly trained, and a million more untrained but available for call.

Belgium had only 120,000 men with which to meet the armies of Germany when they crossed her frontier. This force was later increased to a quarter of a million.

Serbia mobilized 350,000 to face the Austrian invasion.

Such was the approximate strength of the opposing forces at the beginning of the great struggle.

It was recognized that Germany had the best organized army in Europe. Its equipment was perfect in every detail. Not a necessary thing had been overlooked that was within range of human foresight. Every officer was provided with maps, showing in detail the cities,

towns and villages, the roads and railroads, the rivers, forests and elevations of Belgium and France.

For years the trucks used for peace transport in Germany had been built so as to be available for war purposes.

shells began to fall upon the Belgian defenses. Then they were a nightmare to the world.

Germany's decision to attack France thru Belgium was due to the topographical difficulties in the way of a successful

A German Lookout in a Waterproof Trench. A view of a sandbag-constructed trench on the German battlefield in the Western battle zone showing how carefully the trench has been water-proofed.

advance from Alsace-Lorraine. Paris lies within a series of natural escarpments that run in a north and south direction across France to the east of the capital. The outermost is that of the Vosges

mountains; moving toward Paris the next is the heights of the Meuse; then comes the eastern edge of the Champagne, and, nearest Paris, the hills that extend from the region of Laon to the Seine.

After the war of 1870 France strongly fortified the line of the Meuse. The Verdun-Toul-Epinal-Belfort defensive barrier is famous. This Germany would have been compelled to storm, after crossing the Vosges, had she observed the neutrality of Belgium, and struck France directly from her own territory.

There are gaps in the line, but they were readily defensible and offered only narrow entrances for the immense force with which Germany planned to overwhelm her neighbor. The gap of Stenay lies between the Ardennes forest and the Meuse heights; the Toul-Epinal gap is made by the valley of the Moselle, and the Belfort gap lies between the southern end of the Meuse escarpment and the mountains of Switzerland.

By sweeping thru Belgium the enemy hoped to circumvent the escarpments at their northern end, and to reach Paris

Teuton Machine Gun in Action Under Bomb-Proof Shelter.

over ground vastly freer from obstacles.

Germany had two main foes to consider when she began her campaigns—France and Russia. She anticipated no appreciable resistance from Belgium. She knew the military weakness of Great Britain, and feared chiefly her fleet. Russia, she reasoned, would be slow in mobilizing and reaching her frontiers.

Hence it was her plan to drive France to her knees in a swift, smashing blow, and then to turn and deal with Russia before the Slavic giant mustered his strength and became dangerous.

Of the twenty-six army corps that she had available for an immediate use she sent twenty against France and six to hold Russia in check.

She began her attack by occupying the Duchy of Luxembourg, to the east of Belgium. It was an easy victory. Luxem-

Armored Battery on the Flanders Coast. Back View of the Armored Gun Turret.

bourg had no army to oppose invasion. The Duchess went out to meet the advance guard of the enemy and made formal, but futile, protest against the outrage that was planned.

The capital of Luxembourg was seized, and its railroads taken over by the Germans. The latter were, of course, of considerable value for the transport of troops to the French frontier.

Meantime three German divisions had

enemy attempted to storm the forts after a heavy bombardment. He was driven back with heavy losses, and an amazed world began to wonder whether little Belgium would halt the foe on the very threshold of his campaign. But the world had much to learn of Prussian power. A third storming effort was made on August 7, and the enemy succeeded in entering that part of the city lying east of the Meuse. General Leman withdrew his

French Armored Cruisers "Jaureguiberry" and "Bouvet" in Speed Trials.

reached the Belgian frontier opposite the Meuse fortress of Liege. On the night of August 4th they moved to the attack.

Liege is surrounded by six large pentagonal forts, and as many smaller ones. General Leman, a brave Belgian officer, famous as a mathematician, commanded the garrison, and made every possible preparation for stubborn resistance.

On the fifth and again on the sixth the

troops to the west bank of the river.

On the seventh a German siege train arrived carrying heavier guns, and the monster 42 centimeter shells were hurled against the remaining forts of the beleaguered city. The bombardment was terrific, and the forts crumbled under the ponderous impact.

But it was not until August 15 that the last of the Liege forts yielded. They had

served a great purpose. Belgium's magnificent but sacrificial effort had delayed the armies of Germany for two weeks, giving the French time to prepare their defense and the British to mobilize their little army and hasten it across the channel to the scene of hostilities.

On August 7, the day that the Germans entered Liege, the French began their invasion of Alsace. It was designed as a flank attack on the enemy, and, in theory, was wisely planned. But the French movement was too long delayed to be successful. The enemy had moved more rapidly and was already on the ground with strong forces. Moreover the German success at Liege developed at once a serious threat to the French northern frontier that made further offensive adventure in Alsace imprudent. It was necessary to concentrate in order to meet the menace of a sweep thru Belgium.

The British expeditionary force, under General Sir John French, and numbering only some 80,000 men, landed in France on August 8, and immediately moved forward to join the French who were advancing into Belgium.

Meantime the enemy was sweeping across northern Belgium, outraging the civilian inhabitants of the little towns and

Searching skies for the enemy air fleet. Searchlight in full activity; to the left an officer observing the movements of an enemy aeroplane.

villages, burning and pillaging. Behind was a trail of blood and ruin.

The French armies took up defensive positions on a line beginning at Montmedy and extending northwest along the Meuse to Mezieres, and thence north to Dinant. From Dinant the line ran west to Charleroi. The British assumed positions to the left of the French, north of Mons. The second French army was holding positions along the Alsace-Lorraine border, its right wing resting in upper Alsace near Mulhouse and its left near Nancy.

The Belgians evacuated Brussels, retiring on Antwerp. In this way they saved one of the most beautiful capitals from otherwise inevitable destruction. On

The three women were found operating machine-guns during the American advance.

August 20 the Germans occupied Brussels, taking over the administration of the city.

The dismayed civilians lined the streets and watched the endless procession of enemy soldiers, clad in their gray uniforms, marching with monotonous rhythm thru the city. They marched with heads erect and the confidence of conquerors. They were on their way to Paris, and not one of them doubted that he would reach

that were a few days late in reaching Liege, were on time at Namur, and made it a heap of ruins in a few hours.

The battleground was now cleared for the first great test of strength between the enemy and the allied armies of Great Britain and France. Von Kluck commanded the right wing of the advancing foe; the left wing was commanded by the Duke of Wurtemberg; the center was held by troops under Von Bulow and Von

Great German Battleship "Ersatz Bayern" Among Those Surrendered.

the great French capital within a few days time.

On August 22 the Germans, after a brief assault, captured the Belgian fortress of Namur, at the junction of the Meuse and Sambre rivers. Namur was the last stronghold between them and the allied armies. Its sudden capitulation came with the shock of surprise. It had been thought it might hold at least as long as did Liege. But the big siege guns,

Hausen.

The Crown Prince of Germany, commanding the Fifth army, was advancing from Luxembourg.

The French troops reeled backward under the smashing blow of the enemy. Along the line Mezieres-Dinant-Charleroi they retired fighting toward Rethel and Hirson. Between Mezieres and Longwy they staggered under the attack of the Crown Prince, and retreated toward

Chalons, thru the Argonne forest.

The little British army in front of Mons was left without support, and had to face the full strength of the enemy First army under Von Kluck. It fought a gallant battle, outnumbered three to one. The enemy attempted to drive the British into the entrenched camp of Maubeuge, but the masterly tactics of Sir John French defeated his purpose.

There then began one of the most nota-

Had he succeeded in this disaster might have overtaken the armies of France and Great Britain, and the victory might have been gained by Germany before her opponents had time to rally. But Sir John French with his 80,000 men managed to hold Von Kluck and 240,000 at bay. In four days he retreated 64 miles—an average of 16 miles a day—fighting courageous rear-guard actions on every mile, and occasionally halting to strike a more than

A Successful Submarine Torpedo Attack, Cruiser Destroyed by An "Assassin of the Sea."

ble retreats in history—the retreat of the British army from Mons. It held the vital position on the left wing of the allied forces. It had for its task the supreme duty of preventing an enveloping movement.

From the time the retreat began it was the aim of Von Kluck to outflank the allies, swing around their left wing and intercept their retirement on Paris.

usually hard blow against his pitiless pursuers.

Effective retreat calls for as high generalship as effective attack. It is a much harder test of morale. Giving ground is always discouraging to the rank and file and taxing upon the nerve and endurance of officers, who must maintain a spirit of hope and confidence whatever happens.

As the allied armies retired the world

Palace of Justice, Brussels, Belgium.

watched with keen anxiety. Germany was exultant, but nations that loved France and admired Paris contemplated with alarm and consternation the possibility that the great capital of light and life and youth might suffer as Belgian cities had suffered, or that the nation whose spirit it embodied might be forced to yield to the invading foe.

For six days, from August 22 to August 28, the fate of the allied armies hung in the balance. The Germans had another opportunity to win a Sedan. The crisis was reached on August 26, when the British met the full force of Von Kluck's offensive — five army corps against two. The British were standing on the line of Cambrai-LeCateau-Landrecies, and preparing to retire, when the blow fell. It was met with supreme courage.

Re-enforcements had been asked from the French, but no help was sent, and the British were compelled to fight alone. Had they failed Paris would have been lost, because Von Kluck would have driven between Paris and the French right wing, rolling back the French armies and compelling them to fight at a serious disadvantage for their very existence. The capital city would have been left without other protection than its fortifications and garrison—utterly insufficient for defense under the new conditions of warfare.

But the British repulsed the enemy onslaught, and General French succeeded in good order upon St. Quentin. Here he obtained the help he had asked, and thus supported he again faced the enemy and fought a vigorous delaying battle with him in which was inflicted heavy losses.

By September 1 the allied armies had fallen back to within 40 miles of Paris, and the second line of French defenses had been taken by the enemy. There was as yet no sign from General Joffre, com-

manding the French armies, that he had any intention of halting and offering a stabilized resistance.

The line as it retreated was pivoting on Verdun. Along the Verdun-Toul fortifications the enemy was completely checked, while at Nancy the French army, that had been driven ignominiously from Lorraine, was retrieving its honor by a magnificent and stubborn defense.

The left wing of the retreating Anglo-French armies came under the protection of the guns of the Paris forts on September 3. It had won the race. Von Kluck's efforts to outflank and envelope had failed.

The allied armies were now buttressed between the great entrenched camp of Paris and the fortified line of Verdun-Toul. In the center they bent crescentically south of the Marne.

The supreme moment for which General Joffre had waited silently and imperceptibly was now at hand. He had yielded all of northern France to reach this position, and here he elected to make his stand and risk conclusive battle with the enemy.

King Albert and his Queen Entering Brussels

Prussian Plans Go Astray

CHAPTER IV

GERMAN DRIVE WEAKENS — JOFFRE STOPS GERMAN ADVANCE AT VERDUN — FRENCH RESERVES FROM PARIS BOLSTER LINE — BELGIANS CHECK GERMANS ELSEWHERE — GREAT BRITAIN HOLDS LINE AT YPRES.

The whole carefully elaborated plan of campaign for a quick and crushing triumph of Prussia over her enemies and rivals required the occupation of Paris and the paralysis of the French and British armies in not more than six weeks' time.

Every day's delay increased the menace on the German eastern front where comparatively few troops had been left to watch the Russians.

General Joffre, of course, realized this fact. He also realized that the further the German armies pursued him into France the longer the distance over which they must maintain communications and bring transport.

The region of the Marne was known in every topographical detail to Joffre and his subordinates. The French army had often held maneuvers along the river valley and on the heights that border it. The opportunities for employing tactics and developing strategy had all been carefully studied.

The battle line from Paris to Verdun was some 180 miles in length. Paris had ceased to be the French capital, and become merely a great camp, ready to defend itself if need be against siege or storming attack. The French government removed to Bordeaux on September 3, just as General Von Kluck, now only 25 miles to the north at Senlis, discovered that the British had eluded him, and that his last chance to turn the exposed left

flank of the allied armies was gone.

Von Kluck could not storm Paris directly. He could not go around it on the west without breaking the continuity of the German line and exposing himself and his comrades to certain disaster. There was only one thing left for him to do—to swing across in front of Paris and assume positions in which he could assist the German armies to the east of him in attacking the allied center.

Von Kluck violated a Napoleonic aphorism in venturing to swing across Paris and turn his flank toward his opponent, but he was convinced the allies were a beaten foe, lacking either the spirit or the resourcefulness to accept the opportunity his movement might offer.

He reckoned without Joffre. The silent, unworried and unhurried French strategist had foreseen what Von Kluck would be compelled to do at the time when the German general saw nothing but the possibility of outflanking Joffre and the British.

The longer-visioned Frenchman had ambushed an army, under Maunoury, in the region of Amiens. This army had no part in the retreat. It was a surprise prepared for use at the right moment.

Joffre had another surprise in readiness. He had placed the man whom he considered the ablest strategist in Europe at the head of another army, as yet unused. There has been some mystery about the seventh army commanded by General

Belgium Soldiers cutting wire entanglements in No Man's Land. A successful raid followed.

Foch at the battle of the Marne. It was three corps strong—120,000 men.

I have heard a story—that I am unable to confirm—concerning the part played by Italy at this critical time. Italy had declared her neutrality, altho an ally of Germany and Austria when the war began. But France, never at any time a cordial friend of Italy, as a matter of wise precaution had to watch the Franco-Italian frontier. It is said that two army corps were delegated to this duty.

Then, so the story goes, word came to the French government from the Italian government that the latter had no intention of becoming involved in the hostilities; that the French frontier was perfectly safe, and that the French were exceedingly foolish if they did not withdraw their two army corps and use them to check the Germans.

The French acted on this suggestion, it is said, and threw into the battle at the critical moment two army corps that the

The latest photograph of King Albert, of Belgium.

enemy calculated were still employed in watching Italy.

Whether the story be true or no, it is certain that Joffre met the enemy with greater strength and troops fresher and more vigorous than he expected to encounter.

As Von Kluck swung east, Maunoury, who had slipped down nearer Paris on the heels of the Germans, struck him on his flank. A desperate battle began on the Ourcq river. Von Kluck sent for aid and obtained re-enforcements. He attempted to break thru Maunoury's line and destroy its menace to the German armies, now preparing to attack on the allied center.

But Joffre had a third surprise ready. Every taxi-cab and vehicle in Paris had been employed to make it possible, and the Paris garrison, consisting of a med-

Queen Elizabeth of Belgium cheered her wounded soldiers at the front.

ley of fighting material, gendarmes, Republican guards and others, was rushed to the scene of action. The sudden appearance of the re-enforcements threw consternation into the German ranks. Maunoury's first blow had been a surprise; this threatened second blow was a greater surprise; what might happen if they waited for further developments none could guess, and no one was too anxious to discover by experiment.

So they decided to retreat.

lying his forces with indomitable courage, he struck so heavily that the whole enemy line was thrown into confusion and a general retreat began.

The battle had become an allied victory by September 10, and the German army was hastening toward the Aisne with the French and British in close pursuit.

The retreat of the Germans from the Marne was marked by similar tactics to those characterizing the retreat of the al-

Drilling Belgian recruits in the bayonet charge. The Belgian soldier's efficiency with the bayonet when it came to close quarter fighting was due to incessant drilling.

Meantime the British and the French Fifth army, under D'Esperey, had come into action, smashing a hard blow against Von Kluck's front. The combination was too much. The retreat became almost a rout.

Von Kluck exposed to attack his neighbor Von Buelow, and General Foch now came into action with great dash and vigor. He had suffered heavy losses in defensive action the day before, but, ral-

lies from Mons and Charleroi—except that they were reversed. General von Kluck narrowly escaped the clutches of the British, and the crown prince, who had driven southward thru the Argonne, was in serious peril from the pursuit of the French.

In six days the Germans reached the Aisne, where defensive positions had been prepared and the terrain afforded advantage for resistance. Here they made their

stand.

The struggle now became an effort on the part of the allies to outflank them on their right, and the fighting moved north and east along the Oise, the German line slowly extending in a reach for the protection of the seacoast, and forcing a similar stretching of the enemy's front. The French reoccupied Rheims and Amiens.

Meantime the Belgians were harassing the Germans by sorties from Antwerp, and the continued advance of the allies

to aid in the defense. It was quite inadequate for the task, however. On Oct. 5 three of the Antwerp forts fell under the German bombardment. By this time there were skirmishes on the Belgian frontier, and two days later there was fighting near Ypres. The bombardment of the City of Antwerp itself began Oct. 8. On Oct. 10 it surrendered, the Belgian army escaping and reaching Ostend by a detour along the coast. Here it joined the allies, later evacuating the

Covered with mud and glory. Tired out and weary Belgians bespattered with the mud from their inundated fighting ground.

northward toward the Belgian frontier developed a new danger in the possible junction of the Belgian troops with the French and British. On Sept. 20 the Germans began moving siege guns toward Antwerp. By Sept. 29 they were shelling the outer forts of the city. On Oct. 2 the allies had reached Arras, where they met a check. Two days later a detachment of British marines entered Antwerp

city and falling back toward Nieuport and Dixmude.

The race to the coast had been won, and a wall of steel was built across the corner of Belgium from Nieuport to Ypres thru which the enemy was never able to drive a path of victory in spite of the most desperate efforts.

A battle front now extended from Nieuport, on the Belgian coast, thru

A stricken city—What was left of Ypres, utterly devastated by Germans. A remarkable panoramic view of Ypres at the end of the war.

Ypres and Arras to the junction of the Oise and the Aisne, and thence eastward along the Aisne, thru Soissons and Rheims, across the Champagne and the Argonne to the north of Verdun. From the region of Verdun it ran southeasterly to Belfort and into Alsace. It was nearly 400 miles in length.

Since one end rested on the seacoast and the other was against the Swiss frontier, flanking movements had become im-

possible, and the frontal attack was the only means of open warfare, so both sides intrenched and prepared for the greatest siege in history.

During the period of the race for the coast, however, there had been violent fighting along the Aisne, in the Argonne, around Verdun and along the Lorraine and Alsace borders. The French fortunes in Alsace had fluctuated. Mulhausen had been taken, lost and retaken and lost again. The Germans had crossed the Meuse at St. Mihiel and occupied the town. They held it as the point of a wedge driven into the Verdun-Toul fortified front.

PACK UP YOUR TROUBLES IN YOUR OLD SEA BAG.
All work and no play was not permitted to make the American sailor a dull boy.

Lloyd George, Great Britain's foremost Statesman and War Lord.

To recount all the incidents of the trench siege that followed the winning of the coast would be an almost endless task. The outstanding features of it alone need be related. Of these the two first were the battle of the Yser and the battle of Ypres. The former was an attempt of the Germans to drive in the left wing of the allies where it stretched from Dixmude to the sea, and thus to make an opening thru which they could pour in a flanking movement. It began on Oct. 20 with an attack on Nieuport that temporarily succeeded. British gunboats, however, drove the Germans out of the city, and the attack was renewed near Dixmude. Here again defeat was met thru the cutting of dikes and flooding of the canal region. On Oct. 28 the Germans evacuated the south bank of the Yser, and the battle ended.

Three days later the battle of Ypres began. The British were defending this position with an army that had been reduced to about 100,000. Their front was some thirty miles in length. They were attacked by vastly greater numbers. The fighting lasted fifteen days, culminating in an assault on the British front by the famous Prussian guard, under the eyes of the kaiser. The assault failed. Ypres itself was destroyed, but the position was saved. These two battles of Flanders are said to have cost the Germans 150,000 men.

From Nov. 16 until April 21 there was no fresh drive for Calais on the Ypres front. But in the interval there was tremendous fighting in the Argonne, in Champagne, east of the Meuse, and in the Vosges. No great gains followed these terrific encounters, altho there were advances here and there by both sides. The most marked were the German advance at Soissons in the middle of January, the

French gains in the Champagne in March and the French offensive against the St. Mihiel salient in April.

On April 22 the second battle of Ypres began with the German surprise attack in which gas was first used. It was in this battle that the Canadians saved the day after the French line had been driven in. After five days' fighting, the German attack was checked, the allies being compelled to yield ground and reform their lines on their new positions. Ypres, however, remained in possession of the British.

In the early summer there was a notable French offensive on the front north of Arras, in which the Germans had been slowly driven back toward their positions at Lille and Lens. This offensive ended leaving Souchez as a German salient projecting into the French front. Early in July there was a desperate effort of the crown prince to advance in the Argonne. His first onslaught carried several French positions, but was soon checked.

But after a year of trench siege the front showed little change, and the end seemed as far distant as ever.

The Era of Gigantic Battles

CHAPTER V

NEW FIGHTING METHODS USED — TRENCHES — BARBED WIRE
ENTANGLEMENTS — POISONED GAS — BATTLE OF VERDUN —
BATTLE OF SOMME — ALLIED GAINS.

When the first eighteen months of the war had passed and the entrenched lines on the western front showed no significant change, the world began to wonder whether the allies and the central powers had not reached a state of deadlock from which neither could extract a decisive victory.

At first there had been much confident talk of breaking the enemy line. Germany was certain she could reach Paris, the channel ports or any other goal upon which her heart was set—until she tried. Her failures to go thru to Calais on the two occasions when she hurled vast forces against the allied front in Flanders must have discouraged her, even as it encouraged the allies.

Men who were on the Yser and at Ypres in the allied armies said afterward they could not understand why the enemy had not simply walked thru their lines to the sea. They were outnumbered, terribly outgunned, and the Germans had twenty shells to their one.

These enemy failures, and the failures of the British at Neuve Chapelle and the French in the Champagne, the St. Mihiel salient and the Artois, aroused doubts as to the possibility of smashing thru an army fortified in trench positions for great gains that might lead to victory.

Military writers began to talk about war by attrition—that is by the gradual wearing down of the enemy. There was much calculating concerning man-power,

and estimates of natural resources. Statesmen and generals got a new vision of the war's significance; they saw that it was a war of nations, and not of armies merely—a war in which the civilian was to be as important as the soldier.

While some men turned their thought to plans for increasing the resources and stimulating the resourcefulness of their countries, in order that they might be fit to stand the test of a long struggle, other men gave themselves to thinking out methods by which the problems of the new warfare could be solved, and the defenses of the trenches overcome. The traditional tactics and traditional weapons were manifestly inadequate.

Already the achievements of the world's inventive genius for the last fifty years had been requisitioned and adapted to the service of the armies. The telephone and the wireless, the automobile, the aeroplane and the submarine—all of these things were playing undreamed of parts in the great conflict and creating conditions for which the history of the world had no parallel.

For these conditions, almost wholly unforeseen and certainly in no full sense appreciated by strategists and tacticians prior to the actual experience of the war, new plans of attacks and defense had to be worked out and new weapons invented.

One of the first marked tendencies was to strengthen the artillery. It soon became clear that attempts to take entrenched lines, protected by barbed wire

Admiral Wemyss, whose appointment as First Sea Lord was considered a wise step, for he was familiar with the navy from the ground up, and was classed as an "old sea-dog."

entanglements and the fire of innumerable machine guns, involved a certain and terrible expenditure of life, unless the charge of the infantry was preceded by a most thro and destructive artillery bombardment.

The cutting of the enemy barbed wire with nippers proved an enterprise far too costly to be continued. The high explosive shell was substituted as a more efficient and less costly method.

It was in the experimental fighting of the first year and a half that the "barrage" was discovered. The barrage is a method of directing the combined and simultaneous fire of a number of batteries so as to create a barrier of shrapnel, high-explosive or other shells thru which the enemy dare not pass, or, should he venture, must suffer a terrible loss.

In process of time the barrage was developed so that there came to be a number of ways in which it was used for various purposes. There was the creeping barrage, that moved slowly forward like a curtain of fire in front of the advancing infantry, holding the enemy's first line trench until the attackers were within a few yards of it, and then lifting suddenly to fall on his support and reserve trenches. There was the rolling barrage, by which a certain area of the enemy's line was subjected to a systematic shelling that moved back and forth, as a lawn is rolled, until everything was flattened out. And there was the box barrage, laid down so as to form an almost impenetrable protection for a threatened position, or thrown about the enemy so as to prevent his movement laterally as well as frontally.

Another discovery of the experimental stage was the impossibility of an unlimited objective under the new conditions. It was no longer safe to say to a military unit "There is the enemy line. Go as far as you can." Operations were on too big a scale. Single units, that found

Earl Kitchener, Great Britain's former War Minister, better known as Kitchener of Khartoum, who was drowned on his way to Russia.

exceptional opportunities for advancing on their immediate sector, were in danger of getting far ahead of their supporting comrades on either side, losing contact with the main body, and so—in the very hour of victory—becoming cut off disastrously. This happened more than once.

Moreover the barrage, and the increasing use of artillery generally, made it of utmost importance that there should be the closest cooperation between the guns and the infantry. This could only be ensured by giving the infantry definite objectives, to be reached at a certain hour and beyond which it must not go without explicit orders, however promising the opportunities might be. Once the plan of the limited objective was adopted, to ignore it meant slaughter for those who took chances—meant that the venturesome unit was certain to come under the devastating barrage of its own guns.

The British Fleet in the English Channel off Portsmouth.

Hence the fighting of battles became a matter of great precision as to the division of labor, the assignment of objectives, the scheduling of attack and arrival. Battles were frequently planned months in advance and rehearsed behind the lines on fields where the enemy positions and trenches were reproduced as nearly as possible.

Ultimately a battle became an intricate affair in which the functions of heavy and field artillery, mine throwers, trench mortars and machine guns had all to be carefully weighed and related to the particular task to be done. In the same way the use of gas, of hand grenades and rifle fire had to be skilfully calculated and the proportion and manner of each determined. Aeroplanes and tanks added two further factors of ever increasing importance.

The year 1916 brought two great battles on the western front that exceeded anything the world had conceived to be possible—the battle of Verdun and the battle of the Somme. The former lasted from February 21 until July 1, and the latter from July 1 until March of the following year. Each battle—so called—was a series of bitterly fought engagements, any one of which alone would have been considered a notable event in previous wars.

The battle of Verdun was the first German attempt to put into effective use the lessons learned in the year and a half of entrenched warfare.

Two striking features characterized the beginning of this battle—First, its surprise nature; second, the amazing preliminary bombardment. The French knew that something unusual was in progress in and behind the lines north of Verdun, and they were on their guard against attack; but they did not know how strong was the force concentrated by the enemy under cover of the hills and woods. Not less than 500,000 men were assembled by the Germans for this mighty

General Byng, Hero of Cambrai in Famous Tank Charge.

effort, which, they hoped, would lead to the occupation of the great and famous fortress of France, and, possibly to the reduction of the whole Meuse line of defense, and the opening of the Marne valley route to Paris.

Never before had there been seen such a massing of artillery. It had never entered the mind of a military commander that so vast a number of guns could be used on a comparatively limited front. The war correspondent of the *Nieuwe Rotterdamse Courant*, thus described what he saw when he visited the German lines at Verdun:—

“Over the roads leading towards Verdun artillery and ammunition were brought up in such quantities as the history of war has never seen on such a limited area. The country seemed to be covered with an incredible number of guns. We could hardly believe what we saw around Verdun. Long rows of guns, as

Australian Premier and Family: An attempt was made to assassinate William M. Hughes, the Australian Premier, at his home in New Victoria, Australia.

in old battle pictures, set up in open fields with gunners standing about them, and on the hill-tops observation posts with their great telescopes uncovered. When I shut my eyes I still see before me the curved lines, row upon row of guns, endless array, with gunners moving about them in the open battlefield."

To tell in detail the story of Verdun would require a volume of several hundred pages. It was from its first hour a demonstration of German strength and French resistance. Never was the spirit of France more gloriously displayed than in this long and terrible conflict. Two thrilling watchwords rang around the world from the battlefields of the Meuse hills and valleys—"They shall not pass!" and "We shall get them!"

Following the intense and protracted bombardment with which the Germans

Herbert Asquith, famous British Statesman.

Charge of Heroic Scotch Highlanders. The hardest of the British troops are those Highlanders composed of the brawny sons of Scotland.

opened the Verdun campaign, came a charge of their infantry on a front of twenty miles. The first day they gained ground to a depth of two miles, acquiring positions of advantage from which to continue the attack.

On the last day of February the Germans entered Fort Douaumont, northeast of Verdun, and one of the most important of the outer ring of fortresses. It had

attack was repulsed by the French, but, inch by inch, they gave ground on both sides of the Meuse, drawing ever a narrower circle around Verdun. In June the Germans drove up the valley and the hillside leading to Fort Vaux, and, in a bitter fight, captured it. Douaumont and Vaux were now both in the enemy's hands; a few days later Thiaumont fell, almost due north of Verdun, and on June

A German Zeppelin flight over British fleet, which the fleet destroyed with three well placed shots.

been reduced to a ruin before the enemy occupied it. During March they captured Forges, on the west bank of the Meuse, and occupied Vaux, southwest of Douaumont. The long struggle for Dead Man's hill began, the bloodiest struggle and the ghastliest battlefield on the whole Verdun front.

Thruout April and May the fighting continued incessantly. Many a terrific

24 the Germans entered Fleury, penetrating the inner circle of Verdun's defenses. It was a critical hour for France. For a week the fate of Verdun hung in the balance.

Then on July 1—almost without warning—the British and French smashed hard against the German lines on a front of ten miles, north and south of the Somme river.

The second great battle of the war was beginning—a battle worthy to stand side by side with Verdun.

The success of the allied attack on the Somme, altho not measuring up in its early stages to the hopes of the British and French commanders, was enough to alarm the Germans and to relieve the pressure on Verdun. The Meuse city was never again in peril. Germany, first and last, spent 500,000 men in a futile effort. France came out of the great test of strength and spirit her confidence fortified, and forever certain of the world's admiration.

The battle of the Somme was, for the allies, what Verdun had been for the Germans—an attempt to put into effective practise the lessons of warfare learned during the first year and a half or two years of war. The massing of artillery, the employment of the barrage, the use of the limited objective, and the development of the tactical nibble into the big, strategic bite, were all phases of this battle.

When it began the British and French believed they could smash thru and break the enemy line—and the theory was generally held that if the line could be broken on a considerable front a decisive victory might be gained by pressing the advantage with unflinching vigor.

On this theory and with this hope heavy sacrifices were made in the storming of enemy positions. The enemy was made to suffer heavy losses, and his tenacious defense indicated that he regarded seriously the possible consequences of the Franco-British drive.

But the Somme battle had been begun too late in the summer. No time margin had been left for the possible failure of the original schedule, and when the British were held up for weeks at Thiepval and north of the Ancre, the schedule was thrown out of gear.

Before the full value of the Somme successes could be realized by pressing

Gen. Vassitch Commanded Serbia Second Army.

the victory home, the open season for fighting ended and the rainy season set in. The Somme became an almost impassable mire. Infantry movements were exceedingly difficult, and the transport of big guns impracticable. Operations had to be abandoned, and the enemy, who was getting exceedingly uneasy about the security of his lines, obtained a respite that allowed him to revise his plans and prepare for a new program in the spring.

When the drive halted in November 1916 the British had conquered the ridge overlooking Bapaume, and the French had pushed forward to the outskirts of Peronne. It was estimated the Germans had lost 700,000 men, of whom 95,000 had been taken prisoner. The allies counted among their gains 135 heavy guns, 180 field pieces and 1,438 machine guns. From this standpoint the Somme battle had been the most successful battle.

The British forces despite continued opposition from the Turko-German forces entered the Holy City.

Hindenburg Retreats

CHAPTER VI

LLOYD GEORGE FORMS NEW BRITISH CABINET — GERMAN PEACE PROPOSALS — GERMAN ATROCITIES — GERMANS RETREAT — FAMOUS HINDENBURG RETREAT — UNRESTRICTED U-BOAT WARFARE — GEN. BYNG'S TANK DRIVE AT CAMBRAI — BRITISH ARTILLERY OVERWHELMING — CANADA AND OTHER BRITISH COLONIES TAKE PART.

Had the British and French resumed their drive on the Somme front when favorable weather made further operations possible in the spring of 1917 great and important results might have been realized.

They had driven a wedge into the enemy lines, twenty miles in width and nine miles in depth. They had made the deepest impression on an entrenched front that had been made anywhere or by either side since the war began.

If the wedge had been pushed only a few miles further east it would have cut lines of petrol and steam communication absolutely vital to the security of the German line. North of it and south of it were German salients, occupied by many thousands of troops whose positions were menaced by the wedge, and would have been seriously endangered by its further progress.

Germany had suffered so heavily to no purpose in the battle of Verdun, and had been forced to pay so high a price for the defense of her Picardy positions on the Somme, that she was not in a position to launch a big offensive.

Indeed, during the winter of 1916, she made an attempt to promote negotiations for peace. She had just finished the conquest of the greater part of Roumania, and she considered the moment opportune to suggest that a settlement might be reached.

Just before her proposals were made there had been a change in the British government. Mr. Asquith, the Liberal party premier, resigned, and David Lloyd George accepted the responsibility of

forming a cabinet. He invited representatives of all political parties to join him, and succeeded in creating a coalition or union government in which many of Britain's ablest men accepted office.

The answer of this government to the enemy peace proposals was to authorize the enlistment of 1,000,000 more men, and to ask parliament for a war credit of \$2,000,000,000. Thru Premier Briand France warned the world to beware of Germany seeking peace, and General Nivelle celebrated his appointment to succeed General Joffre, now made a Marshal of France, by taking 11,000 prisoners and advancing two miles on a seven mile front north of Verdun.

Germany continued her efforts, but the allied governments gave the world to understand that they were in no humor to consider the enemy's proposals, and had no faith in the enemy's word. Premier Lloyd George declared that allied peace terms were, "Reparation, Restoration and Security."

Germany had no intention whatever of making peace on terms involving reparation and restoration.

So, finding it useless to pursue her peace efforts further, Germany turned her attention to obtaining a more secure position on the western front.

During the winter months an elaborate trench system, fortified as no trench system had ever been fortified before, was constructed along a front extending—roughly—from the region of Douai to the Aisne, with Cambrai and St. Quentin marking its main positions.

Historic City of Bagdad. The photograph shows the British troops in possession of the ancient city marching along the principal street.

Belgian civilians, deported from Belgium, and allied prisoners were employed in the construction of this trench system that became famous throuthout the world as the Hindenburg line.

Early in 1917 the British began to feel out the enemy lines north of the Ancre brook on the Somme front. They found an encouraging situation and pushed forward. Presently they were regaining village after village, capturing strategic heights, and advancing with unexpected rapidity. It became evident that the enemy was retreating according to plan, and engaging only in such rear guard action as was necessary to protect his retirement. He was withdrawing his imperilled salients from their positions north and south of the allies' Somme wedge.

le Against the Germans in Ypres Sector.

ridge extending south from it toward Peronne. Then things moved rapidly. The Germans fell back on a front of 60 miles, burning, blasting and pillaging as they went. In all history there is no precedent for the work of wanton destruction the retreating armies wrought. Evacuated cities were mined and reduced to utter ruins by internal explosions timed to take effect after the German troops were well away; in some villages buildings were wrecked by fastening cables to their corners, and then attaching the cables to steam tractors, that literally pulled the buildings to pieces.

Orchards were chopped down, or valuable trees scarred so as to ensure their death. Vines were cut at the roots.

The civilian population of many a small town was driven out and carried along with the armies for service behind

Horses, too, wore gas masks. Both men and horses wore gas masks at the front.

the German lines.

The retreating armies reached the new Hindenburg positions late in March, and there established themselves none too soon for their own safety. The allies were close upon their heels.

It had been the belief of Von Hindenburg that by making the great retirement he would destroy the program of the allies for a spring offensive. He supposed that they had concentrated vast numbers of guns, and assembled immense quantities of munitions on the Somme front, and that they would not be able to bring these supplies up to his new line in time to launch a serious drive before certain other events occurred upon which he was counting.

One of these events was the success of unrestricted U-boat warfare, proclaimed by Germany on January 31, 1917; the other was Russian surrender or revolu-

tion, for either of which Germany had been working by every secret and corrupt means at her command.

It happened, however, that General Haig and General Nivelle, the British and French commanders, were not quite so simple as the German general supposed them to be.

General Haig, for example, instead of attempting to move all his big guns and stores of munitions across the Hindenburg wilderness, simply ran them up the

ridge and several miles to the east of it, the enemy was manifestly surprised. The British attack and subsequent progress threatened the security of the Hindenburg line at its northern end, and there was a frantic effort of the enemy to construct new and stronger positions covering Douai and protecting Cambrai before Haig's men could menace these important points.

In the meantime the French under General Nivelle carried out an ambitious

Evidence of the good shooting of the Canadian Artillery. A direct shot from a Canadian artillery piece put this German gun out of commission.

line a few miles to the region behind Arras and Vimy ridge. In like manner General Nivelle made his concentrations in the Aisne region. From neither of these fronts had the enemy retired.

The quick pursuit, and the vigor with which the British and French attacked St. Quentin, threw the enemy off his guard. Hence when on Easter Monday, April 9, the British stormed Vimy Ridge, taking 6,000 prisoners and advancing

attack along the Aisne front, with the Craonne plateau and the Chemin des Dames as their primary objective, and the St. Gobain plateau and city of Laon as their ultimate and chief objectives.

They gained their primary objectives in part, at least; but the price paid was so heavy that the political leaders of France were panic stricken, and—so the story goes—ordered the attack abandoned at a time when a great success impended.

Motorcycle Troops on Scout Duty.

General Nivelle soon thereafter lost his command, and was succeeded by General Petain, a man of strict military mind and spirit, who had no ears for the politicians, and was inclined to move carefully, rather than spectacularly. For the rest of the year there was little offensive action on the part of the French. They fought a hard and successful duel with the forces of the German Crown Prince for possession of the Chemin des Dames,

positions from Messines to Passchendaele.

On the Cambrai front General Byng made a dramatic attack that came as a complete surprise to the enemy.

Tanks had been first employed by the British on the Somme. They had proved wonderfully effective in smashing down barbed wire, field fortifications and trench parapets; they had done great work in cleaning out machine gun nests.

British troops in France captured 657 German guns, including over 150 heavy guns. Machine guns to the number of 5,750 have been counted as have over a thousand trench mortars.

and late in the year, by a clever bit of tactical work on the part of Petain, they ousted the enemy from road and plateau, and won positions commanding the approaches to Laon.

The British, having exploited their success on Vimy Ridge as far as seemed possible, opened a new campaign in Belgium, resulting in the capture of all the ridge

But on the Somme tanks had been comparatively few in number. An effort had been made to use them in Flanders, but the ground was so muddy, so horribly churned by shell fire, that the tank was at a disadvantage.

But General Byng swept the enemy temporarily off his feet by a tank attack on an extraordinary scale. Hundreds of

From left to right are the Prince of Wales, Prince Henry, Prince Albert, King George, Princess Mary, and Queen Mary (sitting).

Australian troops on parade just before leaving for the front.

the monsters rolled suddenly down on the German trenches behind a screen of smoke from the British guns, their rumble drowned to the hearing of the enemy by the roar of the cannon. They smashed a wide path thru the enemy lines, opening the way for the infantry. The success was too big—it was bigger than the British expected, bigger than they were prepared to support.

The infantry advanced within three miles of Cambrai, occupying Bourlon wood on the crest of Bourlon hill. But the enemy counter attack caught the British insufficiently supported in their new positions, and they were forced to abandon about two-thirds of the ground they had gained.

The failure of General Byng to hold his advance was a great disappointment to the allies. However there were greater results from the venture than appeared on the map.

It had demonstrated the value of tanks, and it had proved that the enemy line could be broken—a possibility long doubted by many.

The battles of 1916 and 1917 were amazing demonstrations of destructive power.

The Somme bombardments were the most intense known in the history of warfare up to that time.

In eighty days of fighting the French and British troops used on a front of less than 25 miles 15,000,000 artillery shells, or an average of between 150,000 and 200,000 a day—not less than 6,000 an hour for every hour of the twenty-four. And this is exclusive of trench mortar shells and other projectiles, such as hand grenades.

Many of these shells weighed over a ton; many more over half a ton. It is safe to estimate that 5,000,000 tons of metal were hurled against the German defenses in little more than ten weeks time.

Royal Horse Artillery going into action at the gallop. This remarkable British official photograph taken on the British Western front in France shows the Royal Horse Artillery approaching a battery position at a gallop. The R. H. A. are the most mobile branch of the artillery.

The taking of Jerusalem and the entry of the British forces, was probably the most historic event of the old world.

This, of course, was only part of the blasting work. Unestimated quantities of high explosives were used in mining operations, and vast craters were created in which enemy soldiers and guns were entombed.

It was thus that Thiepval, the Regina redoubt and other powerful German works were reduced to ruins, and their garrisons driven from the chaotic heaps of earth and masonry and molten metal.

quantity used in the same time on the Somme. Instead of 6,000 an hour they discharged over 12,000. As a consequence the British captured four times as big an area as they had in a like period of the Somme offensive.

Along the Aisne the French exceeded the British record in quantity of shells used. The strong defenses of the Germans, in the caves and tunnels of the chalk and limestone cliffs, required a tre-

Sir Robert Borden, Premier of Canada, making rousing speech to Canadian fighters at front.

But if the Somme drive outrivalled all previous records, it became a comparatively moderate affair in the light of what took place on the Arras front and along the Aisne in 1917.

It is estimated that the British in the first ten days of their fighting on the Arras front deluged the enemy with 4,000,000 shells, or more than double the

mendous pounding. The French literally shattered the solid rock, and forced the enemy to flee from his quarried shelters as men will flee in the day of God's judgment.

The part played by the over-seas Dominions of Great Britain in the world war is one that will long be remembered to the glory of the British race and the

Anti-Aircraft Gun Used by the Allies Against the Germans.

praise of those free institutions that were cradled in England.

From Canada, Australia, New Zealand and South Africa there was an immediate response. Men of the colonies rallied to the call of the empire. It should be borne in mind that the people of these self-governing dependencies were under no constraint of constitution, law or force to send their sons to Europe, or in any other way

frontier because of the century of friendly relations that she had enjoyed with her great American neighbor. She had no army—only a few militia battalions.

But when the news came that Belgium had been invaded and that Great Britain was at war with Germany, there flashed across the Atlantic the message "England can count on Canada."

In seven weeks Canada had created a

British Tommies returning from the trenches on the Flanders front after several days of fighting.

to share in the sacrifices of the great conflict. They were as free to choose as was the United States, and they chose at once to stand with the mother country, with France and with Belgium for the cause of liberty against the central autocracies.

The story of Canada's response is characteristic of that of the others. Canada was essentially a non-military country, happy in the security of her own long

magnificent camp at Valcartier, near the ancient city of Quebec, and was gathering the nucleus of as fine and as fit a little army as fought on any front in the four years of war.

The government's first call was for 20,000 men. It got 40,000, and the first contingent sailed from the Gaspé Basin on October 3, two months after the war began, numbering 33,000 picked men.

Collision of this vessel, the S. S. Imo, with the S. S. Mont Blanc caused the Great Halifax disaster.

Indescribable horrors and ruin caused by great Halifax explosion. This most remarkable photo tells the story of suffering and misery caused by the great Halifax explosion with graphic realism.

A period of training was necessary in England, but four months from the day of departure a Canadian division landed in France and was sent to the Flanders front.

From that hour to the end of the war Canada always had a place in the line. To her credit stands one brilliant victory after another and many a stout defense.

Langemarck and St. Julien are names on the Canadian honor roll. It was there that the sons of the Maple Leaf saved the day when the enemy, in April, 1915, broke thru the line of the French colonial troops by the use of gas. Canada closed the gap, and, at terrific price held the enemy at bay for over 72 hours until reinforcements could arrive.

In the battle of the Somme the names of Courcellette and the Regina redoubt are remembered among the names of places that are forever identified with Canadian courage.

The taking of Vimy Ridge will be one of the great and often told stories in the history of the Dominion.

It was the Canadians, who, after other troops had tried for weeks to capture Passchendaele, northeast of Ypres, did the job and came back from victory a mere tattered and wounded remnant.

Canada, by voluntary enlistment and conscription, raised an army of about 500,000 men. Her population is barely more than 8,000,000. An army of like proportion in the United States would number over 10,000,000.

Australia did even better in proportion to population, and Australian troops were abreast of the Canadians in the bravery and daring of their efforts for freedom. In the early stages of the war they were mainly engaged in defending Egypt from Turk attack and holding tribesmen of the desert in check.

Their campaigns on the Gallipoli peninsula, in which the New Zealanders

Armenians defeated Turks in the siege of Van. The Turks were compelled to withdraw after a heavy loss inflicted by the Armenians.

were their comrades, brought them undying renown. The world remembers them as the men who fought naked to the waist, in cotton knee breeches and bare legs, and fought with the fury of demons, and the courage of young gods.

On many a western front sector the Australians did magnificent service. The demoralized retreat of the enemy from the Amiens front in the late summer of 1918 is ascribed to the work of these sinewy giants from the antipodes. It is said that their habit of raiding the enemy trenches in broad daylight, often while the German soldiers were eating their noon-day meal, completely unnerved the foe, and made him yield easily when the main counter attack was launched.

South African troops participated in the west front fighting, but the great work of South Africa was done in conquering the German colonies in Africa.

No less loyal than the self-governing colonies was India—still the domain of alien rule. Her turbaned sons took Bagdad and helped to take Jerusalem; they redeemed Mesopotamia and Syria; they were represented on every front, and everywhere with honor to themselves.

Russia's Tragic Story

CHAPTER VII

RUSSIA AT FIRST SUCCESSFUL — HINDENBURG STAYS THE
RUSSIAN ARMIES — RUSSIA RETREATS — VON MACKENSEN VIC-
TORIOUS — RUSSIAN OFFICIALS' TREACHERY — RUSSIAN REVOLU-
TION TAKES PLACE — KERENSKY BECOMES LEADER — KERENSKY
DEPOSED — TROTZKY AND LENINE IN POWER — RUSSIA MAKES
SEPARATE PEACE.

Russia came into the war as an auto-
cracy. She left by the wide gateways of
anarchy, along a road lurid with flame
and crimson with blood.

Imperial Russia was actuated by the
desire to prevent the extension of Im-
perial Prussia's sway to the Balkans,
Constantinople and the regions that lie
beyond.

Always the eyes of Russia had been
on Constantinople. She was a mighty
empire whose coasts in Europe were
washed by the waters of land-locked seas,
or, in the north, were barred by the Arctic
ice for long months in every year. For
her developing life she needed better ac-
cess to the rest of the world. It seemed
intolerable to her that the Dardanelles
should be controlled by Turkey, apt at
any moment to become the tool of some
unfriendly or rival power, and thus the
warden who would lock the only door thru
which her mighty neighbor could emerge
from the Black Sea.

On the Black Sea was the great Rus-
sian port of Odessa, the port where the
vast harvests of southern and south-
western Russia—the incomparably rich
black soil country—were gathered for
shipment thruout the world. Thus the
freedom of the Dardanelles was vital to
the life of Russia. Desire to get Constan-
tinople, or at least to keep it from Ger-
man control, was more than a mere de-
sire for empire. It was prompted by the
fundamental principle of self-preserva-
tion.

There were some differences of opinion
in the military councils of Russia when
the war began as to whether the armies
should advance across Poland and attack
Germany, or whether the Vistula should
be held as a line of defense, while the at-
tack was made on East Prussia and
Galicia, to the north and to the south of
Poland.

This latter idea prevailed. It was de-
cided to hold the Warsaw-Ivangorod for-
tified line of the Vistula, while an advance
was made across the Baltic provinces,
against East Prussia, and thru Bessara-
bia into Galicia.

Before the Germans had completed
their drive thru Belgium the Russians
were over the East Prussian frontier. As
they advanced against an insufficient de-
fending force the people of the invaded
region sent up a loud cry for help, that
reached the ears of the conquering armies
sweeping toward Paris. It became neces-
sary to send back to the eastern front
troops that had been intended to cooper-
ate in the humiliation of France. The
Russian giant had moved with swifter
strides than the German general staff had
believed to be possible, and when it re-
quired re-enforcements to stay the threat-
ening disaster on the Marne, they were
already far distant, hurrying to check the
Slav armies in a remote corner of the
empire.

The service of the Russians in the criti-
cal hour that held victory or defeat for
the western allies should not be forgotten.

The Russians were routed, with a loss of 80,000 in killed, wounded and prisoners, and were compelled to make a hasty retreat to their fortified line on the River Niemen.

The Hindenburg victory was hailed with great acclaim in Berlin. It was disappointing news for the allies, but the disappointment was quickly turned to rejoicing by the success on the Marne—a success to which the Slav reverse had con-

western end of Galicia stood the city of Cracow, once capital of Poland. It was the gateway into Germany. If the Russians reached Cracow the immensely valuable industrial and mining region of Silesian Germany would be exposed to invasion.

Vienna was urged to strengthen its armies and exert a supreme effort to check the Slav advance. But the Russians could not be held at Lemberg, nor yet at

Cleaning Up Sackville Street, Dublin, After Rebellion. It Had Been Shelled by Field Artillery.

tributed materially.

Better fortune attended the Russian invasion of Galicia, where the Austrian armies were early placed upon the defensive. On the day of the defeat at Tannenberg, in East Prussia, the Russians won a great victory over the Austrians at Lemberg. Thousands of the enemy were taken prisoner.

The Austrian demoralization was so great that Berlin became alarmed. At the

San river, seventy miles further west, where the Austrians made a desperate stand against them.

On September 7, as the German army was falling back to the Aisne in France, the Russians routed the Austrians again at Ravaruska. A little more than a week later they invested the great Galician fortress of Przemysl. Leaving besieged by their troops they pressed forward and occupied Jaroslav on September 23.

was falling back to the Aisne in France, the Russians routed the Austrians again at Ravaruska. A little more than a week later they invested the great Galician fortress of Przemysl. Leaving besieged by their troops they pressed forward and occupied Jaroslav on September 23.

With these important strategic points either controlled or held, they advanced to the Donajec river, that crosses Galicia from north to south, and, by the end of the month, had pushed their vanguards

Thus, two months after the beginning of the war, the Russians had conquered Galicia, and were menacing Germany and Hungary.

Early in October the Austrians began a series of counter attacks. German troops had been sent to their aid, and with the better trained soldiers of their great ally they were able to make appreciable progress.

The Russians were driven from the Uzsok pass in the Carpathians and com-

to within cannon range of Cracow.

Here they were content to rest for the time, while they spread out along the Carpathians, that separate Galicia from Hungary, in an attempt to get possession of the chief mountain passes debouching on the Hungarian plains. Here and there they actually penetrated the barrier range and reached the plains, occasioning consternation in Buda Pest, capital of Hungary.

pelled to abandon Przemysl. The capture of Jaroslav followed and the Russian armies fell back in eastern Galicia beyond the San.

A great battle developed along the San in the middle of October. It lasted for days in which fortunes varied. Gradually the Russians gained the upper hand. The Austrians attempted a flank attack thru Bukowina, but before it could threaten seriously the Slav line the Aus-

trians collapsed on the San, and the Russians re-entered Jaroslav. Six days later Przemysl was again besieged, and remained surrounded by the Russian forces until its capture in the following March. By the middle of November the Russians were once more on the outskirts of Cracow.

established a strong line across Galicia, protecting the rear of their forces in the Carpathians. A long series of operations then began in the mountains—battles in deep snows and zero temperatures—in which the Russians gradually forced their way into the passes. On March 22 they captured Przemysl, and under the im-

London air raid. Mother and son inspecting their home. A mother and her little son have returned home from a visit and this mass of debris greets their eyes.

Hungary was again raided thru the mountain passes, and the Austrians were driven from Bukowina.

Germany was forced to send additional aid to her ally. With this help the siege of Cracow was lifted, and the Russians retired to the Donajec river, where they

pulse of this success swept forward on Hungary with Buda Pest as its goal.

The alarmed Austrians rallied again and again to defend their frontier, fighting stubbornly for every yard of ground, and then, with the coming of May appeared Mackensen on the Donajec.

The German offensive against Russia was marked by three great efforts to conquer Poland, seize the Vistula defenses and crush the armies of the Czar.

The first of these began in the opening days of October, 1914, with Von Hindenburg in command, fresh from his victory over the Russians at Tannenberg, in East Prussia. The German armies, admirably equipped, swept across Poland to the Vistula. They reached the outskirts of Warsaw and Ivangorod by October 17. Aviators dropped proclamations in Warsaw calling for the surrender of the city. The big guns began to shell its fortifications. Then re-enforcements suddenly attacked the left flank of the Teutons, driving it back and compelling a retreat all along the line. In perfect order Von Hindenburg's armies withdrew, moving too swiftly for the pursuing Russians, who followed to the German frontier and actually crossed into Posen at one point.

This Russian success was brief. Von Hindenburg struck again. Early in November he began a movement against both flanks of the Russian army. One came down the south bank of the Vistula from the East Russian fortress of Thorn; the other advanced northeast from Czenstochowa, whither it had retired after its failure at Ivangorod. The Russians were

First picture of the actual surrender of Jerusalem on December 9th, 1917. The only photo taken on the morning of December 9th, when Jerusalem surrendered.

in serious peril of being outflanked and cut off from Warsaw and the Vistula. They fell back toward Lodz. Here, at the moment that threatened their destruction, re-enforcements from Warsaw suddenly attacked the flank and rear of Von Hindenburg's encircling movement, and the battle of Lodz began. The tables were turned. The Germans were in peril of extinction. An entire army corps surrendered. But aid was rushed to them and they cut their way out of the Slav net. The Russians fell back from Lodz, and ultimately took up positions along the Bzura river, twenty miles west of Warsaw. Thus began a long trench siege paralleling the Vistula from west of Warsaw to the Galician boundary.

For months there was bitter fighting along the entrenched front in Poland, and

The Maharaja of Patiala visited the Western front. This photo shows the Maharaja of Patiala inspecting one of the big camouflaged British guns on the Western front.

campaign and counter campaign in the Baltic provinces and East Prussia. The Russians met disaster at the Mazurian lakes, but carried out a sweeping offensive in Galicia and the Carpathians, already described, and it was this success that brought upon them the third and greatest German drive.

General Von Mackensen came upon the scene as the leader of this final attack

They crossed the San, abandoned Przemyśl, after an effort to rally and hold it, and fell back on Lemberg. They lost Lemberg on June 22, and a week later Mackensen turned his attack north, behind the fortified line of the Vistula.

Meantime Von Hindenburg was pressing the battle hard in the Baltic provinces. By the middle of July a tremendous struggle was in progress on a 900 mile

A busy scene on a road just behind the lines. The company at the right are resting prior to taking up their march again.

upon the armies of the czar. He massed the greatest concentration of artillery that had been seen up to that time on the eastern front against the Russian Donajec line. On May 3, 1916, he opened fire with all his guns.

The Russian front was shattered. Mackensen captured 30,000 prisoners and drove his enemy in hasty retreat eastward.

front, with Warsaw and Ivangorod as the main objectives of the Austro-German forces. They fell on August 5 and 6. By the end of August the Germans had reached Brest Litovsk.

The czar suddenly came from Petrograd to the battle front, removed the Grand Duke Nicholas from command of the armies, and placed himself at their

head. But it did not stay the retreat. In the middle of September Von Hindenburg drove the Russians across the Dvina, and Von Mackensen occupied Pinsk, on the edge of the marshes that bear the same name.

Then only was the Austro-German advance halted. It succeeded in gaining vast territory, and penetrating far into Russia, but it failed to destroy the Russian armies. They had escaped thru the masterly leadership of the Grand Duke.

the hands of men entrusted with military administration.

But worse than graft was the treachery of officials, in some cases generals and lesser officials, who sold secrets to the foe.

The knowledge of these things began to reach the men in the trenches. They had been forced at times to fight with nail-studded clubs instead of rifles. When they learned that they were being robbed and betrayed sedition spread thru their ranks.

Advancing over newly conquered territory held its difficulties. As many as thirty Tommies were needed to move this big gun.

They had escaped the enemy; but they had not escaped the corruption, mismanagement and betrayal that obtained behind their lines in the Russian bureaucracy.

The Russian rank and file was hungry, wearied, and ill-supplied with arms and munitions. Graft reeked in Russia. Officials enriched themselves at the expense of their armies. Supplies often failed to reach the soldiers, finding their way into

Desertions were numerous during the winter of 1916-1917. The armies held their positions, but chiefly because Germany did not care to press her advance further. She was busy fomenting trouble in the Russian empire. Her agents discovering the increasing dissatisfaction in the army, were promoting it. Mutiny would serve equally as well as a victory won by direct attack.

A plot to induce Russia to make a sepa-

THE "VICTORIOUS RETREAT" BACK TO THE RHINE.

Huns struggling, not hopefully forward to Victory, but dejectedly backward to defeat, under bombing planes ceaselessly showering death upon them.

rate peace was being engineered from Berlin with the aid of disloyal members of the government at Petrograd. It is said the czarina was not wholly innocent of participation in this conspiracy against the empire and its allies.

The winter passed with much suffering on the front for the rank and file of the Russian armies.

There was some activity in eastern Galicia. Roumania had been invaded, and the Russians were looked upon as her natural helpers, but intrigue prevented aid coming in effective form until it was too late, and the little country went the way of others that had felt the crushing heel of German militarism.

With spring there came increasing unrest in Russia. The world heard only rumors of it, but persons in Petrograd saw signs of a coming storm.

The first lightning flash from the gathering clouds was the killing of the Monk Rasputin, a mysterious and notorious individual who had for long been a court favorite, exercising a strange influence over the czarina and, at times, over the czar. It was believed that Rasputin was intriguing for Prussia, and giving his aid to what were known as the "Dark Forces," an unscrupulous cabal of courtiers and officials whose chief concern was to profit at the empire's expense, and to keep themselves in advantageous positions for the purpose. They represented the extreme of reaction, and opposed every movement of a liberalizing character.

The news that the body of Rasputin had been thrown into the Neva aroused immense enthusiasm among those who looked for the day when Russia would escape the clutches of its exploiters. It seemed to be the spark in the powder, and the explosion followed quickly.

On March 11, 1917, a revolutionary movement started in Petrograd. Soldiers

First Tommies crossing the Somme over a roughly constructed bridge into Peronne, which was captured by the British.

from the Petrograd garrison joined the workers. The following day the Duma met in defiance of the czar's orders, and a message was sent to the czar, who was then on the front with his armies, demanding his abdication.

Meantime the capital city was in turmoil. The workers were fighting the police, who, armed with machine guns, held positions in houses and on roofs, from which they attempted to slay the clamoring mob in the streets. Cossacks were called in to ride down the people as they had in many another such emergency; but this time the Cossacks refused to do the murderous work assigned them, and treated the crowd with smiling consideration.

The czar is said to have been served with the demand for his abdication while aboard a train en route for Petrograd, whither he was hastening to face the revolutionary crisis that had arisen so suddenly. He accepted the destiny prescribed for him without argument, and asked only that he be allowed to go to his palace in

the Crimea and spend his days among his flowers. This request was denied. He was taken to Petrograd and there placed in confinement.

A new cabinet was formed with Prince Lvoff, a Russian patriot of democratic spirit, as its leader. It was a coalition cabinet, including the cadet party, a conservative democratic element, and the socialists of the less radical type, represented by Kerensky.

Its life was comparatively brief. It made way for a cabinet more thoroly socialistic under Kerensky.

For a time the world hoped much from this extraordinary little man, who, in a puny frame, combined a fiery spirit and keen intelligence. But the extreme socialist element was not satisfied with the Fabian tactics of Kerensky, who attempted to hold Russia true to the allies, continue the war, and readjust internal conditions on a basis of representative government similar to that of the United States.

The extremists, known as bolsheviki, a word that means simply majority, maintained a constant agitation, harassing Kerensky's government at every step. Their attitude lent itself most conveniently to German plans, and Germany flooded Russia with agents who joined with the bolsheviki in an effort to pull down what might have developed into a stable and efficient government.

The peasants and the soldiers were urged to demand peace and an immediate distribution of the land and other property. Kerensky used all his eloquence to impel the armies to maintain the fight against Germany, and to encourage the people in support of the war; but it proved unavailing.

His effort to convene a constituent assembly for the purpose of drafting a new constitution was defeated by the bolshevik agitation. The ignorant peasantry of Russia knew nothing of constituent assemblies and constitutional forms of gov-

Sir John French, former Commander of Victorious British Expeditionary Forces in 1914.

ernment; they did know the soviet, or local council, and the shrewd bolsheviki appealed to this knowledge with the promise of administration thru soviets.

A returned expatriate, a Russian Jew, who called himself Trotzky, was one of the most aggressive and influential bolshevik leaders. He, like Kerensky, possessed great powers of eloquence. Associated with him was a man name Lenin, a fanatic, whose only aim in life was to overthrow the capitalist systems of the world. In this effort he was willing to take help from any quarter. It is not necessary to question his mad sincerity. It was quite compatible with honesty of conviction that he should accept help from Germany in money or men, and there is little doubt that he did. It was traitorous to Russia and freedom, but it was loyal enough to his own lunatic dream.

Between these men succeeded in overthrowing Kerensky, and seizing the government. Anarchy followed, marked by bloodshed and destruction of property. The Russian armies, now reduced to a helpless strength by desertions, were ordered demobilized, and the bolshevik regime opened negotiations with the enemy for peace.

There followed a series of conferences

United States, the latter by now a belligerent, looked with alarm on the situation. The possibility of German control in Russia constituted a new menace. Already German troops released from service on the east front were appearing on the western front, and Germany was replenishing her depleted stores from Russian granaries. Some day, if the extension of her power was not checked, she might even

Italy and The Little Nations

CHAPTER VIII

ITALY ENTERS THE WAR—ITALY ENTERS AUSTRIA — ITALIAN SUCCESSES — AUSTRIA REINFORCED BY GERMAN CHECKS ITALIAN DRIVE — ITALIAN ARMY DEMORALIZED — STAND MADE AT PIAVE RIVER — SERBIA ENTIRELY OVER RUN — MONTENEGRO CAPITULATES — ROUMANIA SIGNS PEACE TERMS — BRITISH FAILURE IN GALLIPOLI CAMPAIGN — GENERAL ALLENBY SUCCESSFUL IN HOLY LAND — CONSTANTINE OF GREECE FLEES — GREECE JOINS ALLIES.

Before the war began Italy was the ally of Germany and Austria-Hungary. The alliance was of a defensive kind. Each of the three nations was pledged to go to the help of either or both of the others in the event of an attack.

Immediately after the declarations of war made by Germany against Russia and France, Italy declared her neutrality. She took the ground that the central empires had been the aggressors, and that she was under no obligation to join them in anything but a defensive war. This prompt action destroyed the triple alliance, and in its place there gradually developed the quadruple alliance of Germany, Austria-Hungary, Turkey and Bulgaria—the three latter countries being, in fact, the vassal allies of Germany, executing her will and cooperating in her plans for a Pan-German empire of Middle Europe with an Asiatic annex in Syria, Mesopotamia and the remoter east.

Italy maintained her neutrality until May 1915. In the interval the country was disturbed by continual agitation. A strong and popular war party came into existence. It was provoked by the fact that Italy in earlier wars had been deprived of territory in the Trentino, in the region of the Isonzo river, Trieste and Istria. This territory, in which a population of Italian birth or ancestry preponderated, was known as Italia Irredenta, or Italy unredeemed, and there was loud clamor for its recovery.

Austria-Hungary, altho for years an ally, was not loved. In the days of her victory over Italy, when the former Italian provinces were seized, she had delimited a boundary which gave her possession of all the advantageous heights and important passes thru the Alps. Thus she had been a menacing neighbor, and the alliance, from Italy's side, had been consummated largely in order to safeguard the possibility of another attack and invasion.

The demand for war became so insistent in Italy that the government was forced to yield. No doubt existed that Italy went to war on the motion of her people rather than at the behest of her king, or of her military leaders. On May 22, 1915, she declared war on Austria. Her declaration of war on Germany did not come until more than a year later, August, 27, 1916.

Italy's plan of campaign was to hold the mountain frontier along the Trentino region and the Carnic Alps, and to make her offensive against the Isonzo river front of the enemy, with Goritz and Trieste as her chief objectives.

She had vast difficulties to overcome. The work of the Italian engineers in making possible a warfare largely conducted in snow clad and cloud capped mountains is one of the marvels of the great struggle.

The Isonzo river front presented great obstacles to successful campaigning. The

Edith Cavell, whose execution by the Germans shocked the world.

Austrians held the commanding positions and were strongly fortified. They had to divert strength from the Russian front in order to meet the new assault, but they were able to maintain a defense that demanded supreme efforts on the part of Italy.

The campaign went slowly. Italian forces reached Austrian soil on the west bank of the Isonzo, and nibbled at the edges of the Carso plateau, over which lay the road to Trieste. A small advance was made into the Trentino, but was soon halted.

Then Austria summoned its strength for a counter offensive. A great effort was planned to destroy the Italian armies, and end the menace that was interfering with the operations against Russia. The Austrian offensive in the Trentino was a well conceived plan to reach the Italian plains and cut the rail communications with the Isonzo front, thus compelling a

Latin retirement from the positions that threatened Goritz and Trieste. It began on May 16, 1916, and was checked by June 3. In that short space, however, the Austrians pushed through the mountains, captured the Arsiero region and reached the edge of the Italian plains. They were within twenty-five miles of their objective when the Latins brought them to a halt, and began a counter offensive that gradually reconquered all the lost territory. The Italians were aided in bringing this serious menace to a sharp conclusion by the sudden drive of General Brussiloff into Bukowina and Galicia. Austrian troops had to be withdrawn from the Trentino front to meet the new Russian advance.

There followed a period of more or less desultory fighting, and then Italy launched another great drive on the Isonzo front. It began in early August, 1916. The Goritz bridgehead and the Carso plateau were the objectives.

The attack came as a surprise to the Austrians, who had their hands pretty well occupied with keeping the Russians out of Lemberg. It opened on August 6, the Latin guns concentrating their fire on Sabatino, San Michele and the bridge across the Isonzo that was protected by these mountain positions. On August 8, in a great charge they stormed and crossed the bridge, took the mountain fortifications and reached Goritz. The city fell the following day, while the Italians drove forward routing the Carso positions of the enemy.

Across the Carso plateau, south of Goritz, lies the road to Trieste. On August 11, the advance continued along a twelve-mile front. The whole Doberdo plateau was occupied, and further gains made on the Carso. Oppacchiasella was taken the next day. The advanced line of the Latin army reached positions within thirteen miles of Trieste. The offensive rested with this for a few weeks, to be resumed in September, when more ground was gained on the Carso plateau.

In October and November the fighting shifted to the Trentino and other sectors of the Italian front, but the wedge had been driven far in toward Trieste, and the Italians were well placed for further successful operations.

They resumed their attacks in May, 1917, after a winter and spring that was marked by no significant events on either side. Under the leadership of General Cadorna they made amazing progress, sweeping over the Bainsizza plateau, northeast of Goritz, and taking practically the whole of the Carso plateau.

Trieste and Laibach were both menaced by these victories. Austrian collapse seemed a not improbable result of the great defeats suffered by the Hapsburg armies.

Then came a sudden reversal of affairs. Victory had thrown Cadorna off his guard. On the northern end of his Isonzo front enemy agents had been surreptitiously corrupting and demoralizing his troops.

Like lightning from a sky unclouded the bolt fell in the region of Caporetto. The enemy struck with large forces and important elements of the Italian second army, instead of resisting, threw down their arms and allowed the foe to advance unhindered.

This disaster threatened to overwhelm the Italian forces, whose greater numbers and most effective troops were on the eastern front, holding the two plateaus and the intervening valley beyond the Isonzo. The enemy was on their flank and headed with little to check him toward the main lines of communication upon which the Italian armies were absolutely dependent for safe retreat.

The situation developed into a race between the enemy and the Italians for Udine, the main railroad center. The Italians won in sufficient numbers to save a large part of their great force. But a tragic part was lost. The enemy cut off and captured some 250,000 prisoners and

Lieut. H. T. C. Walker, of the British Royal Navy, hero of the British naval attack on Zeebrugge.

enormous numbers of guns and quantities of ammunition. Cadorna fell back fighting delaying actions until he had crossed the Piave. Here he made his stand until he was disposed of and succeeded by General Diaz.

Then followed a long siege and a stubborn defense. The allies sent aid to Italy. British and French troops left the western front, and later some American units joined them, and took up positions in the Italian line.

For a long time the situation was perilous. At places the Austrians crossed the Piave. They attempted to drive down from the Asiago plateau, and repeat their earlier success. German aid was freely extended to them. They had indeed been helped by the Germans in the original drive that compelled Italy's retreat.

But repeated offensives failed to shake the Italian line, and in the summer of

The Terrific Drive by the Scottish Canadians at Ypres. This Was the First German Defeat on this Sector.

German dead in their front line trenches. It may be horrible and all that but it was the only way of defeating the Kaiser.

1918 Italy countered. She cleaned the western bank of the Piave of all hostile forces and regained important positions on the northern mountain front. Then she halted.

The great climax came late in October and early in November of 1917, when, with the Germans in full retreat on the western front, Italy struck again. The Austrian lines broke; demoralization spread thru the ranks; the armies fled before the pursuing allied forces, and thus routed their commander was forced to throw up his hands and ask for an armistice.

It was granted. Its drastic terms were equivalent to a complete surrender. Italy occupied the Trentino, the Isonzo region, Trieste, Istria and the Dalmatian coast.

In the debacle that followed for the dual monarchy the emperor abdicated, and the patchwork empire of central Europe broke up into several parts, each

claiming the right of independence and self-government. The Germans and Magyars parted company; the Czecho-Slovaks and the Jugo-Slavs established republics.

When the full story of the war is written there will be no more brilliant chapter in it than that which tells of how Serbia, in its early months, routed the Austrian forces and drove them from her soil. With the Belgians, the Serbs have earned title to be considered among the bravest of peoples.

Belgrade was under bombardment by August 1, and in the third week in August an Austrian army that had crossed the Drina was routed at the Jedar, and driven back to its own territory. Then the tables were turned. Serbians and Montenegrins swarmed into Bosnia, and approached Serajevo. This continued through September. With the coming of October, the Austrians regained the initiative. Their army had been re-enforced. They had some German aid. Crossing the Drina again they moved forward until they had reached the Oriental railroad, running from Belgrade to Constantinople, through Nish and Sofia. Belgrade was caught on flank and rear, and the garrison had to evacuate it and retreat.

The Austrians reached Valievo. They were on the high road to conquest. Then happened one of the most dramatic events in the whole war—an event never to be forgotten. On December 9, 1914, with the shattered forces of the Serbians giving way before the enemy, there rode upon the field the erect and venerable figure of King Peter. The white haired monarch rallied his discouraged troops, and leading them in person, swept forward against the enemy. The astonished Austrians were beaten, routed, driven back from Valievo, from Belgrade—back across Drina and Save and Danube, until the soil of Serbia was free from the foot

of her foe. It was a scene belonging to the warfare of centuries gone—a scene we are not likely to see repeated in the history of the world.

Serbia remained free until the Great Mackensen drive began in October, 1915.

Von Mackensen had displayed his military talents in the campaign against Russia. He was fresh from the scenes of victory. With an army of 400,000 men he hurled himself against the Serbs. The Austrian force that had unsuccessfully attempted to overrun the little country of peasant heroes was greatly strengthened by German troops, and the leadership of Germany's most brilliant strategist gave the new campaign an element of danger far exceeding the earlier effort.

The Serbs fought courageously, but they were outnumbered and outgunned. Moreover by the middle of the month they were treacherously struck on the flank by Bulgaria, who entered the war as a Teuton ally. King Constantine of Greece made a scrap of paper of his treaty pledging aid to Serbia, and, although the allies landed forces at Saloniki, they were unable to advance with sufficient strength and rapidity to afford the Serbians aid.

Belgrade fell on October 10. By October 28 the Bulgars and Teutons had effected a junction in northeastern Ser-

The British Advance in the West. Trenches captured from the Germans during the great British offensive in the West.

bia. Nish was captured on November 7, and the Bulgars sweeping west reached Monastir by November 19. A month later the Anglo-French forces, that had attempted to push up the Vardar valley, fell back to Saloniki. The conquest of Serbia was complete.

But a large part of the Serbian army had escaped in one of the most terrible retreats of history, across the snowy mountains of Albania. That army, reorganized, is now back on Serbian soil, fighting with a magnificent courage for the redemption of its fatherland. Monastir, that fell into the hands of the Bulgars in November, 1915, was once again in possession of the Serbs in November, 1916.

Serbia remained, except for a narrow fringe in the Monastir region, a conquered land until the late summer of 1918. Then began an attack by the allied armies, in which the Serbs played a magnificent part, that routed the Bulgar troops, left to hold the Macedonian front, and brought the surrender of Bulgaria. A few weeks later the Serbs were back at

British outposts ever on watch for enemy attacks. This photograph shows an alert outpost in the Ypres Salient.

Belgrade, and when Germany and Austria signed armistice terms, they had crossed the Danube and stood on Austrian soil.

Roumania's participation in the war was a tragic disappointment to herself and to her allies. She hesitated a long time under pressure from both sides, and finally reached decision in August 1916 to join the entente countries against the central empires. Once the decision was

Russia, but Russia was in the hands of traitors and German agents, and the help she sent was wholly inadequate. Von Mackensen threatened Bucharest from the east, and Von Falkenhayn attacked the Roumanian armies in Transylvania. Between two fires the little country was helpless. Its intrepid forces that had crossed the Carpathians began a retreat before Von Falkenhayn. They fought courageously every step of the road, and

Duke of Connaught, accompanied by General Currie and other Canadian officers, inspecting Canadian soldiers.

reached she acted with more precipitation than wisdom. On August 27 she began an invasion of Transylvania, throwing her armies across the Carpathians and making swift advances.

Then the redoubtable Von Mackensen was sent to subdue her. He struck her in the flank, using Bulgaria as a base and driving north into the Dobrudja, between the Danube and the Black Sea. She tried to hold him. A distress call was sent to

gave ground only when defense was no longer possible. November was a month of repeated disasters, and on December 6 the enemy entered the capital.

Russian aid then screened the shattered Roumanian army while it retired beyond the Sereth, and for months thereafter, until the revolution ended Russian resistance, the Slav forces held the Danube-Sereth front against the foe.

When Russia entered the peace con-

ference of Brest Litovsk and thru its bolshevik agents made terms with the enemy, Roumania was forced to follow in a like humiliating surrender. The Brest Litovsk treaty was signed on March 2, 1918, and the armistice of Bucharest on

March 4. Harsh terms were imposed upon Roumania by the enemy. The little country could only pray that allied victory in the west front would bring her deliverance.

The little nations of Europe were not

The Magnificent Cathedral at Reims, France.

the only ones affected by the war. The people of Armenia and Syria and Mesopotamia felt its tragic pressure under the campaigns of the Turks.

Turkey, as an ally of the central empires, served the important end to them of keeping the Dardanelles and Constantinople out of the hands of Russia and the allies, and thus preserving the bridge from Europe to Asia over which Germany planned to construct her great Hamburg to Bagdad highway.

Great Britain was vitally interested in this phase of the struggle. Her possessions in India and her suzerainty in Egypt were menaced by the Prussian ambition, and by the vassal aid that Turkey was giving to Berlin. Hence, early in the war, she made two efforts to check the Turk and his German master.

One of these was the Gallipoli cam-

Photograph of M. Raymond Poincaré elected president of the French Republic, January 17, 1913. His term of office is seven years.

Madam Poincaré, wife of the President of France.

paign, in which France joined her. It was a daring but disastrous adventure. It had for its object originally the forcing of the Dardanelles by a naval attack. The British and French warships penetrated the Narrows for some miles, but under the fire from the shore batteries, and facing the subtle perils of mines and submarines, they were compelled to desist after several great vessels—including the *Bouvet*, the *Ocean* and the *Irresistible*—had been sunk.

Then it was decided to land troops on the Gallipoli peninsula, constituting the northern side of the straits. The plan was to take the shore batteries, occupy the peninsula, menace Constantinople from the land, and, with the straits freed from enemy control, to enter the Black Sea with the navy. Had the plan succeeded

Left to right, Marshall Joseph Joffre, one of the French Commissioners; Ambassador Jules Jusserand.

Turkey would have been utterly crushed.

On April 21, 1915, troops were landed under heavy fire at various points on the peninsula. British and French troops cooperated. A large element of the British force was composed of Australians and New Zealanders, whose magnificent

fighting qualities and great daring earned for them the admiration of the world. These troops—known as the Anzacs—occupied positions near Suvla bay.

The Turks had been allowed time to occupy and fortify the peninsula, and they made a stubborn resistance. There are no better fighters when they are well officered than the soldiers of the Sultan, and they were organized and under the command of Germans in many instances. Month after month was marked by a bitter and costly conflict. Allied gains were slow.

Early in August 1915 the British had a great opportunity to win a decisive victory. In the Suvla bay region, where the peninsula is narrower than at some other points, the Turk had been defeated and was in retreat. Had the retreat been followed up by an instant renewal of attack, the British might have cut across the peninsula, isolating the Turks on its western end from their base. But there

was some failure on the part of the command, and the opportunity was lost. The Turks were given time to rally and obtain re-enforcements. As a result of this failure General Sir Ian Hamilton was recalled, and Major General Munro sent to succeed him.

But the change in command did not greatly help the situation. In December 1915 it was decided to abandon the campaign, and the British were withdrawn from the Suvla bay region. The following January the remainder of the allied forces bade farewell to the peninsula, leaving behind many a wooden cross to mark the graves of heroes who had died in vain.

Concurrently with the Gallipoli campaign the British had begun a campaign in Mesopotamia and had been compelled to defend their Egyptian front.

The Mesopotamian campaign opened in November 1914, when Basra was seized at the northern end of the Persian Gulf. The British were impelled by the need of preventing Germany securing access to the Gulf, where the establishment of a naval base would have been a direct threat to India. They were also intent upon blocking Germany's road thru Bagdad to Persia. Already German agents were busy in Persia instigating revolt.

By seizing Basra a base was obtained from which Great Britain could control the Arab tribes, whom Turkey, as Berlin's agent, was attempting to enlist in a "holy war." Operations went slowly at first, but successfully. In November 1915 the British had occupied Kut-el-Amara on the Tigris, about half way north to Bagdad, and General Townshend was nearing the ancient city of the caliphs.

Then came a serious reverse. Within eighteen miles of Bagdad the British were routed by the Turks, and forced to retreat. They fell back to Kut, and there stood. The Turks besieged the city.

A Zeppelin over Paris. A Zeppelin sighted over Paris boulevards. It can be plainly seen in this picture.

General Aylmer and Sir Percy Lake attempted to reach the city with re-enforcements and raise the siege, but failed before the powerful Sannayat position. On April 29, 1916, after 117 days, General Townshend surrendered to the Turks. His garrison had been starved into submission.

France's Colonial Troops. The colonials in the photograph are going through barbed wire entanglements.

Heavy Gun Supposed to Have Been the Type to Shell Paris, a Distance of 75 Miles.

It was a humiliating termination to the first stage of a promising campaign. But the British are not easily daunted. In the following December, with a new army under the command of General Maude, they resumed the campaign. On February 24, 1917, they re-entered Kut. The Turks were badly demoralized, and the

advance against them was continued without interval. On March 11 he entered Bagdad. From that time on the Turk was always in retreat. Expeditionary forces drove many miles north beyond Bagdad, and northwest along the Euphrates toward Aleppo.

In the meantime General Allenby was conducting his Palestine campaign. The Turks had been routed on the Egyptian front, and the British had crossed the desert of Sinai, and entered the Holy Land on its southern border.

On March 27 they met the main forces of the enemy near Gaza and defeated them with heavy losses. For some months thereafter progress was slow. Roads had to be constructed and communications maintained across the desert with the base in Egypt. All the fresh water for the British army was brought across the desert in conduits.

In the autumn of 1917, however, General Allenby got his movement under way. Beersheba was taken on October 31. Gaza and Jaffa, the latter the Mediterranean port of Jerusalem, fell in November. As Christmas drew near the world awaited with expectancy news that

Copper bands on the gigantic shell used in the bombardment of Paris. This section was found in a street of Paris after a shell struck nearby.

the Holy City itself had returned to Christian occupation and control. It was thought General Allenby might time its capture for Christmas day, but being more of a soldier than a sentimentalist, he took it at the first opportunity and entered it on foot, in modest recognition of its sacred character, on December 11.

The fall of Jerusalem marked the beginning of the end for Turkey in Syria. During 1918 General Allenby continued his northward progress, slowly overcoming natural obstacles and enemy opposition. Aleppo, the gateway to Asia Minor, was his goal. Once at this important junction point, where the railroad branches to go east toward Bagdad and south toward Mecca, he knew the whole of Syria and Mesopotamia would be in Christian hands.

Early in October his long journey ended. He reached Aleppo, and the Turkish armies still left in northern Mesopotamia were cut off from Constantinople. On the last day of October Turkey surrendered. Thus the Armenians and Syrians were freed from the tyranny of the Ottoman empire, but not before untold thousands of them had suffered horrors that cannot be named, and multitudes had perished from starvation and abuse.

In the indictment of Germany must be charged not only the atrocities she perpetrated on the people of Belgium and France, but the brutal massacres in Armenia, carried out by her vassal ally without a word of protest or a restraining finger from Berlin.

The part that Greece played in the war was not understood by many people. There were those who charged the allied nations with treating Greece as Germany had treated Belgium. Here are the facts:

A diagram of the mammoth shell, probably the one used in the immense gun located in St. Gobain woods which bombarded Paris a distance of seventy-five miles. The destruction caused by these gigantic shells was very great, and the Parisians were continually in a state of terror until the Allies made a concentrated attack and drove the German forces beyond the Paris range.

Germany violated a treaty to enter Belgium.

The allies entered Greece to keep a treaty.

Germany entered Belgium by violence.

The allies entered Greece by invitation of the constitutional government, of which Venizelos was then premier.

Types of French Troops Who Entered Germany to Keep the Enemy in Order Until Peace Was Declared.

Germany killed Belgians and burned their towns.

The allies respected the lives and property of the Greeks.

Germany bled Belgium white with taxation.

The allies kept Greece alive with loans.

Great Britain, France and Russia were the three powers that gave Greece its independence and placed the father of Constantine on the throne. They were obligated by treaty to preserve the dynasty and the constitutional government of Greece. The treaty further provided that they might land troops on Greek soil by common agreement among themselves in order to fulfill their treaty obligations.

When Constantine refused to recognize the vote of the people that returned the Venizelist government after its forced resignation he over-threw constitutional government. This fact justified the presence of the allies in Greece, aside from their invitation, and aside from the fact that they were there to fulfill for Greece her treaty pledge to Serbia, which Constantine refused to keep.

When Constantine fled from Greece he knew that evidence of his base treachery had been discovered. He was the conscious tool of Germany. His plea to be permitted to remain neutral was a dishonest plea. He was never neutral.

Capt. George Guynemer, the leading French aviator, and Lieut. Vosse, (in oval), a leading German aviator, meet death at almost the same time.

In the last year of the war the Greeks, freed from the incubus of a Berlin-controlled monarch, joined with the Serbs, Italians, French and British in driving the Bulgar from the soil of Macedonia. The spirit of Greece was always with the allies.

The War On The Sea

CHAPTER IX

BRITISH FLEET MASTER OF SEAS — GERMAN SEA RAIDS STOPPED —
U. S. AUGMENTS BRITISH SEA FORCES — BATTLE OFF JUTLAND
— U-BOAT WARFARE — LUSITANIA SUNK.

In no war since the beginning of the world has the sea played a part so important as in this war.

Consider a moment the position of the central empires, and then the position of the allied nations.

There was no fighting front of decisive significance that Germany and Austria-Hungary could not reach by land, and there was none, except the Mesopotamian and Syrian fronts, more than 500 miles from Berlin.

The central powers and their vassal allies had land communication. The transport of troops and materials could be done wholly by rail, and without risk of attack by the enemy, or of any enemy interference.

For example in shifting her armies back and forth between the French and Russian fronts Germany ran no danger of loss thru hostile efforts. She could move men and guns to the Macedonian and Mesopotamian fronts without considering the possibility that her enemies would block their road of travel or destroy them en route.

But Great Britain could not reach any front without crossing seas or channels. Every man she sent to war, every ton of food and munitions, had to be protected against submarine attack. In order to keep contact with her Russian ally Great Britain had to travel thousands of miles around the North Cape of Scandinavia,

to Archangel. To reach the Macedonian front she had to travel the length of the most dangerous of all the seven seas—the Mediterranean. If the Mediterranean had been created for the express purpose of making things easy for the U-boats, its configuration could not have been improved upon. In order to reach the Mesopotamian front Great Britain had to risk these same waters, and continue thru the Red Sea to the Persian Gulf—a distance of 9,000 miles.

Half a million soldiers came 3,000 miles across the Atlantic to fight with their British comrades, and were kept continually supplied by transport between Canada and the front for four years. Half a million came round Good Hope or thru the Suez from Australia and New Zealand, and were in like manner provided.

France sent troops to the east and risked the perils of the sea. Italy, washed by the Mediterranean, was dependent upon sea transport for food and coal and almost every other essential.

And all these countries relied upon America as a source of supply, and upon the Atlantic as a line of communication with the food, and munitions and raw materials of the American market.

Finally, when the great crisis of the war developed, and the life and death struggle on the plains of Picardy and the banks of the Marne was being watched breathlessly by the world, the whole issue depended

French Scout Troops entering Lezon after the German retirement.

upon whether America could get 1,500,000 men across the sea in time.

It is evident, therefore, that the sea constituted one of the biggest problems the allies had to face. They had to make the sea safe for transport and serviceable as a line of communication. If they failed in this the war was lost.

As obviously the sea presented to Germany her greatest opportunity. It was the most vulnerable point at which to

the great ocean highways with power and promptitude.

It happened that the British fleet was mobilized for maneuvers when the war cloud gathered in Europe. Instead of demobilizing it slipped quietly up to a rendezvous in northern waters, and awaited developments. Thus it was ready the instant war was declared to meet and fight the enemy.

The enemy, who probably entertained

French soldiers moving up to the front. This British official photograph shows a detachment of stocky French poilus marching up to the front lines to meet the Huns.

strike her enemies.

Hence the struggle for the sea became, in many respects, the supreme struggle of the war.

In this struggle Great Britain played the part that saved the world from a triumph of Prussianism. Weak as she was numerically and in material equipment for land warfare at the beginning of the war, on sea she was mighty, and she moved to the defense of civilization and

hopes of a swift descent upon the shores of Great Britain and a sweeping campaign by fast cruisers against enemy commerce, modified his plans. He did not dare to challenge the British fleet to do battle.

Several enemy cruisers were at large when the war began, notably the Emden. These engaged in raiding tactics. They sank many thousands of tons of allied shipping, ignoring wholly the requirement

of international law that their prizes should be taken into port to have their status determined by a prize court.

However the commanders of these raiders were humane. They made provision for the safety of passengers and crew, and this consideration entitled them to the respect which even the allies felt for their daring and courage. Had Germany confined herself to such operations as the *Emden* conducted she would not

countered a British squadron of lighter armament in the Pacific, off Coronel on the coast of Chile. Rear-admiral Craddock was in command of the British squadron. He was maneuvered into an unfortunate position. After a courageous fight against odds in which he went down with his flagship, the *Good Hope*, the rest of his squadron, excepting the *Monmouth*, managed to disengage itself. The *Monmouth* followed the *Good Hope*

have sunk in the eyes of the world to the level of national degradation that now marks her.

But the raiders were pursued and captured one after another. An Australian cruiser, the *Sydney*, ran down the *Emden* off Cocos Island in the Indian ocean on November 9, 1914.

Prior to this, however, a German squadron, under Admiral von Spee, en-

to the bottom.

This was the first important naval encounter in the war, and it naturally gave great satisfaction to Germany and her friends, of whom, at this time, she had not a few in America and thruout the world. The von Spee victory was a blow at the supremacy of Britain on the sea.

A month later, on December 8, 1914, von Spee was cruising north on the oppo-

site side of the continent. He was looking for victims in the region of the Falkland Islands—British islands off the coast of Patagonia.

Concealed in one of the deep harbors of the Falkland group lay a British cruiser squadron under the command of Vice-admiral Sturdee. It was waiting for the Germans, and as they steamed northward past the islands, it suddenly sallied out and attacked. Before the

on allied commerce was left to the U-boat.

The story of the U-boat's depredations is too long to tell in detail. The history of the war, exhaustively related, will need a large volume devoted exclusively to the U-boat.

It became, at the climax of its destructiveness, the most serious peril the allies had to face, and, in the end, it was the utter undoing of Germany.

French warriors on horseback. General Joffre had kept these and nearly all his other mounted men from within rifle range of the Germans. These men, who were photographed while reconnoitering in Somme region, were as fine cavalry as the world ever saw. In their two years of service back of the trenches they had time to master the technique of their kind of warfare.

enemy fully realized what was happening he had lost his flagship, the *Scharnhorst*, and the battle cruisers *Gneisenau*, *Leipzig* and *Nurnberg*.

That incident just about finished the surface efforts of the German navy. Such activities as were later engaged in by German battleships took place in waters immediately adjacent to Germany or Great Britain. The waging of war

The U-boats had enjoyed several notable successes in the opening months of the war. A number of British war ships had been sunk, and there was no little uneasiness lest Germany should be able to nibble down the strength of Britain's navy ship by ship.

On September 5, the light cruiser *Pathfinder* was sunk by the U-2 at the entrance to the Firth of Forth; on Septem-

From left to right: Marshal Foch, General Pershing, Madame Dubail, Marshal Joffre, General Dubail and Son, Gens. Pelletier and Galopin in rear to either side of Marshal Joffre.

ber 22 the U-boats had a field day. They caught the armoured cruiser Aboukir in the North Sea just after she had parted from her sister ships the Hogue and the Cressy. The Aboukir was seen to be in distress by the other cruisers, and they went to her aid. This was exactly what the enemy had hoped would happen. As they neared the sinking ship each of them received in her hull a torpedo from the hiding submarine. All three cruisers went down with the loss of 1,400 lives. The cruisers were old and almost obsolete. The loss of life was the most serious phase of the incident. Germany was jubilant. She saw the destruction of the British fleet by "attrition". The U-boat commander responsible for the coup—Otto Weddigen—was decorated and became a national hero.

But the British had learned a lesson. Instructions were given that in case of a ship being torpedoed other ships must not go to the rescue, but must take every precaution to ensure their own safety. Furthermore plans were considered and agreed upon for protecting the navy from the war of attrition without in any measure lessening its efficacy as a menace and a blockading force against the enemy.

Losses to battle ships in North Sea and Atlantic waters became rare events. The enemy's successes were largely confined to the Mediterranean, where the problems of defense were exceedingly difficult, and the treachery of the King of Greece made murder easy for the U-boat.

Germany soon realized that she had a long and probably disappointing task ahead of her in an effort to pick off the great British fleet one ship at a time. Her naval experts began to turn their attention more definitely to the destruction of allied commerce. This was wise policy. To attack the allied lines of communication and cut off the armies in France, Macedonia, Egypt and Mesopotamia from their sources of food supply and munitions meant to compel the capitulation of the allied countries.

Marshal Petain, the Defender of Verdun.

Germany had scattered mines in the waters adjacent to the British Isles. German ships carrying neutral flags had engaged in this murderous work. It was a clear violation of international law. No nation had the right to make the common highways of the sea unsafe for neutral shipping and noncombatant merchant vessels of the enemy by the indiscriminate placing of mines.

Gen. Pershing and Allied Leaders at the Grave of Lafayette.

As a consequence of this action Great Britain in November 1914 announced that a safe channel for neutral shipping would be maintained in the North Sea for all ships entering and leaving it by the Straits of Dover. That meant British ships would sweep up enemy mines and guarantee safety in the swept and guarded waters. Ships taking the northern passage did so at their own peril.

safety of crew and passengers. Neutral ships were told that they ran danger in entering the zone, as a result of "incidents inevitable in sea warfare."

That was the beginning of Germany's great U-boat campaign to starve England into submission. Predictions were made in Germany that England would be compelled to yield in a comparatively short time.

Kemmel Hill Before the Germans Attacked. This was the French commander's post on Mount Kemmel the battle of April 24, when the Germans stormed and captured part of the hill.

Von Tirpitz characterized this action of Great Britain as the closing of the North Sea to neutrals, and hinted at reprisals. The reprisals came in the announcement of the German government on February 4, 1915, that the waters surrounding Great Britain and Ireland were a war region, and that every enemy merchant ship found in these waters on and after February 18 would be destroyed, without guarantee of warning or provision for the

Further it was the beginning of the long controversy between the United States and Germany over her attempt to make piracy and murder legitimate on the high seas. The declaration of U-boat warfare was followed almost at once by President Wilson's note warning Germany that America would hold her to "strict accountability" for offenses against the law of nations and humanity.

To continue the story of the U-boat

war in detail would be merely to relate sinking after sinking, crime after crime against the innocent and the helpless. From the torpedoing of merchant ships without warning the Germans passed to the diabolical practise of shelling open life-boats with women and children in them.

No brutality was too terrible, and the brutal deeds were met with rejoicing and approval by the German people. To this hour no voice has been raised in Germany

“Whoever cannot prevail upon himself to approve from the bottom of his heart the sinking of the *Lusitania*—whoever cannot conquer his sense of the gigantic cruelty to unnumbered perfectly innocent victims, and give himself up to honest delight at this victorious exploit of German defensive power—him we judge to be no true German.”

It was such utterances as these that later arose to refute the arguments of men who tried to draw distinction between the

Real dogs of war on duty in the trenches. People often talked of the “dogs of war” but the dogs they thought of then were far different from these real dogs in the trenches.

to condemn the massacres of the seas, or to regret such offenses as the torpedoing of the *Lusitania* and the *Sussex*.

When the *Lusitania* was sunk, with a loss of 1,154 lives, a medal was struck in Germany to commemorate the occasion, and Pastor D. Baumgarten, a prominent German clergyman, in the course of an address on the Sermon on the Mount, declared:

German rulers and the German people.

After the sinking of the *Lusitania* more notes were exchanged between the United States and Germany, and America began a long season of waiting for an “overt” act on the part of the enemy—an act of open and deliberate hostility.

In August the *White Star* steamer *Arabic* was sunk, struck by a torpedo without warning of any kind. There

were 424 persons on board of whom 26 were Americans. While the lives of all were endangered only 30 were lost, of whom two were Americans.

After some argument Count von Bernstorff, on behalf of his government, disavowed the sinking of the *Arabic*, and assured President Wilson that a recurrence of like incidents was considered "out of the question."

On February 9, 1916, Germany sent her last note on the *Lusitania* affair, in which she declared she was willing to pay a full indemnity for the lives of American victims—as tho that were possible—and repeated the pledge that "unarmed merchantmen shall not be sunk without warning and unless the safety of the passengers and crew can be assured."

And a little less than a month later came the sinking of the *Sussex*, with a loss of some 80 lives. The *Sussex* was a channel steamer carrying passengers from Folkstone to Dieppe. She had 25 Americans on board, some of whom were injured. The U-boat attacked without any warning and made no effort to save the victims of its torpedo.

Germany attempted to evade the *Sussex* issue. She suggested a mine might have caused the disaster; she raised the point that the *Sussex* was armed, or that she was a mine-layer or a warship of some sort. These assertions and allegations were all disproved.

President Wilson on April 26 sent Germany a note that practically informed her she had been caught in repeated lies and deceit, and concluded with the ominous declaration:

"If the Imperial German Government should not now proclaim and make effective renunciation of its present methods of submarine warfare against passenger and cargo ships, the United States Government can have no other choice than to break off completely diplomatic relations with the German government."

This shows the appearance of some of the fragments of shell found in a street of Paris.

To this Germany replied with the announcement that the German naval forces had received the following orders:

"In accordance with the general principles of visit and search and destruction of merchant vessels recognized by international law, such vessels, both within and without the area declared as a naval war zone, shall not be sunk without warning and without saving human lives, unless these vessels attempt to escape or offer resistance."

At the same time Germany suggested that now the United States should exercise her influence to make the British government observe the rules of international law, and added that if the British government did not follow the "laws of humanity" the German government would feel it was facing a new situation in which it must reserve to itself "complete liberty of decision."

Camouflaged Big Gun. Mounted on a specially constructed railroad carriage, this big French 400 m/m. gun was ready to bang away at the German forces making the drive on the Somme front. It was exceedingly well camouflaged to prevent detection by Boche aerial forces.

The British navy had not occasioned the loss of a single neutral or non-combatant life. Even in battle with German warships it had uniformly done everything in its power to rescue enemy sailors. It had bombed no open ports and sunk no merchantmen. It had most scrupulously observed the rules of visit and search, and the enemy had been given his day in the prize court. Its offense was the effective blockade of Germany at a point remote from the German coast and beyond the reach of the U-boats.

The impudence of the German reply, however, lay in making the fulfillment of her pledges to the United States depend upon the conduct of a third party who had

no place in the controversy.

Matters drifted along under this arrangement until the beginning of 1917, and then, as elsewhere narrated, the crisis came and the rupture in diplomatic relations as a result of Germany's proclamation of unrestricted U-boat warfare.

That proclamation was the beginning of a new and serious chapter for the allies. The rate of destruction went up at once. In March, April, May and June of 1917 ships were sunk in such numbers that it looked as if the enemy's intentions might be realized, and the surrender of Great Britain and France forced by starvation.

The United States, entering the war on Good Friday, brought the help of her genius and industry to the problem. Devices were invented for detecting the presence of submarines and for destroying them. The depth bomb began to prove of great value. When the arming of merchantmen failed to lessen the sinking of ships materially, the convoy system was adopted. It proved the most effective method of rendering the U-boat harmless.

Gradually the U-boat was mastered. Allied ship-building efforts gained upon the ship-destroying efforts of the foe. America transported 2,000,000 soldiers to France with practically no losses. By the summer of 1918 the earlier alarm that the central empires might win the war with the submarine was dissipated. Instead it was felt that the submarine could do nothing more than delay the issue.

During the period of the submarine war the British navy had two clashes with the enemy on the high seas. Vice-Admiral Beatty, in command of a British patrolling squadron, encountered a German raiding squadron in the North Sea on January 24, 1915. There was a sharp little fight, in which the enemy battle cruiser *Blucher* was sunk, and two other of his big ships badly damaged. The British cruisers *Lion* and *Tiger* suffered, but were able to make port under their

own steam.

The biggest naval battle of the war occurred off the coast of Denmark on May 31, 1916.

Vice-Admiral Beatty, commanding the battle cruiser squadron, discovered the enemy's high sea fleet steaming north and west in the region of Jutland. It was late in the afternoon, and the weather was hazy, but Beatty at once closed in and gave fight. It was his purpose to engage and hold the foe until the British dreadnaught fleet could arrive on the scene.

The battle raged mightily until darkness set in, and the enemy, realizing his peril, succeeded in slipping away in night and fog and reaching his own sheltered waters behind Helgoland.

The British lost three battle cruisers—the Queen Mary, Indefatigable and Invincible; three armored cruisers—the Defense, Warrior and Black Prince, and eight destroyers. The enemy admitted at the time the loss of one battleship, the Pommern, one battle cruiser, the Lutzow, four cruisers and five destroyers.

When the war ended it developed that his losses had been far heavier than he had admitted or than the British had claimed, and that from May 31, 1916, until the hour of final defeat official Germany knew that its fleet could never again run the risk of meeting the British.

In British naval history, however, no incidents will live longer or rebound more loudly to the praise of Britain than the intrepid raids on the submarine bases of Zeebrugge and Ostend, on the Belgian coast. The former took place on the night of April 22-23, 1918. Vice Admiral Sir Roger Keyes directed the daring expedition that undertook to destroy the fortified mole of Zeebrugge and block the channel by which access was had to the canal. Six obsolete British cruisers took part in the enterprise—the Brilliant, Iphigenia, Sirius, Intrepid, Thetis and Vindictive. The last named won great

French Submersible Torpedo-boat Signalling Fleet at Biserta.

glory. She landed storming parties on the mole while being hammered with shells from the enemy shore batteries. A noble wreck she managed to reach port. A few weeks later she ventured forth again, and allowed herself to be sunk at the entrance to the harbor of Ostend.

In all the history of the world there has been no more wonderful spectacle, nor any surrender more utterly humiliating, than that which ended the long struggle upon and beneath the seas.

When in late November 1918, the pride of the German navy, great dreadnaughts, battle cruisers, armored cruisers and destroyers, steamed sullenly across the North Sea and gave themselves up to the waiting fleet of Britain with its allied squadrons of American and French warships, there ended the dream of Wilhelm Hohenzollern, the dream of a vast world empire, mighty on land and sea.

French Submarine Torpedo Boat "Lavoisier" Helped to Clear the Mediterranean.

America's Long Patience

CHAPTER X

AMERICA NEUTRAL — BELGIUM STARVING — GERMAN PLOTS —
LUSITANIA SUNK — EXCHANGE OF NOTES — RELATIONS WITH
AUSTRIA BROKEN — AMERICA'S ULTIMATUM.

America was slow to discover that she lived in the world rather than in the western hemisphere alone, and that she was neighbor to Europe as well as to Mexico.

When the war began in Europe the American people looked upon it as a strange and tragic madness of monarchs and subject nations, with which they had nothing to do, and could have nothing to do, except as intermediary in an effort to make peace.

Millions of Americans were shocked and outraged by the ruthless treatment of Belgium when Germany hurled herself across the little country's frontier in a frantic effort to get at the throat of France.

Some Americans wanted the United States to protest and even to threaten a declaration of war if Germany persisted in her violation of Belgium's rights and liberty.

No action was taken by the American government, however, and it is probable the government faithfully reflected the sentiment of a majority of the people, at that time. There was very general sympathy for Belgium, and wide-spread indignation against Germany, but the old tradition that America had no lot or part in the politics and quarrels of Europe obtained thruout the land, and few would have been willing to go beyond sympathy and indignation.

America's sympathy was shown most

practically and with little delay. All over the country funds were raised for the relief of Belgium, whose people had been reduced to misery and starvation in a brief space of time by the cruelty of the foe.

When it became apparent that the proper administration of American bounty depended upon direct American supervision, an American Commission for the Relief of Belgium was named, with Herbert Clark Hoover, an Iowa mining engineer, as chairman. Mr. Hoover proved a wonderful organizer, a man of generous heart and great executive ability. Under his leadership millions of dollars were raised for the help of King Albert's oppressed people, and under his personal direction the money was disbursed for their salvation. For two years he labored incessantly, handicapped by the frequent refusal of the German administrators of Belgium to cooperate or in any way to facilitate his work.

The ministry for Belgium was America's main means of contact with the war zone during 1914-15-16. There were other contacts, but they were all of the same sort—relief work for the suffering of Serbia, Syria, and Armenia, or ambulance driving and Red Cross service in France.

Officially America was neutral. The President issued declarations of neutrality as each new belligerent appeared in Europe. Immediately following the first outbreak of war, in August 1914, he ap-

A LIVING FLAG

10,000 Blue Jackets form the most remarkable flag in the world at the Great Lakes Naval Training Station, 30 miles from Chicago, and photographed from a plane. As interesting as the picture itself, is the manner in which the design was laid out in the huge drill grounds. The flag, if formed in proper proportions, would hardly be recognizable when photographed, so expert photographers worked through the law of perspective so that when viewed from the "eye of the camera" and pho-

tographed, it stood out in proper proportions. For instance there were 65 men in the star in the extreme left hand corner and only 12 in the nearest front star.

290 men were in the ball, 560 in the pole, 450 in the top stripe and 300 in the lower one.

The flag itself, was 293 feet long and 428 feet

(Copyright Great Lakes Recruit, 1917)

in width.

The star field measured 143 feet at the top, 66 feet at the bottom.

One of the features of this extraordinary formation is the fact that in the respective stars there were men from nearly every state in the union.

LIVING FLAG

pealed to the American people to maintain a strict neutrality in word and act.

The American people made a loyal effort to acquiesce in the President's request, and a very large proportion of them succeeded admirably; but the American of German birth or descent proved in many instances an exception to the loyalty of the majority.

The United States did not realize at first that its citizens of German blood

ment, the pride and even the fear of German-Americans. Secret organizations were formed; oaths of loyalty to the kaiser were taken; reservists were drilled.

Agents were hired to go into American industries and provoke and persuade the workers to strike. These efforts were directed chiefly to the demoralization of the munition factories, or other concerns producing goods that were of value to the enemies of Germany.

French Advancing Behind a Barrage Fire.

were being made the objects of continued incitement by German agents in America; but this was true. Had they been left to themselves there is little likelihood that any serious trouble would have developed. But men on the pay-roll of the German Ambassador, Count Bernstorff, and in the employ of Dr. Dumba, the Austro-Hungarian Ambassador, maintained a ceaseless propaganda thru channels and agencies of varied kinds by which they played upon the racial senti-

At the same time agents lobbied in Congress, while subsidized or misguided newspapers thruout the country supported their efforts to obtain an embargo on the export of munitions, and even on the export of foodstuffs.

The propaganda of the Bernstorff-Dumba organization attempted to make the American people believe it was unjust and, indeed, unlawful to sell guns and shells and food to the enemies of Germany

The Italian Royal Family.

Premier Orlando directed Italy's War Committee.

when Germany was unable to buy them. This was, of course, ridiculous. The manufacturers and producers of the United States had a right to sell to anybody who could reach their market and pay their price. It was not their fault that Germany could not come to New York or Boston or New Orleans and trade. The obstacle in the way was not American prejudice so much as the British fleet—and that was an obstacle that Germany would have had to remove for herself.

The refusal of Congress to follow the promptings of the kaiser thru Count Bernstorff and his agents, provoked these gentlemen to more desperate efforts.

Explosions became frequent in munition factories; bridges were blown up; trains were wrecked.

But all of these things, altho vexing the American people, did not greatly stir them. Many of them simply refused to believe that they were anything more

than accidents, or—at worst—the work of irresponsible fanatics.

Then came a day—May 1, 1915—when there appeared in the New York newspapers an advertisement. It read as follows:

NOTICE!

TRAVELLERS intending to embark on the Atlantic voyage are reminded that a state of war exists between Germany and her allies and Great Britain and her allies; that the zone of war includes the waters adjacent to the British Isles; that, in accordance with formal notice given by the Imperial German Government, vessels flying the flag of Great Britain, or of any of her allies, are liable to destruction in those waters and that travellers sailing in the war zone on ships of Great Britain or her allies do so at their own risk.

IMPERIAL GERMAN EMBASSY

Washington, D. C., April 22, 1915.

Not many people saw this extraordinary advertisement, in which a foreign government ignored the government of the United States, and talked directly to the American people in threatening words and tone. Those who did see it paid little attention to it.

But there were individuals to whom came mysterious warnings to avoid sailing from New York on the *Lusitania*, that was due to steam out of the harbor the day after the appearance of the German Embassy's menacing notice. Some of them heeded these warnings. Others laughed at them. The idea that Germany would sink a great passenger liner, with American citizens on board, seemed absurd.

It was true that German submarines had been very active and had occasioned considerable loss, but, aside from the sinking of several allied battleships—legiti-

mate prey—there had been no appallingly dramatic happenings such as were soon to come.

In February the German government had proclaimed a submarine zone around the British Isles, and announced the establishment of a U-boat blockade of Great Britain.

President Wilson followed the enemy proclamation with a note addressed to Berlin, pointing out the perils of Germany's plan of blockade and its threat to the freedom and security of neutrals. This note closed with an emphatic declaration that if Germany violated the rights of the United States upon the high seas, the United States would hold her to a "strict accountability."

It was with this phrase still clearly in mind that American citizens went on board the *Lusitania*, and sailed from New York, in spite of insulting advertisements and mysterious warnings.

The *Lusitania* carried in her hold some small arms ammunition—rifle cartridges. She had no dangerous cargo. In every respect her manifest complied with the law. She was a British passenger liner. She had no troops on board, and altho on the naval reserve list, she had not yet been called for active service.

At five minutes after two on the afternoon of May 7, 1915, the *Lusitania* was slipping along rather slowly off the Old Head of Kinsale, Ireland. Suddenly the U-boat 39 appeared at her side, and discharged two torpedoes into the utterly helpless vessel.

No warning was given, no opportunity for the escape of the women and children, and of course no effort was made to visit and search her, as the law of the sea requires.

The great liner sank quickly, carrying to their death 1,154 persons, many of whom were women and children. A score of little babies died pitifully.

Among the 1,154 dead were 102 Amer-

Major Baracca, Italian Ace.

icans.

The news of this tragic happening shocked and horrified the world. It stunned Americans. It seemed impossible to believe it true. After the first incredulous amazement there came a surge of anger, and had President Wilson declared war on Germany the day after the sinking of the *Lusitania* he would have had a large part of the nation with him for vengeance on the cruel and cowardly foe.

But President Wilson did not declare war. Instead he made a speech at Philadelphia in which he said:—"There is such a thing as a man being too proud to fight; there is such a thing as a nation being so right that it does not need to convince others by force that it is right."

The phrase "too proud to fight" was the most unfortunate the President had

Types of soldiers and laborers on the Italian front at time of Austrian invasion.

ever used. Torn from its context it was carried around the world, and wherever it was repeated there came back to America the laughter of mockery and the scorn of men.

President Wilson did not know Germany then. No man knew her as all came to know her later. Had he known her he would never have used the second phrase, about a nation being "so right that it does not need to convince others

onstrate the righteousness of the United States to the German intelligence. He went about his task earnestly, ably and patiently. He wrote two notes to Germany, in the first demanding reparation, and, in the second, emphasizing the demand, and insisting that Germany must not sink ships without warning, and must not turn passengers adrift in open boats at a distance remote from shore.

After these several interchanges of

Italians had many anti-aircraft guns mounted on tractors. Italian anti-craft guns and light artillery pieces were mounted and hauled into position by tractors.

by force." President Wilson learned that there is only one way to convince the Prussian mind of anything, and that is by force. You might be as right as God Himself, and it would make no impression whatever upon the type of mind that burned Louvain, sank the Lusitania, murdered Nurse Cavell and wantonly converted Northern France into a wilderness of death and desolation.

President Wilson attempted to dem-

notes, on September 1 Count Bernstorff announced that Germany would sink no more passenger liners without warning, and would otherwise comply with the conditions deemed by the United States government to be essential in the interests of humanity, international law and neutral rights.

Public indignation subsided a little. It was hoped that the President's conciliatory plan would prove effective.

Type of heavy Italian gun on the Piave River kept the Austrian forces from concentrating at any one point.

There were other provocations, however, that disturbed the peace of mind and good temper of the average American citizen. The activities of certain agents, whose connections had been traced back to the vicinity of the Austrian embassy, made many people feel that America was much too tolerant of some of the representatives of the central empires. This impression became so strong that the State Department at Washington, early

made small difference as long as the shrewd, unscrupulous little agent of the Hohenzollern autocrat was still free to go as he pleased in Washington. Dr. Dumba had never been more than a tool for Count Bernstorff. Dumba was a business man and Bernstorff an aristocrat, hence Dumba was content to be a valet in conspiracy for his master, the arch-conspirator.

However the expulsion of Dumba—

Italian Bersaglieri cycle regiment on their way to the Austrian frontier.

in September 1915, requested the Austrian government to recall Dr. Dumba. This did not mean severing diplomatic relations, but merely a protest against the conduct of the particular individual then acting for the dual monarchy at Washington.

The Austrian government did as it was requested, and Dumba departed. But the departure of the Hapsburg ambassador

for such it was in all but technicality—led to further discoveries and disclosures. As a consequence in December the two German agents chiefly responsible for outrages and plots in America—Boy-Ed and Von Papen—were induced to follow the former Austrian ambassador.

It was on September 1 that Count Bernstorff gave the sacred word of Germany that she would not sink another

Austro-Italian Fighting in the Alps.

passenger ship without full warning. A little less than six months later, on March 25, 1916, the channel packet *Sussex* was torpedoed off the French coast. She sank with loss of life among crew and passengers. Several Americans were on board, but happily escaped death. The *Sussex* was wantonly sunk. No warning was given. No effort was made to save life. It was another instance of cold-blooded murder.

America was on the verge of breaking diplomatic relations with Germany. The anger of the people was intense. "Strict accountability" had been the words a year before, and Germany had acted as tho they meant nothing of which she need be afraid.

President Wilson sent another note, and made a speech to Congress emphasizing the serious and perilous nature of the situation. In his note he told Germany that should she repeat this crime diplomatic relations would be severed.

In a few weeks Germany answered with new promises of good behavior, and once again the United States swallowed its wrath and gave the Germans a chance.

Thru the remainder of 1916 Germany avoided further provocation. President Wilson was re-elected in November on a platform summed up in the phrase "He kept us out of war." America, evidently, was happy to be kept out of war in spite of all the injury that had been done her, and the insults that had been heaped upon her. Her anger had flamed up occasionally, but there was no steady heat. There was certainly no heat intense enough to repudiate the pacifist slogan of the Democratic nominee.

This was in part due to the fact that the people of the great middle-west and far west were not yet aware of the real perils to the nation involved in temporizing with a power like Germany. Moreover the offenses committed by U-boats did not appeal with the same force to them as to the people of the eastern and

Military Men of Southern Europe, Roumanian, Servian and Greek.

sea-board states. They were inclined to think that Americans should keep off the sea when the sea was dangerous, and not risk the provocation of international dispute and war merely to gratify their desire for travel.

Following the victorious campaign of the President on his peace platform, there came a rather dramatic opportunity to act for a moment as a potential peacemaker.

Early in December Berlin proposed that the warring countries engage in an effort to negotiate peace. Germany had just completed the conquest of Roumania by occupying Bucharest six days before. Russia was hors de combat. The hour seemed opportune to the Prussian leaders.

President Wilson also thought the hour opportune for a definite effort to end the war. He addressed an identical note to all the belligerents requesting

Italian Troops After Rout of Tenthic Forces in Northeastern Italy. Having wounds dressed.

them to make a clear statement of the terms upon which they were willing to consider peace. He based this request upon the ground of America's interest in the restoration of peace. He argued that the prolongation of the war was endangering the security of the United States.

The President's note was not favorably received in the lands opposed to the central empires. Nevertheless they replied with definite statements of their war aims. From all of them came a declaration that they would enter into no discussion of peace with Germany until she had defined her terms. The British prime minister insisted that there could be no peace without assurance of reparation, restoration and security. Finally in a combined reply, just as the year ended, the allies emphatically rejected the German proposals for a conference, and reminded the world that Germany looked upon sacred promises as "scraps of paper," and approved the principle that "necessity knows no law."

However opinions may differ as to the wisdom of the course taken by President Wilson, it can never be questioned that he exerted himself to the extreme limit of patience and tact in the effort to keep America neutral and peaceful, and to encourage a spirit of conciliation among the belligerent nations over-seas.

More ardent spirits would have entered the war when Belgium was invaded, the Lusitania sunk or the Sussex torpedoed—excuses were abundant. But President Wilson was not seeking excuses to fight; he was trying to avoid fighting. If America had to fight he wanted it to be the result of a situation that left no possible alternative; he wanted every American citizen, no matter what his ancestry or nativity, to feel that America was entering the war only after she had exhausted every means in her power to remain neutral and because national safety and self-respect could not be preserved in any other way.

This photograph, one of the most remarkable made in the national army camps, shows a number of the soldiers in the trenches wearing their gas masks, facing a gas attack of the "enemy."

When his attempt failed to obtain from the belligerent nations an agreement to enter upon peace negotiation—failed because of Germany's refusal to commit herself to any definite proposals—he realized that he had gone as far as it was possible to go. He had given the central empires chance after chance, and they had proved shifty, untrustworthy and indifferent to honorable appeal. Now, altho the proposal for negotiation came from them, and, at his request, had been met by the allies with a clear forthsetting of their war aims, the central powers declined to go on record as to their basis of bargaining. President Wilson was satisfied at last that if Germany gave any new provocation to the United States there could be only one answer to it. Reason, persuasion and appeal were no longer of any avail. Force—force to the utmost—was the only way left.

The United States Draws The Sword

CHAPTER XI

GERMANY RENEWS SUBMARINE WARFARE — NO HOPE FOR FRIENDLY RELATIONS — GERMAN-MEXICO PLOTS — UNITED STATES DECLARES WAR ON GERMANY — GEN. PERSHING ARRIVES IN FRANCE — FIRST UNITED STATES EXPEDITIONARY FORCES REACH FRANCE — FRENCH AND AMERICANS SHOW CORDIAL RELATIONS.

It was on the last day of January in the year 1917 that Germany announced to the world that she would wage war on the sea with unrestricted frightfulness. Thus she repudiated her pledges to the United States and intimated that she would torpedo without warning every ship that dared to sail the seas. At this time she had lost faith in the efficacy of her wonderful military machine and believed that the huge fleet of submarines she had been building secretly would enable her to starve Britain into submission within three months. She argued that she could afford to earn the hostility of all civilization so long as she won the war.

The gauntlet thrown down by the Teuton warlords was taken up quickly, if reluctantly, by the great North American republic. On February 26th, President Wilson went before Congress and asked that diplomatic relations with Germany be severed. He knew, then, that the step he was taking was irtraceable and that only a miracle could keep the United States from being involved in the fearful European struggle. His last hope, which was that the United States would be able to maintain armed neutrality, soon vanished. Although the President authorized the arming of American merchant ships, the desperate German government proceeded to carry out its threat and soon a whole series of attacks on the trading ships of the world, involving the loss of American property and of American lives. And so on April 2nd, the President went before Congress again and requested that a state of war with Germany be declared. In this utterance Mr. Wilson took pains to say that "We are but

one of the champions of the rights of mankind."

Congress did not hesitate as to its course. The revelation that the German Foreign Minister, while his country was at peace with the United States, had urged the German Minister in Mexico to arrange for a Mexican invasion of the United States, promising to Mexico a slice of American territory, and that he also had sought to improve this plan by seeking an anti-American alliance between Japan and Mexico, aroused the ire of the whole country, and made the people ready to plunge into the Old World struggle. The Senate passed the war declaration on April 4 by a vote of 82 to 6 and the House of Representatives passed it on April 6 by 373 to 50. At the same time the President was directed to employ the entire naval and military resources of the country to bring the struggle to a successful termination.

President Wilson immediately after signing the war resolution issued a proclamation concerning the conduct and treatment of alien enemies.

All of these momentous acts that swept America from her traditional isolation into the maelstrom of European strife took place amid profound emotion on the part of those participating, and breathless interest on the part of the people.

Beyond a display of flags—flags of all the nations at war against the central empires—there was no great public demonstration. Millions of Americans rejoiced that the bonds of neutrality were broken, that the obligation to silence and inactivity was removed, and that—before it was too late—America had taken her place

Commandant Bachkarova, the leader of the Women's Death Battalion.

beside the great democracies of the world for the final fight against autocracy and the legions of oppression.

In 1776 America had raised the flag of freedom and the right of self-determination and self-government. She had been true to these ideals that then began to revolutionize the world. She had fought to free the slave. She had given Cuba liberty. She had redeemed the Philippines from the bondage of Spain. By all that she had held precious, by all that made her history glorious she had a right to stand with France and England and Italy and little Belgium against the Hun. Her duty lay upon the frontiers of freedom, and it was with a glad pride, counting well the cost, that America unsheathed her sword, and sent across the seas to the older allies a message of cheer and comradeship.

Generally speaking, the year 1916 had been most unfortunate for the Germanic combination from a military standpoint.

Only on the Roumanian front had any consolation been offered to the high German command. Russia, although she exhausted herself terribly by her efforts, had carried off the honors on the east, the Italians had had a good year on the southwest and in the west the Verdun offensive had failed and the British and French counter-offensive at the Somme had made dangerous headway. Early in 1917, therefore, Germany was dreading events on all fronts, particularly on the east and the west. Her agents in the east were reporting that a revolution might occur in Russia but the hopes raised by her secret agents in other quarters had been sadly disappointed and she could not be sure that the downfall of the Czaristic regime, with its pro-German element, would be a help to Germany. For that reason she decided to order a retreat from the great Arras-Soissons salient, to dodge the attacks the allies were preparing and to depend on her submarines to gain victory at sea while her armies evaded decisive conflict on land.

That was the general situation in the world conflict when the United States became a belligerent on April 6, 1917. Three days later the British forces gained a brilliant success at Vimy Ridge, and they and the French scored time and again during the remainder of the 1917 fighting season but they had not sufficient strength of themselves to overwhelm the enemy and the United States was in no position to render appreciable help except at sea. American dreadnoughts and destroyers were not long in finding their way to the North Sea and there, and around the shores of Ireland, they did splendid work in curbing the piratical underwater craft of the common enemy. The closest possible co-operation prevailed between the British and American admirals, and together they baffled the supreme effort of the enemy to accomplish the defeat that the enemy's armies had failed to obtain.

In the meantime the United States set

Family of Czar of Russia.

to work determinedly to improvise an army and to build transports in the hope of aiding the allied nations to gain victory in the year 1918. As the months passed by and the destruction of Russia's military efficiency by the revolution became clear, it was seen that the United States would have to prepare to take a much larger part in the struggle than had been anticipated. Twenty-two days after the declaration of war, Congress passed conscription or the law providing for the selective draft. In a few weeks, the regular army, by volunteering, was brought up to a strength of 287,000 and the National Guard up to 625,000. On June 5, ten million young Americans registered and became available, when required, for the purposes of the national cause. Two weeks later, two million men, by drawing lots, were chosen for military service. This number was greatly increased in 1918. Among those enlisting were 300,000 colored men, many of whom won decorations on the field of battle.

By the end of June General Pershing, who was appointed to the chief command of the United States expeditionary forces, and the first contingent of American troops were safe on the soil of France. Training camps for American troops soon were established midway between Paris and the Swiss frontier. Within six months of the declaration of war it became known that American troops were fighting in the trenches on the Nancy front on the banks of the Rhine-Marne front. A few weeks later, in November, the Germans, in their eagerness to gain precise information, made an elaborate raid on the American front in which they killed three, wounded eleven and captured eleven men from the United States. Germany did not realize then that not a year would pass before the allies, with the material aid of a huge American army, would have beaten her to her knees.

The flag of America had been on the front since the first month of the war—

A. F. Kerensky, Russia's youthful Minister of War, formerly one of the greatest of the nation's heroes.

since August 1914. It had been there as a promise and prediction that America would follow it. The story of where that flag came from and what befell it was told in Current History by the Rev. S. N. Watson. And this, in part, is the story:

Under the burning skies of August, 1914, there was seen in the streets of Paris a procession of soldiers of the Foreign Legion. Over the heads of one of the groups floated the Stars and Stripes. The soldiers who formed this American group belonged to the Second Regiment of the Foreign Legion, and their devotion to France and to liberty had impelled them to enlist. Their flag was the first American flag on the French front. Some one had offered them this flag here in Paris, where the group was formed. They took it with them to Rouen, where they had their first camp. When Rouen was threatened by the enemy this regiment was sent to Toulouse. Returning from Toulouse to Paris for active service at

Foreign Minister Leon Trotsky, of the Bolshevik Russian Government.

the front, its members draped the starry banner over the side of the cattle car in which they were riding; and, arrived at the front, they always found a place of honor for their idolized flag. When they slept at night, or when they went "over the top" in an assault, one man or another always carried it with him.

At last came the moment when the United States took its place in the war. The little group of American volunteers was dispersed. Three were dead, one was grievously wounded, one was a prisoner in Germany. Of one of those now dead it is reported that he lay three days in his bed without saying a word and that suddenly he seized the flag and waved it, crying "I'm an American!" and expired.

One of the survivors sent the flag to the rector of the American Church in Paris, asking him to offer it to the French Gov-

ernment. The rector willingly accepted the task. He wrote to the Minister of War, telling of the request of his compatriots, and received this cordial reply:

"I accept with pleasure, in the name of the French Army, this glorious emblem, for which General Niox, Governor of the Invalides, has reserved a beautiful place in the Hall of Honor of the Musée de l'Armée. This flag will thus remain a striking witness of the devotion to France displayed by the American volunteers who, from the beginning of the war, came to fight in the ranks of our army for right and civilization."

General Pershing was present on the occasion when the flag was presented to France. It was on July 4, 1917, in the Court of Honor of the Hotel des Invalides, Paris. The French president was there, and the minister of war and Marshal Joffre. In making the presentation the rector of the American church in Paris said:

Gen. Diaz, Italian Victor, invited to visit America.

"What a prophet this flag has been, the first American flag that has floated over the heads of those who were fighting on the soil of France for the ideals which the banner represents, and which are the life and soul of France! It was not permitted to our gallant boys of the Foreign Legion to carry their flag openly, like the colors of a commander when he leads his soldiers

has come to pass, now that the great Republic beyond the sea is physically taking the place which it has always held in spirit. We are rendering a service to the comrades who died for France when we ask you to accept this emblem for which they gave their lives. It is also an inspiration to the living to be worthy of those pioneers who preceded them on the road

"Battalion of Death" Made Up of Russian Women.

to the charge, but they carried it just the same; one after the other, they carried this flag wrapped about their bodies as a belt—a life-preserver for the soul; one after the other, they were wounded—some were killed—and it was in this way that the American flag received its first baptism of blood in this conflict where now it has its recognized place.

"This flag has been the prophet of what

that leads to eternal liberty and the redemption of justice."

So the flag was placed among the treasured things of France in the heart of Paris, where it remains to this day. And General Pershing, with his staff about him, stood before the tomb of America's heroic friend and said:—

"Lafayette, we are here!"

The Decisive Campaign in the Year 1918

CHAPTER XII

GERMAN REVERSES AND GAINS — UNITED STATES SPEEDS UP — GERMAN GIGANTIC ATTEMPT AT CHANNEL PORTS — ALLIES UNITED UNDER FOCH — FOCH'S STRATEGY WINS GERMAN RETREAT — ENORMOUS ALLIED GAINS — GERMANY ADMITS DEFEAT — ARMISTICE SIGNED.

To understand how Victory came to the allied and associated powers in 1918 it is necessary that we shall see the main features of the war in the preceding years. In 1914 the Germans tried for victory in the west and failed. In 1915 the Germans tried for victory in the east and failed again. In 1916 the Germans made their main efforts on the Italian and French fronts but their attacks broke down and allied offensives at the Somme, on the west, in Galicia on the east and along the Isonzo on the southwest made appreciable headway in spite of the most desperate Teutonic resistance. The 1914 and 1915 offensives of the Germans, while they fell short of complete success, carried the battle-fronts from one to three hundred miles away from the German border on the west and the east and for several years kept the devastation of war out of the fatherland. Thus the defence of Germany was maintained at a safe distance from the towns and cities of Germany which actually suffered less damage than was experienced by those of the various allied countries on the continent which were victorious in the great struggle. Just so soon as the allies demonstrated their ability to sweep over the fair country of the Germanic peoples, the white flag went up and the enemy signified that he would submit to any terms the allies saw fit to impose.

The year 1916 was the first one in which the honors did not go to the Germans. In the two years next preceding, the Germans carried on extremely vigorous offensives, both of which came to within an inch of complete victory. But

in 1916 the only consolation Germany could get out of the campaign was that she improved matters near its close by concentrating all her reserve forces against Roumania and overrunning the larger part of that country. Nevertheless, she averted a disaster on the east in that year only by employing many hundreds of thousands of German troops on that front which were urgently needed elsewhere. Germany realized that the armies of Austria-Hungary were in an exhausted condition at mid-summer in 1917, and that but for the assistance given by Germany the weary dual empire would have been overwhelmed, carrying down to ruin with her Bulgaria and Turkey, and ultimately Germany, herself. As we saw in Chapter XI, it was the obvious inability of her armies under existing conditions to wage victorious offensives on either of the main fronts that nerved Germany to resort to unrestricted frightfulness on the sea and incur the hostility of the United States.

Nineteen-seventeen was a peculiar year in the war. It opened under the most favorable circumstances the allies had enjoyed up to that time, yet it was a year of terrible disappointment of the most unexpected sort. The setback experienced was not foreseen by Lloyd George in January when he said "We are on the verge of the greatest liberation the world has seen since the French revolution." Nor did the enemy's submarine venture accomplish its purpose. Thanks to the effective work of the allied navies, the conservation of food in America and the speeding-up of shipbuilding programs,

Russian Armored Cruiser "Rurik."

Austrian Coast Defense Battleship "Hapsburg" at Sea, Surrendered to Italy.

along with the rejection of non-essential cargoes, the enemy's plan to starve Britain and shut off military supplies destined for France, was a miserable failure. The year also saw the great North American republic, the United States, and plucky little Greece under Venizelos, enlist with the forces of civilization. The upset to the calculations of both the Huns and the civilized nations was provided by the revolution in March which swept away Czarism and crippled still

near Cambrai and almost simultaneously the enemy inflicted a disastrous defeat on the Italian armies on the Isonzo, capturing no less than 300,000 men and 3,000 guns, representing one-half of the artillery and one-fourth of the personnel of the Italian field armies.

At the opening of the year 1918 the anxiety of the allied nations was in marked contrast with the jubilant spirit of the German warlords. The enemy's highest command was convinced that it

Provisional government troops guarding the central telephone station in Petrograd from the Bolsheviks

further the military efficiency of Russia which already had suffered from the treachery of Germans in high places at the court of St. Petersburg. The impotency of the Russian armies from an offensive viewpoint enabled the Germans and Austrians to move large numbers of troops from the east to the western and southwestern fronts. Thus reinforced, the enemy countered effectively when British troops under General Byng broke through the German front with tanks

would not be possible for the United States to develop an army large and efficient enough to be any considerable factor in the year's campaign and it was equally certain that the armies of France and Britain, which had had to send help to Italy during the previous Fall, would be unable to prevent the piercing of the allied battle-front by new methods and the defeat in detail of the separated allied armies.

Von Hindenburg, the German gener-

alissimo, openly boasted that he would be in Paris in April. His chief lieutenant, Ludendorff, declared that nothing could rob Germany of victory. The Kaiser Wilhelm, himself, became so infected by the enthusiasm of his military advisers that he permitted the attack that was being prepared to be referred to as "The Kaiser's Offensive." Instead of pussy-footing for peace as he had been doing throughout 1917 he flaunted his political advisers, vetoed the no-indemnity-no-

strength by the enemy gave him a numerical superiority in March of but little more than one hundred thousand men, but he knew that his advantage in unity of command, standardization of organization and the ability to concentrate reserves where they could be of the most value, which the allies did not possess, was worth several hundred thousand men. He also knew that more troops were hurrying westward and by the middle of May would bring his numerical superior-

These Russian soldiers were made of the right stuff and when called upon to fight to down the enemies of democracy, willingly took up arms and fought a courageous battle.

annexation policy of the Reichstag and imposed an oppressive peace on Russia and Roumania, by treaties signed at Brest-Litovsk and Bucharest in February and March.

By the spring of 1918 the German armies in France and Belgium were at least half a million stronger than they were a year earlier while those of the allies, actually fit for the front, were little if any more numerous. This accession of

ity in troops actually available for the firing line up to five hundred thousand. Consequently, he had little doubt of his ability to destroy the allied armies before the military power of the United States could come into play. So great was his confidence that he figured that he could afford to take chances.

Perhaps the best plan open to the enemy was to concentrate against the French. The morale of France was

shakier and the army of France was more exhausted than were those of Britain. In April and May of 1917 the political situation in France caused the allies concern owing to the war-weariness of the people. It was possible, therefore, that even though the French army were not destroyed by a smashing German attack, the morale of the nation would not bear the tremendous increase in casualties involved in the French bearing the brunt of the German attack.

against the British and only reluctantly did he yield to Petain's request, which was backed up by the Supreme Allied War Council which had been formed to tide the allies over the supreme crisis of the war.

The plan that Hindenburg actually did put into operation was to attack the British on the 50-mile front extending from La Fere on the Oise river to the region of Arras on the Scarpe river. The enemy's generalissimo knew that the

A striking glimpse of Russia's army of women, 2,500 in number, drilling behind the trenches at the central western front.

General Petain, the French commander-in-chief, seems to have expected Hindenburg to concentrate against the French. The most likely point of attack against the French was in the Rheims region and Petain strongly urged General Haig, the British commander-in-chief, to take over twenty-eight more miles of front on both sides of St. Quentin but mostly south of that city. General Haig was not sure that the Germans' confidence would not lead to an attack

southern third of this front was weakly held, that its rear defences were not completed and that the bulk of the British reserves were well to the north behind a vital portion of the line while the bulk of the French reserves were well to the east in the region of Rheims where the French were awaiting an onslaught. He argued that if he could make a huge breach in the allied front at the point where the British front ended and the French front began, the German armies

could push well through, turn, and then roll up the lines of the separated allied armies, driving the British northwestward towards the Straits of Dover and the French southeastward towards the Swiss frontier, in which case Paris would be gathered in without trouble and the allied armies be destroyed at leisure.

During her last bid for victory, made on the western front in 1918, Germany used 3,000,000 men. Of these 2,500,000 were on hand and available when the great opening attack was made upon the British on March 21st. The British armies at that time held a front of 125 miles stretching northward from the Oise river in France, to a point just beyond Ypres in Belgium. The order of the British armies from south to north was Fifth, Third, First and Second, their commanders, in the same order, being Generals Gough, Byng, Horne and Plumer. Although the British held but little more than one-fourth of the entire battle-front between Switzerland and the North Sea they really were playing a much more important part than the length of line indicated for opposed to them were two and a half times as many Germans to the mile as were to be found elsewhere. This was true even before the Germans massed their troops for the final offensive.

The methods the Germans would use in their attack were known to the allies. The British army headquarters frankly published a statement in the middle of February in which the British officers said that the Germans, after training their troops for a dash over destroyed trenches and for open fighting beyond were already bringing their men forward towards the line and that after a few hours' violent bombardment the assault troops, which would stealthily enter the front trenches during the night after a long march, would "go over the top." It was expected that powerful tanks, shells combining high explosives and gases and vast numbers of mobile guns that would

Premier Nikolai Lenine of the Bolshevik Russian Government.

keep pace with the advancing infantry, would feature the German onslaught. This whole program was carried out as anticipated by the intelligence corps of the British army with the exception that the German tanks played a very unimportant part.

All through the winter of 1917-18 the British army prepared for a defensive in the first half of the 1918 fighting season or until sufficient troops from America were ready for offensive operations. It was considered quite possible that a retirement from St. Quentin to the Somme bend at Peronne might be forced, and the bridgehead at Peronne was very powerfully fortified and the whole line of the Somme prepared as a defensive position. It was felt that more ground could be yielded safely here than farther north and it was in the Arras region that the strongest measures were taken to check an enemy advance. Along the whole front, the first two or three miles back

from No Man's Land constituted an outpost line studded with redoubts and machine gun nests. It was hoped that the Germans, after their preparatory bombardment, would suffer staggering losses in trying to overwhelm the survivors of this thinly-held outpost area and that when they reached the main battle-positions on the far side their assaults would collapse.

All the weather conditions favored the German attack. The season was excep-

through and immediately it became necessary for the forces on either side to retreat in order to avoid being hopelessly outflanked.

To say that the world was astounded and thrown into a state of consternation by this German success is to state the truth mildly. The average person had come to believe that siege warfare would be continued until the end of the war. People had been told so many times that it was beyond the power of either side to

Flight of Russians. The camera caught a handful of the thousands as they fled in disorder from the foe.

tionally advanced and extraordinarily dry but the enemy waited until he was sure that a heavy morning mist would overhang the battle area. Then after a bombardment exceeding in fury anything the world ever had known the storm troops dashed forward. On the first day they broke well into the outpost positions but made no alarming progress. The next day, seeing signs of weakness in the St. Quentin region, the enemy redoubled his efforts in that quarter and broke clean

break through and the slow variation of the battle-line in other years had so destroyed their hopes that they looked for nothing very spectacular on land and certainly not a war of movement. The fact that for years the British had not lost a gun and that in 1916 and 1917 the British had conducted repeated offensives against the enemy with ever-increasing success, had lulled them into a sense of security which even the desertion of Russia with one-half of all the allied soldiery

and the disastrous defeat of the Italian army a few months before had not swept away.

The German success in the closing days of March were most impressive. Two days after the battle began Berlin claimed the capture of 16,000 British soldiers and 200 guns. These figures soon grew to 70,000 British prisoners and 1,200 guns captured. The efforts of General Gough to stay his retreat at the Somme were not successful. The fortified British defences on a 60 mile front soon were obliterated. The dryness of the season enabled the Germans to break across at unexpected points and fearing that his somewhat disorganized army was in no condition to make a stand and that a debacle might result from a rash attempt to hang on, General Gough ordered the abandonment of the great Peronne bridgehead.

As the enemy advanced, gap after gap opened in the living battle-front the allies tried to present to the foe. The British, aided by the French, had the utmost difficulty preventing the enemy from getting far to the rear of their main forces. Cavalry had not shown to advantage on other occasions but the British commander-in-chief himself bears testimony to the fact that on this occasion but for the heroic sacrifices made by the cavalry that dashed forward to fill the gaps as they appeared, it is hard to see how the tide of defeat could have been stayed. Labor units under Generals Grant and Carey, Canadian and American engineers who happened to be in the line of advance, and even Chinese coolies were thrown into the breaches. These, with the aid of troops hurriedly detached from the nearest French armies and of Canadian cavalry, and some light tanks, performed invaluable services. Without them, Amiens could not have been saved.

Advancing at the rate of seven miles a day for six days, the Germans by March 28th, were 43 miles beyond their starting point at St. Quentin and their guns near Montdidier were shelling the most im-

portant of the allies' lateral lines of communication, which ran through Amiens. At the same time projectiles from a marvellous cannon were dropping on Paris from a point more than 80 miles away in the forest of St. Gobain, near Laon.

It was hoped by the Germans that this new form of frightfulness, and the exaggerated stories of panic-stricken civilian refugees, would cause the complete collapse of the morale of France. In this the enemy was disappointed. Premier Clemenceau rose to the occasion by a display of sublime courage. The French army never showed to better advantage. It quickly put into effect plans for mutual co-operation that already existed, and took over ten miles of British front which, by the determined advance of the enemy soon was stretched to a length of fifty miles, extending easterly and westerly and

Ferdinand, King of Roumania.

not northerly and southerly as before.

Innumerable deeds of gallantry performed by individuals and by units which were performed in the path of the German advance never will be chronicled. Only a few have been recorded. One of these is told by General Haig in his official report. The enemy had swept over Roisel, Peronne, Ham, Nesle, Bray, Chaulnes and Roye and 100 men of the 61st Brigade, 20th division, were told off under the command of Captain E. C. Combe, M. C., to make a stand at Quesnoy and cover the retreat of their division. From early morning until six at night this little detachment fought against terrible odds until finally the order came for it to retire. By that time only eleven of the gallant one hundred survived. The other eighty-nine had sacrificed themselves that their fellows might effect their retirement and that the Great Cause for which the allies fought might prevail.

Within ten days the enemy's drive

south of the Somme river definitely was checked, notwithstanding the fact that General Gough's Fifth Army virtually had been destroyed, and its commander assigned to the task of preparing field defences.

On March 26th, the British and French government appointed General Foch as governments appointed General Foch as in the western arena. Two days later General Gough was transferred and General Rawlinson was placed in command of the British forces south of the Somme river. At this time the Fourth British Army, that Rawlinson previously had commanded, was in reserve. North of the Somme the battle-front stabilized following the crushing defeat of an attack launched against Arras on March 28th. Byng's Third Army had come through the ordeal with flying colors, although on several successive days it was dangerously menaced by German troops that kept filtering through and opening up new gaps. At last every hole was plugged up and every outflanking movement baffled and the enemy was forced to turn elsewhere in the hope of gaining a new success.

It always will be a matter of controversy how much, if at all, General Gough was to blame for the British reverse in March. His commander-in-chief emphasizes the fact that while Byng with his Third Army held only 27 miles of front, with an average of one division to 4,700 yards, Gough with his Fifth Army held a front of 42 miles, with an average of one division to every 6,750 yards of front. In other words, relative to its task, the Fifth Army was one-third weaker than the Third Army. On the opening day of the attack the enemy launched 64 divisions against 29 British divisions, of which only 19 actually were on the firing line, the others being in reserve. Before this first drive spent itself in front of Amiens, the enemy had used 73 divisions and the British 42 divisions.

The critical situation facing the allies in the first week of April easily can be

Montenegrin Standard Bearer.

imagined. The Fifth British Army virtually had been destroyed by the German attack. Probably between one-half and two-thirds of its numbers had been killed, wounded or captured. The remainder were in no condition for immediate fighting and had to be sent to quiet parts of the line or to reserve camps for rest and reorganization. Even the Third Army was in a serious state, from fighting night and day without sleep and sometimes for days at a stretch without food. Thus one-half of the entire British forces in France had been destroyed or had its fighting efficiency dangerously impaired. At the same time the length of battle-front that had to be defended, in the open and without the aid of elaborately fortified systems, had increased from fifty to one hundred miles. Obviously, the British were in no condition to take care of all the new front, and the French army under General Fayolle rapidly extended its front westward, and with the aid of other French troops concentrated 300,000 men on the southern half of the huge salient made by the German advance. This

drain on the French reserves and the weakening of the French front along the Aisne and elsewhere offered the enemy the alternative of making a drive southward towards Paris against the French or westward towards the Channel ports against the British. As the British were in much the more serious condition, the enemy elected to resume his offensive operations by a smash westward from the Aubers ridge on April 9th.

Before the German drive in Flanders developed it became clear to most observers that the decisive struggle then progressing would continue throughout the spring and summer and that victory would depend on the speed with which the belligerents put their last reserves into the fray. The enemy, having failed to gain complete success in March, was sure to scour all Central Europe for men. The allies, on their part, sent out messages for help to the outermost parts of the earth. In one of these appeals, the British premier said to Canada's governor-general "Let no one think that what even the remotest of our Dominions can now do can be too late." The allies also made the most urgent representations to the United States to speed up the transportation of troops to Europe. It was found that the United States was making elaborate preparations for war in 1919 and 1920 and was far behind in its program for providing airplanes, guns and munitions in 1918. The American army was without adequate divisional organization for the troops when they landed in France and the training of the troops could not be hurriedly completed on the continent. The allies, however, persuaded the United States to rush forward troops without their full equipment, promising to make up all deficiencies, themselves, so far as possible, and to assist in the training. General Pershing splendidly co-operated by offering to permit trained American troops to be brigaded for service with British and French troops and President Wilson agreed that if the

Prof. Thomas G. Masaryk, President of Czecho-Slovakia, Signing the Declaration of Independence of Czecho-Slovakia, in Independence Hall, Philadelphia.

allies would find sufficient vessels, American troops would go forward at the rate of 250,000 a month.

By the opening of April the Germans already had overrun 1,200 additional square miles of French soil and the hearts of the French people, who had been hoping for nearly four years to see the enemy expelled, nearly stopped beating. It appeared to be likely that the second drive would be made in the north, and that the

ports of Calais and Boulogne. By April 8rd the world knew that trained American troops were marching down the roads of France to share in the great ordeal on the German offensive front. The total number of American troops ready for service at that time was about 200,000.

A number of circumstances favored the German drive in Flanders in April. Part of the front to be attacked was manned by Portuguese who had been

enemy would try to crowd the allies out of the 300 square miles of Belgian soil that they had managed to hold since the beginning of the war. Colonel Repington, the London *Times'* correspondent, had expressed the opinion that "grave strategic decisions may not be only due but overdue", by which he meant that perhaps the allies already should have abandoned Ypres and the rest of Belgium and northwestern France and the Channel

long without a rest period, who never had experienced a real offensive and who were in course of removal from the trenches when the attack was launched. Another part of the front was held by hard-trying veterans who had been put in this supposedly quiet sector after being terribly decimated in the March fighting. Here, too, the dryness of the season made possible a quick advance over the usually muddy lowlands on both sides of the Lys

river. At a point so far north, also, it was much harder for the French and American troops to render assistance. By keeping after the overworked and partly exhausted British army, the Germans hoped to break the backbone of the allied resistance and gain a triumph that would repay them for all their losses in the colossal struggle.

The fact that the British were anticipating an attack on the Flanders front or in the Artois did not save them from a second serious setback. The Germans smashed forward on a 35-mile front to a depth of 13 miles and in the first three days of the attack captured more than 20,000 men and 200 guns. The line opposite the Portuguese was completely pierced and only by the most desperate gallantry of various British units was the gap closed. The fact that the Australian troops some weeks before had been moved south to the Ancre river region made it the more difficult to redeem the situation. The enemy drove up the Lys valley and turning northward menaced the line of retreat of the British forces in the Ypres salient. As they moved northward up the slopes of the ridge on which Mount Kemmel stood out like an island, it became evident that the British had not the power to wage an immediate counter-offensive and that it was advisable to reduce the famous Ypres salient so as to be in a better position to prevent a breakthrough that would give the enemy the Channel ports. Then on April 17th, eight days after the enemy's drive began, it was announced that Messines, Passchendaele, Zonnebeke, Hill 60 and Hollebeke, and all the high ground that the British, Canadian and Australasian troops had taken at the cost of 150,000 casualties in 1917 had been abandoned to the foe. It is known now that this was in accordance with plans drawn up some time before. These were carried out with remarkable success, so that the enemy was full of chagrin when he learned that the enemy had eluded his grasp even before

Japanese Officers Representing Japan
at Allied Councils.

he stretched out his hand. By dodging the blow the enemy was preparing in Belgium, General Plumer threw the enemy off his stride and made it necessary for him to go several miles over shell-mutilated ground and prepare all over again for a great advance.

At this time General Maurice, the director of British military operations, an official located in England, was so concerned about the course of operations and possibly so prejudiced against the appointment of a generalissimo in the person of Foch, a military officer of a foreign nation, that he broke into print with the question "Where is Blucher?", thereby intimating that the allied commander-in-chief was not properly, and promptly supporting the British forces in the field. For this extraordinary piece of presumption he was removed from office. It would have been impossible to retain him and preserve sympathetic relations

with the sorely-tried French republic. The answer to General Maurice's question came in a few days when French troops went into the firing line north of the Lys river and made vigorous local counter-attacks.

A month after the enemy had begun his spring campaign against the British the enemy still was going strong, but in reality he had shot his bolt against the British. Although here and there evidences of demoralization had been seen, on the whole the British army never had fought better against terrible odds. Small groups of men stood their ground stubbornly when hopelessly outnumbered and died to the last man after taking an awful toll of the advancing enemy. The enemy knew that this year's campaign was his last great gamble, with World Power or Downfall as the stakes, and that having gone into the venture there could be no halting betwixt two opinions, or counting of the cost. He was conscious of the fact that his own people and those of his allies were weary of the strain of the war and that unless a complete triumph were secured at once they would refuse to go on with the struggle. And so the enemy frantically spurred on his devoted soldiery.

The marvellous effectiveness of the steps taken by the British government to baffle the enemy's offensive campaign was evident within thirty days of the initial attack. Perhaps the British setback would not have been as great if the same degree of energy, combined with vision, had been shown earlier in the year. At all events, the British were well supplied with reserves of young and partly-trained troops, and with reserves of ammunition, guns and airplanes, all kept in England, and by miracles of transportation it was possible to say that within a month 200,000 fresh troops had been put into France and the numbers and equipment of the British army brought quite up to what they were before the German offensive campaign began. By that time, also, it

Roumania's Queen Marie, a staunch supporter of the Allied cause.

became known that the Germans had used 1,600,000 men in the attacks during the month, of whom more than 1,000,000 had been used against the British, 300,000 against the French and another 300,000 against mixed forces of British and French.

On April 25th Mount Kemmel was in the hands of the Germans but their progress had become painful and very slow. They held positions in a narrow salient against which a punishing fire could be brought to bear from north, west and south, and it seemed likely that their mad rush again was restrained and that they would be forced elsewhere to obtain a spectacular success. During the seven weeks between March 21st and April 30th, the armies of Britain were harder pressed than ever before in their history and they came through with flying colors. Not in the days of Wellington or Marlborough had they shown greater tenacity

Smoke Screen for Protection Against Attack.

or more conspicuous gallantry. Fifty-five British divisions had fought to a standstill no less than 109 German divisions.

It was about this time—on April 23rd—that the British navy essayed to do what the British army in 1917 had attempted, namely, to prevent the enemy from using the German submarine bases on the Belgian coast at Ostend and Zeebrugge. Actually there was but one submarine base and that was at Bruges,

at Ostend. Later, the best known of the vessels used in the raid at Zeebrugge, the *Vindictive*, which had put the landing party on the Mole, was sunk as a blockade vessel off Ostend. These brilliant performances by British seamen were undertaken because of the evidence that for months the British land forces would be in no position to deny the enemy the use of his submarine bases. Their success did much to stimulate the resolution of the British people to persevere until

Roumanian army reorganized, ready to strike death blow against Germans. The Roumanian army had been reorganized by the French, and made ready to fight again.

some miles inland, from which canals ran to Zeebrugge and Ostend. The spectacular raids made on the canals at these places, in which 150 vessels participated, were very successful and for five months denied to the enemy the use of the Belgian coast for the purposes of submarines. Three obsolete British cruisers, filled with concrete, were sunk in the shifting sands at the mouth of the canal at Zeebrugge and two at the mouth of the canal

German militarism was destroyed, no matter what the sacrifices.

When May was reached conflicting opinions were expressed by various authorities as to the war outlook. It was reported that Lloyd George was almost irritated by the quiet confidence of General Foch and that turning to the allied generalissimo he asked whether he meant to be understood as saying that he would be rather in the position of the allies than

in the position of the Germans. It is said that the allied generalissimo answered in the affirmative. That may have been the case, but General Foch undoubtedly was looking at general conditions, the vast reserves that were hurrying towards the allies from America and to the final outcome of the war rather than to the prospects for the immediate future. General Robertson of the British army was complimented by the English press at this time for warning the British people that they must expect a long war, which was an unfortunate view to express because it was the very one that had prevented the United States from being ready for the fray in the spring of 1918 and the one, which, if acted on, was most likely to cause the allies to leave undone those extreme things that needed to be done to baffle and defeat the enemy once and for all during the season's campaign. When the middle of May was reached, the view of the British headquarters staff, as semi-officially uttered through the Associated Press was that "for the whole summer the situation must continue to be an anxious one."

By the middle of May the world learned that General Foch had been placed in command of all the allied forces between the Adriatic and the North Seas. Serious as matters were on the French front, there was no certainty that they would not become worse because of the British and French having to increase the aid they had extended to the Italians toward the close of 1917. The Italian army was so weakened by the Isonzo disaster that the allies during the trying days of the following March, April and May had to ever bear in mind that the Italian armies, although much improved in morale and equipment, might not be able to stand alone. It was clear that the moves made on the western and south-western fronts really would be part of one great campaign and that the allied cause was almost as much concerned with one front as with the other. On that account it was desirable that the reserves of

Last chapter of the famous Dumba incident. Good-bye, Doctor Dumba. Doctor and Madame Constantin Dumba aboard the S. S. Nieu Amsterdam, which carried the former Austrian Ambassador and his wife back home on the request to his government by the United States that he be recalled.

all the allied nations should be pooled and be located and used in the way calculated to give the best results. When Foch took over supreme command of the Italian forces, it was understood that he had under his control 1,200,000 British troops, 1,500,000 French, 250,000 Americans and 1,000,000 Italians. These figures particularly of Americans and Italians, did

not represent all the troops in reserve and in training.

On the 27th of May the German commander-in-chief turned from the British to attack the French. He had been amazed to find that the British had 200,000 men whom they speedily could bring over from England to the battle-front and the fact that the British had made good a large proportion of their losses and that the Germans had suffered casualties estimated at 550,000 as against the British 360,000 casualties, was quite

had been weakened appreciably by the extension of its front westward and that the only place where the French were prepared and awaiting attack was east of Rheims. They also may have emphasized the fact that the numerous spurs running from the Aisne ridge down to the river would facilitate the German plan of infiltration and permit large forces to pass in comparative shelter behind the spurs into the valley and the bridgeheads beyond, thus cutting off the allied troops remaining on the high ground. Another

"Herzog Karl," Austrian Battleship Surrendered to Italy.

disconcerting. There are some indications that the Kaiser Wilhelm and Von Hindenburg were disposed to continue all their efforts against the British but that Ludendorff, Von Hindenburg's quartermaster-general and chief lieutenant, sided with the crown prince in demanding that a terrific drive be made against the French on the Aisne heights.

In support of their views, the crown prince and Ludendorff probably urged that the French front north of the Aisne

consideration was the fact that near the point where the battle-front curved away from the ridge and passed southward across the Aisne, some overworked British troops had been put in for a rest.

Whatever led the German leaders to change their plans, the fact is that after pounding the British for two months and six days they gave the British a much-needed rest and turned their attentions to the comparatively fresh French armies. They were then sixty miles away from

Paris and fifty miles from the Channel ports. Obviously the allies had much more freedom of movement when the Germans turned southward than they had when the waters of the Channel were so close behind them. An advance of twenty miles westward at almost any point and of ten miles at some points probably would have made it advisable for the allies to abandon Dunkirk, Belgium and the Channel ports and take up a front along the lower Somme river.

in March did not indicate that the morale of the British troops, which had been good throughout four years of war, had deteriorated, and whether the generalship was not even worse. It may be that this feeling was weakened by the developments following the German drive beginning on May 27. On that day the German troops swept across the Ailette river, stormed the Aisne heights on the far side and sweeping southward reached the Aisne river in the rear of many thou-

The Great German Battle Cruiser "Moltke" among those surrendered to the Allies.

On the whole it appears that the Germans were guilty of a first-class blunder when they gave the British a breathing spell that lasted for nearly two months or until the allies were able to return to the offensive. The best that can be said for their tactics is that they hoped by a sudden change of front to catch the allies off their guard.

Up to this time there were some people in France who were wondering whether the great reverse suffered by the British

sands of allied troops. The British troops sandwiched in among the French were put in a particularly precarious position by the collapse of the French front immediately west of them. The troops of both nations, however, fought gallantly. They were attacked by forces outnumbering them by at least two to one.

Four days after the Aisne attack began the enemy was in full possession of the famous Chemin Des Dames (Ladies' Walk) and the territory taken by the

French at the cost of well on to two hundred thousand casualties in the abortive Nivelle offensive in April of the previous year. Not only so, but the enemy was 30 miles beyond his starting point, having driven a mighty wedge into the allied front that reached all the way to the Marne river. The front of attack was more than forty miles wide. During the first three days of his advance the victorious enemy captured more than 400 guns and more than 45,000 prisoners, and

Marne river, sixteen miles apart. The check to the enemy administered by the Americans came at a critical moment. The enemy for the second time in the war was across the Marne river and heading for Paris. The Americans, with some French troops, tackled the enemy at Chateau Thierry and at Jaulgonne, on the east, and hurled the enemy back to the north bank. The enemy was not in great strength, fortunately, but his loss of the bridgehead held up his advance

Types of Austrian Troops That Invaded Roumania.

British papers printed statements to the effect that the whole war situation had become one of "the utmost gravity." During their advance to the Marne the enemy crossed two important lateral lines of communication, including the railway running to Verdun from Paris through Rheims.

June the 4th saw some signs of improvement from the allied viewpoint. On that day troops from the United States came into action at two points on the

and made it necessary for him to make elaborate preparations for forcing the river. The general situation still caused uneasiness and Premier Clemenceau, whose frequent visits to the front did much to inspire confidence on the part of both civilians and military, took the precaution of ordering the creation of a Committee for the Defence of Paris.

It has not been made clear as to what extent, if at all, the defeat on the Aisne heights was due to the faulty staff work

A United States Soldier Completely Equipped for Service. On his back this American fighting man carries his blanket roll, small shovel, bag, etc. His canteen is at his belt. He is armed with a 30 calibre U. S. Army rifle. Minimum weight for maximum efficiency is the principle upon which his whole outfit has been designed.

of the local commander. There are some indications that the defensive measures

were not of the best. The measures put into effect two weeks later when the enemy tried to widen his offensive front and merge the new Marne salient with the Montdidier salient by attacking on both sides of the Oise river were extraordinarily successful and the local counter-attacks were much more powerful and effective than on any previous occasion. American troops near Montdidier had some part in delivering these counter blows. While the enemy advanced a maximum distance of six miles on a front of thirty miles he did not gain a spectacular success, a fact which was not covered up by the declaration of the Prussian War Minister that as a result of the two blows a large part of the French army had been defeated.

The Aisne attack was a most spectacular victory, bought at a very low price, but the attack on the Oise sector undoubtedly cost the enemy more casualties than it cost the French and the enemy made no appreciable progress towards his goal, which was the destruction of the British and French armies before the power of the United States could be made to tell. American troops continued to arrive at the rate of a quarter of a million a month and already those that had preceded them were rendering aid of some consequence.

The severe check administered to the Germans early in June at the Oise gave the enemy something to think about. It forced him to take time to make more careful preparation for his next attack which, in view of the advance in the season, necessarily had to be much more successful than any that had preceded it. This delay was imposed on the enemy when it was only too plain to him that speed was the essence of victory. The situation for the enemy was most exasperating. He was tantalizingly near to the Channel ports and tantalizingly near to the French capital, possession of either of which would have given him a powerful lever in securing peace. No doubt he

also felt he was tantalizingly near to overpowering the hard-pressed allied armies which, however, always seemed to have just enough strength left to baffle his efforts to deliver the coup de mort.

A circumstance that added to the irritation of the enemy was the tardiness of the Austrians in striking on the Italian front. The German warlords felt that a triumph on the Italian front, where the allies held vulnerable positions, would help materially their campaign in France.

Cheered by these developments, Lloyd George declared that "there is not the slightest doubt in my mind, surveying the whole facts, that our victory will be complete." A few days later, Von Kuehlmann, the German Foreign Minister, was dismissed for stating that a military victory was beyond the reach of either side, a view he probably was put up to express in the hope of evoking a favorable response from the allied side, and a view that the Kaiser and Von Hindenburg are

The great Teutonic drive into Russia. Austrian troops with arms stacked enjoying a brief rest in the mountains.

In the middle of June the Austrians did attack, but after an opening success of considerable dimensions, nature opened the floodgates of heaven and severed communication with the far bank of the Piave river, and the Austrian offensive collapsed. Almost simultaneously the Germans made a minor attack, with 40,000 men against the acute salient around Rheims, and this, too, was a dismal failure.

supposed to have shared. The extremists among the warlords were furious at this moderate statement, which was not unreasonable considering that the German losses of nearly a million men in less than four months had not brought a decisive success.

An estimate of the German and allied casualties in the four drives of the German offensive campaign taking place before the first of July is as follows:

	German casualties.	Allied casualties.
March 31.....	350,000	200,000
April 9.....	200,000	160,000
May 27.....	125,000	150,000
June 9.....	225,000	150,000
Total casualties	<hr/>	<hr/>
Mar. 31-July 1	900,000	660,000

The fifth and last of the drives of the German offensive campaign in 1918 began on July 15. The allied battle-front, which formerly had stretched in a general direction northerly to the North Sea from the Aisne, now appeared as a bent and twisted thing. It bagged alarmingly in three places as a result of the driving forward of the German battering-ram. These huge salients were west of Lille in the Lys valley, between Arras and Soissons and between Soissons and Rheims, the last two being referred to sometimes as the Montdidier and Marne salients. Between these two salients in the German line the allied line curved sharply away from Paris around the forests of Villiers-Cotterets and Compiègne. On the south end of this salient, between the Marne and the Aisne, French and American troops applied persistent pressure during June and drove the enemy back two or three miles but without reducing the Marne salient to a degree dangerous for the Germans.

The enemy, as we have seen, was very anxious to merge the Marne and Montdidier salients and acquire a broad front opposite Paris from which he could maintain a continuous bombardment of the city with a multitude of guns capable of firing forty miles, but the allied resistance here was too strong, and he determined to wage east of Rheims the offensive he had prepared earlier in the season, attacking southward, at the same time as he tried to move southward and south-eastward from the east side of the Marne salient. He was aware that Foch had massed troops between the Marne front and Paris and he hoped that by eluding these by going round them on the east,

A United States Naval Militia Bugler Sounding a Call "To the Colors"

he could surround Rheims and sweep over Epernay and Chalons with ease, and three days later be forty miles from his starting point and far to the southeast of Paris. Such a success would have placed the allied armies in a more serious position than they were in the opening month of the war.

The last German offensive in the war was doomed to failure from the outset.

President Wilson and his Cabinet.

The enemy used half a million men in this effort and would have put in more had his initial attack obtained success. He made the cardinal error of putting into the Marne salient, which was 25 miles deep and only 25 miles across, hundreds of thousands of men with the vast supplies of material required for a great drive. His lines of communication within the salient were vulnerable to shellfire from three directions and his thickly-massed troops were sure to encounter a

better. Under the skilful leadership of General Gouraud, they withdrew from the heights of Moronvilliers, evaded the blow dealt at them and terribly decimated the enemy as he advanced across the shattered outpost positions. The enemy's advance here averaged only a mile and a half on a 25-mile front. The enemy was in such apparent difficulty in his isolated position south of the Marne and he had suffered such heavy losses at all points without compensation, that General Foch

Nation's defense in the hands of these men. The Council of National Defense and the Advisory Commission and the directors and secretaries of both bodies in joint session in the office of the Secretary of War, Washington, D. C.

punishing fire. The consequence was that the best the enemy could do west of Rheims was to advance a maximum distance of five miles on a 25-mile front, the average being only three miles. This advance enabled him to gain a precarious foothold or bridgehead south of the Marne. Here the Americans did exceptionally well and they and the French always were masters of the situation.

East of Rheims the French did even

concluded that the time had come for snatching the initiative from the enemy. And so on July the 18th, three days after the opening of the Germans' final offensive effort, the allied generalissimo let loose the allied thunderbolt and French and American troops began the first allied offensive of the year by attacking the 25 miles of German front nearest to Paris. In this onslaught the allies used 200,000 troops.

The Honorable Robert Lansing, Secretary of State by reason of the resignation of Secretary Bryan.

The allied attack was successful beyond all expectations. As the German storm troops facing eastward battered themselves in vain against the allied defences on the east side of the Marne salient the allied offensive troops, also facing eastward, smashed in the western side of the salient on which the Germans were standing on the defensive. Thus an attacking allied army was moving in the same direction, roughly, as the German attacking forces on the far side of the salient and at a distance of only 25 miles in their rear, a situation seldom seen in warfare. In the first two days of their attack the allies advanced eight miles, capturing 17,000 Germans and 360 guns. Within two weeks, notwithstanding the most frantic opposition, they had advanced 16 miles, the Marne salient had been reduced, 500 square miles of the soil of France had been redeemed, and 30,000 Germans and 500 cannon had been captured.

The turning back of the tide of German invasion in 1918 was due to the same causes as explain the ebbing of the tide of German militarism in 1914. The enemy was overconfident and underrated the offensive powers of the allied forces, and as a result, made inadequate provision for the protection of the right flank of his advancing armies. And so when the allied shock troops attacked on July 18 under General Mangin they turned the flank of Von Boehm's army as General Manoury four years before, at the previous battle of the Marne, had turned the flank of Von Kluck's army. On each occasion the enemy was taken at a serious disadvantage and had to retreat. By tremendous effort and at great sacrifice immediate disaster was averted, but the setback in both battles deprived the Germans of their chance of victory and doomed them to ultimate defeat. In 1914 the commander-in-chief of the German armies was Von Moltke; in 1918 it was Von Hindenburg.

No greater mistake can be made than to imagine that General Foch had lured

Getting Ready to Pay the Boys at Camp Meade. No less than \$300,000 is in sight here.

the Germans on to the Marne by pretending weakness and that he was sure of victory when he struck back. The whole period from March 21 to July 15 was one of genuine anxiety for the allied military leaders and statesmen and as late as the middle of June the allies were discussing whether it would be better to evacuate Paris or the Channel ports. When the Germans began their last offensive on July 15, they had a superiority of half a million men on the western front or three times the numerical superiority they had on March 21st. A much larger proportion of their men, however, had become battle-worn owing to unparalleled exertions. There is not the slightest doubt that General Foch was gravely concerned about the degree of success the enemy might gain in July. He felt that the allies could not afford to give more ground as any considerable German advance would imperil the integrity of the allied armies or at least put the enemy in a position where he could bring great pressure on the allies to make peace.

General Foch took terrible risks in July in preparing to prevent a German advance on Paris. He concluded that the enemy meant to make an attack in that direction and therefore he withdrew 200,-

Secretary of the Treasury, William J. McAdoo, Resigned. Mr. McAdoo, the son-in-law of the President,
U. S. Railroad Administrator, Resigned.

000 men from positions north of the Somme and held them in readiness in the region between Paris and the nearest point on the battle-front. Superior German forces under Prince Rupprecht of Bavaria still were menacing the vital northern sector and had the German strategists learned of the secret movement southward of allied reserves they might have made another dash forward towards the mouth of the Somme and imperilled all the allied troops in Flanders and the Artois. The enemy appears to have been ignorant of the secret concentration of allied reserves opposite Paris at the expense of the northern allied front and when at comparatively low cost the allies on the Marne and in the Champagne baffled the enemy's blow on July 15, without employing the bulk of their reserves, an obvious opportunity to upset his plans and secure the initiative developed.

We have the authority of General Foch for the statement that he had in his mind no grandiose plan for winning the war when he turned to the offensive. In self-defence he had to strike back at the Marne and later on he found opportunities for waging a genuine offensive campaign. The enemy's stupidity in putting his head into the Marne salient noose gave Foch his first chance, and finding his first drive so successful, Foch thought he would try another, and the second led to the third, and the offensive front gradually widened out until the attack extended to the whole 200 miles of front between Verdun and the North Sea. The main idea of General Foch in the early weeks of the offensive was to put the enemy into a new hole just before he succeeded in getting out of another hole. On each occasion the enemy had to engage additional portions of his reserves until finally he lost his offensive power and even the ability to defend himself. The factor that contributed most to the success of the successive allied drives was the extraordinary secrecy of concen-

Soldiers charge German dummies for Red Cross benefit at Fort Hamilton. Besides the event shown in this picture, there were artillery and machine gun drills by the soldiers.

tration against the sectors to be attacked. This, also, was the real explanation of the advantages gained by the enemy in his four-months' offensive campaign. At one time it was thought that the huge quantities of war material and the masses of men required for an offensive could not be brought up to any front without being seen by the enemy in time to give ample warning. It also was thought that weeks of bombardment were necessary to reduce the enemy's fortified positions. But as the quantities of munitions and the number of guns along the entire front multiplied, their significance became less obvious, as indicating the nearness of an offensive, and in time it became apparent that a bombardment of but a few hours would suffice to obliterate the strongest fortified systems. Consequently, all that remained to do to obtain the tremendous advantage of surprise and bring about a war of movement was to have hundreds of thousands of men ready to hurl through the breach before the enemy could discover the plan and make a similar concentration opposite the breach. It was this new element of surprise due to the artillery of the offensive mastering the fortified systems of the defensive that revolutionized warfare on the western front and that distinguished the campaign

Hon. Newton D. Baker, Secretary of War.

of 1918 from those that preceded it.

Foch's second blow, delivered with a view to retaining the much-prized initiative, was struck by British and French troops south of the Somme river on August 8th. In this attack most of the glory went to the Canadian and Australian troops, which with the 51st British divi-

without it being necessary to employ them, the Canadians were given a special course of training back of Arras. When the time came for the attack on the Somme front, Foch gave orders for the strictest secrecy and for elaborate measures for deceiving the Germans. While the bulk of the Canadian troops were

sion and a few others comprised the best assault troops in the British army. The Canadian army corps had been on the Vimy front in March and then were taken out and moved south so as to be ready to cope with the enemy in the event of a deadly breakthrough. The crisis passing

smuggled under cover of night to the Amiens region, some battalions were moved northward to Belgium, where they moved down the roads in broad daylight with colors flying and bands playing, and were put into the firing line near Mount Kemmel. Here telephone conversations

The Hon. Josephus Daniels, Secretary of the Navy.

were put on for the express benefit of the German listeners and enemy spies. A few American troops and British shock troops also went through movements suggesting that an attack was about to be made. Then when the enemy was taking steps to meet a tremendous attack on the Mount Kemmel front, the camouflage troops were rushed back to their own units and the mighty drive up the Somme valley began.

13 miles on a front of 25 miles taking 14,000 prisoners and hundreds of guns during the first day of their advance. Many units took more prisoners than the total number of their casualties. By the end of the first day the main line of communication and retreat for the enemy within the Montdidier salient was gravely threatened and the enemy was under the necessity of evacuating it at a much faster rate than he abandoned the apex of the

Battleship Nevada, Super-Dreadnaught, on Speed Trial.

The second battle of the Somme was a splendid victory for the British and French. The Fourth Army under General Rawlinson represented the British. The enemy was completely surprised and swept off his feet. With the aid of tanks and thousands of mounted troops, the allies advanced a maximum distance of

Marne salient. By August 12, the enemy was retreating on most of the 100-mile front between Amiens and Rheims. Instead of being in Paris as he had fondly hoped less than a month before when he attacked on the Marne the enemy was retiring towards the Hindenburg line after suffering at least 325,000 casualties

—80,000 of whom were captives in the hands of the allies—and losing 1,400 guns and 850 square miles of French territory.

It must not be thought that the world by this time had formed the opinion that the enemy would lose the war in 1918. The public simply felt that the period of the most intense anxiety probably was past. Some of the highest military authorities reminded the public that the

the great American war expert, also intimated that the enemy retirement to the Hindenburg line might be unfortunate for the allies as it had been the year before, that the allies would have to slowly advance through innumerable fortified lines before they reached victory, and that the threat to German home territory in possible thrusts by the American army “will hardly be grave.” He even went so

Pres. Wilson and Poincare driving to the house of Prince Murat in Paris, which during the Peace Conference is to be the White House Overseas.

Germans had sprung a come-back after the Byng tank attack near Cambrai in November of 1917 and that the same thing might happen again. Colonel Repington of the London Times expressed the opinion that the Germans might resume their offensive and he advised General Foch not to be imprudent and try for a knockout in 1918. Frank Simonds,

far as to say that “our enemy has too many reserves and too many prepared positions behind his present front to be in danger of disaster this year and probably next.” It is clear that at this time some of the experts did not sense the real situation.

On August 19 the French attacked on the front east of the Oise river. Their

advance here linked up the allied offensive fronts north of the Marne and east of Amiens. At this time the Germans still clung to Roye and Chaulnes and held positions in the old battle zones of 1915-16 west of the upper Somme. Two days later the British Third Army under General Byng drove forward to the south of Arras, advancing five miles on a 17-mile front and securing 10,000

allied attack in the 1918 campaign was the first to signify that the German armies would be overthrown in the fighting season of that year. Some mention the attack made on October 8, when the Hindenburg line was breached between Cambrai and St. Quentin. It is more likely that the attacks made by the Canadians and other British troops east of Arras in the week beginning August

Arrival of President and Mrs. Wilson in Brest, France, on Board S. S. George Washington.

prisoners. Here the British were moving at right angles to their battle-front in the first battle of the Somme. The ease with which they filtered down the Bapaume ridge between the numerous fortified lines of the previous battle quickly discredited the views then in circulation about the impregnability of the positions they were about to attack.

Opinions differ as to which particular

27th really determined that the enemy would have to submit. In the drives of July 18 and August 8 the allies surprised an enemy who virtually was out in the open, protected by only improvised defenses and occupying ugly salients. On August 27th, however, he was expecting an attack and felt confident in the strength of the permanent fortified systems he had prepared with the utmost

Rear Admiral William S. Sims, Who Commanded U. S. Fleet Abroad.

care during the preceding two years. These included the famous Drocourt-Queant switch line, with a section of the Hindenburg line in front of it and another line behind it. The Canadians, who had been taken out of the Somme front a few days after that drive began and by a wide detour of more than fifty miles had been brought up to the Arras front, were supposed by the enemy to be taking a rest, whereas they were sent hurling through the Hindenburg line on August 27 and a

rest that alone could stave off disaster. German officers have admitted that the smashing of the lines east of Arras by the Canadians dashed any lingering hopes they had of averting defeat.

The grand work of the Canadians had appreciable results both north and south. It hastened a German retirement from the Lys river salient which already had begun and it speeded up the retirement north of the Somme. On August 29 Bapaume and Combles were taken, Mount

American Artillerymen on the Marne Front.

few days later through the even more powerful Drocourt line. Each of these so-called lines consisted of several series of entrenchments, with elaborate underground tunnels and innumerable redoubts and machine gun posts. The wonderful success of the Canadians, with little or no help from tanks, against the positions relied on by the enemy to check the allied advance, convinced the high German command that it had no artificial defences that could give its overworked armies the

Kemmel was abandoned to the British and the enemy was in retreat on the 70 miles of front between Ypres and Peronne. The general situation made it inevitable that the enemy also should withdraw on the 80 miles of front between Peronne and Rheims.

By September 12 it was evident that the Germans were losing ground much faster than they had gained it in the spring campaign. That day was made famous in history by the army of the

A Depth Bomb need not actually hit a submarine to destroy it.

United States launching its first independent offensive effort. The work assigned to it was the elimination of the St. Mihiel salient which had resisted the pressure brought against it by the French during four years of warfare. The salient was in the shape of a foot. It had been there since September, 1914, when German militarism tried to stride across the Meuse south of St. Mihiel and trample over prostrate France. The foot was arrested at St. Mihiel when poised for the next step. The First American Army under General Liggett, acting under the supervision of General Pershing, attacked this salient from the north and from the south, and crushed it in as though it were an eggshell, taking well on to 15,000 prisoners and more than 100 guns. The French troops co-operating with the Americans, took 7,000 prisoners. In August as many as 322,000 American troops landed in France and the number of men available for the front was in the neighborhood of half a million. The wiping out of the St. Mihiel salient permitted General Foch to go on with plans for attacks on the all-important German lateral line of communication running through Sedan and Montmedy or for an attack in Lorraine, south of Metz.

On the day in which the Americans struck first as an independent army, the German Vice-Chancellor, Von Payer, announced that "Strong and courageous in the consciousness of our own invincibility, we laugh at the idea that we should first penitently ask for mercy before we are admitted to peace negotiations." This speech was made to give the allies an idea of the terms the Teutons would want if the allies agreed to the request Austria-Hungary was making at that moment for a peace conference in some neutral country while hostilities continued. The main provision was that Germany should be allowed to retain her conquests in the East while abandoning her spoils in the West and restoring Belgium. A few days later, the Serbians broke the Bulgarian front in

Gen. Allenby commanded victorious British forces in Palestine. General Sir Edmund Henry Hyman Allenby who commanded the British forces that have won successes in the campaign against the Turks in Palestine.

"The Train, Deprived of Its Guiding Hand, Hurtled Along to Its Final Destruction": a British Aeroplane Attacking An Enemy Supply-Train With Bomb and Machine-Gun. Our daring air-fighters did not remain always at great heights to attack their objectives, but flew low whenever opportunity offered, and used their machine-guns as well as bombs. Enemy anti-aircraft guns often were attacked. The exploit here illustrated is described as follows: "This incident occurred on the Eastern Front. The illustration shows two naval airmen attacking a train laden with stores. Bombs were dropped from a height of 150 feet, and fell close to one side of the train. The machine then came down to 50 feet, and from this height the observer fired a tray of ammunition into the cab of the engine, killing the driver. The stoker jumped out in panic and the train, deprived of its guiding hand, hurtled along to its final destruction." Similar feats frequently were performed by our airmen.

Stretcher-Bearers Bringing Wounded Under Fire From the Enemy.

Macedonia and the British overwhelmed the Turkish army in Palestine. Before October opened Bulgaria, finding Germany was unable to give her help, surrendered unconditionally.

The closing days of September saw allied victories all up and down the western front. Within three days the American forces west of the Meuse smashed forward 10 miles on a 20-mile front; the French to the west of them in the Champagne advanced 7 miles on a 20-mile front, taking 10,000 prisoners; the British on the Cambrai front advanced 7 miles on a 35-mile front, taking 22,000 prisoners and 300 guns, and reaching the outskirts of Cambrai, and the British and Belgians on both sides of Ypres advanced 10 miles on a 20-mile front, capturing Dixmude, Passchendaele, Roulers, Menin and Langemark, 10,000 prisoners and 100 guns. At that time the enemy was retiring on the whole front between Verdun and Nieuport with the exception of ten miles of front next the coast.

The outlook now became so alarming for Germany that on Saturday, October 5, Germany intimated to President Wilson that she desired an armistice and a peace conference in which the 14 points of President Wilson would be the basis of discussion. The allies saw that Germany preferred to talk rather than to fight and they insisted on Germany binding herself more specifically and also that during negotiations she conduct warfare according to the laws of nations and otherwise give evidence of good faith. In the meantime they redoubled their efforts to destroy the German armies, and on October 8, with the aid of many thousands of American troops, the British crashed through the powerful Hindenburg defences north of St. Quentin and in two days advanced into open country beyond a depth of 12 miles on a 20-mile front, taking 200 guns and 20,000 prisoners. This success precipitated an enemy retirement from the Chemin des

Dames, the Champagne and the northern Argonne. In the north the Canadians captured Cambrai. A few days later new Belgian and British attacks led to the capture of Lille, Ostend, Bruges, Roulers and Menin. Retreating on the south, the enemy surrendered Laon, La Fere and Vouziers.

On October 22, Germany gave the pledges required by the allies and the United States agreed to forward Germany's request for an armistice. Already the allies had redeemed 6,000 square miles of French soil and 900 square miles of Belgian soil. According to one estimate the German and allied offensives in 1918, up to this time, compared as follows:

	<i>German Offensive</i>	<i>Allied Offensive</i>
	<i>119 days</i>	<i>98 days</i>
	<i>March 21- July 18</i>	<i>July 18- Oct. 24</i>
Ground captured		
in square miles. . .	2,770	7,300
Guns captured.....	2,200	4,600
Prisoners taken.....	200,000	300,000
Casualties. inflicted		
by attacking		
army.....	700,000	1,000,000
Casualties suffered		
by attacking		
army.....	1,000,000	700,000

According to this estimate the total allied casualties from March 21, were 1,400,000 and those of the Germans 2,000,000. The allied losses had been made good by the increase of the American forces which now comprised two armies, the Second being under General Bullard. Including troops in training the United States had 2,000,000 men across seas.

The events during the last week of October suggested that the war was hurrying to an end. The Italians attacked on the Piave front and with British storm-troops and a small American force playing an important role, broke through the Austrian army, capturing 100,000 men and 600 guns, and placing the remainder

Americans in Shell Holes in "No Man's Land," Preparing for the Gas Waves Coming Toward Them.

French entering Village after Armistice locating bomb traps

of the Austrian forces, which were handicapped by revolutions in Bohemia and Jugo-Slavia, at the mercy of the allies. On November 4 the Austrians signed an armistice that represented absolute submission. When this armistice went into effect 1,000,000 Austrians and 6,000 guns—in reality the whole Austrian army—were in the possession of Italy.

During the first week in November the

allies dashed forward 11 miles, south of the Dutch frontier, and reached Ghent. One hundred miles away on the southeast the French and Americans did magnificent work. The enemy, in trying to retreat to his own country, had to pass through two “funnels,” the one running eastward through Liege and the other southeastward through Sedan and Montmedy. The Ardennes forest and hills lying between these funnels prevented hasty

Colored Troopers Embarking for the Front Are Receiving Refreshments and Tobacco from the Red Cross.

withdrawal there, and the two funnels were quite unequal to the demands made upon them. Matters, therefore, were made doubly critical for the enemy when the Americans advanced 14 miles on a 25-mile front west of the Meuse and reached points only 10 miles from Montmedy and 15 miles from Sedan.

Recognizing that the jig was up, Germany on November 8 applied on the battlefield to General Foch for an armistice, as directed to do by President Wilson. This did not put an immediate end to hostilities. The British went on and captured Maubeuge. From Germany came

Germany submitted to the humiliating conditions by which Germany secured exemption from further attack.

It was on the morning of Monday, November 11, that Germany admitted herself beaten and placed herself at the mercy of the allied and associated powers. When the fighting stopped her armies had been forced across the frontier of France on a front of 120 miles stretching southeastward from the North Sea. The enemy still was west of the French border along a stretch of 160 miles. The area he occupied in France then was of varying width embracing about 1,500

Armistice Parties Meeting--Germans Approaching.

reports that the fleet, as a last resort, had been ordered to give battle to the British grand fleet and that the German crews had mutinied and joined a revolutionary movement that speedily swept over Germany. The Kaiser and Crown Prince had refused to sign documents of abdication but on the advice of their generals had fled from their army headquarters at Spa to Holland where they were interned. Yet still the allied troops pressed on. The French and Americans reached Sedan and Mezieres and got astride one line of retreat. Italian troops, which earlier in the summer had fought in the Rheims salient, captured Rocroi. During the last two days of fighting the allies advanced 15 miles on a front of 100 miles. And then the delegates of revolutionary

square miles. He also retained more than 9,000 square miles in Belgium. Had he not cried quits, however, his armies would have been overwhelmingly defeated within a few weeks, for they were nearly in a helpless condition and Foch had a tremendous offensive in Lorraine south of Metz ready to launch. Monster British airplanes also were under orders to bomb Berlin when orders arrived to cancel all such undertakings. By a peculiar coincidence of history, Canadian troops, acting with the British army, who had taken Denain and Valenciennes, captured Mons the morning that the armistice ended hostilities, thus bringing the British back to the point in Belgium where they began fighting more than four years before.

This Company in Cantonment Headquarters was Made Up of Good Colored Fighting Men, Who Later Distinguished Themselves on the Marne.

The Aftermath of The Armistice

CHAPTER XIII

ARMISTICE TERMS NOT SEVERE — GERMAN NAVAL SURRENDER IMPOSING SPECTACLE — OCCUPATION OF GERMANY BEGUN — EBERT BECOMES GERMAN LEADER — LLOYD GEORGE SUSTAINED — PRES. WILSON HEARTILY RECEIVED — POLISH INVASION OF GERMANY — LEAGUE OF NATIONS RESOLUTIONS.

The armistice terms imposed on Germany by the allied and associated powers were severe but not more so than was necessary to ensure that Germany should not resist any longer the will of the allies. The most humiliating feature was the provision requiring the surrender of the best fighting ships of the German navy without their firing a shot as a protest against the onerous terms of the peace settlement. The world never has witnessed a more pathetic spectacle than that afforded on November 21st, ten days after the signing of the armistice, when fourteen German Dreadnoughts, seven scout cruisers and fifty destroyers steamed across the North Sea under the direction of their own crews and tamely surrendered to the allied fleet fifty miles to the east of the Firth of Forth. These surface warships later were interned in the Scapa Flow, in the Orkney Islands. Almost simultaneously scores of German submarines were surrendered to the British off Harwich. In the course of a few weeks the number was increased to more than 120 and it became known that the number of underwater boats that Germany would be required to give up would exceed the original limit set of 160. Uncompleted submarines and surface warships not being surrendered were required to dismantle and the crews of the latter to be paid off. To see that the terms were thoroughly fulfilled, the British Dreadnought *Hercules*, accompanied by torpedo boat destroyers, visited the German naval strongholds after the Germans, themselves, had swept away the mine barriers. Of 48 German warships capable of entering the line when war

began, Germany was left with only 13, as she had found it necessary to scrap 20 pre-Dreadnoughts after the Battle of Jutland. An additional Dreadnought was given up in December.

The original armistice terms were amended from time to time. In most cases the changes made with each monthly renewal rendered Germany more helpless before the allies. The number of machine guns the enemy had to surrender, however, was reduced by 5,000 to 25,000 and the number of airplanes by 300 to 1,700. The number of motor lorries was reduced from 10,000 to 5,000. The reason for these changes was that the Germans had less equipment than had been estimated. On the other hand the enemy was called upon to turn over 150,000 railway cars or three times the number originally fixed. Without these the German army could not conduct serious military enterprises or the country be fed except by grace of the allies. The allies also stipulated that they should be free to occupy the so-called neutral strip east of the Rhine, north of Mainz, if they so desired, and a small bridgehead east of Strassburg.

On November 14 American and French troops crossed the Lorraine frontier in the rear of the evacuating German forces. Four days later Belgian troops were in Brussels and Antwerp, and French troops in Mulhausen and Colmar. Not a living German soldier remained on French soil with the exception of prisoners. By November 25 British troops had reached Namur in Belgium and all Alfortes. Ten days before Christmas the sace-Lorraine had been occupied by allied

Coast Defense. These giant guns guard New York harbor and represent the types used on the entire coast including the Panama Canal. A hostile fleet would be checked miles from our shores went into action.

allied troops were safely entrenched in their three great bridgeheads at Cologne, Coblenz and Mainz, the British at Cologne, the Americans at Coblenz and the French at Mainz.

By the end of November a considerable number of Canadian prisoners-of-war had reached Metz from prison camps in the Rhineland. American troops had passed beyond Metz in their movement eastward and joyfully greeted the American and Canadian prisoners whom they

show heartlessness towards hundreds of thousands of allied prisoners at the very time that their country needed mercy at the hands of the allied peoples. The explanation under the circumstances probably was stupidity and distraction rather than deliberate cruelty—stupidity because for selfish reasons the Germans should have made the care of their prisoners their first concern; distraction because Germany was in a terrible condition and her new rulers were overwhelmed

Czecho-Slovaks at Vladivostok ready to leave for the Russian Interior. The armies of the Czecho-Slovaks that attempted to free Siberia from the Bolsheviki.

had met tramping wearily towards the west. Nearly 18,000 British prisoners had reached England. Of these 8,794 arrived at Hull from Holland; 8,271 at Dover and 500 at London. The British Government sternly warned Germany that she would accept no explanations for the ill-treatment or criminal neglect of the prisoners while on their way to the German border. One wonders what possessed the German rulers that they should

with the multitude of great tasks requiring urgent attention.

A correspondent with the British forces states that he was in Huy, 12 miles beyond Namur, when the Canadian vanguard entered the place. One of our men was asked where was the front line and answered, "In the centre of the high street, sir." The boys from Canada must have looked with great interest at the forts of Namur, perched on precipitous

"Mut," Dog Carrier, Laden with Cigarettes for the Americans in the Trenches.

cliffs, which quickly succumbed to the fire of the mighty German 42-centimetre howitzers in August of 1914, bringing about the fall of a great bastion in the allied front. It was at Huy, on the south side of the Meuse, that the Germans forced a crossing to the north and began their surprising advance north-westward on Brussels and then south-westward on Lille and Mons, where the British, who awaited them found themselves hopelessly outflanked on the left, their right exposed by the unannounced retirement

greeting a released comrade. All were footsore and weary and some were very bitter over the inhuman treatment of which they had been victims, but their passage through Belgium was made easier by the plaudits and comforts heaped on them by the grateful Belgian people.

The time limit for the evacuation by the Germans of Belgium, Luxemburg, and Alsace-Lorraine expired on November 27. All German soldiers not out of those regions by that time were liable to capture and internment. It was amaz-

German Cruiser "Zähringen" Passing Through Kiel Canal to Surrender.

of the French from Charleroi and their front menaced by forces superior by three to one. All the way up the Sambre and Meuse valleys from Mons to Liege the Canadians met multitudes of allied prisoners pouring homeward from the hateful prison camps of the Hun. The majority of them were French, English, Italian, and Russian soldiers, some of them wearing parts of uniforms of nations other than their own, but here and there, no doubt, the Canadians had the pleasure of

ing, therefore, that the Dutch Government should have allowed 68,000 German troops to pass through the peninsula of Dutch territory that prevented their quick return to their homeland. The excuse that the Belgians wanted to get rid of them and that the Germans were deprived of their arms at the border was not sufficient. Holland was guilty of an unneutral act in allowing troops of a belligerent country to cross her territories to escape the consequences of warfare.

One Lone American Soldier is Acting as Guard for the Whole of this Long Column of German Prisoners. Who are on Their Way to Prison Camps at the Back of the Allied Lines. The photo was taken during the Battle of Marne.

As a consequence she had to agree to allow the allies to send supplies across her territories to the allied army of occupation in Germany.

In Germany serious political trouble developed early in 1919. The Ebert government that had displaced the short-lived government of Prince Maximilian of Baden, had been composed of three Majority Socialists and three Independ-

operation their view that the manual workers of the country should disenfranchise and despoil all the other citizens of the country. Thousands of men and women were shot down during the disorders in Berlin and elsewhere but finally the government secured the upper hand and the elections were held. In these the Majority Socialists made considerable gains and, although not having a major-

dent Socialists. The latter resigned or were dismissed from the government and a wing of the Independent Socialists combined with the Spartacans, or German Bolsheviki, and tried to prevent the holding of elections for a National Constituent Assembly. They knew that the vast majority of the people were against them and they attempted to put into

ity of the seats, secured their position as the strongest party in the House.

Premier Ebert set forth his position about this time in a striking address to soldiers who had returned to the capital from the front. This is what he said:

"Your deeds and sacrifices are unexampled. No enemy overcame you. Only when the preponderance of our opponents

Red Cross Hospitals Destroyed by German Bombing Raids. No Other Buildings Were Bombed.

in men and material grew ever heavier did we abandon the struggle. You endured indescribable sufferings, accomplished incomparable deeds and gave, year after year, proofs of your unshakeable courage. You protected the homeland from invasion, sheltered your wives, children and parents from flames and slaughter and preserved the nation's workshops and fields from devastation. With deepest emotion the homeland thanks you. You can return with heads erect. Never have men done or suffered more than you.

"The German people have shaken off the old rule. On you, above all others, rests the hope of German freedom. The hard requirements of the victors are heavy upon us but we will not collapse. We will build a new Germany. With the strength and unshakeable courage you have proved a thousand times, see to it that Germany remains united and that the old misery of a system of small states does not overtake us again. The unity of the German nation is a work of religion, of socialism. We must work with all our strength if we are not to sink to the state of a beggar people. You are laying down the arms which, borne by the sons of the people, should never be a danger but only a protection for the people whose happiness your industrious hands must build up from new foundations."

There were few signs of repentance in these words.

Two days before the German general elections were held Dr. Liebknecht and Rosa Luxemburg, the leaders of the Spartacans, were arrested and killed under very suspicious circumstances. Liebknecht was shot down as he was trying to escape and Rosa Luxemburg was taken from her guards and beaten to death. At least that is the official explanation. The circumstances strongly suggest that the officers of the guards connived at their assassination. During the weeks following the deaths of these

two leaders comparative quiet prevailed in Germany and the men who had been called the Kaiser-Socialists, because they had voted for war credits and condoned war outrages, remained in power.

Before the Peace Conference assembled general elections also were held in the United Kingdom. Here Lloyd George was overwhelmingly sustained so far as the number of seats was concerned although the popular vote showed that his Coalition government only received 5,028,345 votes against 4,330,600 secured by the anti-Coalition candidates. The old Liberal party of H. H. Asquith was eliminated in this election and the Labor group became strong enough numerically to be entitled to rank as the official Opposition. The election results were a great personal tribute to Lloyd George as the man who had led the British people to victory. They also seemed to indicate that the British people desired that Germany should be made to pay the penalty for her criminal responsibility in beginning the war and waging it with extraordinary barbarism.

In France there were reports that Premier Clemenceau would be outvoted but when he had explained his attitude towards the peace settlement and intervention in Russia he scored a great triumph in the House, his budget going through with a majority of 246.

The visit of President Wilson to Europe to attend the Peace Conference caused controversies both at home and abroad as to the wisdom of this unprecedented move but the heartiness of his reception in the various capitals before the Conference met seemed to indicate that the masses largely were in sympathy with his dream of establishing peace on a permanent basis. Later on his work in behalf of the League of Nations further justified his prolonged absence from Washington.

Pending the decisions of the Peace Conference, Jugo-Slavia and Czecho-Slovakia set themselves up as indepen-

dent states and the troops of both clashed with Italian forces, particular those of Jugo-Slavia in Dalmatia which had been promised to Italy when she entered the war on the side of France and Britain but which was populated mainly by Slavs. The Czecho-Slovaks also clashed with the

stantinople in the sea Marmora.

A great political figure in the war, one better known to Europe than to this continent, passed off the scene early in 1919 in the person of Count Von Hertling. This man was Chancellor of Germany, a position equivalent to that of Premier, but vested with greater powers, from November of 1917 to October of 1918. In other words, he controlled Germany's destinies from the time the colossal disaster to the Italian armies took place until the counter-offensive of General Foch forced Germany to seek an armistice on

war for selfish purposes in which she was making a tool of France, and that Germany in resisting the growing power of the United States, was really the champion of all Europe. Von Hertling formerly was Premier of Bavaria and was a Roman Catholic. He displaced Michaelis as Chancellor, Michaelis being a bureaucratic stop-gap. Von Hertling was chosen to succeed Michaelis because it was hoped he would detach the Centre or Clerical party from the Majority Parties who were demanding a democratic peace and because he was influential with the

Barbed Wire Entanglements Failed to Stop Our Boys in the Great Drive. Americans Are Here Seen Going Through German Wire.

the western front. Before and after he became Chancellor he did his best to cause dissension between the allies and to trap them into peace discussions. He professed to favor peace without annexations or indemnities but in February of 1918 he put the screws on Russia and Rumania, stripped them of territory and economic independence and made them Germany's vassals. In his day he taught the divine right of military officers as well as the divine right of kings and absolute submission to religious authority. He pretended that Britain was waging the

Vatican and likely to check the tendency of Bavaria to break away from Prussia. More than once he said that the question of Alsace-Lorraine was the only barrier to peace. He favored adding Lorraine to Prussia and Alsace to Bavaria, but was bitterly opposed to returning the Provinces to France. He did not give up his office as Chancellor until Prince Maximilian assumed power on behalf of the revolution. Prince Maximilian shortly thereafter became Prince Regent and left the Chancellorship to Ebert, who was termed premier.

Heavy Guns at Chateau-Thierry Made Victory Possible.

French general thanking the American soldiers for their bravery under fire.

The death of Colonel Roosevelt synchronised with that of Von Hertling and removed a warm friend of Great Britain and one who never ceased to champion the justice of the allied cause in the war. It cannot be said that the United States would not have intervened without the stimulating effect of "Teddy's" propaganda, for President Wilson secured a free hand when he was returned to power as the man who had kept his country out of the great struggle. Nevertheless, the writings and speeches of Colonel Roosevelt were a real factor in convincing the best elements in the United States that their country should throw all her resources into the scales against Germanic barbarism. So far as the military aspect of the allied cause is concerned the allies had no stouter champion. Perhaps the redoubtable colonel was too virile or too domineering a character to subscribe to the idealistic features of the allied cause. He probably believed that mankind gained something out of the rivalry and strife between nations and that life would become too insipid were a League of Peace to straighten out all serious international disputes without recourse to arms. In one sense the Colonel belonged to the old school. He was a true friend, a formidable foe and a man of honor. He

represented the best type of statesmen in the days when rivalry between nations was keenest. It cannot be said that he was peculiarly adapted for the work of laying a new foundation for the society of nations based on co-operation for the good of all.

On Saturday, January 18, the first session of the Peace Conference was held in Paris. Forty-eight years previously, at Versailles, just outside Paris, the German Empire was proclaimed by the victorious King of Prussia, following the war of 1870. The Peace Conference of 1919 was called to determine the conditions ending The Great War and to veto the treaty of Versailles, restore Alsace-Lorraine to its rightful owner and write "Finis" across the inglorious history of the German Empire.

The first series of resolutions adopted by the Conference were as follows:
On the League of Nations.

"That it is essential to the maintenance of the world settlement which the Associated Nations are now met to establish that a League of Nations be created to promote international obligations and provide safeguards against war. This league should be created as an integral part of the general treaty of peace, and should be open to every civilized nation which can be relied on to promote its objects.

"The members of the league should periodically meet in international conference, and should have a permanent organization and secretaries to carry on the business of the league in the intervals between the conferences.

"The Conference, therefore, appoints a committee representative of the Associated Governments to work out the details of the constitution and the functions of the league."

On Responsibility.

"That a commission composed of two representatives apiece from the five Great Powers and five representatives to be elected by the other powers be appointed

to enquire and report upon the following:

"First—The responsibility of the authors of the war;

"Second—The facts as to breaches of the laws and customs of war committed by the forces of the German Empire and their allies on land, on sea, and in the air during the present war;

"Third—The degree of responsibility for these offences attaching to particular members of the enemy's forces, including members of the general staffs and other individuals, however highly placed;

Great Powers and not more than two representatives apiece from Belgium, Greece, Poland, Roumania and Serbia, to examine and report:

"First, on the amount of reparation which the enemy countries ought to pay; second, on what they are capable of paying, and, third, on the method, the form and time within which payment should be made."

On International Legislation.

"That a commission composed of two representatives apiece from the five Great

Looking at First Sight Like a Group of Antediluvian Monsters Squatting in the Open Before Starting on Their Prowl. At a "Tankdrome" on the Cambrai Front.

"Fourth—The constitution and procedure of a tribunal appropriate to the trial of these offences;

"Fifth—Any other matters cognate or ancillary to the above which may arise in the course of the enquiry, and which the commission finds it useful and relevant to take into consideration."

On Reparation.

"That a commission be appointed which shall comprise not more than three representatives apiece from each of the five

Powers and five representatives to be elected by the other powers represented at the Peace Conference be appointed to enquire into the conditions of employment from international aspect and to consider the international means necessary to secure common action on matters affecting conditions of employment and to recommend the form of a permanent agency to continue such enquiry and consideration, in co-operation with and under the direction of the League of Nations."

On International Control.

"That a commission composed of two representatives apiece from the five Great Powers and five representatives to be appointed by the other powers enquire and report upon the international regime for ports, waterways and railways."

The delegates of the Great Powers on the Committee to plan for the League of Nations were: For the United States, President Wilson and Col. Edward M. House; Great Britain, Lord Robert Cecil and Gen. Jan Christian Smuts; France,

Australia, South Africa and India each being allowed two representatives. The size of the representation of each nation was decided upon not, as proposed by the French plan, in accordance with the part played by the nation in the war, but following the American and British plan, in proportion to the extent of the interest of each nation in the peace settlement. Brazil, Belgium and Serbia were given three representatives. Greece, Poland, Czecho-Slovakia, Roumania and China

One of the various kinds of machine guns that were used against the Germans on the Western Front. This gun was invented by an American.

Leon Bourgeois and Ferdinand Larnaude, dean of the Faculty of Law of the University of Paris; for Italy, Premier Orlando and Vitterio Scialoia; Japan, Viscount Chinda and K. Ochiai.

France, Britain, the United States, Italy and Japan were given five representatives each in the Peace Congress. The British dominions were represented apart from Great Britain, Canada, Aus-

were assigned two representatives each. Portugal, and the states which did not declare war upon Germany but merely broke off diplomatic relations with her, were given one delegate each. Brazil owes her treatment to her historic position as a former empire and her population of more than twenty millions which worked against placing her secondary to nations much less peopled.

The Price of Victory

CHAPTER XIV

A COLOSSAL TOLL — LARGE PERCENTAGE OF LIVES LOST — HALF OF ENLISTED NUMBER WOUNDED OR KILLED — VALUE OF DESTROYED PROPERTY ENORMOUS — TOTAL WAR DEBT IMMENSE — LOSSES IN SHIPPING TONNAGE — RUSSIAN PROBLEM — VICTORY DUE TO COMBINED AID.

The terrible price paid by humanity in blood and tears and money to save Civilization from the Hun cannot be told in words. The struggle was of so colossal a nature, spread over so wide an area and affected human life in such a multitude of ways that it is impossible to record with any degree of accuracy or in great detail the sum total of misery that it entailed. Most of the estimates of the number of soldiers who died from wounds and disease are under rather than over the actual figures. It is an extremely conservative estimate that eleven million men in uni-

form lost their lives, that civilians to a number almost equally large were massacred or died from famine and want, and that many other millions of potential lives were lost. As to the money cost of the war, a rough and ready way of putting it is to say that it used up more than one-third of all the wealth of the world.

Combining official with semi-official and unofficial statements we get the following estimate of the numbers of men enlisted, the lives lost and the total casualties of the principal belligerent countries:

	Men Enlisted	Lives Lost	Total Casualties
United States	3,764,700	72,738	262,693
British Empire	10,000,000	975,000	3,049,991
France	7,000,000	1,500,000	4,500,000
Italy	5,000,000	500,000	1,500,000
Russia	14,000,000	3,000,000	8,000,000
Belgium	500,000	100,000	350,000
Serbia	500,000	125,000	375,000
Rumania	600,000	150,000	400,000
Total for Allies.....	41,364,700	6,422,738	18,437,684
Germany	12,000,000	2,750,000	8,500,000
Austria-Hungary	7,500,000	1,750,000	5,000,000
Turkey	1,750,000	300,000	1,000,000
Bulgaria	1,100,000	200,000	550,000
Total for all belligerents.....	63,714,700	11,422,738	33,487,684

The casualties of the Canadian forces, which were included in the above totals for the British empire are officially given as follows:

	Officers	Other Ranks	Total
Killed in action.....	1,842	33,824	35,666
Died of wounds....	614	11,806	12,420

Died of disease.....	220	5,185	5,405
Wounded	7,130	148,659	155,799
Prisoners of war....	3,575
Presumed dead.....	142	4,529	4,671
Missing	41	384	425
Deaths in Canada..	2,221
Totals	9,989	204,397	220,182

The total deaths were 60,383.

The Australian losses were slightly heavier than those of Canada although the Commonwealth's population is much smaller.

The casualties for the United States are given as follows:

Killed in action.....	28,363
Died of wounds.....	12,101
Died of disease.....	16,034
Died from other causes.....	1,980
Missing in action.....	14,260

Total dead for U. S..... 72,738

Wounded slightly.....	92,036
Wounded.....	43,168
Wounded severely.....	54,751

Total U. S. wounded.....189,955

Total U. S. casualties.....262,693

The number of men in the British navy who lost their lives was 33,361. The number in the British merchant marine which were lost totalled 14,661, making a grand total of 48,002 British lives lost at sea.

The British casualties in the various arenas were made up thus:

Arena	Total Casualties	No. Dead	Percentage of dead in total losses
France and Belgium.....	2,070,000	560,000	20
Dardanelles.....	119,000	33,000	28
Mesopotamia.....	97,000	31,000	30
Egypt and Palestine.....	58,000	16,000	27
Macedonia.....	27,000	7,600	28
East Africa.....	17,000	9,100	51
Italy.....	6,700	1,020	15

The above figures for the western arena do not include the missing or the dead who died from wounds sometime after being wounded.

Bulgaria claimed her losses reached the amazing figure of 1,353,000 made up as follows:

Killed.....	101,000
Wounded.....	1,152,000
Prisoners.....	100,000

Total.....1,353,000

This total was easily double that of most estimates. The number of wounded also showed an unusually high rate as compared with the number of dead. Bulgaria's casualties in The Great War probably were under 600,000.

The war expenditures of the various belligerents have been estimated as follows:

Britain.....	\$ 60,000,000,000
United States.....	50,000,000,000
Russia.....	30,000,000,000
France.....	40,000,000,000

Italy.....	15,000,000,000
Rumania.....	3,000,000,000
Serbia.....	2,000,000,000

Total Expenditures by Allies.....\$200,000,000,000

Germany.....	\$ 52,000,000,000
Austria-Hungary.....	30,000,000,000
Turkey.....	5,000,000,000
Bulgaria.....	3,000,000,000

Total Germanic Expenditures.....\$110,000,000,000

Expended by all belligerents on the war.....\$310,000,000,000

In nearly every case the war debt of the belligerents involves interest charges of from two to three times the government revenue before the war. The 1919 French budget called for an expenditure three and a half times greater than the pre-war expenditures or for an amount supposed to be equal to one-half of all the earnings of the French people for the

year. The billions of dollars Germany has to pay in reparation of course should be added, properly speaking, to the German cost of the war.

During the great allied offensive on the western front in 1918, the allied armies captured 362,355 prisoners, including 7,990 officers, as well as 6,217 cannon, 38,622 machine guns and 3,907 mine throwers, or more than one-third of the enemy's artillery.

The allies during the month of October captured 108,343 prisoners, including 2,472 officers, as well as 2,064 cannon, 13,639 machine guns, and 1,193 mine throwers. The American forces in France during the strenuous campaign of 1918 captured 44,000 Germans and 1,400 guns.

The official British figures of air fighting upon the British Western front from January 1, 1918, to the date of the armistice show that the number of enemy machines destroyed in aerial combats by the British totalled 3,060, while enemy machines driven down out of control numbered 1,174. Germany is known to have lost well over six thousand airplanes destroyed and surrendered during the year. On the other hand, the resources of the allies were reinforced by 1,700 German machines of modern type and in good serviceable condition.

Great Britain was pre-eminent in the air at the close of the war, when the Brit-

In this photograph are seen the American Artillery before Metz, the capital of Alsace, firing into the German lines.

American Poles March to the Front in France.—The regiment was raised and trained in the United States and all the men and officers are citizens of the United States.

ish air force was the largest in the world. In August, 1914, the British naval and military air services together mustered planes, 45 seaplanes and 7 airships, while at the close of hostilities she had 21,000 airplanes, 1,300 seaplanes and 103 airships. Besides this there were 25,000 airplanes and seaplanes being built and 55,000 airplane engines under contract.

In 1914, 45 bombs were dropped on Paris. In 1915, 70 bombs, 62 of them on March 20, fell on the city. In 1916, the 185 officers and 1,853 men of other ranks. In November, 1918, there were 30,000 officers, 264,000 men. At the outbreak of the war Great Britain had 166 air-enemy employed 61 bombs against Paris, and in 1917, 11. During the last ten months of the war there were 1,211 casualties from 396 bombs. Airplanes and Zeppelins dropped 228 bombs on August 6, killing two persons and injuring 392. The long-range cannon fired 168 shells into Paris, killing 196 and wounding 417. On Good Friday, 1918, more than 100 persons were killed.

Trophies Captured by the Americans from the Huns at the Battle of Leichfrey. Among the other trophies in the picture may be seen a Boche gun, gas mask, wire-cutter and canteen.

British merchant tonnage losses were 9,031,828 gross tons from the beginning of the war to Oct. 31, 1918. New construction in the United Kingdom in the same period was 4,842,296; purchases abroad were 530,000 tons and enemy tonnage captured was 716,520. The net loss was 3,443,012 tons. In the last seven months of the war the output exceeded the world's losses by more than 1,000,000 tons. In the case of Great Britain, although the output had not overtaken the losses, yet if purchases abroad were taken into account, the losses of the last five months were balanced by the gains.

The losses in merchant vessels by enemy action and marine risk from the beginning of the war to the end of October, 1918, was 15,053,786 gross tons. In the same period 10,849,527 tons were constructed and 2,392,675 tons of enemy vessels captured. This makes the net loss of tonnage during the war 1,811,584 tons. One hundred and two ocean going steamships of 330,336 gross tons, were built by

American shipyards during November. In addition 63 smaller vessels of 18,108 gross tons were constructed during the same period.

The triumphant close of the war waged on behalf of civilization by the allies provided enough glory to go all around. Each of the allied nations could afford to show a generous appreciation of the part played by the others. The truth is that individually all of the five first-class powers that fought on the side of the allies rendered service that was essential to the final success. These five included Russia, which made a most valuable contribution until she broke under the terrific strain of war. Several small powers rendered most valuable service. For instance, Belgium, whose little army for a brief period stayed the advance of the German hordes and gave the British and French a chance to assemble their forces. Rumania and Serbia also interfered so seriously with the enemy's plans as to attract the attention of large Teutonic forces which might have been used elsewhere with great effect. Had the British Empire, France, Russia, Italy or the United States not participated in the struggle, had any of them failed to give the help they afforded, it is hard to see how Germany would have been brought to her knees by the fall of 1918. It is by no means certain that the non-participation of any one of them would not have permitted the Central Powers to acquire greater prestige as a result of the conflict.

At present Russia is under a cloud. The allied peoples feel that she treacherously deserted them in a crisis, imperiling their victory, increasing their sacrifices and prolonging the war. That feeling is natural and justifiable. Never-

theless, it is a fact that the educated and business classes in Russia bitterly deplore the degradation of their country and are the most unfortunate victims of the rule of the Bolshevik. The masses of the people, ignorant, easily duped, grief-stricken with their losses in the fighting, on the verge of starvation, freed from the despotism of Czarism only to pass under the hateful despotism of Bolshevism, are bewildered and distracted and groping blindly towards the light. What Russia has done she did not mean to do. Russia will emerge from the bog and the blackness and take a leading place among the great democratic nations. To-day she is to be pitied much more than she is to be condemned. To-morrow, for our own sake as well as for hers, we must aid her to the full extent of our ability. In the meantime, we should recognize that when the war began the great military power of the allied side was not Britain, France or Italy, but Russia, slow-moving but terrible in her might; that the enemy planned to overthrow the French and British in 1914 so that he would be able to cope in 1915 with the deadlier peril on the east; that Russia struck in East Prus-

American officers examining captured German howitzer. Officers of the 26th Division examining a German 210 howitzer captured by the 102nd Infantry, 26th Division in France.

sia during August of the first year of war and caused the enemy to rail enough divisions from the west to permit the allies to win the first battle of the Marne—the only truly decisive battle in the war; that Russia struck again in 1916 when Italy was hard pressed, won tremendous victories and brought appreciable relief to the Italians, and that in 1917, after the revolution, Kerensky succeeded in inducing the Russian army to undertake an offensive which had magnificent success until treachery developed at one part of the front. Russia quit because her morale was broken and because her people, having rid themselves of the Czar, thought the war in which the Czar had taken them should come to an end. It is not unreasonable to assume that Russia inflicted one-third of the casualties suffered by the enemy powers in the war and endured as many casualties as the total suffered by Britain and France, or about eight millions.

The part played by Italy is much underrated. In 1915 the British and French were almost helpless before the enemy's fortified line in the west and in

Gen. Plumer Reviews His Yanks at the Front. Gen. Plumer is seen in this photo reviewing his own "Yanks" who participated in the big British offensive.

the east the German army was riding roughshod over Russia. The intervention of Italy drew half a million of the enemy to the south-western arena, and may have prevented the loss of the war then and there. Italy's casualties are one-third of those suffered by all the nations of the British Empire. She certainly inflicted much heavier casualties on the Central Powers.

There is no occasion to emphasize the essential part paid by France in the war. In proportion to population and wealth France's sacrifices are much greater than those suffered by any other allied power, and the damage to her richest industrial areas runs up into the billions.

The aid given by the United States was of the utmost value in hastening the end of the war. The issue in this year's campaign was whether the allies should win the war at an early date or suffer such a disaster as would protract the war for years. The speeding-up of the shipment of American troops when the scales were in the balance enabled the allies to frustrate the enemy's designs and by releasing veteran French troops from quiet sectors and by providing good American shock troops in the later stages of the campaign, brought Germany to her knees. The low casualties suffered by the millions of the American armies, but one-twelfth of those of the British Empire, do not adequately represent the exceedingly valuable contribution of the United States. In financing the allies when Britain's resources were sorely tried and in supplying devices for curbing the enemy's submarine activities which at times were greatly worrying the British authorities, the United States gave invaluable help.

As in the Napoleonic wars a hundred

Photo showing lone French soldier in an enemy's trench signaling to his comrades.

years ago Britain was the mainstay of the forces of liberty. During the struggle her military power caught up with and passed well beyond that of France. Without the aid of her armies, or the work of protection and supply so gallantly performed by her mighty navy, or the self-sacrificing performances of her merchant marine, or her loans of billions of dollars to weaker allies, the cause of humanity would have been defeated. During the war the United Kingdom provided no less than eight million men, and her Dominions overseas and India raised another two millions.

How The Central Powers Fell

CHAPTER XV

GERMANY WEAKENS — BULGARIA SURRENDERS — TURKEY SURRENDERS — AUSTRIAN ARMISTICE AND SURRENDER FOLLOW — GERMANY SIGNS ARMISTICE — KAISER ABDICATES AND FLEES — MILITARY AND NAVAL FORCES SURRENDER — ALLIES OCCUPY GERMANY — CASUALTIES.

The iron defense of the Central Powers and their allies once pierced, the collapse of the coalition came with a swiftness which surprised even the most optimistic among the councillors and leaders of the entente nations and the United States. And strangely enough, while the eyes of the world were turned toward the great struggle in France, where it was believed the issue would be settled, the first breaks which brought the end came from all the other fronts. Within six weeks after the first hint had come that the hour of victory was about to strike, the war was ended. In the chronological order in which they were forced out of the war, the Teutonic allies surrendered as follows:

BULGARIA—Armistice signed just before midnight on September 29th, 1918.

TURKEY—Armistice went into effect in the afternoon of October 31st.

AUSTRIA—Armistice, signed on November 3rd, went into effect in the afternoon of November 4th.

GERMANY—Armistice went into effect 11 o'clock A. M., November 11th.

Bulgaria, the little autocracy in the Balkans, whose czar had heeded the promises made by Germany of a large share in the territorial loot of conquest, was the first to surrender. Driven back, then crushed, the first of the Allied invading army on his own soil, Czar Ferdinand was quick to sue for peace. His people never had favored the war. The Kaiser had

withdrawn nearly all of the German troops which had supported the Bulgarians. Even the Austrian troops, menaced earlier in the summer by the Italian campaign which had cleaned them out of the greater part of Albania, had withdrawn from the Macedonian front. Bulgaria fought it out alone.

About the middle of September the Allies' lines extended from Saloniki on the east to southern Albania where they were in contact with the Italian forces. Under Gen. Franchet d'Esperey, a force of French, British, Italians, Serbs and Greeks began the drive northward. To the Serbs fell the honor of the first victories. They were advancing to hurl the enemy from their native land and supported by French and Greek units, they drove northeast of Monastir. Victory was almost immediate. The first day of the drive the Serbs advanced several miles and freed scores of villages. Within a few days they were threatening the chief railroads and lines of communication and the Bulgar right was nearly cut off.

On September 24th, Prilep, one of the chief bases of the enemy, was taken and the Bulgars faced annihilation. So rapid had their retreat been, that Prilep was entered by French cavalry operating far in advance of the main French and Serbian forces. In the meantime the British and Greek army operating in the Lake Doiran region, had advanced and had effected a juncture with the French and

Serbians and a united attack moved rapidly toward the Bulgarian border itself. Within two days more the Bulgarian army had been split into several groups and each one of these was in flight. The government at Sofia admitted they were facing disaster. Far in the vanguard—fighting their way back home—the Serbs pursued the fleeing Bulgars across trackless mountain wastes and through the once cultivated valleys that had been laid waste by war. On September 25th, the British reached Bulgarian soil opposite Kosturino and the next day Strumnitza fell. The Serbs now were well toward the great Bulgarian base of Uskub and Ferdinand's troops were fleeing in disorder, hopelessly beaten.

Nothing could save Sofia from possible bombardment and the Bulgarian government sought peace. A commission bearing the white flag of surrender entered the allied lines. The Allied commanders left Gen. d'Esperey to impose the terms. The Bulgarians submitted to unconditional surrender. They agreed to evacuate all territory they still held in Greece and Serbia, to completely demobilize their army; to give up all their railroads, and, what was most important of all, to allow the Allied forces a free passage through Bulgaria.

Thus was the first big gap cut into the Berlin to Bagdad project. The road to Vienna was open. Austria was in what was almost a panic and Vienna signified willingness to discuss peace, though holding to the statement that they would stand by Germany on terms. The stock market in Berlin felt the effects of the Bulgarian disaster and in both Berlin and Vienna the socialists began open discussion of constitutional reforms. The Teutonic Alliance was crumbling. With Bulgaria out and the Macedonian region free from danger, the Allies could now turn their attention to Constantinople from the north while the British were advancing through the Holy Land on the south. Serbia was being evacuated and Austria would soon be attacked from across the

Frank Mayo, Rear Admiral, United States Navy.

Danube. King Ferdinand of Bulgaria had abdicated in favor of his son, Boris, and the Allies were in control of the Balkans.

The developments in the Balkans had surprised the Allies, but the victories in the Orient and the smashing of the Turks came with even greater suddenness. Since his occupation of Jerusalem, Gen. Allenby, with a force of British and Indian troops, reinforced by French and friendly Arab tribesmen, had moved slowly northward until in the latter part of September they occupied a line from the River Jordan westward to the Mediterranean. The great stroke was delivered on September 18th, 19th, 20th and 21st. Over a front of sixteen miles Gen. Allenby struck the Turkish forces and in less than a day they were fleeing in full rout. They pushed through between Rafat and the sea for nineteen miles on the first day and took

3,000 prisoners. Bodies of cavalry were advancing so rapidly that they threatened to completely cut off the Turks' retreat. Railway communications were cut and the Turkish forces were trapped. Huge stores of guns and supplies were taken and the Turk dead blocked the roadways. Caught in the valleys and lowlands, they were at the mercy of the British artillery, and airplanes, flying at low altitudes, raked the fleeing forces with machine gun fire.

By September 25th, British cavalry had pressed along the coast for sixty miles and taken Haifa and Acre, two important ports. Step by step the Allies were rushing forward along the entire line, practically without opposition except from straggling bodies of the routed enemy, and the prisoners now numbered nearly 50,000. The Fourth Turkish army also had been caught in the trap and surrounded. The British had advanced to the sea of Galilee which region they now

U. S. Submarines Played an Important Part in the Guarding of American Coasts.

By September 21st, the captured Turks numbered 20,000. An entire Turkish column, attempting to escape into the Jordan valley, was cut off and taken. The whole valley was commanded by Allied artillery and two Turkish armies were in the trap. The British cavalry captured Nazareth and the plains of Armageddon with more stores and guns. The Seventh and Eighth Turkish armies were practically annihilated. Six miles piled deep with their bodies bore testimony to the deadly accuracy of the British artillery.

dominated. Field Marshal Liman von Sanders, who had been in command of the Turks around Nazareth, had fled to Constantinople.

By October 1st, Damascus was surrounded and taken. French detachments were speeding toward Beirut. This port they took a few days later. Palestine had been completely cleared of the enemy and it was officially announced in London that Gen. Allenby had bagged 71,000 prisoners. The Allies kept advancing northward and a Turk column north of Damas-

cus was cut off and taken. British and French warships began cooperating along the coast. The Arab chieftain reported the capture of 10,000 Turks in their share of the campaign and of the Ottoman armies involved it was stated that only 17,000 had escaped to the northward.

Thenceforth the Allied advance was rapid. Mosul, on the road to Constantinople, was reached by one expedition, and

dered. The remainder of the Turkish forces were demobilized except for enough to serve for policing purposes. The few vessels of the fleet were dismantled. Within a short time British and French vessels had sailed through the Dardanelles to Constantinople. The thousands of British prisoners captured when Gen. Townshend was forced to surrender at Kut-el-Amara, were liberated. It was

American Marines took a part in the rout of the Hun. Note the build of these boys.

other columns moved along the coast to Smyrna where they cooperated with the fleets. Rioting had broken out in the capital and the uprising was directed at the German officers and leaders of the Young Turk party. Turkey was crushed. Facing destruction from the south, west and north, with open revolution threatening, the Porte sued for an armistice under terms which meant surrender. The Dardanelles were surren-

dered. Gen. Townshend himself who had been sent to the Allied commanders with the first plea for an armistice.

In June, her drives in France lagging to a halt, Germany goaded Austria-Hungary into making an attack and on June 15th, the Teutonic Allies began a great offensive over a front of 100 miles from the Asiago plateau to the sea and along the lines on the Piave river. The first force of the drive carried the enemy across

the Piave in places and the Italians, who had now been reinforced by a considerable force of British and French and some American troops, lost 30,000 prisoners. But any initial success was quickly offset by a counter offensive. Within three days the Austrian drive both in the mountainous region of the north and in the lowlands north of Venice had been brought to a complete halt. The Austrians hurled division after division into the battle, regardless of heavy losses. Driven on by the German high command, Austria was staking all on the final effort.

Nature had intervened in behalf of the Italians. The Austrian and German forces had crossed the Piave on pontoons, bringing up with them many heavy guns. Torrential rains had fallen after their advance and Allied airmen had bombed and destroyed the bridges behind them. Cut off, they were slaughtered in thousands. The only means of reaching them with food was by airplane and the Allies held the superiority in the air. Along the entire Asiago plateau the Austrians met defeat. It was estimated that they had thrown half a million men into action and of these probably 200,000 were numbered among the casualties.

The Italians followed up with a victorious advance. Positions along the Brenta river were taken and the heights in the Mont del Rosso and Di Val Bello region were scaled and taken. Fresh army corps were rushed to aid the Austrians, for the determined advance threatened to carry the Italians back to their lines held before the disaster of months before. But steadily the Italians and British and French pressed forward, improving their lines and strengthening their positions during July and August. Height by height the enemy was pushed back in the north.

In October, the Italian effort developed into a heavy drive. Every available unit was sent in against the Austrians, who had been somewhat weakened by the with-

General Tasker H. Bliss, former Chief of Staff of the United States Army, one of the American delegates to the Peace Conference.

drawal of German forces back to the front in France. The influence of the Separatists had begun to be felt seriously and revolt was threatening to disrupt the Dual Monarchy. Through Holland, Emperor Charles had asked for mediation to secure the meeting of a peace conference. Back across the Asiago plateau the Austrians were driven, losing thousands in dead and prisoners. Austria was now extremely hard pressed, many of her troops were unreliable and she pleaded with Berlin for reinforcements. Crossings of the Piave were won by the Italians and British and the big push northward was rapid. On October 30th, American troops under Maj. Gen. Treat, operating with the British army, crossed the Piave. Vittorio, the great Austrian base, was captured and a hundred other towns freed along a front of 100 miles.

The offensive now had developed until it reached all along the Piave. In the Mont Grappa region the enemy was beaten at Segusino in a sanguinary battle and Mont Gesen was taken.

Full disaster had overtaken Emperor Charles' armies by late in October. Fifty thousand prisoners had been taken and hundreds of the heaviest guns. The Austrians were pouring across the mountains in rout and the Allies were pushed to their utmost even to keep in contact in places. The Tagliamento river was crossed by the Italians. Other columns reached the towns of Azzano, Decimo, Portogruaru and Concordia. The Italians were now within less than eighteen miles of Udine, where the Italian headquarters had been established when the disaster at Caporetta overtook them. Their total advance had been thirty miles.

On November 1st, with nearly 100,000 of their armies prisoners, 200,000 more cut off and surrounded in the Brenta and Piave regions, emissaries from the Austrian commanders entered the Italian lines under a white flag, bearing a plea for an armistice. The Allied war council in Versailles began drawing up the terms. In the meantime, with the announcement that he would rather drive the Austrians out than accept their surrender, Gen. Diaz kept up his hammer blows. The Austrians were in full rout and their casualties were mounting into the hundreds of thousands. Their entire army in the Trentino district had been cut off.

On November 3rd, the Allies' terms were presented to Austria and the armistice was signed. Germany's last prop had been kicked out from under her. Fighting in a death grip on the west front, her eastern borders were now exposed to the enemy's attack. The armistice terms left Austria powerless. She was forced to evacuate all territories under occupation. Her fleet had to be given up to the Allies. Her army had to be totally demobilized and all her troops fight-

Brigadier General Peyton Conway March, Commander of all United States Artillery in France.

ing with the Germans in France had to be withdrawn. The armistice terms practically granted what Italy had fought for, the occupation of the Trentino district, which she had lost to Austria, as well as the peninsula of Istria. The armistice provided magisterial powers over this territory and troops also began occupation to ensure the keeping of the terms in good faith.

Germany made her first direct request for an armistice on October 6th, but for the purposes of narration the peace negotiations which resulted in the complete dissolution of the Teutonic Allies and the surrender of Germany are here reviewed in chronological order, along with the internal disturbances which accompanied the defeats at the front and which have resulted in a political upheaval of the greater part of Europe:

As early as September 15th, the Kaiser had offered a separate peace to Belgium, one that was scorned by the little kingdom. This was taken as the first indication of a "peace drive", started to weaken the Allies and bring discord. The offer was vague except in that it asked Belgium's neutrality until the close of the war and guaranteed her political identity.

On the same day Austria, through the Swiss government and the other neutral

Though the Allies regarded this simply as a ruse, President Wilson sent the following curt reply:

"The government of the United States feels that there is only one reply which it can make to the suggestion of the imperial Austro-Hungarian government. It has repeatedly and with entire candor stated the terms upon which the United States would consider peace, and can and will entertain no proposal for a confer-

King George Salutes the Stars and Stripes When United States Soldiers March Through London.

nations, sent a proposal for a parley of the powers to accomplish peace. It proposed that the hostilities not cease during the discussions, which were to be carried on by delegates from the belligerents to bring out the ideas of eventual terms for the ending of the war. The conference was to be "nonbinding and confidential discussion on the basic principle for the conclusion of peace".

ence upon a matter concerning which it has made its position and purpose so plain."

Austria-Hungary was known to be facing dissolution. The Czecho-Slavs and the Jugo-Slavs were already declaring for separate republics and Bohemia was threatening a similar step.

On October 6th, Germany, with the

Interior of One of the Cement Ships, Showing Construction Work.

new chancellor, Prince Maximilian of Baden, in power as the representative of the coalition government, which had been formed to still the threatened disturbances by adherents of the Social democrats, sent the first direct appeal for an armistice. On that day Prince Maximilian, through the Swiss government, sent the following note to President Wilson:

"The German Government requests the president of the United States to take in hand the restoration of peace, acquaint

quests the immediate conclusion of an armistice on land and water and in the air."

Baron Burian, of Austria, made known the similar wish of Austria, and in his subsequent utterances to the Reichstag, Prince Maximilian supplemented his declaration of the government's position by indicating the wish to change the constitution, to accomplish democratization and to form a league of nations to protect the peace of the world.

The message of President Wilson men-

Boxing contest viewed by 20,000 soldier's. It was one of the most picturesque boxing tournaments ever held at Camp Upton. The ring was raised about eight feet from the ground and draped with the flags of the Allies.

all the belligerent states of this request and invite them to send plenipotentiaries for the purpose of opening negotiations.

"It accepts the program set forth by the president of the United States in his message to congress on January 8 and in his later pronouncements, especially his speech of September 27, as a basis for peace negotiations.

"With a view to avoiding further bloodshed, the German government re-

tioned in the German note occupies a place in a previous chapter as the basis upon which all peace negotiations must rest. His liberty loan speech on September 27th, to which the German chancellor also referred, follows:

"We are all agreed that there can be no peace obtained by any kind of bargain or compromise with the governments of the central empires, because we have dealt with them already and have seen them

deal with other governments that were parties to this struggle, at Brest-Litovsk and Bucharest.

"They have convinced us that they are without honor and do not intend justice. They observe no covenants, accept no principle but force and their own interest.

"Get out first—then talk an justice and peace," was the sense of the reply sent to Germany by President Wilson on October 8th. He stated that there could be no compromise with autocracy and demanded to know in unequivocal language if Germany would accept the uncompromising terms laid down by him. The Allied nations saw in the German note another trap, one by which the German chancellor hoped to involve the United States in a long diplomatic discussion, which, when peace finally was denied, would strengthen the flagging strength of the German people's faith in the government by showing them that the Allies sought not a just peace but were bent upon a war of slaughter and conquest. But every faith was placed in President Wilson, and his reply, which follows, was ample assurance that he would handle the situation:

"Before making reply to the request of the imperial German government, and in order that that reply shall be as candid and straightforward as the momentous interests involved require, the president of the United States deems it necessary to assure himself of the exact meaning of the note of the imperial chancellor.

"Does the imperial chancellor mean that the imperial German government accepts the terms laid down by the president in his address to the congress of the United States on the eighth of January last and in subsequent addresses, and that its object in entering into discussions would be only to agree upon the practical details of their application?

"The president feels bound to say with

Capt. Raoul Lufbery, premier "ace" of the Lafayette Escadrille, has brought down his twelfth German plane. He would have made it thirteen had he not run short of ammunition.

regard to the suggestion of an armistice that he would not feel at liberty to propose a cessation of arms to the governments with which the government of the United States is associated against the central powers, so long as the armies of those powers are upon their soil. The good faith of any discussion would manifestly depend upon the consent of the central powers immediately to withdraw their forces everywhere from invaded territory.

"The president also feels that he is justified in asking whether the imperial chancellor is speaking merely for the constituted authorities of the empire who have so far conducted the war. He deems the answer to these questions vital from every point of view."

From all over the United States, from the people and from Congress came demands for the unconditional surrender of the Central Powers. The Germans were being driven back and every day registered another defeat for their arms. There was scant faith placed in the sincerity of their peace aims. On October 14th, Germany's further expression of acceptance of President Wilson's terms came by wireless. The message follows:

"In reply to the question of the president of the United States of America the German government hereby declares:

"The German government has accepted the terms laid down by President Wilson in his address of January the eighth, and in his subsequent addresses, on the foundation of a permanent peace of justice.

"Consequently, its object in entering into discussions would be only to agree upon practical details of the application of those terms.

"The German government believes that the governments of the powers associated with the government of the United States also take the position taken by President Wilson in his address. The German government, in accordance with

Americans on Aisne Sector. American troops on active service in the Aisne sector: boarding motorlorries for a journey.

the Austro-Hungarian government, for the purpose of bringing about an armistice, declares itself ready to comply with the propositions of the president in regard to evacuation.

"The German government suggests that the president may occasion the meeting of a mixed commission for making the necessary arrangements concerning the evacuation.

"The present German government, which has undertaken the responsibility for this step towards peace, has been formed by conferences and in agreement with the great majority of the reichstag.

"The chancellor, supported in all of his actions by the will of this majority, speaks in the name of the German government and of the German people."

This note was signed by Solf, the new state secretary of the foreign office, and brought forth a new cry for unconditional surrender both here and in the allied nations of Europe. Further evidence of a "peace trap" was seen in the suggestion for discussion of the terms, and on October 15th President Wilson sent a reply

which left no doubt as to the uncompromising attitude of the Allies and the United States. He stated that the terms of evacuation and reparation were those which must be determined wholly by the Allies and in which Germany could have no hand. He called attention to the continued activities of submarines and the burning of cities during the German retreat and other inhuman acts, all being committed while the Germans sought to discuss terms for the cessation of hostilities. He left no doubt that the deposing of the Kaiser was one of the chief aims of the nations fighting against Germany. In the following language he told of the blow aimed at autocracy:

"It is necessary, also, in order that there may be no possibility of misunderstanding, that the president should very solemnly call the attention of the government of Germany to the language and plain intent of one of the terms of peace which the German government has now accepted. It is contained in the address of the president delivered at Mount Vernon on the fourth of July last. It is as follows:

"The destruction of every arbitrary power anywhere that can separately, secretly, and of its single choice disturb the peace of the world; or, if it cannot be presently destroyed, at least its reduction to virtual impotency."

"The power which has hitherto controlled the German nation is of the sort here described. It is within the choice of the German nation to alter it. The president's words just quoted naturally constitute a condition precedent to peace, if peace is to come by the action of the German people themselves. The president feels bound to say that the whole process of peace will, in his judgment, depend upon the definiteness and the satisfactory character of the guaranties which can be given in this fundamental matter. It is indispensable that the governments associated against Germany should know beyond peradventure with whom they are dealing."

American and French Soldiers Searching for Concealed Self-explosive Bombs.

Affairs in Austria were going from bad to worse. The discussion of splitting the Dual Monarchy into four states was going on. These new nations on the map were to be a Germanic Austria, the republic of the Czecho-Slavs and the Illyrian and Ruthenian republics. On October 18th, the Czecho-Slavs revolted and raised their own flag. Prague was seized and a republic was declared with no doubt that its national policies would be against Germany and all other forms of autocracy. From Berlin came the first indications to the world that open rebellion was threatened. The Socialists rioted and a display of force was made to quell them.

The Allies were placing great faith in President Wilson's ability to keep out of diplomatic tangles with Berlin and Vienna and to avoid traps in peace negotiations. But with the consent of the

Heavy Artillery on the French Front Used by the Americans to Advantage.

United States, it was agreed that all peace proposals should go to the Allied war cabinet. The British, with the taste of victory, with the end of four years of conflict and suffering almost in sight, were determined in their demands that absolutely no compromise be reached.

From Austria had come a plea for a separate peace, but it was not made public until October 19th, the day on which President Wilson sent his reply. Austria, like Germany, agreed to the famous "fourteen articles", but likewise, suggested "negotiations of the details". The President's curt reply voiced the same uncompromising attitude he had adopted toward Germany and Vienna was told that evacuation must come first, then talk of peace.

Another note was received from Berlin on October 21st. This reiterated as-

surances that the overthrow of autocracy would come with peace and that it was the voice of the German people speaking through the negotiations, not that of the Kaiser. It protested against the view that atrocities were being committed and assured President Wilson that these acts were against the strictest orders and the guilty were being punished. But the note, like its predecessors, made no suggestion of quick and absolute surrender on the terms the Allies would impose. At the same time Great Britain made her position plain as regarded evacuation of territory. Hints at new demands regarding the freedom of the seas were made and the British press asked for terms which would impose the fullest reparation and indemnities for the ravaged countries.

President Wilson's reply to this latest advance was the strongest of his exchanges with Germany and deserves full space here. The note closed the doors to any further discussion without a guaranty of surrender and made it plain that the Allied military command would dictate the terms of an armistice in the field and that Germany must apply directly there. It also dealt in unqualified terms with the record of pledges broken by Germany and stated that the United States and the Allies would in no way deal with the Hohenzollern dynasty or with a cabinet who represented them. The President's memorable note follows:

"Having received the solemn and explicit assurance of the German government that it unreservedly accepts the terms of peace laid down in his address to the congress of the United States on the eighth of January, 1918, and the principles of settlement enunciated in his subsequent addresses, particularly the address of the twenty-seventh of September, and that it desires to discuss the details of their application and that this wish and purpose emanated, not from those who have hitherto dictated German policy and conducted the present war on Germany's behalf, but from ministers who speak for the majority of the reichstag

and for an overwhelming majority of the German peoples; and having received also the explicit promise of the present German government that the humane rules of civilized warfare will be observed both on land and sea by the German armed forces, the president of the United States feels that he cannot decline to take up with the governments with which the government of the United States is associated the question of an armistice.

"He deems it his duty to say again, however, that the only armistice he would feel justified in submitting for consideration would be one which should leave the United States and the powers associated with her in a position to enforce any arrangements that may be entered into and to make a renewal of hostilities on the part of Germany impossible.

"The president has, therefore, transmitted his correspondence with the present German authorities to the governments with which the government of the United States is associated as a belligerent, with the suggestion that, if those governments are disposed to effect peace upon the terms and principles indicated, their military advisers and the military advisers of the United States be asked to submit to the governments associated against Germany the necessary terms of such an armistice as will fully protect the interests of the peoples involved and ensure to the associated governments the unrestricted power to safeguard and enforce the details of the peace to which the German government has agreed, provided they deem such an armistice possible from the military point of view.

"Should such terms of armistice be suggested, their acceptance by Germany will afford the best concrete evidence of her unequivocal acceptance of the terms

Three soldiers wearing different types of gas masks. At an exhibition they realistically went through their drills and maneuvers and won applause from the great crowd that gathered to see them.

and principles of peace from which the whole action proceeds.

"The president would deem himself lacking in candor did he not point out in the frankest possible terms the reason why extraordinary safeguards must be demanded. Significant and important as the constitutional changes seem to be which are spoken of by the German foreign secretary in his note of the 20th of October, it does not appear that the principle of a government responsible to the German people has yet been fully worked out or that any guarantees either exist or are in contemplation that the alterations of principle and of practice now partially agreed upon will be permanent.

"Moreover, it does not appear that the

Minister Whitlock returning to his post in Belgium. U. S. Minister Brand Whitlock aboard the S. S. Rotterdam.

heart of the present difficulty has been reached. It may be that future wars

have been brought under the control of the German people, but the present war has not been; and it is with the present war that we are dealing.

"It is evident that the German people have no means of commanding the acquiescence of the military authorities of the empire in the popular will; that the power of the king of Prussia to control the policy of the empire is unimpaired; that the determining initiative still remains with those who have hitherto been the masters of Germany.

"Feeling that the whole peace of the world depends now on plain speaking and straightforward action, the president deems it his duty to say, without any attempt to soften what may seem harsh words, that the nations of the world do not and cannot trust the word of those who have hitherto been the masters of German policy, and to point out once more that, in concluding peace and attempting to undo the infinite injuries and injustices of this war, the government of the United States cannot deal with any but veritable representatives of the German people.

"If it must deal with the military masters and the monarchial autocrats of Germany now, or if it is likely to have to deal with them later in regard to the international obligations of the German empire, it must demand, not peace negotiations, but surrender. Nothing can be gained by leaving this essential thing unsaid."

Events were transpiring in the domains of the Central Powers which were having a strong influence. The people's party and the Social Democrats, openly committed to an early peace, were making their demands heard in Berlin. The Germans were being cleared from Roumania and the eastern gates of Austria were now threatened by the Allies. Hungarian soldiers were openly joining the peace

mobs in Budapest and other cities in the Dual Monarchy. And, most serious of all, the militarists, who had committed Germany to the great war, had lost their last shreds of power. Ludendorff, who, more than Hindenburg, was the embodiment of the military policy, was forced out after a bitter controversy. The first quartermaster general, up to the last moment, even with the iron military machine falling about his ears, is supposed to have stood firm against surrender. Hindenburg, with others, had met the Kaiser and the new chancellor and his ministry in

to it.

Austria again asked for separate peace terms and on October 29th she made her direct plea for an armistice at once, the details of which have been recounted above.

The action of the Allies was quick in regard to Germany's last plea. The Allied war cabinet met at Versailles and framed the terms of armistice. These were transmitted to Gen. Foch and on November 5th, President Wilson communicated to Berlin the fact that the terms might be had by applying to the Allied

Americans Before St. Mihiel Salient. Before opening artillery fire on the Germans in the St. Mihiel salient these American boys are seen with gas masks on awaiting to receive the final word.

conference. There were rumors that he frankly told his sovereign that all was lost. And with this news to the outside world, came authoritative evidence that the German army at the front was disbanding in revolt even as it retreated.

Berlin, convinced that the Allies and the United States would countenance no more quibbling, on October 27th, made a direct request for the terms of an armistice. To President Wilson, Berlin addressed the information that the government was now by the people and that the military authority had been subjected

high command on the field of battle.

Germany, pushed to extreme straits, did not delay. Gen. Foch was notified by wireless that a German armistice commission sought to enter the lines and confer with him at headquarters, and on November 7th, firing was stopped at the point in the lines where the commission was to arrive and they were taken to Gen. Foch's headquarters. Gen. E. G. W. von Gruenell, Germany's delegate to the Hague peace conferences; Gen. H. K. A. von Winterfeld, former military attaché in Paris; Vice Admiral Meurer, and Ad-

miral Paul von Hintze made up the German commission.

And even as they were entering the lines, great events making for the collapse of Germany and Austria were transpiring. Along a front of a hundred miles the Allied armies were advancing in an assault which in savageness surpassed anything that had gone before. Ghent had capitulated as Queen Elizabeth of Belgium watched; Sedan was in flames and the first American troops had advanced to its outskirts; the Italians now numbered their prisoners at 1,000,000 men and they had taken 6,000 big guns and 200,000 horses. And in Germany there remained no doubt that autocracy was toppling. German sailors on some of the battleships at Kiel had revolted and seized the vessels in the name of the revolution. The first outburst of the workers and soldiers movement came when 20,000 workers gathered at Stuttgart and waved the red flag and shouted the slogan "Down with the war and long live the social republic". Dispatches which found their way out of Austria revealed that a state of chaos existed there. Cities were flooded by the soldiers returning in disorder. The demoralized troops were plundering and rallying to the banners of a score of incipient revolts. Of food there was little and the returning soldiers seized what little of that there was.

On November 8th, from the German commission within the French lines, there was sent a courier who bore the terms of the Allies to the German council at Spa. Germany was given seventy-two hours in which to answer, but the request that fighting cease until that time was refused by Gen. Foch. The wily French commander refused to be tricked and his victorious troops kept on in their rush Rhinewards.

Emperor Wilhelm II, the world's greatest autocrat, abdicated the throne and renounced the rights of succession for the Crown Prince on November 9th and

Capt. Eddie Rickenbacher, America's greatest "Ace," standing by his machine at an American Aviation field, France. Capt. Rickenbacher brought down twenty-six enemy planes.

the overthrow of autocracy and militarism was complete. This was followed by the announcement a few hours later that the first of the German states to announce a republic was Bavaria and that the diet of that little kingdom had overthrown the Wittelsbach dynasty and deposed King Ludwig and his heir, Prince Rupprecht. The German chancellor's announcement of the Kaiser's abdication follows:

"The German imperial chancellor, Prince Max of Baden, has issued the following decree: 'The kaiser and king has decided to renounce the throne.

"The imperial chancellor will remain in office until the questions connected with the abdication of the kaiser, the renouncing by the crown prince of the throne of the German empire and of Prussia, and the setting up of a regency shall have been settled.

“For the regency he intends to appoint Deputy Ebert as imperial chancellor, and he proposes that a bill shall be brought in for the establishment of a law providing for the immediate promulgation of general suffrage and for a consti-

dreams of dominion had plunged the world into war. With some of his staff and members of his personal household, he fled to Holland, where he was interned. Early in the year 1919 the conferees of the nations will meet and settle the peace

Henry P. Davison of the Red Cross.

tutional German national assembly, which will settle finally the future form of government of the German nation and of those peoples which might be desirous of coming within the empire.”

Thus ended the reign of the man whose

terms. His presence in Holland was a great source of embarrassment to that country. The people of Holland, influenced by the wave of democracy—and in some instances bolshevism—that was sweeping Europe, feared that his pres-

ence in their country might be used as an excuse to demand the removal of royalty and the setting up of a socialistic form of government.

In the meantime the political disturbances in Germany were growing. The strikes of workers extended through all the cities of northern Germany. More ships had been seized by the rebels at Kiel

flying everywhere in Berlin and a republic was declared to exist by the social democrats. Friedrich Ebert, with the resignation of Prince Maximilian, had become chancellor and head of the provisional government. Among his cabinet he numbered Dr. Liebknecht, recently released from prison, and Philip Scheidemann, both worldwide known leaders of govern-

and there had been fighting between them and the scattered royalists. With the abdication of the Kaiser, Berlin had been seized by the workmen's and soldiers' council. The revolutionists held sway in Wurtemberg and Brunswick and the monarchs of those principalities stepped down from their thrones.

On November 10th, the red flag was

mental reform. A general strike had been called and within seven hours, with no bloodshed except for a few deaths in clashes with German army officers, the overthrow of the imperial government had been accomplished and another republic added to the free nations of the world.

The world war ended at 11 o'clock

A. M. (Paris time) on November 11th, 1918. The United States received the news in a dispatch sent from Washington stating that at 2:45 o'clock A. M. the state department had announced that the armistice terms had been signed and that they would become effective at the hour given above. Gen. Foch had conveyed the news to all his commanders and

MILITARY SURRENDERS

The Germans, within fourteen days, must evacuate all of Belgium, France, Alsace-Lorraine, and Luxemburg. All German troops remaining after that time will become prisoners of war.

The Germans must surrender 5,000 cannon, half heavy and half field artil-

Interior View of Replica of a Jewish Welfare Board Hut in France on the Fighting Lines.

promptly to the minute firing ceased at the time set.

The terms imposed in the armistice left no opportunity for Germany to resume military operations. With the signing of the agreement the new government in Berlin, in effect, placed itself absolutely in the hands of the Allies. The following is a summary of the terms of the armistice:

30,000 machine guns, 3,000 mine throwers, and 2,000 airplanes, fighters, bombers—firstly D. seventy-threes—and night bombing machines.

The Germans must surrender in good condition 5,000 locomotives, 50,000 wagons, and 10,000 motor lorries. They also must turn over all the railways in

Alsace-Lorraine and their coal and metal supplies.

All Germans in East Africa must surrender in one month.

NAVAL SURRENDERS

The Germans must surrender 160 submarines, including all cruiser and mine laying submarines. They also must give

auxiliary vessels (trawlers, motor vessels, etc.) are to be disarmed.

All ports on the Black sea occupied by the Germans are to be surrendered, together with all the Russian vessels captured by the Germans.

All merchant vessels belonging to the Allies now in the hands of the Germans

up the following naval craft, the individual ships to be designated by the allies: Fifty destroyers, six battle cruisers, ten battleships, eight light cruisers.

The other submarines and all the other surface vessels are to be disarmed and dismanned and concentrated in German ports to be designated by the Allies. All

are to be surrendered without reciprocity.

OCCUPATIONS

The allies will occupy all of the country on the left (west) bank of the Rhine and the principal crossings at Mayence, Coblenz, and Cologne, together with the bridgeheads (twenty miles in radius) on the right bank.

The Germans must withdraw and create a neutral zone on the right bank forty kilometers wide from the Holland border to the Swiss border.

The allies will occupy the German forts on the Cattagat to insure freedom of access to the Baltic.

RESTORATION

Besides France, Belgium and Alsace, the Germans must retire from all territory held by Russia, Roumania, and Turkey before the war.

The treaties of Bucharest and Brest-Litovsk are abrogated.

The allies are to have access to the restored territories in the east either through Dantzig or the River Vistula.

RESTITUTION

Full restitution for all damage done by the German armies.

Restitution of the cash taken from the National Bank of Belgium.

Return of all of the gold taken by the Germans from Russia and Roumania, this gold to be turned over to the allies as trustees.

REPATRIATION

All allied prisoners in Germany, military, naval or civilian, to be repatriated immediately without reciprocal action by the allies.

The territory west of the Rhine which the Germans were to evacuate is roughly 20,000 square miles in extent, with a population of about 9,000,000. It includes some of the most important mining and manufacturing districts of Germany, and such great centers as Cologne, Strassburg, Metz, and Coblenz.

The territory consists of Alsace-Lorraine, the Palatinate, the Rhine province, Birkenfeld, and about one-third of Hesse.

The Rhine province is the largest of these districts. Its area is 10,423 square miles and the census of 1910 gave its population as 5,759,000. It contains

Two Salvation Army Lassies, Prize Winners in Doughnut and Pie Making.

great coal and metal deposits and some of the largest iron and steel manufacturing centers of Germany. There also are textile industries on a vast scale as well as extensive farming and wine growing regions.

The most important cities are Cologne, Coblenz, Bonn, and Aix-la-Chapelle. The Rhine province is the most westerly province of Prussia, by which it was acquired in 1815.

Next in size is Alsace-Lorraine. Torn from France after the Franco-Prussian war, its restoration to the mother country has been one of the chief points upon which the allies have insisted in outlining their terms. Its area is 5,600 square miles, and its population about 1,875,000.

The principal towns are Metz, Strassburg, Muehlhausen, and Kolmar. It contains the great iron ore district of Briey, one of the principal sources of German supply, and the extensive Saar coal fields. Its textile industries are among the most important in Germany.

The Palatinate is 2,372 square miles in extent, and has about 950,000 inhabitants. It is chiefly a farming and wine growing country, although there are some large

manufacturing industries. The capital is Speyer.

Birkenfeld is a principality belonging to, although detached from the grand duchy of Oldenburg. It is inclosed in the Rhine province. Its area is 194 square miles, and its population about 45,000.

The total area of the grand duchy of Hesse, about one-third of which lies west of the Rhine, is 2,965 square miles, and its total population is 1,300,000. The capital of Hesse, which is on the west bank of the Rhine, is Mainz, one of the principal fortresses of Germany.

clined by 45 per cent. while that of the allies was as great at the end as at the beginning of the campaign, thanks to the extraordinarily rapid reinforcement of the American army. The British bore the brunt of the fighting of the final campaign and their strength was reduced by 27 per cent. during the season while that of the French declined by only 21 per cent. When the fighting ceased the retreating German armies, outnumbered by the ratio of 25 to 17, terribly exhausted and short of munitions, were being split in two by the forest of the Ardennes.

The interned Austrian transport "Danube," used to carry food to the starving people of Belgium.

Evacuation of this territory also freed from German control the nominally independent grand duchy of Luxemburg, which, invaded by Germany at the beginning of the war, had been completely under its control since that time.

That the Germans gave up the struggle on November 11th because the allies were about to destroy the German armies is beyond peradventure. During the course of the sanguinary 1918 campaign the strength of the enemy's field armies de-

which would have prevented mutual support being quickly given by the northern and southern German armies. Foch would have covered himself with glory by administering the coup de mort to the stricken German armies, but he yielded to the view that it would be a crime to sacrifice thousands of additional lives on the allied side when every essential of peace could be secured without such a sacrifice. The only regrettable feature about that decision is that multitudes of

German people did not sense the fact that their armies were defeated.

Figures suggesting in detail the changes in the relative strength of the combatants as the German offensive waned and the allied offensive progressed to final victory were given by General Maurice, who appears to have had access to semi-official information. Taking the strength of the Belgian army as the unit, which means that a unit represents slightly more than 100,000 men, the following appears to have been the standing of the belligerents on March 21st, when the supreme German effort to win the war began.

Strength of Allied Armies	Strength of German Armies
British $10\frac{1}{2}$	
French $12\frac{3}{4}$	
American.... $3\frac{1}{4}$	
Belgian 1	26
<hr/>	<hr/>
25 units	26 units

Thus the actual strength of the Germans at the front at the beginning of the campaign was little more than 100,000 greater than that of the four allied nations, but the Germans had 13 other units, or more than 1,300,000 additional troops, on the way across Europe, which they could use and had available in the west before they attacked the French north of the Aisne on May 27th. In spite of all his losses in attacking the British, the enemy's attacking strength in May had increased from 26 to 31 units, giving him an advantage of more than half a million men. In the first weeks of the campaign the allies were unable to make the best use of their several and distinct armies because of the lack of a supreme commander. Had the wisest use been made of the pooled resources of the allies it is doubtful that the reverses between March and July ever would have been suffered. The enemy, with undivided control, was able to concentrate such overpowering strength against a 50-mile sector of the British front as gave him the initiative over all the allied armies and got them "in bad."

A long and anxious time was spent before the allies freed themselves from their painful disadvantage.

The writer has stated his belief that Foch had little idea, himself, what would be the effect of a counter-thrust on July 18. The most he counted on, probably, was that the enemy's offensive would be held up until the reinforcements from the United States would permit a genuine offensive campaign to proceed. This view is supported by the fact that in July the enemy still retained a great advantage in numbers though his troops were more battle-worn. The relative strength of the combatants when the allies struck back was:

Allied Strength	German Strength
British $9\frac{1}{2}$	
French $11\frac{1}{2}$	
U. S. 3	
Belgian 1	30
<hr/>	<hr/>
25	30

It will be noticed that the strength of the British and French had fallen off by $2\frac{1}{4}$ units, which were made up by the Americans. The German strength, since March, had increased by 4 units.

The rapidly-increasing American reserves justified Foch in striking and in keeping striking. Having snatched away the initiative he kept the enemy reserves dashing about madly to plug up holes in the line and wore them down rapidly. And so when the Germans made their submission in November the relative strength of the opponents was as follows:

Allied Strength	German Strength
British 8	
French 10	
Americans.... 6	
Belgians..... 1	17
<hr/>	<hr/>
25	17

In effect, the 1918 campaign ended in the allies gaining the greatest victory ever recorded in military history.

Americans Going Forward to Occupy Front Trenches in France.

Marvels of the War on Land, Sea and Air

CHAPTER XVI

TANKS GREAT INVENTION — AIRSHIPS IMPROVED GREATLY —
GERMAN SUBMARINE MOST FORMIDABLE — NAVAL COMPARISONS.

The most remarkable invention developed for military purposes during The Great War was the tank. It was an idea adapted from the tractor machine and various persons in England and in America were credited with first giving the suggestion to the British War Office. It was used with considerable success in the battle of the Somme in 1916 but later the anti-tank guns of the Germans proved effective and many officers on both sides were disposed to regard the tank as a failure. Consequently, a complete surprise was sprung by General Byng late in 1917 when hundreds of tanks rushed forward, beating down or carrying away the elaborate wire entanglements protecting the German trenches opposite Cambrai, opening the way for an advance of nine miles by the British infantry. Had General Haig been well supplied with reserves to hurl through the breach thus made by the perambulating fortresses, a different ending to the campaign of that year might have been written into history. Thereafter the tank was greatly feared by the German army but it was too late then for the Germans to go into the manufacture of them on a large scale. They had only a few tanks in their spring offensive in 1918. The British and other allied armies, however, had many hundreds of them and used them as brigades in a most spectacular manner. In the Somme offensive of August, 1918, the tanks did very fine work.

In the air wonderful progress was made in the development of heavier-than-air machines which proved to be much

more effective for army purposes than the German dirigibles or Zeppelins. These huge flying monsters were used in making several raids on England but with disastrous results to themselves. Finally the Germans confined the operations of Zeppelins to scouting for the Fleet. When the war began the British army had only one hundred airplanes but at the end of the war they had tens of thousands. On Ostend and Zeebrugge alone the British bombing planes dropped an average of four tons of bombs daily over a period lasting for five months. By that time three-decker airplanes capable of flying thousands of miles and of carrying as many as forty men had been used. The third day after the armistice was signed had been set as the date for a great raid on Berlin by monster allied airplanes.

The submarine became a much more formidable vessel as the war progressed, and the radius and power of the torpedo, its principal weapon, was much increased. Some of the later submarines were of 2,500 tons, equipped with six-inch guns and capable of submerging safely to a depth of 300 feet. The British also developed a battle-cruiser capable of crossing the ocean in three days.

The British Admiralty permitted to be made public the real story of the submarine cruisers the British successfully constructed at the time the Germans were boasting of their super-submarine. The British craft have two funnels and make 24 knots an hour on the surface under steam power. They carry from eight to

ten torpedo tubes, two or three 4-inch guns and also are equipped with internal combustion motors for surface cruising. The batteries for the undersea power can be charged from both the steam and combustion engines, and an ingenious scheme has been devised for quickly dismantling the funnels for the purpose of submerging. The vessels displace 2,000 tons on the surface and 2,700 tons submerged. They are 340 feet long, have a beam of 26 feet and a cruising radius of 3,000 miles. They are designed to be even a match for torpedo-boat destroyers in surface fighting.

It is also known that the British have successfully built a submarine carrying a 12-inch gun, although the details of this craft have not been made public. The craft was built with the idea of making it possible to fire this gun, the new ideas embraced in the construction including the "cushioning" of the boat to withstand the terrific concussion of the gun. This idea is reported unofficially as having been successful. So far as is known the new craft was never employed against any enemy vessel.

During the first half of the year 1918 no less than 100 German submarines were trapped in British mine fields off Heligoland. The total number captured or destroyed during the war is put at 202. As at least 122 were surrendered since the armistice and 58 were not yet completed, it appears that Germany used during the war or had in course of construction, a total of 382 submarines, whereas she was credited with only 35 when war began. During the course of one month the British mined zone off the Belgian coast caught 17 German submarines.

Five hundred and seventeen ships were added to the British navy during the war. The new vessels include seven battleships, five battle-cruisers, twenty-six light cruisers, seventeen monitors, 230 destroyers and 232 mine-sweepers and special craft.

Secretary Daniels of the U. S., at the end of the war said that Great Britain has in operation or building sixty-one

battleships, 13 battle cruisers, 31 heavy cruisers, 111 light cruisers, 216 patrol and gunboats, 409 destroyers, 219 submarines, 98 torpedo boats, 32 flotilla leaders, 220 airships and 897 miscellaneous ships.

The United States, with the second largest navy in the world, has built or projected 39 battleships, six battle cruisers, eight armored cruisers, forty light cruisers, 342 destroyers, 181 submarines, 15 coast torpedo vessels, 17 torpedo boats and 569 other vessels.

France has 29 battleships, 21 cruisers, eight light cruisers, 92 destroyers, 121 torpedo boats, 70 submarines, 39 airships and 183 other craft.

Italy has 18 battleships, seven cruisers, ten light cruisers, five monitors, 15 flotilla leaders, 54 destroyers, 83 torpedo boats, 45 submarines, 30 airships and 442 miscellaneous vessels.

Russia, before quitting the war, had 18 battleships, four battle cruisers, 12 heavy and nine light cruisers, 128 destroyers, 54 submarines, 13 torpedo boats, 14 airships and 90 miscellaneous vessels.

Before the armistice was signed, Germany had 47 battleships, six battle cruisers, 51 other cruisers, 223 destroyers, 175 torpedo boats, 243 submarines, and 564 miscellaneous vessels.

During the war 2,475 British ships were sunk with their crews beneath them, and 3,147 vessels were sunk and their crews left adrift. Fishing vessels to the number of 670 were lost during the period of hostilities.

According to one story, when the kaiser urged upon Admiral Scheer in October, 1918, that he sail out to meet the British fleet, the admiral consented, but only on condition that the kaiser accompany the fleet on the flagship and take nominal control of the action with the British fleet. In the interview between Scheer and the kaiser the latter pledged his word to Scheer that he would do so. The German fleet was to have sailed on a Thursday night, the kaiser was to have arrived at Kiel the previous Tuesday. But on the Monday preceding

a naval attache arrived at Kiel with a despatch for Scheer from the kaiser, in which Wilhelm stated that he could not come to Kiel because he believed it to be his duty to remain at Potsdam. Admiral Scheer then decided not only not to allow the fleet to sail, but as a protest against the Hohenzollerns to take possession of Kiel. Scheer informed Premier Ebert that he would hold the great naval base until a new government had been formed. Prince Henry of Prussia, who was at Kiel, was held a prisoner for a week. In a cablegram to government officials at Berlin, Admiral Scheer said, "We preferred disgrace to fighting in the cause of a coward."

Describing the German warships which surrendered to the British and are now interned in Scapa Flow, the correspondent of *The Daily Telegraph* says:

"The German admiral's flag, white with a thin black cross and two black balls, indicative of his rank, still flew at the main topgallant of the *Friedrich der Grosse*, as the German squadron moved between the British lines. It hung limp and dirty—typical in this state of all the German ships and their crews. The ships were in such condition that they looked like vessels laid by for breaking-up purposes. They could not have seen paint for two years. Their sides, funnels and bridges were covered with red rust, and the masts were black with soot. The guns even had not been painted for months.

"The *Derfflinger* was in better condition than any of the others, and there was an appearance on board that discipline was still in vogue. On all the other ships the crews were lounging about, many on the quarter decks, not recognizing their officers. On the *Derfflinger* the officers were parading smartly about on their own quarter, and the men were clean and orderly. As we passed close to each ship the men crowded the rail. They looked miserable and drenched and cold. Their

clothing was nondescript. There was an air of melancholy and depression everywhere.

"It was a pleasure to come from them alongside our own great ships, where everything was spick and span. Hearty sailormen with cheery faces were at every porthole, and the quarter decks were occupied only by officers, the commander marching briskly along in the traditional way, telescope under his arm. The German officers have been very polite, and no trouble whatever has been experienced with them. The British officers have rejected all advances at friendliness, and have extended only the necessary courtesies."

Captain Persius, the German naval critic, chose the moment when the finest vessels of the German navy were about to be surrendered to the allies to publish in the *Berlin Tageblatt* a sensational article containing revelations regarding the German fleet. Captain Persius said the hope that the German fleet would be able in a second Skagerrak battle to beat the British fleet rested upon the bluff and lies of the naval authorities. In August, 1914, Germany had about one million tonnage in warships, while Great Britain had more than double that, and thanks to the mistakes of Von Tirpitz, the German material was quite inferior to the British. In the Skagerrak battle, the German fleet was saved from destruction partly by good leadership and partly by favorable weather conditions. Had the weather been clear or Admiral Von Scheer's leadership less able the destruction of the whole German navy would have resulted. The long-range British guns would have completely smashed the lighter-armed German ships. As it was, the losses of the German fleet were enormous, and on June 1, Captain Persius says, it was clear to every thinking man that the Skagerrak battle must be the only general naval engagement of the war.

On all sides, says Capt. Persius, Ad-

miral Von Tirpitz was advised to construct only submarines, but he remained obstinate. On October 1, 1915, several members of the Reichstag made an earnest appeal to the army command—not to the naval staff—with the result that an order was issued terminating the construction of battleships in order that the material might be used for the making of U-boats. In the meantime so great a scarcity of material had arisen that it became necessary to disarm a number of the battleships and take the metal. In this manner, at the beginning of 1916 twenty-three battleships had been disarmed, as well as one newly built cruiser.

At the beginning of 1918 Captain Persius states, the German navy consisted only of dreadnaughts and battleships of the Heligoland, Kaiser and Markgraf types, and some few battle cruisers. All the ships which Von Tirpitz had constructed from 1897 to 1906, at a cost of innumerable millions, had been destroyed, and the U-boats that had been constructed had proved unable to fight against British warships. Admiral Von Capelle during his period as head of the navy constructed very few submarines, work being continued only on the construction of submarines of the large type, but in official quarters it was still stated that Germany possessed an enormous number of U-boats and that the losses were virtually nil. That was not true, the writer admits. In 1917, he states, 83 submarines were constructed, while 66 were destroyed. In April, 1917, Germany had 126 submarines and in October 146. In February, 1918, she had 136 and in June of the same year 113.

Only a small percentage of these submarines were actively operating at any given time, Captain Persius declares. In January, 1917, for instance, when conditions were favorable for submarine work, only twelve percent were active while thirty percent were in harbor, thirty-eight percent under repairs and twenty percent "incapacitated". Submarine crews, he says, were not sufficiently educated and

trained and they looked with distrust upon the weapon. In the last months, he reveals, it was very difficult to get men for submarine work, as experienced seamen looked upon the submarine warfare as political stupidity. Captain Persius tells of the mutiny that broke out at the beginning of the month when the German navy was ordered out for attack. Had the seamen obeyed, the writer remarks, innumerable lives would have been lost, and he declares that "every thinking man therefore is of the opinion that the seamen on November 5 rendered an invaluable service to their country".

The surrender of war weapons by the enemy represented a higher percentage of his strength than had been estimated. A Paris despatch reported that the allies captured one-third of the German artillery during their offensive, that one-ninth was destroyed in action and that the surrender of 5,000 guns represented at least one-half of all the enemy's remaining artillery. The enemy was credited with having only 2,586 planes, and the surrender of 1,700 machines left him without a single bombing or fighting plane, the remainder being planes designed for other work.

The detailed report of General Haig on the British operations between April and November showed that General Haig agrees with Foch that the defensive power of the German army was destroyed by the allies' four months' campaign and that the armistice saved the German armies from a colossal disaster and Germany from an armed invasion. But for the cessation of hostilities the allied offensive would have been extended still farther. During the 1918 campaign the British captured more than 200,000 Germans and 2,850 cannon out of a total of 330,000 prisoners and 6,000 cannon taken by all the allied armies. General Haig says that during the last three months of the fighting, the British, using 59 divisions, met and defeated no less than 99 different divisions of the Germans.

THE MARINES

By

Secretary Josephus Daniels

No achievement in the entire war stands forth more brilliantly than the share of American troops in stopping the Germans. The Germans were within less than fifty miles from Paris. Apparently all that was needed was the final push.

Because the Marines bore the greater share of the fighting at Chateau Thierry and Belleau Wood, Secretary of the Navy Daniels deals extensively with these engagements in his annual report for

Daniels' report which deals with the fighting at Chateau Thierry and Belleau Wood, renamed by the French in honor of the U. S. Marine Corps, and which was the first detailed and accurate narrative made public:

MARINE CORPS WINS GLORY.

This efficient fighting, building, and landing force of the Navy has won imperishable glory in the fulfillment of its latest duties upon the battle fields of France,

Allied Motor Transport Halted on the Western Front.

1918. Also, a bit of Foch's strategy, not before made public, is hinted at in the report. Secretary Daniels indicates that Marshal Foch realized the strength, courage and efficiency of the Americans before the rest of Europe awoke to them, and that in his confidence he dangled an apparently open road to Paris before the eyes of the German Crown Prince as a bait and that the indomitable Americans were the steel jaws of the trap he was to spring.

Following is that portion of Secretary

where the Marines, fighting for the time under Gen. Pershing as a part of the victorious American Army, have written a story of valor and sacrifice that will live in the brightest annals of the war. With heroism that nothing could daunt the Marine Corps played a vital role in stemming the German rush on Paris, and in later days aided in the beginning of the great offensive, the freeing of Rheims, and participated in the hard fighting in Champagne, which had as its object the throwing back of the Prussian armies in the vicinity of Cambrai and St. Quentin.

With only 8,000 men engaged in the fiercest battles, the Marine Corps casualties numbered 69 officers and 1,531 enlisted men dead and 78 officers and 2,435 enlisted men wounded seriously enough to be officially reported by cablegram, to which number should be added not a few whose wounds did not incapacitate them from further fighting. However, with a casualty list that numbers over half the original 8,000 men who entered battle, the official reports account for only 57 United States Marines who have been captured by the enemy. This includes those who were wounded far in advance of their lines and who fell into the hands of the Germans while unable to resist.

STOPPED DRIVE ON PARIS.

Memorial Day shall henceforth have a greater, deeper significance for America, for it was on that day, May 30, 1918, that our country really received its first call to battle—the battle in which American

This shell case is now in possession of President Wilson because it contained the first shot fired by American troops at the enemy. An American officer of the forces overseas is shown holding the historic shell case.

troops had the honor of stopping the German drive on Paris, throwing back the Prussian hordes in attack after attack, and beginning the retreat which lasted until Imperial Germany was beaten to its knees and its emissaries appealing for an armistice under the flag of truce. And to the United States Marines, fighting side by side with equally brave and equally courageous men in the American Army, to that faithful sea and land force of the Navy fell the honor of taking over the lines where the blow of the Prussian would strike the hardest, the line that was nearest Paris and where, should a breach occur, all would be lost. The world knows today that the United States Marines held that line; that they blocked the advance that was rolling on toward Paris at a rate of six or seven miles a day; that they met the attack in American fashion and with American heroism; that Marines and soldiers of the American Army threw back the crack guard divisions of Germany, broke their advance, and then, attacking, drove them back in the beginning of a retreat that was not to end until the "cease firing" signal sounded for the end of the world's greatest war. In this connection Melville Stone, general manager of the Associated Press, said, following an exhaustive trip of investigation in Europe:

"They (the Marines) had before them the best Prussian Guards and shock troops—the Germans were perfectly sure they could drive the 'amateurs' back.

"It was a dramatic situation, for success meant that the Germans could probably push for Calais and other channel ports; but Foch dangled Paris before their eyes by putting raw Americans at a point across the direct road to Paris, in the pocket between Rheims and Soissons. Instead of driving back the 'amateurs,' the 'amateurs' drove them and gave them also a very sound thrashing. Their losses were very heavy, but they did the work, and in doing it also did three things: They saved Paris; they seriously injured the morale of the best German troops; and they set a standard and fixed a reputation for Ameri-

can troops that none other dared tarnish.”

Such is the opinion of the head of a great news-gathering force regarding the achievements of the United States Marines at Chateau Thierry, where in the battle field of Bois de Belleau, now named the Bois de la Brigade de la Marine by official order of the French Staff, this branch of the Navy met the Germans and blocked their drive on Paris.

ORDERED TO FRONT ON MEMORIAL DAY.

It was on the evening of May 30, after a day dedicated to the memory of their comrades who had fallen in the training days and in the Verdun sector, that the Fifth and Sixth Regiments and the Sixth Machine Gun Battalion, United States Marines, each received the following orders:

“Advance information official received that this regiment will move at 10 p. m. 30 May by bus to new area. All trains shall be loaded at once and arrangements hastened. Wagons, when loaded, will move to Serans to form train.”

All through the night there was fevered activity among the Marines. Then, the next morning, the long trains of camions, busses, and trucks, each carrying its full complement of United States Marines, went forward on a road which at one place wound within less than 10 miles of Paris, toward Meaux and the fighting line.

Through the town of Meaux went the long line of camions and to the village of Montriel-aux-Lions, less than 4 miles from the rapidly advancing German line. On this trip the camions containing the Americans were the only traffic traveling in the direction of the Germans; everything else was going the other way—refugees, old men and women, small children, riding on every conceivable conveyance, many trudging along the side of the road driving a cow or calf before them, all of them covered with the white dust which the camion caravan was whirling up as it rolled along; along that road only one organization was advancing, the United States Marines.

GOT INTO LINE ON JUNE 2.

At last, their destination reached early on the morning of June 2, they disem-

The Gas Mask Adopted by the United States. Close up view of an American trooper accoutred with new style gas-mask. He penetrated a gas cloud, generated for the occasion, and came out unharmed, although it usually takes an experienced hand to put on a mask securely.

barked, stiff and tired after a journey of more than 72 miles, but as they formed their lines and marched onward in the direction of the line they were to hold they were determined and cheerful. That evening the first field message from the Fourth Brigade to Maj. Gen. Omar Bundy, commanding the Second Division, went forward:

“Second Battalion, Sixth Marines, in line from Le Thiolet through Clarembauts Woods to Triangle to Lucy. Instructed to

hold line. First Battalion, Sixth Marines, going into line from Lucy through Hill 142. Third Battalion in support at La Voie du Chatel, which is also the post command of the Sixth Marines. Sixth machine-gun battalion distributed at line."

Meanwhile the Fifth Regiment was moving into line, machine guns were advancing, and the artillery taking its position. That night the men and officers of the Marines slept in the open, many of them in a field

vancing in smooth columns. The United States Marines, trained to keen observation upon the rifle range, nearly every one of them wearing marksman's medal or better, that of the sharpshooter or expert rifleman, did not wait for those gray-clad hordes to advance nearer. Calmly they set their sights and aimed with the same precision that they had shown upon the rifle ranges at Paris Island, Mare Island, and Quantico. Incessantly their rifles cracked,

that was green with unharvested wheat, awaiting the time when they should be summoned to battle. The next day at 5 o'clock, the afternoon of June 2, began the battle of Chateau Thierry, with the Americans holding the line against the most vicious wedge of the German advance.

BATTLE OF CHATEAU THIERRY.

The advance of the Germans was across a wheat field, driving at Hill 165 and ad-

and with their fire came the support of the artillery. The machine-gun fire, incessant also, began to make its inroads upon the advancing forces. Closer and closer the shrapnel burst to its targets. Caught in a seething wave of machine-gun fire, of scattering shrapnel, of accurate rifle fire, the Germans found themselves in a position in which further advance could only mean absolute suicide. The lines hesitated. They

stopped. They broke for cover, while the Marines raked the woods and ravines in which they had taken refuge with machine gun and rifle to prevent them making another attempt to advance by infiltrating through. Above, a French airplane was checking up on the artillery fire. Surprised by the fact that men should deliberately set their sights, adjust their range, and then fire deliberately at an advancing foe, each man picking his target instead of firing merely in the direction of the enemy, the aviator signalled below "Bravo!" In the

to defend the positions they had won with all the stubbornness possible. In the black recesses of Belleau Wood the Germans had established nest after nest of machine guns. There in the jungle of matted underbrush, of vines, of heavy foliage, they had placed themselves in positions they believed impregnable. And this meant that unless they could be routed, unless they could be thrown back, the breaking of the line would be only a matter of time. There would come another drive and another. The battle of Chateau Thierry was

Honoring Old Glory on German territory.

rear that word was echoed again and again. The German drive on Paris had been stopped.

PIERCE FIGHTING IN BELLEAU WOOD.

For the next few days the fighting took on the character of pushing forth outposts and determining the strength of the enemy. Now, the fighting had changed. The Germans, mystified that they should have run against a stone wall of defense just when they believed that their advance would be easiest, had halted, amazed; then prepared

therefore not won and could not be won until Belleau Wood had been cleared of the enemy.

It was June 6 that the attack of the American troops began against that wood and its adjacent surroundings, with the wood itself and the towns of Torcy and Bouresches forming the objectives. At 5 o'clock the attack came, and there began the tremendous sacrifices which the Marine Corps gladly suffered that the German fighters might be thrown back.

FOUGHT IN AMERICAN FASHION.

The Marines fought strictly according to American methods—a rush, a halt, a rush again, in four-wave formation, the rear waves taking over the work of those who had fallen before them, passing over the bodies of their dead comrades and plunging ahead, until they, too, should be torn to bits. But behind those waves were more waves, and the attack went on.

“Men fell like flies”; the expression is

CHARGING MACHINE-GUN NESTS.

In Belleau Wood the fighting had been literally from tree to tree, stronghold to stronghold; and it was a fight which must last for weeks before its accomplishment in victory. Belleau Wood was a jungle, its every rocky formation forming a German machine-gun nest, almost impossible to reach by artillery or grenade fire. There was only one way to wipe out these nests—by the bayonet. And by this method were

Paris gives wonderful reception to American troops.

that of an officer writing from the field. Companies that had entered the battle 250 strong dwindled to 50 and 60, with a sergeant in command; but the attack did not falter. At 9:45 o'clock that night Boursches was taken by Lieut. James F. Robertson and twenty-odd men of his platoon; these soon were joined by two reinforcing platoons. Then came the enemy counter attacks, but the Marines held.

they wiped out, for United States Marines, bare chested, shouting their battle cry of “E-e-e-e y-a-a-h-h-h yip!” charged straight into the murderous fire from those guns, and won! Out of the number that charged, in more than one instance, only one would reach the stronghold. There, with his bayonet as his only weapon, he would either kill or capture the defenders of the nest, and then swinging the gun

about in its position, turn it against the remaining German positions in the forest. Such was the character of the fighting in Belleau Wood; fighting which continued until July 6, when after a short relief the invincible Americans finally were taken back to the rest billet for recuperation.

HELD THE LINE FOR MANY WEARY DAYS.

In all the history of the Marine Corps there is no such battle as that one in Belleau Wood. Fighting day and night with-

ter that they were unable to supply, seeing men fight on after they had been wounded and until they dropped unconscious; time after time officers seeing these things, believing that the very limit of human endurance had been reached, would send back messages to their post command that their men were exhausted. But in answer to this would come the word that the lines must hold, and if possible those lines must attack, and the lines obeyed. Without wa-

The American Red Cross workers at this station are feeding the Saloniki refugees, who are sheltered in the tents that dot the plain.

out relief, without sleep, often without water, and for days without hot rations, the Marines met and defeated the best divisions that Germany could throw into the line. The heroism and doggedness of that battle are unparalleled. Time after time officers seeing their lines cut to pieces, seeing their men so dog tired that they even fell asleep under shell fire, hearing their wounded calling for the wa-

ter, without food, without rest they went forward—and forward every time to victory. Companies had been so torn and lacerated by losses that they were hardly platoons; but they held their lines and advanced them. In more than one case companies lost every officer, leaving a sergeant and sometimes a corporal to command, and the advance continued. After 13 days in this inferno of fire a captured German of-

ficer told with his dying breath of a fresh division of Germans that was about to be thrown into the battle to attempt to wrest from the Marines that part of the wood they had gained. The Marines, who for days had been fighting on their sheer nerve, who had been worn out from nights of sleeplessness, from lack of rations, from terrific shell and machine-gun fire, straightened their lines and prepared for the attack. It came—as the dying German officer had predicted.

GERMAN CRACK TROOPS REPULSED AND BEATEN.

At 2 o'clock on the morning of June 13 it was launched by the Germans along the whole front. Without regard for men, the enemy hurled his forces against Bourresches and the Bois de Belleau, and sought to win back what had been taken from Germany by the Americans. The orders were that these positions must be taken at all costs; that the utmost losses in men must be endured that the Bois de Belleau and

Bouresches might fall again into German hands. But the depleted lines of the Marines held; the men who had fought on their nerve alone for days once more showed the mettle of which they were made. With their backs to the trees and boulders of the Bois de Belleau, with their sole shelter the scattered ruins of Bourresches, the thinning lines of the Marines repelled the attack and crashed back the new division which had sought to wrest the position from them.

And so it went. Day after day, night after night, while time after time messages like the following traveled to the post command:

“Losses heavy. Difficult to get runners through. Some have never returned. Morale excellent, but troops about all in. Men exhausted.”

Exhausted, but holding on. And they continued to hold on in spite of every difficulty. Advancing their lines slowly day by day, the Marines finally prepared their positions to such an extent that the last rush for the possession of the wood could be made. Then, on June 24, following a tremendous barrage, the struggle began.

The barrage literally tore the woods to pieces, but even its immensity could not wipe out all the nests that remained; the emplacements that were behind almost every clump of bushes, every jagged, rough group of boulders. But those that re-

The grave of Lieut. Quentin Roosevelt, aviator, and son of ex-President Roosevelt, who was killed during an air raid over enemy lines on July 14 last, has been located in France.

mained were wiped out by the American method of the rush and the bayonet, and in the days that followed every foot of Belleau Wood was cleared of the enemy and held by the frayed lines of the Americans.

PRAISE FROM FRENCH STAFF

It was, therefore, with the feeling of work well done that the depleted lines of the Marines were relieved in July, that they might be filled with replacements and made ready for the grand offensive in the vicinity of Soissons, July 18. And in recognition of their sacrifice and bravery this praise was forthcoming from the French:

“ARMY HEADQUARTERS, *June 30, 1918.*”

In view of the brilliant conduct of the Fourth Brigade of the Second United States Division, which in a spirited fight took Bouresches and the important strong point of Bois de Belleau, stubbornly defended by a large enemy force, the general commanding the Sixth Army orders that henceforth, in all official papers, the Bois de Belleau shall be named ‘Bois de la Brigade de Marine.’

“DIVISION GENERAL DEGOUTTE,

“*Commanding Sixth Army.*”

GEN. PERSHING PERSONALLY CONGRATULATES MARINES

Gen. Pershing's congratulations also were contained in the following order, issued by the brigade commander, dated

A member of an American Field Battalion is shown carrying an aged French woman into a cellar while a Hun air raid is going on.

Husky Americans landing at Bordeaux.

June 9, 1918, to the units of his command:

“The brigade commander takes pride in announcing that, in addition to the commander in chief's telegram of congratulation to the Fourth Brigade, published in an indorsement from the division commander, dated June 9, Gen. Pershing has today visited division headquarters and sent his personal greetings and congratulations to the Marine Brigade. He also added that Gen. Foch, commander in chief of the allied armies in France, especially charged him this morning to give the Marine Brigade his love and congratulations on their fine work of the past week.

“By command of Brig. Gen. Harbord.

“H. LAY, *Major, Adjutant.*”

GEN. HARBORD'S COMMENDATION

On July 18 the Marines were again called into action in the vicinity of Soissons, near Tigny and Vierzy. In the face of a murderous fire from concentrated machine guns, which contested every foot of their

advance, the United States Marines moved forward until the severity of their casualties necessitated that they dig in and hold the positions they had gained. Here, again, their valor called forth official praise, which came in the following:

“General Orders, No. 46.

“It is with keen pride that the divisional commander transmits to the command the congratulations and affectionate greetings of Gen. Pershing, who visited the divisional headquarters last night. His praise of the

11 batteries of artillery, over 100 machine guns, minnenwerfers, and supplies. The Second Division has sustained the best traditions of the Regular Army and the Marine Corps. The story of your achievements will be told in millions of homes in all allied nations tonight.

“J. G. HARBORD,

“Major General, N. A.

American troops learning how to go “over the top.” With veterans of the battlefield as instructors, and their native dash, they soon made good soldiers.

gallant work of the division on the 18th and 19th is echoed by the French high command, the Third Corps commander, American Expeditionary Forces, and in a telegram from the former divisional commander. In spite of two sleepless nights, long marches through rain and mud, and the discomfort of hunger and thirst, the division attacked side by side with the gallant First Moroccan Division, and maintained itself with credit. You advanced over 6 miles, captured over 3,000 prisoners,

IN BATTLE FOR ST. MIHIEL SALIENT

Then came the battle for the St. Mihiel salient. On the night of September 11 the Second Division took over a line running from Remenauville to Limey, and on the night of September 14 and the morning of September 15 attacked, with two days' objectives ahead of them. Overcoming the enemy resistance, they romped through to the Rupt de Mad, a small river, crossed it on stone bridges, occupied Thiaccourt, the

first day's objective, scaled the heights just beyond it, pushed on to a line running from the Zammes-Joulney Ridges to the Binvaux Forest, and there rested, with the second day's objectives occupied by 2:50 o'clock of the first day. The casualties of the division were about 1,000, of which 134 were killed. Of these, about half were Marines. The captures in which the Marines participated were 80 German officers, 3,200 men, ninety-odd cannon, and vast

swept the enemy from the field.

"Major General,

"United States Marine Corps."

CAPTURE OF BLANC MONT RIDGE

But even further honors were to befall the fighting, landing, and building force, of which the Navy is justly proud. In the early part of October it became necessary

United States nurses arriving in England on their way to France. The wonderfully humane work done by the nurses at the front was the subject of hearty praise by General Pershing.

stores. In his congratulations, following the battle, Gen. Lejeune said:

"SEPTEMBER 17, 1918.

"General Orders, No. 54.

"I desire to express to the officers and men my profound appreciation of their brilliant and successful attack in the recent engagement.

"Our division maintained the prestige and honor of the country proudly and

for the allies to capture the bald, jagged ridge 20 miles due east of Rheims, known as Blanc Mont Ridge. Here the armies of Germany and the allies had clashed more than once, and attempt after attempt had been made to wrest it from German hands. It was a keystone of the German defense, the fall of which would have a far-reaching effect upon the enemy armies. To the glory of the United States Marines, let it be said, that they were again a part of that

splendid Second Division which swept forward in the attack which freed Blanc Mont Ridge from German hands, pushed its way down the slopes, and occupied the level ground just beyond, thus assuring a victory, the full import of which can best be judged by the order of Gen. Lejeune, following the battle:

“FRANCE, October 11, 1918.

“Officers and men of the Second Division:

selves several German divisions from other parts of the front you greatly assisted the victorious advance of the allied armies between Cambrai and St. Quentin.

“Your heroism and the heroism of our comrades who died on the battle field will live in history forever, and will be emulated by the young men of our country for generations to come.

Americans Going Forward to the first line trenches. Troops of the 7th Infantry are climbing aboard trucks of the Motor Transport Service on the way to the firing line, relieving those who have already ridden part of the way.

“It is beyond my power of expression to describe fitly my admiration for your heroism. You attacked magnificently and you seized Blanc Mont Ridge, the keystone of the arch constituting the enemy’s main position. You advanced beyond the ridge, breaking the enemy’s lines, and you held the ground gained with a tenacity which is unsurpassed in the annals of war.

“As a direct result of your victory, the German armies east and west of Rheims are in full retreat, and by drawing on your-

“To be able to say when this war is finished, ‘I belonged to the Second Division; I fought with it at the Battle of Blanc Mont Ridge,’ will be the highest honor that can come to any man.

“JOHN A. LEJEUNE,

“Major General,

“United States Marine Corps,

“Commanding.”

MARKSMANSHIP AMAZES ALLIES

Thus it is that the United States Marines have fulfilled the glorious traditions of their corps in this their latest duty as the "soldiers who go to sea." Their sharpshooting—and in one regiment 93 per cent of the men wear the medal of marksmanship, a sharpshooter, or an expert rifleman—has amazed soldiers of European armies, accustomed merely to shooting in the general direction of the enemy. Under the fiercest fire they have calmly adjusted their sights, aimed for their man, and killed him, and in bayonet attacks their advance on machine gun nests has been irresistible. In the official citation lists more than one American Marine is credited with taking an enemy machine gun single handed, bayoneting its crew and then turning the gun against the foe. In one battle alone, that of Belleau Wood, the citation lists bear the names of fully 500 United States marines who so distinguished themselves in battle as to call for the official commendation of their superior officers.

CORPS FULFILLED EVERY GLORIOUS TRADITION

More than faithful in every emergency, accepting hardships with admirable morale, proud of the honor of taking their place as shock troops for the American legions, they have fulfilled every glorious tradition of their corps, and they have given to the world a list of heroes whose names will go down to all history. Let one, therefore, stand for the many, one name denote all, one act of heroism tell the story of the countless deeds of bravery that stand forth brilliantly upon the victorious pages of America's participation in this the world's greatest war:

"First Sergt. Daniel Daly, Seventy-third (Machine Gun) Company, twice holder of the medal of honor, repeatedly performed deeds of valor and great service. On June 5 he extinguished, at risk of his life, fire in the ammunition dump at Lucy-le-Bocage. On June 7, while sector was under one of its heaviest bombardments, he visited all gun crews of his company, then posted over a wide section of front, cheering the men. On June 10, single-handed, he attacked enemy machine-

German Trenches Captured by the Allies.

gun emplacement and captured it by use of hand grenades and his automatic pistol. On the same date, during enemy attack on Bouresches, he brought in wounded under fire. At all times, by his reckless daring, constant attention to the wants of his men, and his unquenchable optimism, he was a tower of strength until wounded by enemy shrapnel fire on June 20. A peerless soldier of the old school, twice decorated for gallantry in China and Santo Domingo."

I must add this citation of a typical deed of self-sacrifice, illustrative of the spirit of the noble privates in the corps:

"Pvt. Albert E. Brooks, Company F, Sixth Marines: Conspicuous for his heroic action in placing his body in front of his platoon leader while under heavy machine-gun fire in order to dress the latter's wounds. He was shot twice in the hip while performing this act of mercy."

Actual Photo of American Machine Gun Troops Operating From German Second Line in Great Cantigny Advance.

American Expeditionary Forces

By

John J. Pershing,

A remarkable summary of the operations of the American Expeditionary Force in France from the date of its organization, May 26, 1917, to the signing of the armistice November 11, 1918, was cabled to the Secretary of War by General Pershing on November 20, 1918. His account of the active military operations was as follows:

COMBAT OPERATIONS

During our period of training in the trenches some of our divisions had engaged the enemy in local combats, the most important of which was Seicheprey by the 26th on April 20, 1918, in the Toul sector, but none had participated in action as a unit. The 1st Division, which had passed through the preliminary stages of training, had gone to the trenches for its first period of instruction at the end of October, and by March 21, when the German offensive in Picardy began, we had four divisions with experience in the trenches, all of which were equal to any demands of battle action. The crisis which this offensive developed was such that our occupation of an American sector must be postponed.

On March 28 I placed at the disposal of Marshal Foch, who had been agreed upon as Commander-in-Chief of the Allied Armies, all of our forces to be used as he might decide. At his request the 1st Division was transferred from the Toul sector to a position in reserve at Chaumont en Vexin. As German superiority in numbers required prompt action, an agreement was reached at the Abbeville conference of the allied premiers and commanders and myself on May 2 by which the British shipping was to transport ten American divisions to the British army area, where they were to be trained and equipped, and additional British shipping was to be provided for as many divisions as possible for use elsewhere.

On April 26 the 1st Division had gone into the line in the Montdidier salient on the Picardy battle front. Tactics had been suddenly revolutionized to those of open warfare, and our men, confident of the results of their training, were eager for the test. On the morning of May 28 this division attacked the commanding German position in its front, taking with splendid dash the town of Cantigny and all other objectives, which were organized and held steadfastly against vicious counterattacks and galling artillery fire. Although local, this brilliant action had an electrical effect, as it demonstrated our fighting qualities under extreme battle conditions, and also that the enemy's troops were not altogether invincible.

The German Aisne offensive, which began on May 27, had advanced rapidly toward the River Marne and Paris, and the Allies faced a crisis equally as grave as that of the Picardy offensive in March. Again every available man was placed at Marshal Foch's disposal, and the 3rd Division, which had just come from its preliminary training in the trenches, was hurried to the Marne. Its motorized machine-gun battalion preceded the other units and successfully held the bridgehead at the Marne, opposite Chateau-Thierry. The 2nd Division, in reserve near Montdidier, was sent by motor trucks and other available transport to check the progress of the enemy toward Paris. The division attacked and retook the town and railroad station at Bouresches and sturdily held its ground against the enemy's best guard divisions. In the battle of Belleau Wood, which followed, our men proved their superiority and gained a strong tactical position, with far greater loss to the enemy than to ourselves. On July 1, before the Second was relieved, it captured the village of Vaux with most splendid precision.

Meanwhile our 2nd Corps, under Major-General George B. Read, had been organized for the command of our divisions with the British, which were held back in training areas or assigned to second-line defenses. Five of

the ten divisions were withdrawn from the British area in June, three to relieve divisions in Lorraine and in the Vosges and two to the Paris area to join the group of American divisions which stood between the city and any further advance of the enemy in that direction.

BATTLE OF CHATEAU-THIERRY

The great June, July troop movement from the States was well under way, and, although these troops were to be given some preliminary training before being put into action, their very presence warranted the use of all the older divisions in the confidence that we did not lack reserves. Elements of the 42d Division were in the line east of Rheims against the German offensive of July 15, and held their ground unflinchingly. On the right flank of this offensive four companies of the 28th Division were in position in face of the advancing waves of the German infantry. The 3rd Division was holding the bank of the Marne from the bend east of the mouth of the Surlélin to the west of Mézy, opposite Chateau Thierry, where a large force of German infantry sought to force a passage under support of powerful artillery concentrations and under cover of smoke screens. A single regiment of the 3rd wrote one of the most brilliant pages in our military annals on this occasion. It prevented the crossing at certain points on its front while, on either flank, the Germans, who had gained a footing, pressed forward. Our men, firing in three directions, met the German attacks with counterattacks at critical points and succeeded in throwing two German divisions into complete confusion, capturing 600 prisoners.

The great force of the German Chateau-Thierry offensive established the deep Marne salient, but the enemy was taking chances, and the vulnerability of this pocket to attack might be turned to his disadvantage. Seizing this opportunity to support my conviction, every division with any sort of training was made available for use in a counteroffensive. The place of honor in the thrust toward Soissons on July 18 was given to our 1st and 2nd Divisions in company with chosen French divisions. Without the usual brief warning of a preliminary bombardment, the massed French and American artillery, firing by the map, laid down its rolling barrage at dawn while the infantry began its charge. The tactical handling of our troops under these trying conditions was excellent throughout the action. The enemy brought up large numbers of reserves and made a stubborn defense, both with machine guns and artillery, but through five days' fighting the 1st Division continued

to advance until it had gained the heights above Soissons and captured the village of Berzy-le-Sec. The 2d Division took Beau Repaire farm and Vierzy in a very rapid advance and reached a position in front of Tigny at the end of its second day. These two divisions captured 7,000 prisoners and over 100 pieces of artillery.

The 26th Division, which, with a French division, was under command of our 1st Corps, acted as a pivot of the movement toward Soissons. On the 18th it took the village of Torcy while the 3d Division was crossing the Marne in pursuit of the retiring enemy. The 26th attacked again on the 21st, and the enemy withdrew past the Chateau-Thierry-Soissons road. The 3d Division, continuing its progress, took the heights of Mont St. Pere and the villages of Charteves and Jaulgonne in the face of both machine gun and artillery fire.

On the 24th, after the Germans had fallen back from Trugny and Epieds, our 42d Division, which had been brought over from the Champagne, relieved the 26th, and fighting its way through the Foret de Fère, overwhelmed the nest of machine guns in its path. By the 27th it had reached the Ourcq, whence the 3d and 4th Divisions were already advancing, while the French divisions with which we were co-operating were moving forward at other points.

The 3d Division had made its advance into Roncheres Wood on the 29th and was relieved for rest by a brigade of the Thirty-second. The Forty-second and Thirty-second undertook the task of conquering the heights beyond Cierges, the Forty-second capturing Sergy and the Thirty-second capturing Hill 230, both American divisions joining in the pursuit of the enemy to the Vesle, and thus the operation of reducing the salient was finished. Meanwhile the Forty-second was relieved by the Fourth at Chery-Chartreuve, and the Thirty-second by the Twenty-eighth, while the Seventy-seventh Division took up a position on the Vesle. The operations of these divisions on the Vesle were under the 3rd Corps, Major-General Robert L. Bullard commanding.

BATTLE OF ST. MIHIEL

With the reduction of the Marne salient, we could look forward to the concentration of our divisions in our own zone. In view of the forthcoming operation against the St. Mihiel salient, which had long been planned as our first offensive action on a large scale, the First Army was organized on August 10 under my personal command. While American units had held different divisional and corps sectors

along the western front, there had not been up to this time, for obvious reasons, a distinct American sector; but, in view of the important parts the American forces were now to play, it was necessary to take over a permanent portion of the line. Accordingly, on August 30, the line beginning at Port sur Seille, east of the Moselle and extending to the west through St. Mihiel, thence north to a point opposite Verdun, was placed under my command. The American sector was afterward extended across the Meuse to the western edge of the Argonne Forest, and included the 2d Colonial French, which held the point of the salient, and the 17th French Corps, which occupied the heights above Verdun.

The preparation for a complicated operation against the formidable defenses in front of us included the assembling of divisions and of corps and army artillery, transport, aircraft, tanks, ambulances, the location of hospitals, and the molding together of all of the elements of a great modern army with its own railroads, supplied directly by our own Service of Supply. The concentration for this operation, which was to be a surprise, involved the movement, mostly at night, of approximately 600,000 troops, and required for its success the most careful attention to every detail.

The French were generous in giving us assistance in corps and army artillery, with its personnel, and we were confident from the start of our superiority over the enemy in guns of all calibers. Our heavy guns were able to reach Metz and to interfere seriously with German rail movements. The French Independent Air Force was placed under my command which, together with the British bombing squadrons and our air forces, gave us the largest assembly of aviation that had ever been engaged in one operation on the western front.

From Les Eparges around the nose of the salient at St. Mihiel to the Moselle River the line was roughly forty miles long and situated on commanding ground greatly strengthened by artificial defenses. Our 1st Corps (82d, 90th, 5th and 2d Divisions), under the command of Major-General Hunter Liggett, re-strung its right on Pont-a-Mousson, with its left joining our 3rd Corps (the 89th, 42nd and 1st Divisions), under Major-General Joseph T. Dickman, in line to Xivray, were to swing toward Vigneulles on the pivot of the Moselle River for the initial assault. From Xivray to Mouilly the 2d Colonial French Corps was in line in the center, and our 5th Corps, under command of Major-General George H. Cameron, with our 26th Division and a French division at the western base of the salient,

were to attack three different hills—Les Eparges, Combres and Amaranthe. Our 1st Corps had in reserve the 78th Division, our 4th Corps the 3d Division, and our First Army the 35th and 91st Divisions, with the 80th and 33d available. It should be understood that our corps organizations are very elastic, and that we have at no time had permanent assignments of divisions to corps.

After four hours' artillery preparations, the seven American divisions in the front line advanced at 5 a. m. on September 12, assisted by a limited number of tanks manned partly by Americans and partly by French. These divisions, accompanied by groups of wire cutters and others armed with bangalore torpedoes, went through the successive bands of barbed wire that protected the enemy's front line and support trenches, in irresistible waves on schedule time, breaking down all defense of an enemy demoralized by the great volume of our artillery fire and our sudden approach out of the fog.

Our 1st Corps advanced to Thiaucourt, while our 4th Corps curved back to the southwest through Nonsard. The 2d Colonial French Corps made the slight advance required of it on very difficult ground, and the 5th Corps took its three ridges and repulsed a counter-attack. A rapid march brought reserve regiments of a division of the 5th Corps into Vigneules in the early morning, where it linked up with patrols of our 4th Corps, closing the salient and forming a new line west of Thiaucourt to Vigneulles and beyond Fresnes-en-Woevre. At the cost of only 7,000 casualties, mostly light, we had taken 16,000 prisoners and 443 guns, a great quantity of material, released the inhabitants of many villages from enemy domination, and established our lines in a position to threaten Metz. This signal success of the American First Army in its first offensive was of prime importance. The Allies found that they had a formidable army to aid them, and the enemy learned finally that he had one to reckon with.

MEUSE-ARGONNE OFFENSIVE, FIRST PHASE

On the day after we had taken the St. Mihiel salient, much of our corps and army artillery which had operated at St. Mihiel, and our divisions in reserve at other points, were already on the move toward the area back of the line between the Meuse River and the western edge of the forest of Argonne. With the exception of St. Mihiel, the old German front line from Switzerland to the east of Rheims was still intact. In the general attack all along the line, the operation assigned the American Army as the hinge of this allied offensive was directed toward the important railroad com-

munications of the German armies through Mezieres and Sedan. The enemy must hold fast to this part of his lines or the withdrawal of his forces with four years' accumulation of plants and material would be dangerously imperiled.

The German Army had as yet shown no demoralization, and, while the mass of its troops had suffered in morale, its first-class divisions, and notably its machine-gun defense, were exhibiting remarkable tactical efficiency as well as courage. The German General Staff was fully aware of the consequences of a success on the Meuse-Argonne line. Cer-

screened by dense thickets, had been generally considered impregnable. Our order of battle from right to left was the 3d Corps from the Meuse to Malancourt, with the 33d, 80th and 4th divisions in line, and the 3d Division as corps reserve; the 5th Corps from Malancourt to Vauquois, with 79th, 87th and 91st Divisions in line, and the 32d in corps reserve, and the 1st Corps, from Vauquois to Vienne le Chateau, with 35th, 28th and 77th Divisions in line, and the 92d in corps reserve. The army reserve consisted of the 1st, 29th and 82d Divisions.

On the night of September 25 our troops

French and Americans Advance to Grenade Attack Land somewhere on the front in France. They are carrying in the sacks slung over their shoulders.

These staunch allies are shown crossing No Man's moving cautiously, ready to use the grenades they are

tain that he would do everything in his power to oppose us, the action was planned with as much secrecy as possible and was undertaken with the determination to use all our divisions in forcing decision. We expected to draw the best German divisions to our front and to consume them while the enemy was held under grave apprehension lest our attack should break his line, which it was our firm purpose to do.

Our right flank was protected by the Meuse, while our left embraced the Argonne Forest whose ravines, hills, and elaborate defense,

quietly took the place of the French, who thinly held the line of this sector, which had long been inactive. In the attack which began on the 26th we drove through the barbed wire entanglements and the sea of shell craters across No Man's Land, mastering all the first-line defences. Continuing on the 27th and 28th, against machine guns and artillery of an increasing number of enemy reserve divisions, we penetrated to a depth of from three to seven miles and took the village of Montfaucon and its commanding hill and Exermont, Gercourt, Cuisy, Septsarges, Malan-

court, Ivoiry, Epinonville, Charpentry, Very and other villages. East of the Meuse one of our divisions, which was with the 2d Colonial French Corps, captured Marcheville and Rieville, giving further protection to the flank of our main body. We had taken 10,000 prisoners, we had gained our point of forcing the battle into the open, and were prepared for the enemy's reaction, which was bound to come, as he had good roads and ample railroad facilities for bringing up his artillery and reserves.

In the chill rain of dark nights our engineers had to build new roads across spongy shell-torn areas, repair broken roads beyond No Man's Land, and build bridges. Our gunners, with no thought of sleep, put their shoulders to wheels and drag-ropes to bring their guns through the mire in support of the infantry, now under the increasing fire of the enemy's artillery. Our attack had taken the enemy by surprise, but quickly recovering himself, he began to fire counterattacks in strong force, supported by heavy bombardments, with large quantities of gas. From September 28 until October 4 we maintained the offensive against patches of woods defended by snipers and continuous lines of machine guns, and pushed forward our guns and transport, seizing strategical points in preparation for further attacks.

OTHER UNITS WITH ALLIES

Other divisions attached to the allied armies were doing their part. It was the fortune of our 2d Corps, composed of the 27th and 30th Divisions, which had remained with the British, to have a place of honor in coöperation with the Australian Corps on September 29 and October 1 in the assault on the Hindenburg Line where the St. Quentin Canal passes through a tunnel under a ridge. The 30th Division speedily broke through the main line of defense for all its objectives, while the 27th pushed on impetuously through the main line until some of its elements reached Gouy. In the midst of the maze of trenches and shell craters and under crossfire from machine guns the other elements fought desperately against odds. In this and in later actions, from October 6 to October 19, our 2d Corps captured over 6,000 prisoners and advanced over thirteen miles. The spirit and aggressiveness of these divisions have been highly praised by the British Army commander under whom they served.

On October 2-9 our 2d and 36th Divisions were sent to assist the French in an important attack against the French in an important attack against the old German positions before Rheims. The 2d conquered the com-

plicated defense works on their front against a persistent defense worthy of the grimmest period of trench warfare and attacked the strongly held wooded hill of Blanc Mont, which they captured in a second assault, sweeping over it with consummate dash and skill. This division then repulsed strong counterattacks before the village and cemetery of Ste. Etienne and took the town, forcing the Germans to fall back from before Rheims and yield positions they had held since September, 1914. On October 9 the 36th Division relieved the 2d, and in its first experience under fire withstood very severe artillery bombardment and rapidly took up the pursuit of the enemy, now retiring behind the Aisne.

MEUSE-ARGONNE OFFENSIVE, SECOND PHASE

The allied progress elsewhere cheered the efforts of our men in this crucial contest, as the German command threw in more and more first-class troops to stop our advance. We made steady headway in the almost impenetrable and strongly held Argonne Forest, for, despite this reinforcement, it was our army that was doing the driving. Our aircraft was increasing in skill and numbers and forcing the issue, and our infantry and artillery were improving rapidly with each new experience. The replacements fresh from home were put into exhausted divisions with little time for training, but they had the advantage of serving beside men who knew their business and who had almost become veterans overnight. The enemy had taken every advantage of the terrain, which especially favored the defense by a prodigal use of machine guns manned by highly trained veterans and by using his artillery at short ranges. In the face of such strong frontal positions we should have been unable to accomplish and progress according to previously accepted standards, but I had every confidence in our aggressive tactics and the courage of our troops.

On October 4 the attack was renewed all along our front. The 3d Corps, tilting to the left, followed the Briulles-Cunel Road; our 5th Corps took Gesnes, while the 1st Corps advanced for over two miles along the irregular valley of the Aire River and in the wooded hills of the Argonne that bordered the river, used by the enemy with all his art and weapons of defense. This sort of fighting continued against an enemy striving to hold every foot of ground and whose very strong counterattacks challenged us at every point. On the 7th the 1st Corps captured Chatel-Chénéry and continued along the river to Cornay. On the east of the Meuse sector one of the two divisions coöperating with the

French, captured Consenvoye and the Hautmont Woods. On the 9th the 5th Corps, in its progress up the Aire, took Fléville, and the 3d Corps, which had continuous fighting against odds, was working its way through Briueulles and Cunel. On the 10th we had cleared the Argonne Forest of the enemy.

It was now necessary to constitute a second army, and on October 9 the immediate command of the First Army was turned over to Lieut.-Gen. Hunter Liggett. The command of the Second Army, whose divisions occupied a sector in the Woevre, was given to Lieut.-Gen. Robert L. Bullard, who had been commander of the 1st Division and then of the 3d Corps. Major-Gen. Dickman was transferred to the command of the 1st Corps, while the 5th Corps was placed under Major-Gen. Charles P. Summerall, who had recently commanded the 1st Division. Major-Gen. John L. Hines, who had gone rapidly up from regimental to division commander, was assigned to the 3d Corps. These four officers had been in France from the early days of the expedition and had learned their lessons in the school of practical warfare.

Our constant pressure against the enemy brought day by day more prisoners, mostly survivors from machine-gun nests captured in fighting at close quarters. On October 18 there was very fierce fighting in the Caures Woods east of the Meuse and in the Ormont Woods. On the 14th the 1st Corps took St. Juvin, and the 5th Corps, in hand-to-hand encounters, entered the formidable Kriemhilde line, where the enemy had hoped to check us indefinitely. Later the 5th Corps penetrated further the Kriemhilde line, and the 1st Corps took Champignuelles and the important town of Grandpre. Our dogged offensive was wearing down the enemy, who continued desperately to throw his best troops against us, thus weakening his line in front of our Allies and making their advance less difficult.

DIVISIONS IN BELGIUM.

Meanwhile we were not only able to continue the battle, but our 37th and 91st Divisions were hastily withdrawn from our front and dispatched to help the French Army in Belgium. Detraining in the neighborhood of Ypres, these divisions advanced by rapid stages to the fighting line and were assigned to adjacent French corps. On October 31, in continuation of the Flanders offensive, they attacked and methodically broke down all enemy resistance. On Nov. 3, the 37th had completed its mission in dividing the enemy across the Escaut River and firmly established itself along the east bank included in the division zone of action. By a clever

flanking movement troops of the 91st Division captured Spitaals Bosschen, a difficult wood extending across the central part of the division sector, reached the Escaut, and penetrated into the town of Audenarde. These divisions received high commendation from their corps commanders for their dash and energy.

MEUSE-ARGONNE—LAST PHASE.

On the 23d the 3d and 5th Corps pushed northward to the level of Bantheville. While we continued to press forward and throw back the enemy's violent counterattacks with great loss of morale by the enemy game our men more der way for the final assault. Evidences of loss of morale by the enemy gave our men more confidence in attack and more fortitude in enduring the fatigue of incessant effort and the hardships of very inclement weather.

With comparatively well-rested divisions, the final advance in the Meuse-Argonne front was begun on November 1. Our increased artillery force acquitted itself magnificently in support of the advance, and the enemy broke before the determined infantry, which, by its persistent fighting of the past weeks and the dash of this attack, had overcome his will to resist. The 3d Corps took Ancreville, Doulon and Andevanne, and the 5th Corps took Landres et St. Georges and passed through successive lines of resistance to Bayonville and Chennery. On the 2d the 1st Corps joined in the movement, which now became an impetuous onslaught that could not be stayed.

On the 3d advance troops surged forward in pursuit, some by motor trucks, while the artillery pressed along the country roads close behind. The 1st Corps reached Authe and Châtilon-Sur-Bar., the 5th Corps, Fosse and Nouart, and the 3d Corps, Halles, penetrating the enemy's lines to a depth of twelve miles. Our large-caliber guns had advanced and were skillfully brought into position to fire upon the important lines at Montmedy, Longuyon and Conflans. Our 3d Corps crossed the Meuse on the 5th and the other corps, in the full confidence that the day was theirs, eagerly cleared the way of machine guns as they swept northward, maintaining complete coordination throughout. On the 6th, a division of the 1st Corps reached a point on the Meuse opposite Sedan, twenty-five miles from our line of departure. The strategical goal which was our highest hope was gained. We had cut the enemy's main line of communications, and nothing but surrender or an armistice could save his army from complete disaster.

In all forty enemy divisions had been used against us in the Meuse-Argonne battle. Be-

tween September 26 and November 6 we took 26,059 prisoners and 468 guns on this front. Our divisions engaged were the 1st, 3d, 4th, 5th, 26th, 28th, 29th, 32d, 33d, 35th, 37th, 42d, 77th, 78th, 79th, 80th, 82d, 89th, 90th and 91st. Many of our divisions remained in line for a length of time that requires nerves of steel, while others were sent in again after only a few days of rest. The 1st, 5th, 26th, 77th, 80th, 89th and 90th were in the line twice. Although some of the divisions were fighting their first battle, they soon became equal to the best.

OPERATIONS EAST OF THE MEUSE

On the three days preceding November 10, the 3d, the 2d Colonial and the 17th French Corps fought a difficult struggle through the Meuse Hills south of Stenay and forced the enemy into the plain. Meanwhile my plans for further use of the American forces contemplated an advance between the Meuse and the Moselle in the direction of Longwy by the First Army, while, at the same time, the Second Army should assure the offensive toward the rich coal fields of Briey. The operations were to be followed by an offensive toward Château-Salins east of the Moselle, thus isolating Metz. Accordingly, attacks on the American front had been ordered, and that of the Second Army was in progress on the morning of November 11, when instructions were received that hostilities should cease at 11 o'clock a. m.

At this moment the line of the American sector, from right to left, began at Port-sur-Seille, thence across the Moselle to Vandieres and through the Woevre to Bezonvaux, in the foothills of the Meuse, thence along to the foothills and through the northern edge of the Woevre forests to the Meus at Mouzay, thence along the Meuse connecting with the French under Sedan.

RELATIONS WITH THE ALLIES

Coöperation among the Allies has at all times been most cordial. A far greater effort has been put forth by the allied armies and staffs to assist us than could have been expected. The French Government and Army have always stood ready to furnish us with supplies, equipment and transportation and to aid us in every way. In the towns and hamlets wherever our troops have been stationed or billeted the French people have everywhere received them more as relatives and intimate friends than as soldiers of a foreign army. For these things words are quite inadequate to express our gratitude. There can be no doubt that the relations growing out of our associations here assure a permanent friendship between the two peoples. Although we have not been so intimately associated with the people of Great Britain, yet their troops and ours

when thrown together have always warmly fraternized. The reception of those of our forces who have passed through England and of those who have been stationed there has always been enthusiastic. Altogether it has been deeply impressed upon us that the ties of language and blood bring the British and ourselves together completely and inseparably.

STRENGTH

There are in Europe altogether, including a regiment and some sanitary units with the Italian Army and the organizations at Mursk, also including those en route from the States, approximately 2,053,347 men, less our losses. Of this total there are in France 1,338,169 combatant troops. Forty divisions have arrived of which the infantry personnel of ten have been used as replacements, leaving thirty divisions now in France organized into three armies of three corps each.

The losses of the Americans up to November 18 are: Killed and wounded, 36,145; died of disease, 14,811; deaths unclassified, 2,204; wounded, 179,625; prisoners, 2,163; missing, 1,160. We have captured about 44,000 prisoners and 1,400 guns, howitzers and trench mortars.

[General Pershing then highly praised the work of the General Staff, the Service of Supply, Medical Corps, Quartermaster Department, Ordnance Department, Signal Corps, Engineer Corps, and continued:]

Our aviators have no equals in daring or in fighting ability, and have left a record of courageous deeds that will ever remain a brilliant page in the annals of our army. While the Tank Corps has had limited opportunities, its personnel has responded gallantly on every possible occasion, and has shown courage of the highest order.

The navy in European waters has at all times most cordially aided the army, and it is most gratifying to report that there has never before been such perfect coöperation between these two branches of the service.

Finally, I pay supreme tribute to our officers and soldiers of the line. When I think of their heroism, their patience under hardships, their unflinching spirit of offensive action, I am filled with emotion which I am unable to express. Their deeds are immortal, and they have earned the eternal gratitude of our country.

I am, Mr. Secretary, very respectfully,

JOHN J. PERSHING,

General, Commander-in-Chief,
American Expeditionary Forces.

To the Secretary of War.

The year 1915 may be described as the year of "Too late" for the allies, and especially for England, so far as land operations were concerned. The Gallipoli adventure is an illustration. During the winter a great naval attack upon the Dar-

mitted Germany to send and place modern guns.

Then, on April 26, British, Australian and New Zealand forces landed for an attack on the land side. The campaign, which ran through the year, is a tale of heroism and blunders too long to tell here.

American Officer and Private Win French Decorations. General Gaucher, of the French Army, is decorating an American officer and an American soldier for bravery in a recent bombardment.

danelles was planned and begun. It failed, with the loss of several vessels. Had it been inaugurated the year before it is believed it would have succeeded, as the usual Turkish slackness had neglected the fortifications. But the delay per-

Had the landing been a few weeks or even a few days earlier it might have succeeded, but it was again "too late." Victory is now believed to have been in sight at one time, but the opportunity was missed. On Jan. 9, '16 the attempt was finally given up.

Again, on March 10, the British drove at Neuve Chapelle and took it, but blunders were made which turned the victory into a practical defeat. Four days later, however, the Russians took Przemysl and stood in the Carpathian passes, and Hungary cried out for help against an imminent invasion.

THE FALL OF WARSAW.

But in May the Huns, under Mackensen, broke the Russian line on the Duna-jec, while Hindenburg drove through from Courland toward Warsaw. On June 23 the Russians were forced out of

On May 24, 1915, Italy had entered the war on the side of the allies. The timid statesmen who had been in power had to choose between fighting the Hun and revolution at home. Not for lack of zeal and courage, but because of topographical conditions Italy was able to accomplish little this year.

In 1866 Italy had obtained Venetia as a reward for siding with Prussia against Austria. Berlin took care that its prospective ally should get the best of its actual ally in the boundary drawing.

The line was so fixed along the Carnic Alps as to be easily defended by Austria

One of the later types of British Submersible, The "E-87."

Lemberg; on Aug. 5 Warsaw fell, and on Aug. 25 the Germans took Brest-Litovsk, and a few days later drove the Russians across the Dwina. Except for occasional advances to Galicia, the Russians did little more in the Polish theater.

After the fall of Warsaw the Grand Duke Nicholas was displaced from command and sent to the Caucasus, whence he was to accomplish something against the Turks the next year. But with the retreat beyond the Dwina, the Russian armies, though this was not realized at the time, ceased to be a possible decisive factor.

and difficult of attack by Italy. To get at Austria the Italians had to fight uphill through a very rough mountain region whose natural defenses had been carefully improved by military art. The slow progress of the Italian armies for more than a year was mainly due to the difficulties of the country over which they had to fight their way.

On May 7, 1915, occurred an event which filled the world with horror, outside of Germany, where it was the subject of public rejoicing. This was the sinking by a Hun submarine of the great Cunard liner Lusitania, without the slightest warning or giving the least opportunity for her people to

The Latest Type of U. S. Submarine, the L-1.

escape. The result was the murder of 1,134 noncombatants, about half of them women and children, and more than 100 of them Americans. In moral effect this "success" was a greater loss to Germany than the battle of the Marne, for from it the world began to understand that there could be no safety for any nation until the German empire was destroyed.

THE DISASTER OF SERBIA.

Little Serbia had beaten off the Austrian attack the year before, and for nine months had kept her soil clear of the invader. But

now came her turn to join Belgium in martyrdom.

Having really disposed of Russia, as the event proved, even more by corruption of its administration, including some of the chief ministers of the czar, than by victories in the field, the Huns were now able to bring Bulgaria to their side and thus turn irresistible forces upon hapless Serbia. An Austro-German army swept over the Danube; the Bulgars attacked from the east; the pro-German king of Greece, whose wife was the kaiser's sister, repudiated his solemn engagement to aid Serbia if attacked by Bulgaria.

The allies attempted to come to Serbia's aid by landing troops at Saloniki, but again they were "too late." The Serbian army was simply overwhelmed, and its retreat with most of the civilian population through the mountains of Albania to the Adriatic was one of the most tragic events in history. The Serbian spirit, however, remained unbroken, and Serbian soldiers did their parts in winning the triumphs of 1918.

Thus in the main theaters of the war the year was a bad one for the Allies. In its outer fields they made substantial progress. Early in the war Australian, New Zealand and Japanese forces had seized the German

A Captured German Stronghold.

colonies in the Pacific, and the Japanese had taken Kaio-Chao, the Hun stronghold on the Chinese coast.

Berlin had counted confidently on a Boer revolt in South Africa, but the Boers themselves quickly suppressed some attempts and on May 12, 1915, the forces of the Union of South Africa captured the German military colony of Southwest Africa. Meanwhile, British and French colonial forces

This year was also marked by the appearance of a new weapon, poison gas, first used by the Huns in the second battle of Ypres in April against French colonial troops. The break in the line was closed by the valor of the Canadians, who suffered horribly, but still held fast.

“THEY SHALL NOT PASS”

The western front battles of 1916 opened on Feb. 21 with the great German drive

Defenders of Our Shores. Coast defense gun crew at Fort Andrews, Boston, loading a projectile into a twelve-inch mortar.

had been cleaning up Togoland, and by the end of the year East Africa was the only colony still held by German forces.

Turkish attempts to reach the Suez canal had also been repulsed and the British had made alliances with the Arab tribes seated about the Mohammedan holy cities of Mecca and Medinah, which were to have important effects upon the position of the Turkish sultan in the eyes of Moslems throughout the world.

against the Verdun position. For weeks the issue was doubtful, with the French tenaciously holding, but slowly pushed back by the constant hammering of the Huns. The spirit of France was voiced in the motto, “On ne passe pas”—“They shall not pass.” And they did not pass, though before the Hun wave reached its crest in July it had penetrated the inner fortifications of Verdun.

Then at the critical moment, on July 1,

The "America," a great seaplane built for transatlantic flight.

the British and French struck back on the Somme, driving a wedge twenty miles wide and ten miles deep into the German lines, and inflicting losses estimated at 700,000 men, including 95,000 prisoners, over 300 cannon and nearly 1,500 machine guns. In this allied drive the "tank" first made its appearance, a huge armored tractor de-

vised by the British and built in America whose "caterpillar" wheels enabled it to waddle over seemingly impassable obstructions.

This battle, it was hoped, would be the beginning of the "big push" that would end in the expulsion of the Huns from France, but it was halted in November by the rainy season when its threat seemed most dangerous to the enemy. It is also reported that certain French politicians, tainted with the "defeatist" propaganda for which Bolo Pasha later paid with his life, intrigued against Gen. Nivelle, commander of the region of the famous "Ladies' road," and procured his supersession at the critical moment.

First view of plant where Uncle Sam built his airplanes for which Congress has appropriated \$640,000,000. The view shows the work of building the airplanes, which went on behind guarded walls.

On the Asiatic front the Russian armies under Grand Duke Nicholas made substantial progress into Armenia, where the year before the Turks, with German sanction, had massacred probably 250,000 of that hapless race. The Russian fleets dominated the Black sea, despite the addition to the Turkish navy of German vessels and men, but the capture of Trebizond on April 15 marked the limit of the Russian advance.

This was offset by the loss two weeks later of 10,000 Anglo-Indian troops at Kut-

el-Amara in Mesopotamia. These forces for about a year had been slowly working up the Tigris and had almost reached Bagdad when they were caught by floods, surrounded and starved into surrender.

THE BETRAYAL OF ROUMANIA

By August of this year it also began to look as if the Italians would finally be able to carry the war into Austria. They had taken Gorizia after overcoming the most enormous difficulties of terrain. Then on Aug. 27 Roumania declared for the allies, and added her army to the forces which the Huns had to meet on the eastern front.

Of course Roumania could not have ventured to come in without definite assurances of support and supply of munitions from the allies. These promises were kept on the part of England and France. The arms and munitions were duly delivered at Archangel and on the Murman coast. But they never reached Roumania. Neither did the promised Russian army that was to come through Bessarabia ever arrive to join the Roumanians and the Russian advance into Galicia did not get far enough seriously to impede the secondary Austro-German attack from Transylvania.

Moreover the Roumanians, instead of sending their principal army against Bulgaria on the south, made their main effort toward Hungary. As a result the Bulgarians, led by Gen. Mackensen, probably the

Americans on the Aisne receiving masks for protection against German poison gas.

most efficient of the German commanders, speedily forced the passage of the Danube, and by Dec. 6 Bukharest had fallen, the Roumanian government had fled to Jassy, and half of Roumania, including the precious petroleum fields, was in possession of the Huns.

As it afterward appeared German corruption of high Russian officials, extending even to Stuermer, then prime minister, had brought about the betrayal of Roumania, both by failure to deliver indispensable munitions and withholding the promised aid of troops and by advance communication of Roumania's plan of campaign to the German general staff. That is, the undoubted abilities of Mackensen were aided at Petrograd by the grossest treachery, procured by Berlin's bribes. While Roumania nominally held out for more than a year, her army was not after the end of 1916 an important factor in the conflict.

AMERICA ENTERS THE WAR

Many Americans had been slow to believe the tales of Hun atrocity in Belgium and France. But evidence accumulated and

A Captured German Dugout. On a battlefield near Lens. The entrance to a thick concrete walled and bomb-proof roofed German trench dugout.

U. S. Mine for Harbor protection.

the wholesale murder of the *Lusitania* roused such indignation that millions would have welcomed an immediate declaration of war. The government at Washington however deemed it wise to wait until the cup of Hun iniquity should be not only full but running over.

After full two years of effort on the part of President Wilson to recall Germany to observance of the laws of civilized warfare, and after Berlin's repeated promises had

proved to be brazen lies the break finally came when on Jan. 31 the kaiser's government added open insult to repeated injuries.

On that day Berlin decreed to itself the ownership of about half of the Atlantic ocean for its submarines and assumed to bar out of this "war zone" not only all enemy, but all neutral vessels, under penalty of destruction. The United States was forbidden to send to any British port more than one ship weekly, which vessel must also be distinguished by a sort of barber-pole decoration.

On Feb. 3 the German ambassador was handed his passports. On April 2 President Wilson asked congress to make a formal declaration of war, which was passed and signed on April 6—Good Friday, and in the judgment of the whole nation a good day for a good deed.

The first American naval contingent sailed immediately. American troops began to land in France on June 26 and saw their first fighting on Oct. 27, but the remainder of the year on this side of the Atlantic was largely consumed in raising and training the army, which finally grew to 2,000,000 men in France and as many more preparing to follow them when the successive surrenders of Bulgaria, Turkey, Austria, and Germany led to the armistice and ended hostilities.

THE RUSSIAN REVOLUTIONS

The year 1917 had opened not unpros-

Allied Troops Resting After a Battle.

perously for the free nations. The French and English had improved their positions on the western front. A new British army that had been pushing up the Tigris took Bagdad on March 11. At the same time the Huns in Flanders retreated about twenty miles to what became known as "the Hindenburg line." Toward the end of May the Italians had crossed the Isonzo and were on the Bainsizza plateau, within twelve miles of Trieste. The United States, though not yet ready with a great army, was freely making enormous and sorely needed loans to France, England, Italy, Belgium and Russia.

But on March 12 a revolution, led by members of the duma and backed by the Petrograd garrison, had dethroned the czar, declared monarchy abolished and set up a Russian republic. It was hailed with joy by all friends of democracy, but the hopes built upon it were doomed to disappointment. The provisional government went through one crisis after another, until finally with the fall of Kerensky on Nov. 8 the control of Russia fell into the hands of the "bolsheviki," a group of radical socialists and doctrinaire pacifists, who demoralized the army and made peace with the Huns, ceding to them and the Turks Poland, the Baltic provinces, the Ukraine and Trans-Caucasia.

Even the original Russian revolution is suspected to have been more or less "made

Private Shelly being decorated by the King of England with the Medal of Honor for gallantry in advance from Hamel on July 4th.

in Germany," though the honesty of Kerensky and others of its original leaders is not questioned. It has been proved, however, that Lenine and Trotzky, the chiefs of the bolsheviki, were from the beginning in German pay and it was said of the Bolsheviki that "those who are not crazy are crooked and those who are not crooked are crazy," and the epigram appears to be an accurate description.

Even before the fall of Kerensky the Germans had been enabled by the growing demonstrations of the Russian armies to take Riga and engineer the secession of the Ukraine from northern Russia, with eventual results of getting temporary possession of territories larger than the whole German empire before the war.

THE ITALIAN DISASTER

Delivered by the collapse of Russia from the need of maintaining more than a border guard on the eastern front, with plundering expeditions into the Baltic provinces and the Ukraine, the Huns concentrated for a great drive upon Italy. On Oct. 26 the Italian line was broken at Caporetto and within three weeks the Italian army had lost all its hard won gains of nearly thirty months, and more.

Its retreat was marked by enormous losses of men and material and ended only at the Piave river, where a successful stand was made with the aid of French and Brit-

An improved type of bomb-gun with which the British Army is well equipped.

ish troops. There is little doubt that "German propaganda" along the lines of the bolshevist idea that the war could be ended by the soldiers simply refusing to fight any more had undermined the morale of certain Italian contingents and contributed to this German success.

In other quarters, however, the allies fared better. On June 12 the treacherous King Constantine of Greece was forced to abdicate and Venizelos returned to power.

with a proclamation of a "holy war." The effort had failed, but the British government was not content to rest on the evident loyalty of its Moslem subjects. It struck back not only with the expedition into Mesopotamia, but also by measures which detached the Arab tribes about Mecca and Medinah from obedience to Constantinople.

Then in the latter part of 1917 an expedition commanded by Gen. Allenby pushed

Arrival of the First American Troops in Paris.

Then began a reorganization and purification of the Greek army, which the next year sent 400,000 Greeks to aid in putting Bulgaria and Turkey out of the war and in the reconquest of Serbia.

There were other steps taken by the allies of importance in a political as well as a military sense. Early in the war the Turkish government had attempted to arouse all Mohammedans against the allies

across the desert from Egypt into Palestine, defeated the Turks near Joppa, and on Dec. 20 captured Jerusalem and later pushed eastward across the Jordan and seized the railroad to Medinah.

Christendom was pleased with the Christmas gift of Jerusalem, and Zionist Jews saw their hopes bearing promise of fruition. But the new alignment which the barring of all roads to the Moslem shrines

against the Turks of Constantinople gave to the Moslem world was even more important.

The Turkish sultan's only claim to the title of "Khalif" or successor of Mahomet was that he had kept open the pilgrim roads to Mecca and Medinah. For the practical purposes of assuring to Moslems power of compliance with the religious duty of pilgrimage, the "khalif" is now King George V.

THE REVIVAL OF A NATION

On Feb. 12, 1918, the Russian bolsheviki had accepted the Hun peace terms at Brest Litovsk and Russia was nominally as well as actually out of the war. On March 9, Roumania had been forced to submit in form. Russia was breaking into fragments and plunging into ever increasing anarchy. The pro-German elements in the Ukraine got the upper hand there and made that great granary virtually a German province. Mutinies broke up the Russian Black sea fleet, German forces seized the Black sea ports, and the Turks pushed over into the great Russian oil fields between the Black sea and the Caspian.

Then came one of the most extraordinary events of the war, checking the Germanization of Russia, and leading directly to the rebirth of a nation long subjugated and oppressed, with its formal recognition by all the allied powers as an independent state. That nation was Bohemia, with the border provinces of Moravia and Silesia, which their own people prefer to call Slovakia.

Yanks Bringing in German Prisoners.

A Protected Battery. The most cleverly concealed battery on the Serbian front.

Among the consequences of the war is the winning of the Czech-Slovaks of their fight of nearly 500 years to preserve their distinct nationality.

Bohemia, had, of course, been forced to furnish her due proportion of troops to the Austrian armies. At every opportunity they went over to the Russians, with whom they fought valiantly. When Russia collapsed these Czech-Slovak regiments turned eastward, seeking to make their way through Siberia to the sea, hoping in time to reach France and fight the Huns there.

Fortunately for the cause of Bohemia and of orderly liberty everywhere the madness of the Russian bolsheviki refused to permit the Czech-Slovaks to depart in peace. Their arms were demanded and the trains on which they were making their way to Vladivostok were attacked. There were between 75,000 and 100,000 armed men, strung out all the way from the Volga

Inspection of West Point Cadets by Secretary Baker and Staff.

region to eastern Siberia.

The Czech-Slovaks defended themselves and did more. Their national council, organized at Paris under the leadership of Prof. Thomas G. Masaryk, an exiled educator, who proved a statesman of the first rank, realized that these troops could form a most valuable rallying point for such elements in Russia as were neither infected with bolshevik insanity nor in German pay.

The Czech-Slovak national council was formally recognized, first by England and France and later by the other allies, as a de facto government, and the Czech-Slovak troops in Russia were accorded the rights of belligerents. This meant that the Huns

of great Hun drives opened from the Scarpe to the Oise in Flanders.

On a sixty-mile front more than 1,000,000 men were hurled toward Amiens. The German plan was to divide the British from the French, roll up the British, drive them back to the coast and destroy them. Berlin hoped thus to obtain, if not a complete victory, at least a "negotiated peace" that would restore the German colonies and permit the Huns to retain their Russian plunder.

Those were extremely perilous days, for the Americans had not yet come up in full strength, and if the British armies were

A Night Scene in "No Man's Land." A pyrotechnic display over "No Man's Land." A night scene on the French front, caused by a barrage of incendiary bombs.

could no longer treat Czech-Slovak prisoners as "deserters" without incurring stern reprisals. Thanks largely to the Czech-Slovaks, aided by Japanese and American troops, bolshevism had been practically suppressed in Siberia when the war on the western front ended, and European Russia about half-way up the Volga was in the hands of friends of the allies.

FOUR ANXIOUS MONTHS

With the utter collapse of Russia the Huns were enabled to turn their full strength upon the French and British armies on the western front. On March 21 what was to be the first of the last series

destroyed the French could hardly stand alone. But though the British line bent back and back, it did not break, and as it shortened the French extended. This battle led to the appointment on April 2 of Marshal Foch as supreme commander of all the allied forces. The allies thereafter had absolutely unified direction of all their armies.

Halted in the direct drive for Amiens, the Huns struck at Arras and between Messines and La Bassee with intent to gain the Flanders ridge. The whole weight of this drive fell on the British, who were literally fighting with "their backs to the wall," with no natural line

West Point Cadets

of defense between them and the channel. But the British line held.

Balked in their direct attempts to divide the British and French and reach the channel ports, the Huns launched a new drive between Soissons and Rheims, with Paris as the goal. In six days the Huns had hammered across the Aisne and had again reached the Marne in the region of Chateau Thierry. But an attempt to push farther down the Oureq was defeated by the French and Americans, and at Cantigny and Belleau wood the United States Marines added new names to a victory roll that goes back to the very beginning of the nation in 1775.

THE HIGH TIDE OF THE HUN

The first half of 1918 was, in fact, a race between America and the Huns. It seemed a question for weeks whether the Yanks could get across the ocean fast enough. They were coming at the rate of nearly 300,000 a month, but could they get into the battle line soon enough? By July 1 the question was really answered, for more

than 1,000,000 American soldiers were in France, and they were still pouring in,

Heavy United States Coast Artillery.

unchecked by Hun submarine raids on the American coast.

On July 15 the Germans opened what proved to be their last great drive. Balked in their effort to open roads to Paris along the Oise and Ourcq valleys they tried again from Chateau Thierry to Rheims and on eastward across Champagne to the edge of the Argonne forest. The Champagne attack was held within the

forest of Villers-Cotterets, southwest of Soissons, were hurled against the west flank of the Marne wedge. The enemy engaged on the eastward side of the wedge, was taken by surprise and fell back before the Franco-American forces.

The drive toward Epernay was the high tide of the Hun and Chateau Thierry marked what proved to be its final break. Thereafter the allies kept on the defensive

A model "Tank" constructed to be demonstrated to officers of the United States Army crossing the Los Angeles River, when the soft earth turned a double somersault while climbing a bank after gave way under the 13-ton machine. The demonstration, however, was successful, as it showed how easily a machine used in time of war can cross a river and climb its banks. The "Tank" is modeled after those

French battle zone. West of Rheims the Huns got across the Marne and turned their drive up its valley toward Epernay.

Then at Chateau Thierry on July 18 the American marines went in. Out of 8,000 their casualties were 6,000, but they halted the Hun advance on Epernay. Marshal Foch had, in fact, anticipated the enemy plan. Strong reserves gathered in the

and never again lost that advantage.

Gradually Foch extended pressure all around the Marne pocket. The Hun resistance was stubborn. By desperate effort he held the corners of the pocket and its mouth open through a retreat across the Vesle. A few days later Foch struck again at the nose of the Somme salient. British and French troops advanced from

Montdidier to Albert. The Hun was again taken by surprise, and by the middle of August had been driven back to the lines held before the Somme advance of the allies in 1916.

THE YANKS IN LORRAINE

By this time nearly 2,000,000 Americans were in France. Heretofore they had been brigaded with the French and British. Now they were to show what they could do wholly by themselves. Pershing had 1,000,000 men under his personal command

Followed the tedious task of fighting through the Argonne forest. During October it was completed and the Americans had closed the Stenay gap and were driving on to Sedan. That historic town, the scene of the great French disaster in 1870, they reached in the early days of November. Its capture cut one of the two great German lines of supply and of retreat.

Meanwhile the French and British, with various American contingents, had been driving the Hun in a retreat of ever-

British Hydroplane and Submarine After Sinking a German Submarine by a Depth Bomb.

along the line from Verdun southeastward across Lorraine.

The great American drive opened on Sept. 12, and rapidly smashed in the St. Mihiel salient which the Germans had held for four years. Within little more than a week the Americans were within cannon shot of the outer forts of Metz. They did not directly attack that enormous fortress. There was a longer but less costly way to break the back of the Hun armies.

increasing speed and disorder across French Flanders and Belgium. Ostend and Zeebrugge, lair of the U-boats, were abandoned. Full 15,000 Huns were caught against the Dutch frontier and forced into internment in Holland. When the Hun envoys came with white flags to Guise on Nov. 8 to receive Foch's terms of truce the allied line was from east of Ghent and Aïn denarde to Maubeuge and the Hun "farthest west" in France was at Chaumont-Porcien.

Herbert C. Hoover, Food Dictator, Was Selected by President Wilson as the Most Able Man for the Position.

Before the armistice was formally accepted this salient had been smashed in and allied troops were in Rocroi, scene of a famous French victory over 200 years ago. The French had reached the Belgian frontier east of Avesnes, and the Canadians on the morning of Nov. 11 took Mons, a place of a heroic effort of the British to halt the Hun in the summer of 1914. Pershing's men on Nov. 10 had attacked on a front of seventy-one miles from the Meuse southeastward and were within ten miles

structed armies of Greece and Serbia. Czar Ferdinand the Tricky abdicated in favor of his son Boris, who at last account was unlikely long to keep his throne.

After some weeks and much squirming, Turkey sent Gen. Townshend, the British commander captured at Kut-el-Amara, to beg for a truce from the British admiral commanding the allied fleets in the Aegean, and obtained conditions that foreshadowed what the Huns themselves were to expect. Meanwhile the British had advanced far up

A Motor Drawn Cannon with Armor Used to Fight Zeppelins and Aeroplanes.

of the north side of Metz. Had the Hun not submitted it was evidently the plan to pocket Metz and push down the Moselle valley for a direct invasion of Germany.

THE SMASH OF EMPIRES

Preceding the final collapse of the Hun on the western front had come the collapse of his vassals. Bulgaria was the first to go, under the hammering of the allies on the Macedonian front, aided by the recon-

the Euphrates and were approaching Aleppo, while Allenby's army had pushed north beyond Damascus.

A few days after the Turkish surrender, Austria-Hungary, which had for weeks been trying to obtain a parley for peace, only to receive an "unconditional surrender" answer, sent a white flag into the Italian lines. Early in October the Italians had resumed the offensive and had

Landing of United States Forces on French Shore.

been steadily driving the Austrians back, and the various nationalities which made up the former Hapsburg empire had been busily engaged in seceding from one another.

The terms imposed on Austria-Hungary involved a surrender, not only complete but abject. There was, in fact, hardly a government left in Vienna to sign truce terms, and what Gen. Diaz really did was to accept the surrender of the million or

The abdication of Kaiser Wilhelm and his flight to Holland on the night of Nov. 10 completed the smash up of the Hun empires, and the apparent end of the last autocratic government in Europe.

NOT A "GENERALS' WAR"

The war produced commanders whom the military historian will rank among the most accomplished the world has known. But it was not a "generals' war" in the

U. S. Sailors in the Firth of Forth After Surrender of German Fleet.

so of Austro-Hungarian soldiers who were starving in front of his forces.

At last accounts the Bohemians were completely masters of their own country, the German-Austrians were begging for a hearing from the allies, the south Slavs had set up an independent government, Hungary was in the throes of civil war, and Kaiser Karl had fled from Vienna to Switzerland.

old sense of the word. Its numbers were too enormous and its fighting fronts extended for hundreds of miles. It afforded no opportunity for the general to perform feats like that of Napoleon at the bridge of Lodi or of Logan at Atlanta. Operations were directed, not by the general in personal contact with his whole force—that was physically impossible—but

by the general sitting at the collecting reservoir of information, with numerous advisers and assistants of all kinds.

In a very real sense the war was waged by boards of directors, known as "general staffs," with chairmen having power of final decision. "Great headquarters" was like the huge general office of a great industrial plant or a big governmental department. Elaborate plans had to be made far

tent to force a compromise peace if they could not win a sweeping victory, made it largely a "subalterns' war," using the term with the due expansion compelled by the engagement of such numbers that a colonel was of little more relative importance than a lieutenant in former wars. It was a war which could not be won by "maneuvers" or unexpected combinations. The Hun had to be "worn down." French

in advance for every important movement. The monotonous reiteration of the German official statements, that this or that movement was "executed according to plan," became a catchword of derision to civilians ignorant of the mechanics of modern war. Yet it accurately described the condition, though sometimes used to disguise reverses.

The "digging in" of the Huns, with in-

mental clarity early and correctly described it as "a war of attrition."

FRANCE PROVIDES GREATER COMMANDERS

France provided the commander-in-chief who ended the war, as was natural. The Hun willed that the war must be lost or won on the soil of France, and France was the only one of the western allies which had, at the start, an army commensurate to the task both in numbers and training.

President Wilson and Members of the War Board.

Britain and the United States had still their great armies to make when they entered the war. Moreover, the training of British generals was in leading compact forces on distant expeditions rather than in management of enormous masses. British military technic was, perhaps, too individual and too little accustomed to widest range co-operation. It is significant that most complaints of failure in due co-ordi-

commanded, and that of his chief subordinates by the fact that the forces for which they were responsible exceeded in numbers any army led by Wellington. Nor must the services of Kitchener, the great organizer, nor of Sir John French, unshaken battler against well-nigh hopeless odds, be forgotten.

Minor British commanders, Townshend, unfortunate in the field to whom destiny

In the German Second Line Before Cambrai, After Its Capture by the British.
A Tank Stopped in Negotiating a Deep Until After the Action.

nation of action came from the British front in France.

Great Britain did her full share in provision of man power, and more than her share in provision of material, both by land and sea. In the sea war Britain was properly supreme. Yet though he rightly gave place to Foch in supreme command, Sir Douglas Haig's achievement may be measured by the fact that he led to victory greater armies than any Briton ever before

brought the fortune of being his captors' envoy to beg peace for them; Maude dying for England within a few days after he had won her a great victory; Allenby, captor of Jerusalem and hamstringer of the Turk, and Botha, the Boer, who fought bravely against England and loyally for England when her cause was freedom's, can be merely mentioned.

THE TURNERS OF THE TIDE

Of the American commanders, Pershing

This French Official photograph was the first to be received in this country of the actual drafting of the Armistice terms by the Allied plenipotentiaries at Versailles. While this conference was in progress the world waited with bated breath for the word that would seal the fate of German autocracy.

Here are shown American officers and American marines saluting the parade of the Allies in the streets of Vladivostok.

and his associates, it can be said that they proved fully equal to their task. No American since Grant has commanded so great an army as did Pershing. Their task was to turn the tide and make certain the victory. They were not called upon to endure as were their French and British colleagues, though we feel sure they would have endured with equal firmness had the need come. Nor will the world soon forget the word of Bundy at Chateau Thierry, "Retreat for Americans is intolerable," for it marked the turning of the Hun tide.

The impression left by the Italian leaders at this distance is that Cadorna was competent but slow and unfortunate, and that Diaz was competent, steadfast, prompt to press an advantage, and fortunate.

To Joffre and Foch, one for staying the Hun rush at the Marne, and the other for dealing the great counter stroke that ended the conflict, must be awarded the highest honors. Yet of Nivelle and Pe-

tain, of Mangin and Gouraud, of d'Esperey and Debeny, it must be said that they equaled any of Napoleon's marshals, and successfully led far greater forces and solved far more complex military problems.

British Tommies devised novel ways to carry their wounded. Photo shows British carrying their wounded on horses in Mesopotamia.

Naval Battles of The War

By

A D M I R A L S I M S

Admiral Mahan's contention, based on history, that sea power rather than land power is the decisive factor in wars where both can play their part, has received striking confirmation both in the progress and the events of the world war which the German rulers began and which has ended in their country's ruin.

The British navy has naturally played the larger part in the sea struggle. When the war began it was, nearly two to one, the most powerful on the seas. And it was ready as only the German war machine was ready on land. While its work was admirably supplemented by the fleets of France and Italy, and in the last two years by that of the United States, upon it fell the whole of one of the three great sea tasks of the war, and the heavier part of the other two.

These tasks were (1) clearing the oceans of the German cruisers; (2) the blockade of Germany, including the paralysis of the German high seas fleet; (3) guarding transport of troops and supplies, including the battle with the German submarines and mines.

HUNTING THE HUN FROM THE SEAS.

Within twenty-four hours after the declaration of war Admiral Sir John Jellicoe was at sea with the British grand fleet and the blockade lid was set upon the German outlets to the oceans. The story of that more than fifty months' ceaseless watch of the North sea must give first place, however, to the tale of the hunting of the Hun from all the outer waters of the world.

How deliberate was the German war planning is shown by the fact that several

days before its declaration Admiral Spee's cruiser squadron steamed out of Kiao Chao to take up the work of commerce destroying. Detaching the Emden to raid the Indian ocean Spee sent the Leipzig and Neuenberg to join the Dresden on the South American coast, where he later met them with the Scharnhorst and Gneisenau after "shooting up" some defenseless French and British trading towns among the South Pacific islands.

On Nov. 1, 1914, Admiral Sir Charles Craddock, steaming north from Cape Horn, met the five German cruisers in a gale off Coronel on the Chilean coast with the armored cruisers Good Hope and Monmouth and the light cruiser Glasgow. The battleship Canopus, sent out to reinforce Craddock, was unable to get in sight of the action owing to slow speed. Craddock was overmatched, and the Good Hope and Monmouth went down with all hands, the battered Glasgow alone escaping south to warn the Canopus.

THE FIGHT OFF THE FALKLANDS.

The British admiralty calculated correctly that Spee would be compelled by want of coal and food to attempt a raid on the Falkland islands, in the South Atlantic, and sent thither Admiral Sir Frederick Sturdee with the Invincible, Inflexible, Carnarvon, Kent, Cornwall, Bristol and Macedonia.

The next morning after the British squadron arrived Spee steamed into sight. The action opened just before 1 p. m. on Dec. 8, 1914. At 4:16 the Scharnhorst sank, and soon after the Gneisenau, to be joined in the depths by the Nuernberg at 7:26 and by the Leipzig at 9:15. Unlike the Huns at Coronel, the British seamen

Victorious Yanks on a North River Ferry, on Their Return from France to New York.

did their best to rescue their beaten foes.

The Dresden escaped for the time and fled back into the Pacific, to be overhauled by the Kent and the Glasgow at Juan Fernandez the next March and to pull down her colors after an action of five minutes.

The Emden had met her fate a month before the fight off the Falklands, after destroying a number of merchant ships. On Nov. 10, 1914, the Australian cruiser

Within the first month of the war, on Aug. 30, 1914, the Kaiser Wilhelm der Grosse had been sunk by the Highflyer off the Cape Verde islands. Two weeks later, on Sept. 14, the Carmania, an armed merchantman, had settled the Cap Trafalgar in the South Atlantic, and the Spreewald was captured by the Berwick in the North Atlantic.

HUN FLAG SWEPT FROM OCEANS.

The Prinz Eitel Friederich was hunted

Remarkable Photograph of a "Flame-Throwing" or "Rain of Fire" Attack in the First Line French Trenches.

Sydney, when about fifty miles east of the Cocos-Keeling islands in the Indian ocean, picked up a wireless message from the Cocos station: "Strange warship off entrance."

Two hours later the Emden was sighted coming out from the destruction of the wireless station. Two hours more and the Emden was a flaming wreck on the North Keeling reefs.

to refuge in an American port on April 8, 1915. The Geier had interned at Honolulu early in the war. The Karlsruhe simply disappeared, and its fate remains one of the mysteries of the seas. The Koenigsberg ran for shelter into an African river forest, and perished there on July 11, 1915.

Except for one or two raiders which slipped through the blockade disguised as

neutral merchantmen, that was the end of the German flag on the oceans.

The naval war's first and continuing problem was the German battle fleet—to beat it if it came out from its citadel down in the corner of the North sea behind Heligoland, or to keep it there impotent. That was Admiral Sir John Jellicoe's responsibility. How it has been met by the British navy under his command, and by his successor, Admiral Sir David Beatty, may be judged by the fact that only once has the German high seas fleet ventured out of harbor in force, as distinguished from light cruiser raids which achieved only baby-killing on bathing beaches.

The problem was enormous. England had fought no great naval war for a century. All the conditions had changed. The fleet actions of modern armorclads, off Santiago and in the Sea of Japan, had settled little, owing to the inferiority of the Spanish vessels and the incompetence of the Russian commanders. Much had been promised for the torpedo, but little performed. It had sunk no Russian vessel at Tsushima not already disabled by gunfire.

THE BLOCKADE AND THE PATROL.

The first summer of the war proved that the torpedo, plus the submarine, must be more seriously reckoned with. A British cruiser squadron made a challenging reconnaissance into the Heligoland light. Within half an hour three large though old and somewhat slow cruisers, the *Aboukir*, *Cressy* and *Hogue*, were sent down, the Germans claimed by a single submarine. The lesson was promptly learned that submarine infested waters must be patrolled by small and swift vessels, and that there could be no humane slowing up for rescue.

No comparable success was again achieved by the Hun U-boats against war vessels. Some claimed were more probably by drifting mines, with which Germany, in brazen disregard of her Hague pledges, sowed the seas at every opportu-

nity. The "victories of our U-boats" which German cities celebrated, were almost wholly over defenseless merchant ships, such as the *Lusitania*. They were, in fact, sheer murder of noncombatants.

The blockade had not only to bar the English channel and keep safe the ferry to France, but also to cover the sub-Arctic waters north of the British islands and up to Iceland. How effective it was may be judged from the fact that after the first week of the war the only supplies that came into Germany from overseas were smuggled through Holland or Italy, Denmark or Sweden, the latter of which will quite possibly have to reckon with the allies in the final settlement for light regard of neutral duties. The German fleet could stand off the Russian in the Baltic and keep that traffic open, but that was all.

The French fleets in the Mediterranean, aided by the Italian after the first year, were equally efficient in their work. Austria had a considerable naval force of modern ships, but it never got out of the Adriatic except under the surface. Austrian and German submarines committed their share of atrocities in the Mediterranean, aided by the treachery of the Greek government until King Constantine was expelled from the throne, but the Hun battleships never but once dared a standup fight with their foes.

THE JUTLAND BATTLE.

This one great fleet action of the war was preceded by three swift cruiser raids toward the English coast. The first, on Nov. 3, 1914, did little damage to *Yarmouth*. The second, on Dec. 16, 1914, killed a large number of women and children at Scarborough, Hartlepool and Whitby. The third was intercepted on Jan. 24, 1915, on the Dogger bank by Sir David Beatty's cruiser squadron. In that encounter the British cruisers *Lion* and *Tiger* sank the German battleship *Bluecher* and sent the *Derfflinger* home badly crippled.

On the morning of May 31, 1916, Sir John Jellicoe was between Scotland and Denmark with the British grand fleet. Sir David Beatty's cruiser squadron had completed its sweep to the south and was swinging northward. At 2:30 p. m. Beatty was signaled by his light cruisers that the German fleet was out in force. It had apparently steamed north along the Danish coast and, when sighted, was heading home again, with light cruisers leading.

The choice was Beatty's either to encounter and try to detain the foe or to keep on his way to join Jellicoe. He followed Nelson's rule: "Engage the enemy in sight." The ensuing battle divides itself into three stages: (a) Beatty's advance until he found he had the whole German heavy fleet before him; (b) Beatty's swing round in an effort to draw the Germans toward Jellicoe, during which Admiral Evan Thomas came up with four battleships and took the first fire of Scheer's battleships; (c) the arrival of Jellicoe with Admiral Hood's battle cruiser squadron in the van.

The concentration of the British squadrons had been effected, and Jellicoe behind Hood was bearing down on Scheer in overwhelming force. But it was then 7 p. m. and night brought the North sea haze behind which and his own smoke screens Scheer turned and escaped with most of his vessels. The British fleet remained on the scene until the afternoon of June 1, picking up survivors. Not one German ship was in sight on a sea strewn with wreckage.

THEY NEVER CAME OUT AGAIN

The Huns being near home, while the British were 400 miles from port, got out the first story of the action, claiming "an enormous victory." Beatty lost, in fact, two battle cruisers, the *Indefatigable* and the *Queen Mary*, early in the action. Later the *Invincible*, Admiral Hood's flagship, went down with her commander, whose conduct was worthy of a family so renowned in naval annals. Some four or five German vessels of equal or greater value were sunk. Just how great the German

Boche helmets—mementos of Cambrai. Steel helmets were all taken from Boche prisoners captured during the memorable advance on Cambrai.

losses were is yet to be ascertained.

Victories, however, are tested by their results. With all the kaiser's claims to his people, he did not claim that the British blockade was ended. It continued, and more stringent than ever. And, strange to relate, immediately after the engagement it became "inconvenient" to permit even the most patriotic Germans to gaze upon their "victorious" fleet. For months afterward no civilian was permitted in the great naval port of Wilhelmshaven. And the German high seas fleet was never again seen outside the bight of Heligoland.

The third great naval task of the war was dealing with the submarine. Its invention is contested between the Englishman Day and the American Bushnell. Day was drowned by his in 1774 and Bushnell made unsuccessful attacks with his upon British vessels during our war of independence. Holland, an American, first made it practical. To the Hun was reserved the distinction of making it the synonym for wanton murder of the innocent. For a thousand years at least the German, in every land, when he dares to boast of "civilization," must expect as a blow in the face the word "Lusitania."

CURBING THE SUBMARINE

When the war began the submarine was unproved as a war weapon. After its first successes against the British cruisers already mentioned it had none of moment

American Soldiers Who Returned on the "Leviathan" Impersonating Fritz in His "Kamerad" Stuff.

save those which the common consent of mankind outside of "kultured" Germany has adjudged piratical. It warred with success only upon the weak and the defenseless. Its assigned role in the Hun scheme of world conquest was to starve out England. It failed and worse than failed.

For military reasons all the measures taken in dealing with the submarine have not yet been revealed. As usual, necessity quickened invention. It was discovered that airplanes flying over the sea could locate submarines under the surface. The seagull in its search for food betrayed them. They were entangled in nets swept between two vessels over their suspected lurking places. It is said that great steel nets barred against them the British channel entrance to the Atlantic and drawn across the straits of Otranto confined them in the Adriatic.

Apparently helpless freighters with concealed guns and bombs enticed them to destruction. As they could move only slowly under water, the American invention of the depth bomb aided their destruction. British ship yards built as never before to replace the losses they caused. When America entered the war she joined in the building race on a scale unknown since the world began. It was announced the other day that the ship yards of the free nations had replaced all the losses by submarines since the war began and were 500,000 tons ahead.

THE AMERICAN NAVY IN THE WAR

Slow in arousing to the truth that the Hun must be finally smashed on land in Europe, the United States had no great army prepared when on Good Friday, 1917, its government resolved that Hun outrages and insults could no longer be endured. But its navy was ready. In size it stood only fourth or fifth, but in efficiency it was second to none. No American will soon forget the thrill of pride he felt when the word came back from England that the first destroyer fleet had arrived, and what was the answer given to the inquiry, "When can you put to sea?"

Admiral Sims' answer was "Now."

Ex-Emperor Charles of Austria-Hungry and his
Ex-Empress Zita.

After threshing through 3,000 miles of sea his destroyers were ready to go out and fight. They have had little fighting to do, and the heavy ships have had none. But with the British destroyers they have guarded safely to France transports that carried more than 2,000,000 men and all their supplies, and with practically no loss by submarines on the eastward voyage. But one troopship, the *Tuscania*, was sunk by a submarine on the way to Europe.

Had the Hun held out longer it is possible that American battleships might have had an opportunity to prove their power against the German fleet in the North sea. But the German navy, disgraced by submarine murders of noncombatants, was destined to end in the crowning disgrace to all naval discipline, capture by mutineers from its own lawful authority. Its masters violated every law of civilized warfare, and it is not unnatural that its

Colored Band of the 814th Infantry Leaving the Celtic After Her Arrival.

men should finally be guilty of treason to their own criminal government. There is no honor among thieves when gripped by the law, and the pirate's hand turns against his fellow when Execution Dock looms in sight.

THE OTHER ALLIED FLEETS

France and Italy have done their part on the sea, as clearly noted, but it has been a part less visible from this side the Atlantic, and of which the full story is not yet known. Only fragments of the record have reached us here. We know they have done their share in curbing the submarine in the Mediterranean and have confined the Austrian fleet to the Adriatic. We know of such daring deeds as the penetration of the very harbor of Pola and the sinking of Austrian battleships there. But for the fuller record we must wait awhile.

The Russian fleet, before Russia collapsed under Hunnish corruption and bolshevik craziness, did its part with some distinction. Never strong enough in the Baltic to contend with the Germans there, it mastered the Black sea and aided in the Russian army's advance to Trebizond.

The Japanese fleet has done all that was asked of it and done it well. It aided in the extinction of German rule on the Chinese coast, and sent a squadron of destroyers to the Mediterranean to battle the submarine. It has been a reserve force which would have come into play had any reverse at sea befallen the fleets of the European allies.

Brazil has also contributed vessels to the guarding of the Atlantic against the submarine, and Greek vessels, since Constantine was expelled, have aided in the patrol of the eastern Mediterranean.

From a purely materialistic viewpoint the Hun did not unwisely in pinning his faith to the submarine. It has taken the united sea power of the free nations to put down its menace. Where the Hun miscalculated was, first, in believing that victory could be won by land power without predominating sea power; second, in so using his sea power as to make it clear that there could be no safety for the rest of the world until the Hun was not only swept from the seas, but also ground to powder on land.

The end of the war came with startling

swiftness. Almost as suddenly as it broke upon the world, it collapsed in an abject defeat, not only of the German army, but much more significant, in the defeat and eradication of the German idea.

On July 15 of last year the German armies were threatening Paris. The capital of France was under bombardment by the seventy-five-mile gun. The troops of the United States were just beginning to arrive in sufficient numbers to constitute a real force. A great German drive started on the Marne. There it stopped, and in three days it was turned back into one of the great defeats of history, and after that date the allies enjoyed an unbroken procession of victories, while the central powers have fallen apart until there is left only Germany, with its cowering war lord running to take refuge from his people with his armies.

It is a different picture the blustering beast of Potsdam now presents from the pompous general seeking to conquer the continent of Europe and extend his dominions into Asia. Hand in hand with a "made in Germany" Gott, he promised his people the countries of Europe as their reward for making war. Now he is hiding while his people, anarchy rent, marching under the red flag, have brought about his abdication and the destruction of the house of Hohenzollern.

ELABORATE STRUCTURE IN RUINS

The elaborate structure he had built based on blood bonds and lust for power has disappeared. First it was Bulgaria, the haggling center of the Balkans, seeking its price in territory and power, which veered first to the allies and then finally fell into the German net. Bulgaria found itself beaten and rushed to cover. Then came the Turk and the great fortresses shutting off the Dardanelles and the ports

Italy, after a debacle at Caporetta, caused more by treason and German propaganda within than the strength of the Austrian army without, reorganized its shattered forces and turned upon Austria, overwhelmingly defeating Germany's chief aid and forcing upon her the most abject surrender ever recorded. Then Germany fell.

Gen. Sir Douglas Haig and British Army Commanders. These are British Army Commanders who safely guided Great Britain to victory.

TREATY OF PEACE WITH GERMANY

The United States of America, The British Empire, France, Italy and Japan

These Powers being described in the present Treaty as the Principal Allied and Associated Powers,
BELGIUM, BOLIVIA, BRAZIL, CHINA, CUBA, ECUADOR, GREECE, GUATEMALA, HAITI, THE HEDJAZ, HONDURAS, ICELAND, NICARAGUA, PANAMA, PERU, POLAND, PORTUGAL, ROUMANIA, THE SERBO-CROAT-SLOVENE STATE, SIAM, CZECHO-SLOVAKIA and URUGUAY.

These Powers constituting with the Principal Powers mentioned above the Allied and Associated Powers, of the one part;

And GERMANY, of the other part;
Bearing in mind that on the request of the Imperial German Government an Armistice was granted on November 11, 1918, to Germany by the Principal Allied and Associated Powers in order that a Treaty of Peace might be concluded with her, and

The Allied and Associated Powers being equally desirous that the war which they were successfully involved directly or indirectly and which originated in the declaration of war by Austria-Hungary on July 28, 1914, against Serbia, the declaration of war by Germany against Russia on August 1, 1914, and against France on August 3, 1914, and in the invasion of Belgium, should be replaced by a firm, just and durable Peace,

For this purpose the HIGH CONTRACTING PARTIES represented as follows:

THE PRESIDENT OF THE UNITED STATES OF AMERICA, by:

The Honourable Woodrow WILSON, President of the UNITED STATES, acting in his own name and by his own proper authority;

The Honourable Robert LANSING, Secretary of State;

The Honourable Henry WHITE, formerly Ambassador Extraordinary and Plenipotentiary of the United States at Rome and Paris;

The Honourable Edward M. HOUSE, General Tasker H. BLISS, Military Representative of the United States on the Supreme War Council;

HIS MAJESTY THE KING OF THE UNITED KINGDOM OF GREAT BRITAIN AND IRELAND AND OF THE BRITISH DOMINIONS BEYOND THE SEAS, EMPEROR OF INDIA, by:

The Right Honourable David LLOYD GEORGE, M. P., First Lord of His Treasury and Prime Minister;

The Right Honourable Andrew BONAR LAW, M. P., First Lord of His Majesty's Treasury;

The Right Honourable Viscount MILNER, G. C. B., G. C. M. G., His Secretary of State for the Colonies;

The Right Honourable Arthur James BALFOUR, O. M., M. P., His Secretary of State for Foreign Affairs;

The Right Honourable George NICOLL BARNES, M. P., Minister without portfolio;

and for the DOMINION OF CANADA, by:

The Honourable Charles Joseph DOBNEY, Minister of Justice;

The Honourable Arthur Lewis SIFTON, Minister of Customs;

for the COMMONWEALTH OF AUSTRALIA, by:

The Right Honourable William Morris HUGHES, Attorney General and Prime Minister;

The Right Honourable Sir Joseph COOK, G. C. M. G., Minister for the Navy;

for the UNION OF SOUTH AFRICA, by:

General the Right Honourable Louis BOTHA, Minister of Native Affairs and Prime Minister;

Lieutenant-General the Right Honourable Jan Christian SMUTS, K. C., Minister of Defence;

for the DOMINION OF NEW ZEALAND, by:

The Right Honourable William Ferguson MASSEY, Minister of Labour and Prime Minister;

for INDIA, by:

The Right Honourable Edwin Samuel MONTAGU, M. P., His Secretary of State for India;

Major-General His Highness Maharaja Sir Ganga Singh Bahadur, Maharaja of BIKANER, G. C. S. I., G. C. I. E., G. C. V. O., K. C. B., A. D. C.;

THE PRESIDENT OF THE FRENCH REPUBLIC, by:

Mr. Georges CLEMENCEAU, President of the Council, Minister of War;

Mr. Stephen PICRON, Minister of Foreign Affairs;

Mr. Louis-Lucien KLOTZ, Minister of Finance;

Mr. André TARDIEU, Commissary General for Franco-American Military Affairs;

Mr. Jules CAMBON, Ambassador of France;

HIS MAJESTY THE KING OF ITALY, by:

Baron S. SONNINO, Deputy;

Marquis G. IMPERIALI, Senator, Ambassador of His Majesty the King of Italy at London;

Mr. S. CRESPI, Deputy;

HIS MAJESTY THE EMPEROR OF JAPAN, by:
Marquis SAIONJI, formerly President of the Council of Ministers;

Baron MAKINO, formerly Minister for Foreign Affairs, Member of the Diplomatic Council;

Viscount CHINDA, Ambassador Extraordinary and Plenipotentiary of H. M. the Emperor of Japan at London;

Mr. K. MATSUI, Ambassador Extraordinary and Plenipotentiary of H. M. the Emperor of Japan at Paris;

Mr. H. JUJIN, Ambassador Extraordinary and Plenipotentiary of H. M. the Emperor of Japan at Rome;

HIS MAJESTY THE KING OF THE BELGIANS, by:

Mr. Paul HYMANS, Minister for Foreign Affairs, Minister of State;

Mr. Jules van den HEUVEL, Envoy Extraordinary and Minister Plenipotentiary, Minister of State;

Mr. Emile VANDEVELDE, Minister of Justice, Minister of State;

THE PRESIDENT OF THE REPUBLIC OF BOLIVIA, by:

Mr. Ismael MONTES, Envoy Extraordinary and Minister Plenipotentiary of Bolivia at Paris;

THE PRESIDENT OF THE REPUBLIC OF BRAZIL, by:

Mr. João PANDIA CALOGERAS, Deputy, formerly Minister of Finance;

Mr. Raul FERNANDES, Deputy;

Mr. Rodrigo Octavio de L. MENEZES, Professor of International Law of Rio de Janeiro;

THE PRESIDENT OF THE CHINESE REPUBLIC, by:

Mr. LOU Tseng-Tsiang, Minister for Foreign Affairs;

Mr. Chen-tung THOMAS WANG, formerly Minister of Agriculture and Commerce;

THE PRESIDENT OF THE CUBAN REPUBLIC, by:

Mr. Antonio Sánchez de BUSTAMANTE, Dean of the Faculty of Law in the University of Havana, President of the Cuban Society of International Law;

THE PRESIDENT OF THE REPUBLIC OF ECUADOR, by:

Mr. Enrique DORN Y DE ALSA, Envoy Extraordinary and Minister Plenipotentiary of Ecuador at Paris;

HIS MAJESTY THE KING OF THE HELLENES, by:

Mr. Eleftheros K. VENISELOS, President of the Council of Ministers;

Mr. Nicolas POLITIS, Minister for Foreign Affairs;

THE PRESIDENT OF THE REPUBLIC OF GUATEMALA, by:

Mr. Joaquin MENDEZ, formerly Minister of State for Public Works and Public Instruction, Envoy Extraordinary and Minister Plenipotentiary of Guatemala at Washington, Envoy Extraordinary and Minister Plenipotentiary on special mission at Paris;

THE PRESIDENT OF THE REPUBLIC OF HAITI, by:

Mr. Tertulien GUILBAUD, Envoy Extraordinary and Minister Plenipotentiary of Haiti at Paris;

HIS MAJESTY THE KING OF THE HEDJAZ, by:

Mr. Rustem HAIDAR;

Mr. Abdul Hadi AOUNI;

THE PRESIDENT OF THE REPUBLIC OF HONDURAS, by:

Dr. Policarpo BONILLA, on special mission to Washington, formerly President of the Republic of Honduras, Envoy Extraordinary and Minister Plenipotentiary;

THE PRESIDENT OF THE REPUBLIC OF LIBERIA, by:

The Honourable Charles Dunbar Burgess KING, Secretary of State;

THE PRESIDENT OF THE REPUBLIC OF NICARAGUA, by:

Mr. Salvador CHAMORRO, President of the Chamber of Deputies;

THE PRESIDENT OF THE REPUBLIC OF PANAMA, by:

Mr. Antonio BUROOS, Envoy Extraordinary and Minister Plenipotentiary of Panama at Madrid;

THE PRESIDENT OF THE REPUBLIC OF PERU, by:

Mr. Carlos G. CANDAMO, Envoy Extraordinary and Minister Plenipotentiary of Peru at Paris;

THE PRESIDENT OF THE POLISH REPUBLIC, by:

Mr. Ignace J. PADERBSKI, President of the Council of Ministers, Minister for Foreign Affairs;

Mr. Roman DMIOWSKI, President of the Polish National Committee;

THE PRESIDENT OF THE PORTUGUESE REPUBLIC, by:

Dr. Afonso Augusto DA COSTA, formerly President of the Council of Ministers;

Dr. Augusto Luiz Vieira SOARES, formerly Minister for Foreign Affairs;

HIS MAJESTY THE KING OF ROUMANIA, by:

Mr. Ion I. C. BRATIANO, President of the Council of Ministers, Minister for Foreign Affairs;

General Constantin COANDA, Corps Commander, A. D.

C. to the King, formerly President of the Council of Ministers;

HIS MAJESTY THE KING OF THE SERBS, THE CROATS, AND THE SLOVENES, by:

Mr. Nicolas P. PACHITCH, formerly President of the Council of Ministers;

Mr. Ante TRUMBIC, Minister for Foreign Affairs;

Mr. Milenko VESNITCH, Envoy Extraordinary and Minister Plenipotentiary of H. M. the King of the Serbs, the Croats and the Slovenes at Paris;

HIS MAJESTY THE KING OF SIAM, by:

His Highness Prince CHAROON, Envoy Extraordinary and Minister Plenipotentiary of H. M. the King of Siam at Paris;

His Serene Highness Prince Traidos PRABANDHU, Under Secretary of State for Foreign Affairs;

THE PRESIDENT OF THE CZECHO-SLOVAK REPUBLIC, by:

Mr. Karl KRAMAR, President of the Council of Ministers;

Mr. Eduard BENES, Minister for Foreign Affairs;

THE PRESIDENT OF THE REPUBLIC OF URUGUAY, by:

Mr. Juan Antonio BUBERO, Minister for Foreign Affairs, formerly Minister of Industry;

GERMANY, by:

Mr. Hermann MÜLLER, Minister for Foreign Affairs of the Empire;

Dr. BELL, Minister of the Empire;

Acting in the name of the German Empire and of each and every component State.

WHO having communicated their full powers found in good and due form have AGREED AS FOLLOWS:

From the coming into force of the present Treaty the state of war will terminate. From that moment and subject to the provisions of this treaty, all relations with Germany, and with any of the German States, will be resumed by the Allied and Associated Powers.

PART I.

THE COVENANT OF THE LEAGUE OF NATIONS.

THE HIGH CONTRACTING PARTIES,

In order to promote international co-operation and to achieve international peace and security

by the acceptance of obligations not to resort to war, by the prescription of open, just and honourable relations between nations,

by the firm establishment of the understandings of international law as the actual rule of conduct among Governments, and

by the maintenance of justice and a scrupulous respect for all treaty obligations in the dealings of organized peoples with one another,

Agree to this Covenant of the League of Nations.

ARTICLE 1.

The original Members of the League of Nations shall be those of the Signatories which are named in the Annex to this Covenant and also such of those other States named in the Annex as shall accede without reservation to this Covenant. Such accession shall be effected by a Declaration deposited with the Secretariat within two months of the coming into force of the Covenant. Notice thereof shall be sent to all other Members of the League.

Any fully self-governing State, Dominion or Colony not named in the Annex may become a Member of the League if its admission is agreed to by two-thirds of the Assembly, provided that it shall give effective guarantees of its sincere intention to observe its international obligations, and shall accept such regulations as may be prescribed by the League in regard to its military, naval and air forces and armaments.

Any Member of the League may, after two years' notice of its intention so to do, withdraw from the League, provided that all its international obligations and all its obligations under this Covenant shall have been fulfilled at the time of its withdrawal.

ARTICLE 2.

The action of the League under this Covenant shall be effected through the instrumentality of an Assembly and of a Council, with a permanent Secretariat,

ARTICLE 3.

The Assembly shall consist of Representatives of the Members of the League.

The Assembly shall meet at stated intervals and from time to time as occasion may require at the Seat of the League or at such other place as may be decided upon.

The Assembly may deal at its regular meetings with any matter within the sphere of action of the League or affecting the peace of the world.

At meetings of the Assembly each Member of the League shall have one vote, and may have not more than three Representatives.

ARTICLE 4.

The Council shall consist of Representatives of the Principal Allied and Associated Powers, together with Representatives of four other Members of the League. These four Members of the League shall be selected by the Assembly from time to time in Rotation. Until the appointment of the Representatives of the four Members of the League first selected by the Assembly, Representatives of Belgium, Brazil, Spain and Greece shall be members of the Council.

With the approval of the majority of the Assembly, the Council may name additional Members of the League whose Representatives shall always be members of the Council; the Council with like approval may increase the number of Members of the League to be selected by the Assembly for representation on the Council.

The Council shall meet from time to time as occasion may require, and at least once a year, at the Seat of the League, or at such other place as may be decided upon.

The Council may deal at its meetings with any matter within the sphere of action of the League or affecting the peace of the world.

Any Member of the League not represented on the Council shall be invited to send a Representative to sit as a member at any meeting of the Council during the consideration of matters specially affecting the interests of that Member of the League.

At meetings of the Council, each Member of the League represented on the Council shall have one vote, and may have not more than one Representative.

ARTICLE 5.

Except where otherwise expressly provided in this Covenant or by the terms of the present Treaty, decisions at any meeting of the Assembly or of the Council shall require the agreement of all the Members of the League represented at the meeting.

All matters of procedure at meetings of the Assembly or of the Council, including the appointment of Committees to investigate particular matters, shall be regulated by the Assembly or by the Council and may be decided by a majority of the Members of the League represented at the meeting.

The first meeting of the Assembly and the first meeting of the Council shall be summoned by the President of the United States of America.

ARTICLE 6.

The permanent Secretariat shall be established at the Seat of the League. The Secretariat shall comprise a Secretary General and such secretaries and staff as may be required.

The first Secretary General shall be the person named in the Annex; thereafter the Secretary General shall be appointed by the Council with the approval of the majority of the Assembly.

The secretaries and staff of the Secretariat shall be appointed by the Secretary General with the approval of the Council.

The Secretary General shall act in that capacity at all meetings of the Assembly and of the Council.

The expenses of the Secretariat shall be borne by the Members of the League in accordance with the apportionment of the expenses of the International Bureau of the Universal Postal Union.

ARTICLE 7.

The Seat of the League is established at Geneva.

The Council may at any time decide that the Seat of the League shall be established elsewhere.

All positions under or in connection with the League, including the Secretariat, shall be open equally to men and women.

Representatives of the Members of the League and officials of the League when engaged on the business of the League shall enjoy diplomatic privileges and immunities.

The buildings and other property occupied by the League or its officials or by Representatives attending its meetings shall be inviolable.

ARTICLE 8.

The Members of the League recognize that the maintenance of peace requires the reduction of national armaments to the lowest point consistent with national safety and the enforcement by common action of international obligations.

The Council, taking account of the geographical situation and circumstances of each State, shall formulate plans for such reduction for the consideration and action of the several Governments.

Such plans shall be subject to reconsideration and revision at least every ten years.

After these plans shall have been adopted by the several Governments, the limits of armaments therein fixed shall not be exceeded without the concurrence of the Council.

The manufacture by common action of the manufacture by private enterprise of munitions and implements of war is open to grave objections. The Council shall advise how the evil effects attendant upon such manufacture can be prevented, and agreed being and to the necessities of those Members of the League which are not able to manufacture the munitions and implements of war necessary for their safety.

The Members of the League undertake to interchange full and frank information as to the scale of their armaments, the military, naval and air programmes and the condition of such of their industries as are adaptable to war-like purposes.

ARTICLE 9.

A permanent Commission shall be constituted to advise the Council on the execution of the provisions of Articles 1 and 8 and on military, naval and air questions generally.

ARTICLE 10.

The Members of the League undertake to respect and preserve as against external aggression the territorial integrity

Geneva, the Seat of the League of Nations. The illustration Shows the Power Stations on the River Rhone. This is One of Switzerland's Most Beautiful Cities.

and existing political independence of all Members of the League. In case of any such aggression or in case of any threat or danger of such aggression the Council shall advise upon the means by which this obligation shall be fulfilled.

ARTICLE 11.

Any war or threat of war, whether immediately affecting any of the Members of the League or not, is hereby declared a matter of concern to the whole League, and the League shall take any action that may be deemed wise and effectual to regard the peace of nations. In case any such emergency should arise the Secretary General shall on the request of any Member of the League forthwith summon a meeting of the Council.

It is also declared to be the friendly right of each Member of the League to bring to the attention of the Assembly or of the Council any circumstance whatever affecting international relations which threatens to disturb international peace or the good understanding between nations upon which peace depends.

ARTICLE 12.

The Members of the League agree that if there should arise between them any dispute likely to lead to a rupture, they will submit the matter either to arbitration or to inquiry by the Council, and they agree in no case to resort to war until three months after the award of the arbitrators or the report by the Council. In any case under this Article the award of the arbitrators shall be made within a reasonable time, and the report of the Council shall be made within six months after the submission of the dispute.

ARTICLE 13.

The Members of the League agree that whenever any dispute shall arise between them which they recognise to be suitable for submission to arbitration and which cannot be satisfactorily settled by diplomacy, they will submit the whole subject-matter to arbitration.

Disputes as to the interpretation of a treaty, as to any question of international law, as to the existence of any fact which if established would constitute a breach of any international obligation, or as to the extent and nature of the reparation to be made for any such breach, are declared to be among those which are generally suitable for submission to arbitration.

For the consideration of any such dispute the court of arbitration to which the case is referred shall be the Court agreed on by the parties to the dispute or stipulated in any convention existing between them.

The Members of the League agree that they will carry out in full good faith any award that may be rendered, and that they will not resort to war against a Member of the League which complies therewith. In the event of any failure to carry out such an award, the Council shall propose what steps should be taken to give effect thereto.

ARTICLE 14.

The Council shall formulate and submit to the Members of the League for adoption plans for the establishment of a Permanent Court of International Justice. The Court shall be competent to hear and determine any dispute of an international character which the parties thereto submit to it. The Court may also give an advisory opinion upon any dispute or question referred to it by the Council or by the Assembly.

ARTICLE 15.

If there should arise between Members of the League any dispute likely to lead to a rupture, which is not submitted to arbitration in accordance with Article 13, the Members of the League agree that they will submit the matter to the Council, and that the Council may effect such submission by giving notice of the existence of the dispute to the Secretary General, who will make all necessary arrangements for a full investigation and consideration thereof.

If this purpose the parties to the dispute will communicate to the Secretary General, as promptly as possible, statements of their case with all the relevant facts and papers, and the Council may forthwith direct the publication thereof.

The Council shall endeavor to effect a settlement of the dispute, and if such efforts are successful, a statement shall be made public giving such facts and explanations regarding the dispute and the terms of settlement thereof as the Council may deem appropriate.

If the dispute is not thus settled, the Council either unanimously or by a majority vote shall make and publish a report containing a statement of the facts of the dispute and the recommendations which are deemed just and proper in regard thereto.

Any Member of the League represented on the Council may make public a statement of the facts of the dispute and of its conclusions regarding the same.

If a report by the Council is unanimously agreed to by its members, or if a report by the Representatives of one or more of the parties to the dispute, the Members of the League agree that they will not go to war with any party to the dispute which complies with the recommendations of the report.

If the Council fails to reach a report which is unanimously agreed to by the members thereof, other than the Representatives of one or more of the parties to the dispute, the Members of the League reserve to themselves the

right to take such action as they shall consider necessary for the maintenance of right and justice.

If the dispute between the parties is claimed by one of them, and is found by the Council, to arise out of a matter which by international law is solely within the domestic jurisdiction of that party, the Council shall so report, and shall make no recommendations as to its settlement.

The Council may in any case under this Article refer the dispute to the Assembly. The dispute shall be so referred at the request of either party to the dispute, provided that such request is made within fourteen days after the submission of the dispute to the Council.

In any case referred to the Assembly, all the provisions of this Article and of Article 12 relating to the action and powers of the Council shall apply to the action and powers of the Assembly, provided that a report made by the Assembly, if concurred in by the Representatives of those Members of the League represented on the Council and of a majority of the other Members of the League, exclusive in each case of the Representatives of the parties to the dispute, shall have the same force as a report made by the Council concurred in by all the members thereof other than the Representative of one or more of the parties to the dispute.

ARTICLE 16.

Should any Member of the League resort to war in disregard of its covenants under Articles 12, 13 or 15, it shall *ipso facto* be deemed to have committed an act of war against all other Members of the League, which hereby undertake immediately to subject it to the severance of all trade and financial relations, the prohibition of all intercourse between their nationals and the nationals of the covenant-breaking State, and the prevention of all financial, commercial or personal intercourse between the nationals of the covenant-breaking State and the nationals of any other State, save in so far as may be required by the Council.

It shall be the duty of the Council in such case to recommend to the several Governments concerned what effective military, naval or air force the Members of the League shall severally contribute to the armed forces to be used to protect the covenants of the League.

The Members of the League agree, further, that they will mutually support one another in the financial and economic measures which are taken under this Article, in order to minimise the loss and inconvenience resulting from the above measures, and that they will mutually support one another in resisting any special measures aimed at one of their number by the covenant-breaking State, and that they will take the necessary steps to afford passage through their territory to the forces of any Members of the League which are co-operating to protect the covenants of the League.

Any Member of the League which has violated any covenant of the League may be declared to be no longer a Member of the League, and the Council may be authorised in this behalf by the Representatives of all the other Members of the League represented thereon.

ARTICLE 17.

In the event of a dispute between a Member of the League and a State which is not a Member of the League, or between States not Members of the League, the State or States not Members of the League shall be invited to accept the obligations of membership in the League for the purposes of such dispute, upon such conditions as the Council may deem just. If such invitation is accepted, the provisions of Articles 12 to 16 inclusive shall be applied with such modifications as may be deemed necessary by the Council.

Upon such invitation being given the Council shall immediately institute an inquiry into the circumstances of the dispute and recommend such action as may seem best and most effectual in the circumstances.

If a State so invited shall refuse to accept the obligations of membership in the League for the purposes of such dispute, and shall resort to war against a Member of the League, the provisions of Article 16 shall be applicable as against the State making such action.

If both parties to the dispute when so invited refuse to accept the obligations of membership in the League for the purposes of such dispute, the Council may take such measures and make such recommendations as will prevent hostilities and will result in the settlement of the dispute.

ARTICLE 18.

Every treaty or international engagement entered into hereafter by any Member of the League shall be forthwith registered with the Secretary General, and as soon as possible be published by it. No such treaty or international engagement shall be binding until so registered.

ARTICLE 19.

The Assembly may from time to time advise the reconsideration by Members of the League of treaties which have become inapplicable and the consideration of international conditions whose continuance might endanger the peace of the world.

ARTICLE 20.

The members of the League severally agree that this Covenant is accepted as abrogating all obligations or understandings *inter se* which are inconsistent with the terms thereof, and solemnly undertake that they will not hereafter enter into any engagements inconsistent with the terms thereof.

In case any Member of the League shall, before becoming a Member of the League, have undertaken any obligations inconsistent with the terms of this Covenant, it shall be the duty of such Member to take immediate steps to procure its release from such obligations.

ARTICLE 21.

Nothing in this Covenant shall be deemed to affect the validity of international engagements, such as treaties of arbitration or regional understandings like the Monroe doctrine, for securing the maintenance of peace.

ARTICLE 22.

To those colonies and territories which as a consequence of the late war have ceased to be under the sovereignty of the States which formerly exercised it, and which are inhabited by peoples not yet able to stand by themselves under the strenuous conditions of the modern world, there should be applied the principle that the well-being and development of such peoples form a sacred trust of civilization and that the interests of the world are best secured if these trusts should be embodied in this Covenant.

The best method of giving practical effect to this principle is that the tutelage of such peoples should be entrusted to advanced nations who by reason of their resources, their experience or their geographical position can best undertake this responsibility, and who are willing to accept it, and that this tutelage should be exercised by them as Mandatories on behalf of the League.

The character of the mandate must differ according to the stage of the development of the people, the geographical situation of the territory, its economic conditions and other similar circumstances.

Certain communities formerly belonging to the Turkish Empire have reached a stage of development where their existence as independent States is not practically recognised subject to the rendering of administrative advice and assistance by a Mandatory until such time as they are able to stand alone. The wishes of these communities must be a principal consideration in the selection of the Mandatory.

Other peoples, especially those of Central Africa, are at such a stage that the Mandatory must be responsible for the administration of the territory under conditions which will guarantee freedom of conscience and religion, subject only to the maintenance of public order and morals, the prohibition of abuses such as the slave trade, the arms traffic and the liquor traffic, and the prevention of the establishment of fortifications or military or naval bases and of military training of the natives for other than police purposes and the defence of territory, and shall also guarantee opportunities for the trade and commerce of other Members of the League.

There are territories, such as South-West Africa and certain of the South Pacific Islands, which, owing to the sparseness of their population or to their small size or their remoteness from the centres of civilisation, or their geographical contiguity to the territory of the Mandatory, and other circumstances, can be best administered under the laws of the Mandatory as integral portions of its territory, subject to the safeguards above mentioned in the interests of the indigenous population.

In every case of mandate, the Mandatory shall render to the Council an annual report in reference to the territory committed to its charge.

The degree of authority, control, or administration to be exercised by the Mandatory shall, if not previously agreed upon by the Members of the League, be explicitly defined in each case by the Council.

A permanent Commission shall be constituted to receive and examine the annual reports of the Mandatories and to advise the Council on all matters relating to the observance of the mandates.

ARTICLE 23.

Subject to and in accordance with the provisions of international conventions existing or hereafter to be agreed upon, the Members of the League:

- (a) will endeavor to secure and maintain fair and humane conditions of labour for men, women, and children, both in their own countries and in all countries to which their commercial and industrial relations extend, and for that purpose will establish and maintain the necessary international organizations;
- (b) undertake to secure just treatment of the native inhabitants of territories under their control;
- (c) will entrust the League with the general supervision over the execution of agreements with regard to the traffic in women and children, and the traffic in opium and other dangerous drugs;
- (d) will entrust the League with the general supervision of the traffic in arms and ammunition with the countries in which the control of this traffic is necessary in the common interest;
- (e) will make provision to secure and maintain freedom of communications and of transit and equitable treatment for the commerce of all Members of the League. In this connection, the special necessities of the regions devastated during the war of 1914-1918 shall be borne in mind;
- (f) will endeavor to cooperate in matters of international concern for the prevention and control of disease.

ARTICLE 24.

There shall be placed under the direction of the League international bureaux already established by general treaties if the parties to such treaties consent. All such international bureaux and all commissions for the regulation of matters of international interest hereafter constituted shall be placed under the direction of the League.

In all matters of international interest which are regulated by general conventions but which are not placed under the control of the international bureaux or commissions, the Secretariat of the League shall subject to the consent of the Council and if desired by the parties, collect and distribute all relevant information and shall render any other assistance which may be necessary or desirable.

The Council may include as part of the expense of the Secretariat the expenses of any bureau or commission which is placed under the direction of the League.

ARTICLE 25.

The Members of the League agree to encourage and promote the establishment and co-operation of duly authorised voluntary national Red Cross organizations having as purposes the improvement of health, the prevention of disease and the mitigation of suffering throughout the world.

ARTICLE 26.

Amendments to this Covenant will take effect when ratified by the Members of the League whose Representatives compose the Council and by a majority of the Members of the League whose Representatives compose the Assembly. No such amendment shall bind any Member of the League which signifies its dissent therefrom, but in that case it shall cease to be a Member of the League.

II. FIRST SECRETARY GENERAL OF THE LEAGUE OF NATIONS.

The Honourable Sir James Eric Drummond, K. C. M. G., C. B.

PART II.

BOUNDARIES OF GERMANY.

ARTICLE 27.

The boundaries of Germany will be determined as follows:

1. *With Belgium:*
From the point common to the three frontiers of Belgium, Holland and Germany and in a southerly direction:
the north-eastern boundary of the former territory of neutral Moresnet, then the eastern boundary of the Kreis of Eupen, then the frontier between Belgium and the Kreis of Montjoie, then the north-eastern boundary of the Kreis of Malmédy to its junction with the frontier of Luxemburg.
2. *With Luxemburg:*
The frontier of August 3, 1914, to its junction with the frontier of France of the 18th July, 1870.
3. *With France:*
The frontier of July 18, 1870, from Luxemburg to Switzerland with the reservations made in Article 48 of Section IV (Saar Basin) of Part III.
4. *With Switzerland:*
The present frontier.
5. *With Austria:*
The frontier of August 3, 1914, from Switzerland to Czecho-Slovakia as hereinafter defined.
6. *With Czecho-Slovakia:*
The frontier of August 3, 1914, between Germany and Austria from its junction with the old administrative boundary between Bohemia and Austria to the point north of the Salient of the old province of Austrian Silesia situated at about 8 kilometres east of Neustadt.
7. *With Poland:*
From the point defined above to a point to be fixed on the ground about 2 kilometres east of Lorzendorf:
the frontier as it will be fixed in accordance with Article 88 of the present Treaty;
from the point defined in Section I to the point where the administrative boundary of Posenia crosses the river Bartsch:
a line to be fixed on the ground leaving the following

places in Poland: Skorischeau, Reichthal, Trembatschau, Kunzendorf, Schiele, Gross Kosel, Schreibersdorf, Rippin, Fürstlich-Niefken, Pawelan, Tescheschen, Konradau, Jöhannsdorf, Modzenow, Bogdan, and in Germany: Lorzendorf, Kaulwitz, Glauche, Daibersdorf, Reschwitz, Stradam, Gross Wartenberg, Kraschen, Neu Mittelwalde, Domaslawitz, Wedelsdorf, Tescheschen Hammer;

thence the administrative boundary of Posnania north-westward to the point where it cuts the Rawitsch-Herrstadt railway;

thence to the point where the administrative boundary of Posnania cuts the Reisen-Tschirnau road;

a line to be fixed on the ground passing west of Triebusch and Gabel and east of Sabowitz;

thence the administrative boundary of Posnania to its junction with the eastern administrative boundary of the *Kreis* of Fraustadt;

thence in a north-westerly direction to a point to be chosen on the road between the villages of Unruhstadt and Kopnitz;

A line to be fixed on the ground passing west of Geysersdorf, Brenno, Fehlen, Altlocher, Kiebel, and east of Ulbersdorf, Buchwald, Jgen, Weine, Lunitzke, Schwenten;

thence in a northerly direction to the northernmost point of Lake Chlop;

a line to be fixed on the ground following the median line of the lakes; the town and the station of Bentschen however (including the Bogdan, and the lines Schychnas, Bentschen and Züllichau-Bentschen) remaining in Polish territory;

thence in a north-easterly direction to the joint of junction of the boundaries of the *Kreis* of Schwerin, Birnbaum and Mesritz;

A line to be fixed on the ground passing east of Betsche;

thence in a northerly direction the boundary separating the *Kreis* of Schwerin and Birnbaum, then in an easterly direction the northern boundary of Posnania to the point where it cuts the river Netze;

thence upstream to its confluence with the Küddow;

the course of the Netze;

thence upstream to a point to be chosen about 6 kilometres south-east of Seefeldmühl;

the course of the Küddow;

thence north-eastwards to the most southern point of the re-entrant of the northern boundary of Posnania about 5 kilometres west of Stahren;

a line to be fixed on the ground leaving the Schneidmühl-Konitz railway in this area entirely in German territory;

thence the boundary of Posnania north-eastwards to the point of the salient it makes about 15 kilometres east of Fladow;

thence north-eastwards to the point where the river Kamionka meets the southern boundary of the *Kreis* of Konitz about 3 kilometres north-east of Grunau;

a line to be fixed on the ground leaving the following places in Poland: Masadowo, Gr. Lutau, Kl. Lutau, Wittkau, and to Germany: Gr. Butzig, Cziskowo, Battrow, Bück, Grunau;

thence in a northerly direction the boundary between the *Kreis* of Konitz and Schlochau to the point where this boundary cuts the river Bary;

thence to a point on the boundary of Pomerania 15 kilometres east of Rummelsburg;

a line to be fixed on the ground leaving the following places in Poland: Konarzin, Kelpin, Adl. Briesen, and in Germany: Sumpohl, Neureuth, Steinfurt, Gr. Peterkan;

then the boundary of Pomerania in an easterly direction to its junction with the boundary between the *Kreis* of Konitz and Schlochau;

thence northwards the boundary between Pomerania and West Prussia to the point on the river Riheda about 3 kilometres north-west of Gohra where that river is joined by a tributary from the north-west;

thence to a point to be selected in the bend of the Piasnitz river about 12 kilometres north-west of Waraschkau;

a line to be fixed on the ground;

thence this river downstream, then the median line of Lake Zarnowitz, then the old boundary of West Prussia to the Baltic Sea.

§. With Denmark:

The frontier as it will be fixed in accordance with Articles 109 to 111 of Part III, Section XII (Schleswig).

ARTICLE 28.

The boundaries of East Prussia, with the reservations made in Section IX (East Prussia) of Part III, will be determined as follows:

from a line on the coast of the Baltic Sea about 13 kilometres north of Pröbbernu church in a direction of about 159° East from true North;

a line to be fixed on the ground for about 2 kilometres;

thence in a straight line to the light at the bend of the Elbing Channel in approximately latitude 54° 19' North, longitude 19° 26' East of Greenwich;

thence to the easternmost mouth of the Nogat River at a bearing of approximately 209° East from true North;

thence up the course of the Nogat River to the point where the lake between Vitula (Weichsel);

thence up the principal channel of navigation of the Vitula, then the southern boundary of the *Kreis* of Marienwerder, then that of the *Kreis* of Rosenberg eastwards to the point where it meets the old boundary of East Prussia;

thence the old boundary between East and West Prussia,

then the boundary between the *Kreise* of Osterode and Neidenburg, then the course of the river Skottau downstream, then the course of the Neide upstream to a point situated about 5 kilometres west of Bialutten being the nearest point to the old frontier of Russia;

thence in an easterly direction to a point immediately south of the intersection of the road Neidenburg-Mlava with the old frontier of Russia;

thence to be fixed on the ground passing north of Bialutten;

thence the old frontier of Russia to a point east of Schmallenigen, then the principal channel of navigation of the Niemen (Memel) downstream, then the Skierwigt arm of the delta to the Kurisches Haff;

thence a straight line to the point where the eastern shore of the Kurische Nehrung meets the administrative boundary about 4 kilometres south-west of Nidden;

thence this administrative boundary to the western shore of the Kurische Nehrung.

ARTICLE 29.

The boundaries as described above are drawn in red on a one-in-a-million map which is annexed to the present Treaty (Map No. 1).

In the case of any discrepancies between the text of the Treaty and this map or any other map which may be annexed, the text will be final.

ARTICLE 30.

In the case of boundaries which are defined by a waterway, the terms "course" and "channel" used in the present Treaty signify: in the case of non-navigable rivers, the median line of the waterway or of its principal arm, and, in the case of navigable rivers, the median line of the principal channel of navigation. It will rest with the Boundary Commissions provided by the present Treaty to specify in each case whether the frontier line shall follow any changes of the course or channel which may take place or whether it shall be definitely fixed by the position of the course or channel at the time when the present Treaty comes into force.

PART III.

POLITICAL CLAUSES FOR EUROPE.

SECTION I.

BELGIUM.

ARTICLE 31.

Germany, recognizing that the Treaties of April 19, 1839, which established the status of Belgium before the war, no longer conform to the requirements of the situation, consents to the abrogation of the said Treaties and undertakes immediately to recognize and to observe whatever conventions may be entered into by the Principal Allied and Associated Powers, or by any of them, in concert with the Governments of Belgium, and of the Netherlands, to replace the said Treaties of 1839. If her formal adhesion should be required to such conventions or to any of their stipulations, Germany undertakes immediately to give it.

ARTICLE 32.

Germany recognizes the full sovereignty of Belgium over the whole of the contested territory of Moresnet (called *Moresnet neutre*).

ARTICLE 33.

Germany renounces in favour of Belgium all rights and title over the territory of Prussian Moresnet situated on the west of the road from Liège to Aix-la-Chapelle; the road will belong to Belgium where it bounds this territory.

ARTICLE 34.

Germany renounces in favour of Belgium all rights and title over the territory comprising the whole of the *Kreis* of Eupen and of Malmédy.

During the six months after the coming into force of this Treaty the registers will be opened by the Belgian authority at Eupen and Malmédy in which the inhabitants of the above territory will be entitled to record in writing a desire to see the whole or part of it remain under German sovereignty.

The results of this public expression of opinion will be communicated by the Belgian Government to the League of Nations and Belgium undertakes to accept the decision of the League.

ARTICLE 35.

A Commission of seven persons five of whom will be appointed by the Principal Allied and Associated Powers, one by Germany and one by Belgium, will be set up fifteen days after the coming into force of the present Treaty to settle on the spot the new frontier line between Belgium and Germany, taking into account the economic factors and the means of communication.

Decisions will be taken by a majority and will be binding on the parties concerned.

ARTICLE 36.

When the transfer of the sovereignty over the territories referred to above has become definite, German nationals habitually resident in the territories will definitively acquire Belgian nationality *ipso facto*, and will lose their German nationality.

Nevertheless, German nationals who became resident in the territories after August 1, 1914, shall not obtain Belgian nationality without a permit from the Belgian Government.

ARTICLE 37.

Within the two years following the definitive transfer of the sovereignty over the territories assigned to Belgium under the present Treaty, German nationals over 18 years of age habitually resident in those territories will be entitled to opt for German nationality.

Option by a husband will cover his wife, and option by parents will cover their children under 18 years of age. Persons who have exercised the above right to opt must within the ensuing twelve months transfer their place of residence to Germany.

They will be entitled to retain their immovable property in the territories acquired by 31st Dec. They may carry with them their movable property of every description. No export or import duties may be imposed upon them in connection with the removal of such property.

ARTICLE 38.

The German Government will hand over without delay to the Belgian Government the archives, registers, plans, title deeds and documents of every kind concerning the civil, military, financial, judicial or other administrations in the territory transferred to Belgian sovereignty.

The German Government will likewise restore to the Belgian Government the archives and documents of every kind carried off during the war by the German authorities from the Belgian public administration in particular from the Ministry of Foreign Affairs at Brussels.

ARTICLE 39.

The proportion and nature of the financial liabilities of Germany and of Prussia which Belgium will have to bear on account of the territories ceded to her shall be fixed in conformity with Articles 254 and 256 of Part IX (Financial Clauses) of the present Treaty.

SECTION II.
LUXEMBURG.

ARTICLE 40.

With regard to the Grand Duchy of Luxembourg, Germany renounces the benefit of all the provisions inserted in her favor in the Treaties of February 8, 1842, April 2, 1847, October 20-25, 1866, August 18, 1866, February 21 and May 11, 1867, May 10, 1871, June 11, 1872, and November 11, 1902, and in all Conventions consequent upon such Treaties.

Germany recognizes that the Grand Duchy of Luxembourg ceased to form part of the German Zollverein as from January 1, 1919, renounces her right to the exploitation of the railways, adheres to the termination of the régime of neutrality of the Grand Duchy, and accepts in advance all international arrangements which may be concluded by the Allied and Associated Powers relating to the Grand Duchy.

Germany undertakes to grant to the Grand Duchy of Luxembourg, when a demand to that effect is made to her by the Principal Allied and Associated Powers, the rights and advantages stipulated in favour of such Powers or their nationals in the present Treaty with regard to economic questions, to questions relative to transport and to aerial navigation.

SECTION III.
LEFT BANK OF THE RHINE.

ARTICLE 42.

Germany is forbidden to maintain or construct any fortifications either on the left bank of the Rhine or on the right bank to the west of a line drawn 50 kilometres to the East of the Rhine.

ARTICLE 43.

In the area defined above the maintenance and the assembly of armed forces, either permanently or temporarily, and military manoeuvres of any kind as well as the upkeep of all permanent works for mobilization, are in the same way forbidden.

ARTICLE 44.

In case Germany violate in any manner whatever the provisions of Articles 42 and 43, she shall be regarded as committing a hostile act against the Powers signatory of the present Treaty and as calculated to disturb the peace of the world.

SECTION IV.
SAAR BASIN.

ARTICLE 45.

As a compensation for the destruction of the coal-mines in the north of France and as part payment towards the total reparation due from Germany for the damage resulting from the war, Germany cedes to France in full and absolute possession, with exclusive rights of exploitation, unencumbered and free from all debts and claims of any kind, the coal-mines situated in the Saar Basin as defined in Article 48.

ARTICLE 46.

In order to assure the rights and welfare of the population and to guarantee to France complete freedom in working the mines, Germany agrees to the provisions of Chapters I and II of the Annex hereto.

ARTICLE 47.

In order to make in due time permanent provision for the government of the Saar Basin in accordance with the wishes of the populations, France and Germany agree to the provisions of Chapter III of the Annex hereto.

ARTICLE 48.

The boundaries of the territory of the Saar Basin, as dealt with in the present stipulations, will be fixed as follows:

On the south and south-west: by the frontier of France as fixed by the present Treaty.

On the north-west and north: by a line following the northern administrative boundary of the Kreis of Merzig from the point where it leaves the French frontier to the point where it meets the administrative boundary separating the commune of Saarblüsch from the commune of Britten; following this communal boundary southwards and reaching the administrative boundary of the canton of Merzig, so as to include in the territory of the Saar Basin the canton of Mettlach, with the exception of the commune of Britten; following successively the northern administrative boundaries of the cantons of Merzig and Haudstadt, which are incorporated in the so-called Saar Basin, then successively the administrative boundaries separating the Kreis of Sarrelouis, Ottweiler and Saint-Wendel from the Kreis of Merzig, Treves (Trier) and the Principality of Birkenfeld as far as a point situated about 500 metres north of the village of Furschweiler (viz., the highest point of the Metzberg).

On the north-east and east: from the last point defined above to a point about 3½ kilometres east-north-east of Saint-Wendel:

a line to be fixed on the ground passing east of Furschweiler, then of Roschberg, east of points 418, 329 (south of Roschberg), west of Leitersweiler, north-east of point 464, and following the line of the crest southwards to its junction with the administrative boundary of the Kreis of Kusel;

thence in a southerly direction the boundary of the Kreis of Kusel, then the boundary of the Kreis of Homburg towards the south-south-east to a point situated about 1000 metres west of Dunzweiler;

thence to a point about 1 kilometre south of Hornbach: a line to be fixed on the ground passing through point 424 (about 1000 metres south-east of Dunzweiler), point 363 (Fuchs-Berg), point 322 (south-west of Waldmohr), then east of Jägersburg and Erbach, then encircling Homburg, passing through the points 361, 342 (about 2½ kilometres north-east by east of that town), 342 (about 2 kilometres south-east of that town), 347 (Schreiners-Berg), 356, 350 (about 1½ kilometres south-east of Schwarzenbach), then passing east of Einöd, south-east of points 322 and 333, about 2 kilometres east of Webenheim, about 2 kilometres east of Mimbach, then passing east of Ringweilerhof and north of the road from Mimbach to Böckweiler (so as to include this road in the territory of the Saar Basin), passing immediately north of the junction of the roads from Böckweiler and Altheim situated about 2 kilometres north of Altheim, then passing south of Ringweilerhof and north of point 322, rejoining the frontier of France at the angle which it makes about 1 kilometre south of Hornbach (see Map No. 2/100,000 annexed to the present Treaty).

The Commission composed of five members, one appointed by France, one by Germany, and three by the Council of the League of Nations, which will select nationals of other Powers, will be constituted within fifteen days from the coming into force of the present Treaty, to trace on the spot the frontier line described above.

In those parts of the preceding line which do not coincide with administrative boundaries, the Commission will endeavor to keep to the line indicated, while taking into consideration, so far as is possible, local economic interests and existing communal boundaries.

The decisions of this Commission will be taken by a majority, and will be binding on the parties concerned.

ARTICLE 49.

Germany renounces in favour of the League of Nations, in the capacity of trustee, the government of the territory defined above.

At the end of fifteen years from the coming into force of the present Treaty the inhabitants of the said territory shall be called upon to indicate the sovereignty under which they desire to be placed.

ARTICLE 50.

The stipulations under which the cession of the mines in the Saar Basin shall be carried out together with the measure intended to guarantee the rights and the well-being of the inhabitants and the government of the territory, as well as the conditions in accordance with which the plebiscite hereinbefore provided for is to be made, are laid down in the Annex hereto. This Annex shall be considered as an integral part of the present Treaty, and Germany declares her adherence to it.

ANNEX.

In accordance with the provisions of Articles 45 to 50 of the present Treaty, the stipulations under which the cession by Germany to France of the territory of the Saar Basin will be effected, as well as the measure intended to ensure respect for the rights and well-being of the population and the government of the territory, and the conditions in which the inhabitants will be called upon to indicate the sovereignty under which they may wish to be placed, have been laid down as follows:

NOTE. This pictorial MAP is divided into 100 MILE SQUARES shown as if seen in perspective.

A BIRDSEYE VIEW OF GERMANY, SHOWING NEW BOUNDARIES

In the West France not only gets back the provinces of Alsace and Lorraine, but also secures the ownership of the valuable coalfields of the Saar basin, whose inhabitants will decide by plebiscite fifteen years hence, whether they will be German or French. The Malmédy district to the North is restored to Belgium.

In the East a vast area of the old Polish Kingdom is allotted to the new Polish State. It includes Polish Silesia and

ARTICLE 119. TERRITORIES TO BE TRANSFERRED TO POLAND.

1. together with the major part of West Prussia, appropriated by the Prussians over a century ago. The important city of Danzig, with the area at the mouth of the Vistula, is to become a free city. The areas in which the people are to decide by plebiscite their own destiny include the Semi-Polish part of East Prussia also Slesvig, formerly part of Denmark. The Kiel Canal is to remain under German sovereignty, but under commercial conditions similar to those governing the Panama Canal. Heligoland is to be dismantled.

CHAPTER I.

CONCESSION AND EXPLOITATION OF MINING PROPERTY.

1. From the date of the coming into force of the present Treaty, all the deposits of coal situated within the Saar Basin as defined in Article 48 of the said Treaty, become the complete and absolute property of the French State.

The French State will have the right of working or not working the said mines, or of transferring to a third party the right of working them, without having to obtain any previous authorization or fulfil any formalities.

The French State may always require that the German mining laws and regulations referred to below shall be applied in order to ensure the determination of its rights.

The right of ownership of the French State will apply not only to the deposits which are free and for which concessions have not yet been granted, but also to the deposits for which concessions have already been granted, whoever may be the present proprietors, or irrespective of whether they belong to the Prussian State, to the Bavarian State, to other States or bodies, to companies or to individuals, whether they have been worked or not, or whether a right of exploitation distinct from the right of the owners of the surface of the soil has been recognized.

As far as concerns the mines which are being worked, the transfer of the ownership to the French State will apply to all the accessories and subsidiaries of the said mines, in particular to their plant and equipment both on and below the surface, to the extracting machinery, their plants for transforming coal into electric power, coke and by-products, their workshops, means of communication, electric lines, plant for catching and distributing water, land, buildings such as offices, managers' employees' and workmen's dwellings, schools, hospitals and dispensaries, their stocks and supplies of every description, their archives and plans, and in general everything which those who own or exploit the mines possess or enjoy for the purpose of exploiting the mines and their accessories and subsidiaries.

The transfer will apply also to the debts owing for products delivered before the entry into possession by the French State, and after the signature of the present Treaty, and to deposits of money made by customers, whose rights will be guaranteed by the French State.

4. The French State will acquire the property free and clear of all debts and charges. Nevertheless, the rights acquired, or in course of being acquired, by the employees of the mines and their accessories and subsidiaries at the date of the coming into force of the present Treaty, in connection with pensions for old age or disability, will not be affected. In return, Germany must pay over to the French State a sum representing the actuarial amounts to which the said employees are entitled.

5. The value of the property thus ceded to the French State will be determined by the Reparation Commission referred to in Article 233 of Part VIII (Reparation) of the present Treaty.

This value shall be credited to Germany in part payment of the amount due for reparation.

It will be for Germany to indemnify the proprietors or parties concerned, whoever they may be.

6. No tariff shall be established on the German railways and canals which may directly or indirectly discriminate to the prejudice of the transport of the personnel or products of the mines and their accessories or subsidiaries, or of the material necessary to their exploitation. Such transport shall enjoy all the rights and privileges which any international railway conventions may guarantee to similar products of French origin.

7. The equipment and personnel necessary to ensure the despatch and transport of the products of the mines and their accessories and subsidiaries, as well as the carriage of workmen and employees who are provided by the local railway administration of the Basin.

8. No obstacle shall be placed in the way of such improvements of railways or waterways as the French State may judge necessary to assure the despatch and the transport of the products of the mines and their accessories and subsidiaries, such as double trackage, enlargement of stations, and construction of yards and appurtenances. The distribution of expenses will, in the event of disagreement, be submitted to arbitration.

9. The French State may also establish any new means of communication, such as roads, electric lines and telephone connections which it may consider necessary for the exploitation of the mines. It may exploit freely and without any restrictions the means of communication of which it may become the owner, particularly those connecting the mines and their accessories and subsidiaries with the means of communication situated in French territory.

10. The French State shall always be entitled to demand the application of the German mining laws and regulations in force on November 11, 1918, excepting provisions adopted exclusively in view of the state of war, with a view to the acquisition of such land as it may judge necessary for the exploitation of the mines and their accessories and subsidiaries.

The payment for damage caused to immovable property by the working of the said mines and their accessories and subsidiaries shall be made in accordance with the German mining laws and regulations above referred to.

11. Every person whom the French State may substitute for itself as regards the whole or part of its rights to the exploitation of the mines and their accessories and subsidiaries shall enjoy the benefit of the privileges provided in this Annex.

12. The mines and other immovable property which become the property of the French State may never be made the subject of measures of forfeiture, forced sale, expropriation or regulation, nor of any other measure affecting the right of property.

The personnel and the plant connected with the exploitation of these mines or their accessories and subsidiaries, as well as the product extracted from the mines or manufactured in their accessories and subsidiaries, may not at any time be made the subject of any measures of requisition.

The exploitation of the mines and their accessories and subsidiaries, which become the property of the French State, will continue, subject to the provisions of paragraph 23 below, to be subject to the régime established by the German laws and regulations on November 11, 1918, excepting provisions adopted exclusively in view of the state of war.

The rights of the workmen shall similarly be maintained, subject to the provisions of the said paragraph 23, as established on November 11, 1918, by the German laws and regulations above referred to.

No impediment shall be placed in the way of the introduction or employment in the mines and their accessories and subsidiaries of workmen from without the Basin. The employees and workmen of French nationality shall have the right to belong to French labour unions.

13. The amount contributed by the mines and their accessories and subsidiaries, either to the local budget of the territory of the Saar Basin or to the communal funds, shall be fixed with due regard to the ratio of the value of the mines to the total taxable wealth of the Basin.

14. The French State shall always have the right of establishing and maintaining, as incidental to the mines, primary or technical schools for workmen, employees and their children, and of causing instruction therein to be given in the French language, in accordance with such curriculum and by such teachers as it may select.

It shall also have the right to establish and maintain hospitals, dispensaries, workmen's houses and gardens and other charitable and social institutions.

15. The French State shall enjoy complete liberty with respect to the distribution, dispatch and sale prices of the products of the mines and their accessories and subsidiaries.

Nevertheless, whatever may be the total product of the mines, the French Government undertakes that the requirements of local consumption for industrial and domestic purposes shall always be satisfied in the proportion existing in 1913 between the amount consumed locally and the total output of the Saar Basin.

CHAPTER II.

GOVERNMENT OF THE TERRITORY OF THE SAAR BASIN.

16. The Government of the territory of the Saar Basin shall be entrusted to a Commission representing the League of Nations. This Commission shall sit in the territory of the Saar Basin.

17. The Governing Commission provided for by paragraph 16 shall consist of five members chosen by the Council of the League of Nations, and will include one citizen of France, one native inhabitant of the Saar Basin, not a citizen of France, and three members belonging to three countries other than France or Germany.

The members of the Governing Commission shall be appointed for one year and may be re-appointed. They can be removed by the Council of the League of Nations, which will provide for their replacement.

The members of the Governing Commission will be entitled to a salary which will be fixed by the Council of the League of Nations, and charged on the local revenues.

18. The Chairman of the Governing Commission shall be appointed for one year from among the members of the Commission by the Council of the League of Nations and may be re-appointed.

The Chairman will act as the executive of the Commission.

19. Within the territory of the Saar Basin the Governing Commission shall have all the powers of government hitherto belonging to the German Empire, Prussia, or Bavaria, including the appointment and dismissal of officials, and the creation of such administrative and representative bodies as it may deem necessary.

It shall have full powers to administer and operate the railways, canals and the different public services. Its decisions shall be taken by a majority.

20. Germany will place at the disposal of the Governing Commission all official documents and archives under the control of Germany, of any German State, or of any local authority, which relate to the territory of the Saar Basin or to the rights of the inhabitants thereof.

21. It will be the duty of the Governing Commission to ensure, by such means and under such conditions as it may deem suitable, the protection abroad of the interests of the inhabitants of the territory of the Saar Basin.

22. The Governing Commission shall have the full right of user of all property, other than mines, belonging, either in public or in private domain, to the Government of the German Empire, or the Government of any German State, in the territory of the Saar Basin.

As regards the railways an equitable apportionment of rolling stock shall be made by a mixed Commission on which the Government of the territory of the Saar Basin and the German railways will be represented.

Persons, goods, vessels, carriages, wagons and mails coming from or going to the Saar Basin shall enjoy all the rights and privileges relating to transit and transport which are specified in the provisions of Part XII (Ports, Waterways and Railways) of the present Treaty.

23. The laws and regulations in force on November 11, 1918, in the territory of the Saar Basin (except those enacted in consequence of the state of war) shall continue to apply.

If, for general reasons or to bring these laws and regulations into accord with the provisions of the present Treaty, it is necessary to introduce modifications, these shall be decided on, and put into effect by the Governing Commission, after consultation with the elected representatives of the inhabitants in such a manner as the Commission may determine.

No modification may be made in the legal régime for the exploitation of the mines, provided for in paragraph 12, without the French State being previously consulted, unless such modification results from a general regulation respecting labour adopted by the League of Nations.

In fixing the conditions and hours of labour for men, women and children, the Governing Commission is to take into consideration the wishes expressed by the local labour organisations, as well as the principles adopted by the League of Nations.

24. Subject to the provisions of paragraph 4, no rights of the inhabitants of the Saar Basin acquired or in process of acquisition at the date of the coming into force of this Treaty, in any insurance system of Germany or in respect of any pension of any kind, are affected by any of the provisions of the present Treaty.

Germany and the Government of the territory of the Saar Basin will preserve and continue all of the aforesaid rights.

25. The civil and criminal courts existing in the territory of the Saar Basin shall continue to exist.

A civil and criminal court will be established by the Governing Commission to hear appeals from the decisions of the said courts and to decide matters for which these courts are not competent.

The Governing Commission will be responsible for settling the organisation and jurisdiction of the said court.

Justice will be rendered in the name of the Governing Commission.

26. The Governing Commission will alone have the power of levying taxes and dues in the territory of Saar Basin.

These taxes and dues will be exclusively applied to the needs of the territory.

The fiscal system existing on November 11, 1918, will be maintained as far as possible, and no new tax except customs duties may be imposed without previously consulting the elected representatives of the inhabitants.

27. The present stipulations will not affect the existing nationality of the inhabitants of the territory of the Saar Basin.

No hindrance shall be placed in the way of those who wish to acquire a different nationality, but in such case the acquisition of the new nationality will involve the loss of any other.

28. Under the control of the Governing Commission the inhabitants will retain their local assemblies, their religious liberties, their schools and their language.

The right of voting will not be exercised for any assemblies other than the local assemblies, and will belong to every inhabitant over the age of twenty years, without distinction of sex.

29. Any of the inhabitants of the Saar Basin who may desire to leave the territory will have full liberty to retain in it their movable property or to sell it at fair price, and to remove their movable property free of any charges.

30.

There will be no military service, whether compulsory or voluntary, in the territory of the Saar Basin, and the construction of fortifications therein is forbidden.

Only a local gendarmerie for the maintenance of order may be established.

It will be the duty of the Governing Commission to provide in all cases for the protection of persons and property in the Saar Basin.

31.

The territory of the Saar Basin as defined by Article 48 of the present Treaty shall be subjected to the French customs régime. The receipts from the customs duties on goods imported or local consumption shall be included in the budget of the said territory after deduction of all costs of collection.

No export tax shall be imposed upon metallurgical products or coal exported from the said territory to Germany, nor upon German exports for the use of the industries of the territory of the Saar Basin.

Natural or manufactured products originating in the Basin in transit over German territory and, similarly, German products in transit over the territory of the Basin shall be free of all customs duties.

Products which both originate in and pass from the Basin into Germany shall be free of import duties for a period of five years from the date of the coming into force of the present Treaty, and during the same period articles imported from Germany into the territory of the Basin for local consumption shall likewise be free of import duties.

During these five years the French Government reserves to itself the right of limiting to the annual average of the quantities imported into Alsace-Lorraine and France in the years 1911 to 1913 the quantities which may be sent into France of all articles coming from the Basin which include raw materials and semi-manufactured goods imported duty free from Germany. Such average shall be determined after reference to all available official information and statistics.

32.

No prohibition or restriction shall be imposed upon the circulation of French money in the territory of the Saar Basin.

The French State shall have the right to use French money in all purchases, payments and contracts connected with the exploitation of the mines or their accessories and subsidiaries.

33.

The Governing Commission shall have power to decide all questions arising from the interpretation of the preceding provisions.

France and Germany agree that any dispute involving a difference of opinion as to the interpretation of the said provisions shall in the same way be submitted to the Governing Commission, and the decision of a majority of the Commission shall be binding on both countries.

CHAPTER III.

PLEBISCITE.

34.

At the termination of a period of fifteen years from the coming into force of the present Treaty, the population of the territory of the Saar Basin will be called upon to indicate their desires in the following manner:

A vote will take place by communes or districts, on the three following alternatives: (a) maintenance of the régime established by the present Treaty and by this Annex; (b) union with France; (c) union with Germany.

All persons without distinction of sex, more than twenty years old at the date of the voting, resident in the territory at the date of the signature of the present Treaty, will have the right to vote.

The other conditions, methods and the date of the voting shall be fixed by the Council of the League of Nations in such a way as to secure the freedom, secrecy and trustworthiness of the voting.

35.

The League of Nations shall decide on the sovereignty under which the territory is to be placed, taking into account the wishes of the inhabitants as expressed by the voting:

(a) If, for the whole or part of the territory, the League of Nations decides in favour of the maintenance of the régime established by the present Treaty and this Annex, Germany hereby agrees to make such renunciation of her sovereignty in favour of the League of Nations as the latter shall deem necessary. It will be the duty of the League of Nations to take appropriate steps to adapt the régime definitively to the permanent welfare of the territory and the general interest;

(b) If, for the whole or part of the territory, the League of Nations decides in favour of union with France, Germany hereby agrees to cede to France in accordance with the decision of the League of Nations all rights and title over the territory specified by the League;

(c) If, for the whole or part of the territory, the League of Nations decides in favour of union with Germany, it will be the duty of the League of Nations to cause the German Government to re-establish in the government of the territory specified by the League.

36.

If the League of Nations decides in favour of the union of the whole or part of the territory of the Saar Basin with Germany, France's rights of ownership in the mines

situated in such part of the territory will be repurchased by Germany in their entirety at a price payable in gold. The price to be paid will be fixed by three experts, one nominated by Germany, one by France, and one, who shall be neither a Frenchman nor a German, by the Council of the League of Nations; the decision of the experts will be given by a majority.

The obligation of Germany to make such payment shall be taken in account by the Reparation Commission, and for the purpose of this payment Germany may create a prior charge upon her assets or revenues upon such detailed terms as shall be agreed to by the Reparation Commission.

If, nevertheless, Germany, after a period of one year from the date on which the payment by France, and one, who shall have effected the said payment, the Reparation Commission shall do so in accordance with such instructions as may be given by the League of Nations, and, if necessary, by liquidating that part of the mines which is in question.

37.

If, in consequence of the repurchase provided for in paragraph 36, the ownership of the mines or any part of them is transferred to Germany, the French State and French nationals shall have the right to purchase such amount of coal of the Saar Basin as their industrial and domestic needs are found at that time to require. An equitable arrangement regarding amounts of coal, duration of contract, and prices will be fixed in due time by the Council of the League of Nations.

38.

It is understood that France and Germany may, by special agreements concluded before the time fixed for the payment of the price for the repurchase of the mines, modify the provisions of paragraphs 36 and 37.

The Council of the League of Nations shall make such provisions as may be necessary for the establishment of the régime which is to take effect after the decisions of the League of Nations mentioned in paragraph 35 have become operative, including an equitable apportionment of any obligations of the Government of the territory of the Saar Basin arising from loans raised by the Commission or from other causes.

From the coming into force of the new régime, the powers of the Governing Commission will terminate, except in the case provided for in paragraph 35 (a).

40.

In all matters dealt with in the present Annex, the decisions of the Council of the League of Nations will be taken by a majority.

SECTION V.

ALSACE-LORRAINE.

The High Contracting Parties, recognising the moral obligation to redress the wrong done by Germany in 1871 both to the rights of France and to the wishes of the population of Alsace and Lorraine, which were separated from their country in spite of the solemn protest of their representatives at the Assembly of Bordeaux,

Agree upon the following Articles:

ARTICLE 51.

The territories which were ceded to Germany in accordance with the Preliminaries of Peace signed at Versailles on February 26, 1871, and the Treaty of Frankfurt of May 10, 1871, are restored to French sovereignty as from the date of the Armistice of November 11, 1918.

The provisions of the Treaties establishing the delimitation of the frontiers before 1871 shall be restored.

ARTICLE 52.

The German Government shall hand over without delay to the French Government all archives, registers, plans, titles and documents of every kind concerning the civil, military, financial, judicial or administrative institutions of the territories restored to French sovereignty. If any of these documents, archives, registers, titles or plans have been misplaced, they will be restored by the German Government on the demand of the French Government.

ARTICLE 53.

Separate agreements shall be made between France and Germany dealing with the interests of the inhabitants of the territories referred to in Article 51, particularly as regards their civil rights, their business and the exercise of their professions, it being understood that Germany undertakes from the present date to recognise and accept the regulations laid down in the Annex hereto regarding the nationality of the inhabitants or natives of the said territories, not to claim at any time or in any place whatsoever as German nationals those who shall have been declared on any ground to be French, to receive all others in her territory, and to conform as regards the property of German nationals in the territories indicated in Article 51, with the provisions of Article 297 and the Annex to Section IV of Part X (Economic Clauses) of the present Treaty.

Those German nationals who, without acquiring French nationality, do not receive protection from the French Government to reside in the said territories shall not be subjected to the provisions of the said Article.

ARTICLE 54.

Those persons who have regained French nationality in virtue of paragraph 1 of the Annex hereto will be held to be Alsace-Lorrainers for the purposes of the present Section.

The persons referred to in paragraph 2 of the said Annex will from the day on which they have claimed French nationality be held to be Alsace-Lorrainers with retroactive effect as from November 11, 1918, for those whose application is rejected, the privilege will terminate at the date of the refusal.

Such juridical persons will also have the status of Alsace-Lorrainers as shall have been recognised as possessing this quality, whether by the French administrative authorities or by a judicial decision.

ARTICLE 55.

The territories referred to in Article 51 shall return to France free and quit of all public debts under the conditions laid down in Article 255 of Part IX (Financial Clauses) of the present Treaty.

ARTICLE 56.

In conformity with the provisions of Article 256 of Part IX (Financial Clauses) of the present Treaty, France shall enter into possession of all property and estate, within the territories referred to in Article 51, which belong to the German Empire or German States, without any payment or credit on this account to any of the States ceding the territories.

This provision applies to all movable or immovable property of public or private domain together with all rights whatsoever belonging to the German Empire or German States or to their administrative areas.

Crown property and the property of the former Emperor or other German sovereigns shall be assimilated to property of the public domain.

ARTICLE 57.

Germany shall not take any action, either by means of stamping or by any other legal or administrative measures not applying equally to all property and estate, which may be to the detriment of the legal value or redeemability of German monetary instruments or moneys which, at the date of the signature of the present Treaty, are legally current, and at that date are in the possession of the French Government.

ARTICLE 58.

A special Convention will determine the conditions for repayment in marks of the exceptional war expenditure advanced during the course of the war by Alsace-Lorraine or by the public bodies in Alsace-Lorraine on account of the Empire in accordance with German law, such as payment to the families of persons mobilised, requisitions, billeting of troops, and assistance to persons who have been evacuated.

In fixing the amount of these sums Germany shall be credited with that portion which Alsace-Lorraine would have contributed to the Empire to meet the expenses resulting from these payments, this contribution being calculated according to the proportion of the Imperial revenues derived from Alsace-Lorraine in 1910.

ARTICLE 59.

The French Government will collect for its own account the imperial taxes, duties and dues of every kind leviable in the territories referred to in Article 51 and not collected at the time of the Armistice of November 11, 1918.

ARTICLE 60.

The German Government shall without delay restore to Alsace-Lorrainers (individuals, juridical persons and public institutions) all property, rights and interests belonging to them on November 11, 1918, in so far as these are situated in German territory.

ARTICLE 61.

The German Government undertakes to continue and complete without delay the execution of the financial clauses regarding Alsace-Lorraine contained in the Armistice Conventions.

ARTICLE 62.

The German Government undertakes to bear the expense of all civil and military pensions which had been earned in Alsace-Lorraine on date of November 11, 1918, and the maintenance of which was a charge on the budget of the German Empire.

The German Government shall furnish each year the funds necessary for the payment in francs, at the average rate of exchange for that year, of the sums in marks to which persons residing in Alsace-Lorraine had remained under German jurisdiction.

ARTICLE 63.

For the purposes of the obligation assumed by Germany in Part VIII (Reparation) of the present Treaty to give compensation for damages caused to the civil populations of the Allied and Associated countries in the form of fines, the inhabitants of the territories referred to in Article 51 shall be assimilated to the above-mentioned populations.

ARTICLE 64.

The regulations concerning the control of the Rhine and of the Moselle are laid down in Part XII (Ports, Waterways and Railways) of the present Treaty.

ARTICLE 65.

Within a period of three weeks after the coming into force of the present Treaty, the port of Strasburg and the port of Kehl shall be constituted, for a period of seven years, a single unit from the point of view of exploitation.

The administration of this single unit will be carried on by a manager named by the Central Rhine Commission, which shall also have power to remove him.

This manager shall be of French nationality. He will reside in Strasbourg and will be subject to the supervision of the Central Rhine Commission. There will be established in the two ports free zones in conformity with Part XII (Ports, Waterways and Railways) of the present Treaty.

A special Convention between France and Germany, which shall be submitted to the approval of the Central Rhine Commission, will fix the details of this organization, particularly as regards finance.

It is understood that the purpose of the present Article the port of Kehl includes the whole of the area necessary for the movements of the port and the trains which serve it, including the harbour, quays and railroads, platforms, cranes, sheds and warehouses, silos, elevators and hydro-electric plants, which make up the equipment of the port.

The German Government undertakes to carry out all measures which shall be required of it in order to assure that all the making-up and switching of trains arriving at or departing from Kehl, whether for the right bank or the left bank of the Rhine, shall be carried on in the best conditions possible.

All property rights shall be safeguarded. In particular the administration of the ports shall not prejudice any property rights of the French or Baden railroads. Equality of treatment as respects traffic shall be assured in both ports to the nationals, vessels and goods of every country.

In case at the end of the sixth year France shall consider that the progress made in the improvement of the port of Strasbourg still requires a prolongation of this temporary régime, she may ask for such prolongation from the Central Rhine Commission, which may grant an extension for a period not exceeding one year.

Throughout the whole period of any such extension the free zones above provided for shall be maintained. Pending appointment of the first manager by the Central Rhine Commission a provisional manager who shall be of French nationality may be appointed by the Principal Allied and Associated Powers subject to the foregoing provisions.

For all purposes of the present Article the Central Rhine Commission will decide by a majority of votes.

ARTICLE 66.

The railway and other railways across the Rhine now existing within the limits of Alsace-Lorraine shall, as to all their parts and their whole length, be the property of the French State, which shall ensure their upkeep.

ARTICLE 67.

The French Government is substituted in all the rights of the German Empire and the railways which were administered by the Imperial railway administration and which are actually working or under construction.

The same shall apply to the rights of the Empire with regard to railway and tramway concessions within the territories referred to in Article 51.

This substitution shall not entail any payment on the part of the French State. The frontier railway stations shall be established by a subsequent agreement, it being stipulated in advance that on the Rhine frontier they shall be situated on the right bank.

ARTICLE 68.

In accordance with the provisions of Article 268 of Chapter I of Section I of Part X (Economic Clauses) of the present Treaty, for a period of five years from the coming into force of the present Treaty, natural or manufactured products originating in and coming from the territories referred to in Article 51 shall, on importation into German customs territory, be exempt from all customs duties. The French Government may fix each year, by decree communicated to the German Government, the nature and amount of the products which shall enjoy this exemption.

The amount of each product which may be thus sent annually into Germany shall be fixed at the beginning of the year and sent annually in the years 1911-1913.

Further, during the period of five years above mentioned, the German Government shall allow the free export from Germany and the free reimportation into Germany, exempt from all customs duties and other charges (including interferences from Germany into the territories referred to in Article 51, to be subjected there to any finishing process, such as dyeing, dressing, printing, mercerization, gassing, twisting or finishing.

ARTICLE 69.

During a period of ten years from the coming into force of the present Treaty, central electric supply works situated in German territory and formerly furnished electric power to the territories referred to in Article 51 or to any establishment the working of which passes permanently or temporarily from Germany to France, shall be required to continue such supply up to the amount of consumption corresponding to the undertakings and contracts current on November 11, 1918.

Such supply shall be furnished according to the contracts in force and at a rate which shall not be higher than that paid to the said works by German nationals.

ARTICLE 70.

It is understood that the French Government preserves its right to prohibit in the future in the territories referred to in Article 51 all new German participation:

- (1) In the management or exploitation of the public domain and of public services, such as railways, navigable waterways, water works, gas works, electric power, etc.;
 - (2) In the ownership of mines and quarries of every kind and in enterprises connected therewith;
- In metallurgical establishments, even though their working may not be connected with that of any mine.

ARTICLE 71.

As regards the territories referred to in Article 51, Germany renounces on behalf of herself and her nationals as from November 11, 1918, all rights under the law of May 25, 1910, regarding the trade in potash salts, and generally under any stipulations for the intervention of German organizations in the working of the potash mines. Similarly, she renounces on behalf of herself and her nationals all rights under any agreements, stipulations or laws which may exist to her benefit with regard to other products of the aforesaid territories.

ARTICLE 72.

The settlement of the questions relating to debts contracted before November 11, 1918, between the German Empire and the German States or their nationals residing in Germany on the one part and Alsace-Lorraine residing in Alsace-Lorraine on the other part shall be effected in accordance with the provisions of Section III of Part X (Economic Clauses) of the present Treaty, the expression "before the war" therein being replaced by the expression "before November 11, 1918". The rate of exchange applicable in the case of such settlement shall be the average rate quoted on the Geneva Exchange during the month preceding November 11, 1918.

There may be established in the territories referred to in Article 51, for the settlement of the aforesaid debts under the conditions laid down in Section III of Part X (Economic Clauses) of the present Treaty, a special clearing office, it being understood that this office shall be regarded as a "central office" under the provisions of paragraph 1 of the Annex to the said Section.

ARTICLE 73.

The private property, rights and interests of Alsace-Lorrainers in Germany will be regulated by the stipulations of Section IV of Part X (Economic Clauses) of the present Treaty.

ARTICLE 74.

The French Government reserves the right to retain and liquidate all the property, rights and interests which German nationals or societies controlled by Germany possessed in the territories referred to in Article 51 on November 11, 1918, subject to the conditions laid down in the last paragraph of Article 55 above.

Germany will directly compensate her nationals who may have been dispossessed by the aforesaid liquidations.

The product of these liquidations shall be applied in accordance with the stipulations of Sections III and IV of Part X (Economic Clauses) of the present Treaty.

ARTICLE 75.

Notwithstanding the stipulations of Section V of Part X (Economic Clauses) of the present Treaty, all contracts made before the date of the promulgation in Alsace-Lorraine of the French decree of November 30, 1918, between Alsace-Lorrainers whether individuals or juridical persons or others resident in Alsace-Lorraine on the one part and the German Empire or German States and their nationals residing in Germany on the other part, the execution of which has been suspended by the Armistice or by subsequent French legislation, shall be maintained.

Nevertheless, any contract of which the French Government shall notify the cancellation to Germany in the general arrest with effect from a period of six months from the date of the coming into force of the present Treaty, shall be annulled except in respect of any debt or other pecuniary obligation arising out of any act done or money paid thereunder before November 11, 1918. If this dissolution would cause one of the parties substantial prejudice, suitable compensation, calculated solely on the capital employed without taking account of loss of profits, shall be accorded to the prejudiced party.

With regard to prescriptions, limitations and forfeitures in Alsace-Lorraine, the provisions of Articles 300 and 301 of Section V of Part X (Economic Clauses) shall be applied with the substitution for the expression "outbreak of war" of the expression "November 11, 1918", and for the expression "duration of the war" of the expression "the period of the present Treaty", to the date of the coming into force of the present Treaty.

ARTICLE 76.

Questions concerning rights in industrial, literary or artistic property of Alsace-Lorrainers shall be regulated in accordance with the general stipulations of Section VII of Part X (Economic Clauses) of the present Treaty, it being understood that Alsace-Lorrainers holding rights of this nature under German legislation shall preserve full and entire enjoyment of those rights on German territory.

ARTICLE 77.

The German Government undertakes to pay over to the French Government such proportion of all reserves accumulated by the Empire or by public or private bodies dependent upon it for the purposes of disability and old age insurance, as would fall to the disability and old age insurance fund at Strasburg.

The same shall apply in respect of the capital and reserves accumulated in Germany falling legitimately to other such insurance funds, to superannuation funds, to the fund of the railways of Alsace-Lorraine, to other superannuation organisations established for the benefit of the personnel of public administrations and institutions operating in Alsace-Lorraine, and also in respect of the capital and reserves due by the insurance of private employees at Berlin, by reason of engagements entered into for the benefit of insured persons of that category resident in Alsace-Lorraine.

A special Convention shall determine the conditions and procedure of these transfers.

ARTICLE 78.

With regard to the execution of judgments, appeals and prosecutions, the following rules shall be applied:

(1) All civil and commercial judgments which shall have been given since August 3, 1914, by the Courts of Alsace-Lorraine between Alsace-Lorrainers, or between Alsace-Lorrainers and foreigners, or between foreigners, and which shall not have been appealed from before November 11, 1918, shall be regarded as final and susceptible of immediate execution without further formality.

When the judgment has been given between Alsace-Lorrainers and Germans or between Alsace-Lorrainers and subjects of the allies of Germany, it shall only be capable of execution after the issue of an *exequatur* by the corresponding new tribunal in the restored territory referred to in Article 51.

All judgments given by German Courts since August 3, 1914, against Alsace-Lorrainers for political crimes or misdemeanours shall be regarded as null and void.

(3) All sentences passed since November 11, 1918, by the Court of the Empire at Leipzig on appeals against the decisions of the Courts of Alsace-Lorraine shall be regarded as null and void and shall be so pronounced. The papers in regard to the cases in which such sentences have been given shall be returned to the Courts of Alsace-Lorraine concerned.

All appeals to the Court of the Empire against decisions of the Courts of Alsace-Lorraine shall be suspended. The papers shall be returned under the aforesaid conditions for transfer without delay to the French Cour de Cassation, which shall be competent to decide them.

(4) All prosecutions in Alsace-Lorraine for offences committed during the period between November 11, 1918, and the coming into force of the present Treaty will be conducted under German law except in so far as this has been modified by decrees duly published on the spot by the French authorities.

(5) All other questions as to competence, procedure or administration of justice shall be determined by a special Convention between France and Germany.

ARTICLE 79.

The stipulations as to nationality contained in the Annex hereto shall be considered as of equal force with the provisions of the present Section.

All other questions concerning Alsace-Lorraine which are not regulated by the present Section and the Annex thereto or by the general provisions of the present Treaty will form the subject of further conventions between France and Germany.

ANNEX.

1.

As from November 11, 1918, the following persons are *ipso facto* reinstated in their nationality:

(1) Persons who lost French nationality by the application of the Franco-German Treaty of May 10, 1871, and who have not since that date acquired any nationality other than German.

(2) The legitimate or natural descendants of the persons referred to in the immediately preceding paragraph, with the exception of those whose ascendants in the paternal line include a German who migrated into Alsace-Lorraine after July 15, 1870;

(3) All persons born in Alsace-Lorraine of unknown parents, or whose nationality is unknown.

2.

Within the period of one year from the coming into force of the present Treaty, persons included in any of the following categories may claim French nationality:

(1) All persons not restored to French nationality under paragraph above, whose ascendants include a Frenchman or Frenchwoman who lost French nationality under the conditions referred to in the said paragraph;

(2) All foreigners, not nationals of a German State, who acquired the status of a citizen of Alsace-Lorraine before August 3, 1914;

(3) All Germans domiciled in Alsace-Lorraine, if they have been so domiciled since a date previous to July 15, 1870, or if one of their ascendants was at that date domiciled in Alsace-Lorraine;

(4) All Germans born or domiciled in Alsace-Lorraine who have served in the Allied or Associated armies during the present war, and their descendants;

(5) All persons born in Alsace-Lorraine before May 10, 1871, of foreign parents, and the descendants of such persons;

(6) The husband or wife of any person whose French nationality may have been restored under paragraph 1, or who may have claimed and obtained French nationality in accordance with the preceding provisions.

The legal representative of a minor may exercise, on behalf of that minor, the right to claim French nationality; and if that right has not already been exercised, the minor may claim French nationality within the year following his majority.

Except in the cases provided for in No. (6) of the present paragraph, the French authorities reserve to themselves the right, in individual cases, to reject the claim to French nationality.

3.

Subject to the provisions of paragraph 2, Germans born or domiciled in Alsace-Lorraine shall not acquire French nationality by reason of the restoration of Alsace-Lorraine to France, even though they may have the status of citizens of Alsace-Lorraine.

They may acquire French nationality only by naturalisation, on condition of having been domiciled in Alsace-Lorraine from a date previous to August 3, 1914, and of submitting proof of unbroken residence within the restored territory for a period of three years from November 11, 1918.

France will be solely responsible for their diplomatic and consular protection from the date of their application for French naturalisation.

The French Government shall determine the procedure by which reinstatement in French nationality as of right shall be effected, and the conditions under which decisions shall be given upon claims to such nationality and applications for naturalisation, as provided by the present Annex.

SECTION VI.

AUSTRIA.

ARTICLE 80.

Germany acknowledges and will respect strictly the independence of Austria, within the frontiers which may be fixed by the Treaty between that State and the Principal Allied and Associated Powers; she agrees that this independence shall be inalienable, except with the consent of the Council of the League of Nations.

SECTION VII.

CZECHO-SLOVAK STATE.

ARTICLE 81.

Germany, in conformity with the action already taken by the Allied and Associated Powers, recognizes the complete independence of the Czecho-Slovak State which will include the autonomous territory of the Ruthenians to the south of the Carpathians. Germany hereby recognizes the frontiers of this State as determined by the Principal Allied and Associated Powers and the other interested States.

ARTICLE 82.

The old frontier as it existed on August 3, 1914, between Austria-Hungary and the German Empire will constitute the frontier between Germany and the Czecho-Slovak State.

ARTICLE 83.

Germany renounces in favour of the Czecho-Slovak State all rights and title over the portion of Silesian territory defined as follows:

starting from a point about 2 kilometres south-east of Katscher, on the boundary between the *Kreise* of Leobschütz and Ratibor:

the boundary between the two *Kreise*;

then, the former boundary between Germany and Austria-Hungary up to a point on the Oder immediately to the south of the Ratibor-Oderberg railway;

thence, towards the north-west and up to a point about 2 kilometres to the south-east of Katscher:

a line to be fixed on the spot passing to the west of Kranowitz.

A Commission composed of seven members, five nominated by the Principal Allied and Associated Powers, one by Poland and one by the Czecho-Slovak State, will be appointed fifteen days after the coming into force of the present Treaty to trace on the spot the frontier line between Poland and the Czecho-Slovak State.

The decisions of this Commission will be taken by a majority and shall be binding on the parties concerned.

Germany hereby agrees to renounce in favour of the Czecho-Slovak State all rights and title over the part of the *Kreise* of Leobschütz comprised within the following boundaries in case after the determination of the frontier between Germany and Poland the southern part of that *Kreis* should become isolated from Germany:

from the south-eastern extremity of the salient of the former Austrian frontier at about 5 kilometres to the west of Leobschütz southwards and up to the point of junction of the boundary between the *Kreise* of Leobschütz and Ratibor;

the former frontier between Germany and Austria-Hungary;

then, northwards, the administrative boundary between the *Kreise* of Leobschütz and Ratibor up to a point situated about 2 kilometres to the south-east of Katscher;

thence, north-westwards and up to the starting-point of this definition:

a line to be fixed on the spot passing to the east of Katscher.

ARTICLE 84.

German nationals habitually resident in any of the territories recognized as forming part of the Czechoslovak State will obtain Czechoslovak nationality *ipso facto* and lose their German nationality.

ARTICLE 85.

Within a period of two years from the coming into force of the present Treaty, German nationals over eighteen years of age habitually resident in any of the territories recognized as forming part of the Czechoslovak State will be entitled to opt for German nationality. Czechoslovaks who are German nationals and are habitually resident in Germany will have a similar right to opt for Czechoslovak nationality.

Option by a husband will cover his wife and option by parents will cover their children under eighteen years of age.

Persons who have exercised the above right to opt must within the succeeding twelve months transfer their place of residence to the State for which they have opted. They will be entitled to retain their landed property in the territory of the other State where they had their place of residence before exercising the right to opt. They may carry with them their movable property of every description. No export or import duties may be imposed upon them in connection with the removal of such property.

Within the same period Czechoslovaks who are German nationals and are in a foreign country will be entitled, in the absence of any provisions to the contrary in the foreign law, and if they have acquired the foreign nationality, to obtain Czechoslovak nationality and lose their German nationality by complying with the requirements laid down by the Czechoslovak State.

ARTICLE 86.

The Czechoslovak State accepts and agrees to embody in a Treaty with the Principal Allied and Associated Powers such provisions as may be deemed necessary by the said Powers to protect the interests of inhabitants of that State who differ from the majority of the population in race, language or religion.

The Czechoslovak State further accepts and agrees to embody in a Treaty with the said Powers such provisions as they may deem necessary to protect freedom of transit and equitable treatment of the commerce of other nations.

The proportion and nature of the financial obligations of Germany and Prussia which the Czechoslovak State will have to assume on account of the Silesian territory placed under its sovereignty will be determined in accordance with Article 254 of Part IX (Financial Clauses) of the present Treaty.

Subsequent agreements will decide all questions not decided by the present Treaty which may arise in consequence of the cession of the said territory.

SECTION VIII.

POLAND.

ARTICLE 87.

Germany, in conformity with the action already taken by the Allied and Associated Powers, recognizes the complete independence of Poland, and renounces in her favour all rights and title over the territory bounded by the Baltic Sea, the eastern frontier of Germany as laid down in Article 27 of Part II (Boundaries of Germany) of the present Treaty up to a point situated about 2 kilometres to the east of Lorzenendorf, then a line to the acute angle which the northern boundary of Upper Silesia makes about 3 kilometres north-west of Simmenau, then the boundary of Upper Silesia to its meeting point with the frontier between Germany and Prussia, the latter frontier to the point where it crosses the course of the Niemen, and then the northern frontier of East Prussia as laid down in Article 28 of Part II aforesaid.

The provisions of this Article do not, however, apply to the territories of East Prussia and the Free City of Danzig, as defined in Article 23 of Part II (Boundaries of Germany) and in Article 100 of Section XI (Danzig) of this Part.

The boundaries of Poland not determined in the present Treaty will be subsequently determined by the Principal Allied and Associated Powers.

A Commission consisting of seven members, five of whom shall be nominated by the Principal Allied and Associated Powers, one by Germany and one by Poland, shall be constituted at a date to be fixed in the present Treaty to delimit on the spot the frontier line between Poland and Germany.

The decisions of the Commission will be taken by a majority of votes and shall be binding upon the parties concerned.

ARTICLE 88.

In the portion of Upper Silesia included within the boundaries described below, the inhabitants will be called upon to indicate by a vote whether they wish to be attached to Germany or to Poland:

starting from the northern point of the salient of the old province of Austrian Silesia situated about 8 kilometres east of Neustadt, the former frontier between Germany and Austria to its junction with the boundary between the *Kreise* of Leobschütz and Ratibor;

thence in a northerly direction to a point about 2 kilometres south-east of Katscher;

the boundary between the *Kreise* of Leobschütz and Ratibor;

thence in a south-easterly direction to a point on the course of the Oder immediately south of the Ratibor-Oderberg railway;

a line to be fixed on the ground passing south of Kranowitz;

thence the old boundary between Germany and Austria, then the old boundary between Germany and Russia to its junction with the administrative boundary between Posnania and Upper Silesia;

thence this administrative boundary to its junction with the administrative boundary between Upper and Middle Silesia;

thence westwards to the point where the administrative boundary turns in an acute angle to the south-east about 3 kilometres north-west of Simmenau;

the boundary between Upper and Middle Silesia;

then in a westerly direction to a point to be fixed on the ground about 2 kilometres east of Lorzenendorf;

a line to be fixed on the ground passing north of Klein Henersdorf;

thence southwards to the point where the boundary between Upper and Middle Silesia cuts the Städtel-Karlsruhe road;

a line to be fixed on the ground passing west of Henersdorf, Polkowitz, Noldau, Steinersdorf and Dammer, and east of Strehltz, Nassade, Eckersdorf, Schwirz and Städtel;

thence the boundary between Upper and Middle Silesia to its junction with the eastern boundary of the *Kreis* of Falkenberg;

then the eastern boundary of the *Kreis* of Falkenberg to the point of the salient which is 3 kilometres east of Pusant;

thence to the northern point of the salient of the old province of Austrian Silesia situated about 8 kilometres east of Neustadt;

a line to be fixed on the ground passing east of Zülz.

The régime under which this plebiscite will be taken and given effect to is laid down in the Annex hereto.

The Polish and German Governments hereby respectively bind themselves to conduct no prosecutions on any part of their territory and to take no exceptional proceedings for any political action performed in Upper Silesia during the period of the régime laid down in the Annex hereto and up to the settlement of the final status of the country.

Germany hereby renounces in favour of Poland all rights and title over the portion of Upper Silesia lying beyond the frontier line fixed by the Principal Allied and Associated Powers as the result of the plebiscite.

ANNEX.

1.

Within fifteen days from the coming into force of the present Treaty the German troops and such officials as may be designated by the Commission set up under the provisions of paragraph 2 shall evacuate the plebiscite area. Up to the moment of the completion of the evacuation they shall refrain from any form of requisitioning in money or in kind, and from all acts likely to prejudice the material interests of the country.

Within the same period the Workmen's and Soldiers' Councils which have been constituted in this area shall be dissolved. Members of such Councils who are natives of another region and are exercising their functions at the date of the coming into force of the present Treaty, or who have gone out of office since March 1, 1919, shall be evacuated.

All military and semi-military unions formed in the said area by inhabitants of the district shall be immediately disbanded. All members of such military organizations who are not domiciled in the said area shall be required to leave it.

2.

The plebiscite area shall be immediately placed under the authority of an International Commission of four members to be designated by the following Powers: the United States of America, France, the British Empire and Italy. It shall be occupied by troops belonging to the Allied and Associated Powers, and the German Government undertakes to give facilities for the transference of these troops to Upper Silesia.

3.

The Commission shall enjoy all the powers exercised by the German or the Prussian Government, except those of legislation or taxation. It shall also be substituted for the Government of the province and the *Regierungsbezirk*. It shall be within the competence of the Commission to interpret the powers hereby conferred upon it and to determine to what extent it shall exercise them, and to what extent they shall be left in the hands of the existing authorities.

Changes in the existing laws and the existing taxation shall only be brought into force with the consent of the Commission.

The Commission will maintain order with the help of the troops which will be at its disposal, and, to the extent which may be necessary, by means of gendarmerie recruited among the inhabitants of the country.

Interior of the salon at the Ministry of Foreign Affairs, where the Peace Conference was held.
The beautiful statue represents "Liberty."

The Commission shall provide immediately for the replacement of the evacuated German officials and, if occasion arises, shall itself order the evacuation of such authorities and proceed to the replacement of such local authorities as may be required.

It shall take all steps which it thinks proper to ensure the freedom, fairness and secrecy of the vote. In particular, it shall have the right to order the expulsion of any person who may in any way have attempted to distort the result of the plebiscite by methods of corruption or intimidation.

The Commission shall have full power to settle all questions arising from the execution of the present clause. It shall be assisted by technical advisers chosen by it from among the local population.

The decisions of the Commission shall be taken by a majority vote.

4.

The vote shall take place at such date as may be determined by the Principal Allied and Associated Powers, but not sooner than six months or later than eighteen months after the establishment of the Commission in the area.

The right to vote shall be given to all persons without distinction of sex who:

Have completed their twelfth year on the 1st January of the year in which the plebiscite takes place;

(b) Were born in the plebiscite area or have been domiciled there since a date to be determined by the Commission which shall not be subsequent to January 1, 1918, or who have been expelled by the German authorities and have not retained their domicile there.

Persons convicted of political offences shall be enabled to exercise their right of voting.

Every person will vote in the commune where he is domiciled or in which he was born, if he has not retained his domicile in the area.

The result of the vote will be determined by communes according to the majority of votes in each commune.

5.

On the conclusion of the voting, the number of votes cast in each commune will be communicated by the Commission to the Principal Allied and Associated Powers, with a full report as to the taking of the vote and a recommendation as to the line which ought to be adopted as the frontier of Germany in Upper Silesia. In this recommendation regard will be paid to the wishes of the inhabitants as shown by the vote, and to the geographical and economic conditions of the locality.

6.

As soon as the frontier has been fixed by the Principal Allied and Associated Powers, the German authorities will be notified by the International Commission that they are free to take over the administration of the territory which it is recognized should be German; the said authorities must proceed to do so on the moment of such notification and in the manner prescribed by the Commission.

Within the same period and in the manner prescribed by the Commission, the Polish Government must proceed to take over the administration of the territory which it is recognized should be Polish.

When the administration of the territory has been provided for by the German and Polish authorities respectively, the powers of the Commission will terminate.

The cost of the army of occupation and expenditure by the Commission, whether in discharge of its own functions or in the administration of the territory, will be a charge on the area.

ARTICLE 89.

Poland undertakes to accord freedom of transit to persons, goods, vessels, carriages, wagons and mails in transit between East Prussia and the rest of Germany over Polish territory, including territorial waters, and to treat them at least as favorably as the persons, goods, vessels, carriages, wagons and mails respectively of Poland or of any other more favored nationality. The right of importation starting point or onward stop as regards facilities, restrictions and all other matters.

Goods in transit shall be exempt from all customs or other similar duties.

Freedom of transit will extend to telegraphic and telephone services under the conditions laid down by the conventions referred to in Article 98.

ARTICLE 90.

Poland undertakes to permit for a period of fifteen years the exportation to Germany of the products of the mines in any part of Upper Silesia transferred to Poland in accordance with the present Treaty.

Such products shall be free from all export duties or other charges or restrictions on exportation.

Poland agrees to take such steps as may be necessary to secure that any such products shall be available for sale to purchasers in Germany on terms as favourable as are applicable to like products sold under similar conditions to purchasers in Poland or in any other country.

ARTICLE 91.

German nationals habitually resident in territories recognized as forming part of Poland will acquire Polish nationality *ipso facto* and will lose their German nationality. German nationals who, however, or their descendants who become resident in these territories after January 1, 1918, will not acquire Polish nationality without a special authorization from the Polish State.

Within a period of two years after the coming into force of the present Treaty, German nationals over 18 years of age habitually resident in any of the territories recognized as forming part of Poland will be entitled to opt for German nationality.

Polish and German nationals over 18 years of age and habitually resident in Germany will have a similar right to opt for Polish nationality.

Option by a husband will cover his wife and option by parents will cover their children under 18 years of age. Persons who have exercised the above right to opt may within the succeeding twelve months transfer their place of residence to the State for which they have opted.

They will be entitled to retain their immovable property in the territory of the other State where they had their place of residence before exercising the right to opt.

They may carry with them their movable property of every description. No export or import duties or charges may be imposed upon them in connection with the removal of such property.

Within the same period Poles who are German nationals and are in a foreign country will be entitled, in the absence of any provisions to the contrary in the foreign law, and if they have not acquired the foreign nationality, to obtain Polish nationality and to lose their German nationality complying with the requirements laid down by the Polish State.

In the portion of Upper Silesia submitted to a plebiscite the provisions of this Article shall only come into force as from the definitive attribution of the territory.

ARTICLE 92.

The proportion and the nature of the financial liabilities of Germany and Prussia which are to be borne by Poland will be determined in accordance with Article 254 of Part IX (Financial Clauses) of the present Treaty.

There shall be excluded from the share of such financial liabilities assumed by Poland that portion of such liabilities according to which the above-mentioned Article, arises from measures adopted by the German and Prussian Governments with a view to German colonisation in Poland.

In fixing under Article 256 of the present Treaty the value of the property and possessions belonging to the German Empire and to the German States which pass to Poland with the territory transferred above, the Reparation Commission shall exclude from the valuation buildings, forests and other State property which belonged to the Kingdom of Poland; Poland shall acquire these properties free of all costs and charges.

In all the German territory transferred in accordance with the present Treaty and recognized as forming definitively part of Poland, all property, rights and interests of Germany shall not be liquidated under Article 297 by the Polish Government except in accordance with the following provisions:

(1) The proceeds of the liquidation shall be paid direct to the owner;

(2) If on his application the Mixed Arbitral Tribunal provided for by Section VI of Part X (Economic Clauses) of the present Treaty, or an arbitrator appointed by that Tribunal, is satisfied that the conditions of the sale or measures taken by the Polish Government outside its general legislation were unfairly prejudicial to the price obtained, they shall have discretion to award to the owner equitable compensation to be paid by the Polish Government.

Further agreements will regulate all questions arising out of the cession of the above territory which are not regulated by the present Treaty.

ARTICLE 93.

Poland accepts and agrees to embody in a Treaty with the Principal Allied and Associated Powers such provisions as may be deemed necessary by the said Powers to protect the property, rights and interests of Poland who differ from the majority of the population in race, language or religion.

Poland further accepts and agrees to embody in a Treaty with the said Powers such provisions as they may deem necessary to protect the freedom of transit and equitable treatment of the commerce of other nations.

SECTION IX.
EAST PRUSSIA.

ARTICLE 94.

In the area between the southern frontier of East Prussia, as described in Article 93 of Part II (Boundaries of Germany) of the present Treaty, and the line described below, the inhabitants will be called upon to indicate by a vote the State to which they wish to belong:

The western and northern boundary of *Regierungsbezirk Allenstein* to its junction with the boundary between the Kreise of Oletzko and Angerburg; thence, the northern boundary of the Kreis of Oletzko to its junction with the old frontier of East Prussia.

ARTICLE 95.

The German troops and authorities will be withdrawn from the area defined above within a period not exceeding fifteen days after the coming into force of the present Treaty. Until the evacuation is completed they will abstain from all requisitions in money or in kind and from all measures injurious to the economic interests of the area.

On the expiration of the above-mentioned period the said area will be placed under the authority of an International Commission of five members appointed by the Principal Allied and Associated Powers. This Commission will have general powers of administration and, in particular, will be charged with the duty of arranging for the vote and of taking such measures as may be deemed necessary to ensure free freedom, fairness and secrecy. The Commission will have all necessary authority to decide any questions to which the execution of these provisions may give rise. The Commission will make such arrangements as may be necessary to assist in the exercise of its functions by officials chosen by itself from the local population. Its decisions will be taken by a majority. Every person, irrespective of sex, will be entitled to vote who:

(a) Is 20 years of age at the date of the coming into force of the present Treaty, and

(b) Was born within the area where the vote will take place or has been habitually resident there from a date to be fixed by the Commission.

Every person will vote in the commune where he is habitually resident or, if not habitually resident in the area, in the commune where he was born.

The result of the vote will be determined by communes (*Gemeinde*) according to the majority of the votes in each commune.

On the conclusion of the voting the number of votes cast in each commune will be communicated by the Commission to the Principal Allied and Associated Powers, with a full report as to the taking of the vote and a recommendation as to the line which ought to be adopted as the boundary of East Prussia in this region. In this recommendation regard will be paid to the wishes of the inhabitants as shown by the vote and to the geographical and economic conditions of the locality. The Principal Allied and Associated Powers will then fix the frontier between East Prussia and Poland in this region.

If the line fixed by the Principal Allied and Associated Powers is such as to exclude from East Prussia any part of the territory defined in Article 94, the renunciation of its rights by Germany in favour of Poland, as provided in Article 57 above, will extend to the territories so excluded.

As soon as the line has been fixed by the Principal Allied and Associated Powers, the authorities administering East Prussia will be notified by the International Commission that they are free to take over the administration of the territory to the north of the line so fixed, which they shall proceed to do within one month of such notification and in the manner prescribed by the Commission. At the same period, as prescribed by the Commission, the Polish Government must proceed to take over the administration of the territory to the south of the line. When the administration of the territory by the East Prussian and Polish authorities respectively has been provided for, the powers of the Commission terminate.

Expenditure by the Commission, whether in the discharge of its own functions or in the administration of the territory, will be borne by the local revenues. East Prussia will be required to bear such portion of any deficit as may be fixed by the Principal Allied and Associated Powers.

ARTICLE 96.

In the area comprising the *Kreis* of Stuhm and Rosenberg and the portion of the *Kreis* of Marienburg which is situated east of the Nogat and that of Marienwerder east of the Vistula, the inhabitants will be called upon to indicate by a vote, to be taken in each commune (*Gemeinde*), whether they desire the various communes situated in this territory to belong to Poland or to East Prussia.

ARTICLE 97.

The German troops and authorities will be withdrawn from the area defined in Article 96 within a period not extending fifteen days after the coming into force of the present Treaty. Until the evacuation is completed they will abstain from all requisitions in money or in kind and from all measures injurious to the economic interests of the country.

On the expiration of the above-mentioned period, the said area will be placed under the authority of an International Commission of five members appointed by the Principal Allied and Associated Powers. This Commission, supported if occasion arises by the necessary forces, will have general powers of administration and in particular will be charged with the duty of arranging for the vote and of taking such measures as it may deem necessary to ensure free freedom, fairness and secrecy. The Commission will make such arrangements as may be necessary to assist in the exercise of its functions by officials chosen by itself from the local population. Its decisions will be taken by a majority.

Expenditure by the Commission, whether in the discharge of its own functions or in the administration of the territory, will be borne by the local revenues.

On the conclusion of the voting the number of votes cast in each commune will be communicated by the Commission to the Principal Allied and Associated Powers with a full report as to the taking of the vote and a recommendation as to the line which ought to be adopted as the boundary of East Prussia in this region. In this recommendation regard will be paid to the wishes of the inhabitants as shown by the vote and to the geographical and economic conditions of the locality. The Principal Allied and Associated Powers will then fix the frontier between East Prussia and

Poland in this region, leaving in any case to Poland for the whole of the section bordering on the Vistula full and complete control of the river including the east bank as far east of the river as may be necessary for its regulation and improvement. Germany agrees that in any portion of the said territory which remains German, no fortifications shall be erected at any time.

The Principal Allied and Associated Powers will at the same time draw up regulations for assuring to the population of East Prussia to the fullest extent and under equitable conditions access to the Vistula and the use of it for themselves, their commerce and their boats.

The determination of the frontier and the foregoing regulations shall be binding upon all the parties concerned.

When the administration of the territory has been taken over by the East Prussian and Polish authorities respectively, the powers of the Commission will terminate.

ARTICLE 98.

Germany and Poland undertake, within one year of the coming into force of this Treaty, to enter into conventions of which the terms, in case of difference, shall be settled by the Council of the League of Nations, with the object of securing, on the one hand to Germany full and adequate railroad, telegraph and telephonic facilities for communication between the rest of Germany and East Prussia over the intervening Polish territory, and on the other hand to Poland full and adequate railroad, telegraphic and telephonic facilities for communication between Poland and the Free City of Danzig over any German territory that may, on the right bank of the Vistula, intervene between Poland and the Free City of Danzig.

SECTION X.

MEMEL.

ARTICLE 99.

Germany renounces in favour of the Principal Allied and Associated Powers all rights and title over the territories included between the Baltic, the north eastern frontier of East Prussia as defined in Article 28 of Part II (Boundaries of Germany) of the present Treaty and the former frontier between Germany and Russia.

Germany undertakes to accept the settlement made by the Principal Allied and Associated Powers in regard to these territories, particularly in so far as concerns the nationality of the inhabitants.

SECTION XI.

FREE CITY OF DANZIG.

ARTICLE 100.

Germany renounces in favour of the Principal Allied and Associated Powers all rights and title over the territory comprised within the following limits: from the Baltic Sea southwards to the point where the principal channels of navigation of the Nogat and the Vistula (Welchsel) meet;

the boundary of East Prussia as described in Article 28 of Part II (Boundaries of Germany) of the present Treaty;

thence to the principal channel of navigation of the Vistula down-stream to a point about 6½ kilometres north of the bridge of Dirschau;

thence north-west to point 5, 1½ kilometres south-east of the church of Gütlland;

a line to be fixed on the ground;

thence in a general westerly direction to the salient made by the boundary of the *Kreis* of Berent 8½ kilometres north-east of Schöneck;

a line to be fixed on the ground passing between Mühlbanz on the south and Rambeltsch on the north;

thence the boundary of the *Kreis* of Berent westwards to the restaurant which it forms 6 kilometres north-north-west of Schöneck;

thence to a point on the median line of Lonkener See;

a line to be fixed on the ground passing north of Neu Fletz and Scharptal and south of Barenhütte and Louken;

thence the median line of Lonkener See to its northernmost point;

thence to the southern end of Pollenziner See;

a line to be fixed on the ground;

thence the median line of Pollenziner See to its northernmost point;

thence in a north-easterly direction to a point about 1 kilometre south of Kollebach church, where the Danzig-Neustadt railway crosses a stream;

a line to be fixed on the ground passing south-east of Kamplin, Krissau, Pölin, Sulmin (Richtof), Mattern, Schiferei, and to the north-west of Nenendorf, Marschall, Czapleken, Hoch- and Klein-Kelpin, Pulvermühl, Renneberg and the towns of Oliva and Zoppot;

thence the course of the stream mentioned above to the Baltic Sea.

The boundaries described above are drawn on a German map scale 1/100,000, attached to the present Treaty (Map No. 3).

ARTICLE 101.

A Commission composed of three members appointed by the Principal Allied and Associated Powers, including a High Commissioner as President, one member appointed by Germany and one member appointed by Poland, shall be constituted within fifteen days of the coming into force of the present Treaty for the purpose of delimiting on the spot the boundary of the territory described above, taking into account as far as possible the existing communal boundaries.

ARTICLE 102.

The Principal Allied and Associated Powers undertake to establish the town of Danzig together with the rest of the territory described in Article 100, as a Free City. It will be placed under the protection of the League of Nations.

ARTICLE 103.

A constitution for the Free City of Danzig shall be drawn up by the duly appointed representatives of the Free City in agreement with a High Commissioner to be appointed by the League of Nations. This constitution shall be placed under the guarantee of the League of Nations.

The High Commissioner will also be entrusted with the duty of dealing in the first instance with all differences arising between Poland and the Free City of Danzig in regard to this Treaty or any arrangements or agreements made thereunder.

The High Commissioner shall reside at Danzig.

ARTICLE 104.

The Principal Allied and Associated Powers undertake to negotiate a Treaty between the Polish Government and the Free City of Danzig, which shall come into force at the same time as the establishment of the said Free City, with the following objects:

To effect the inclusion of the Free City of Danzig within the Polish Customs frontiers, and to establish a free area in the port;

(2) To ensure to Poland without any restriction the free use and service of all waterways, docks, basins, wharves and other works within the territory of the Free City necessary for Polish imports and exports;

(3) To ensure to Poland the control and administration of the Vistula and of the whole railway system within the Free City, except such streets and other railways as serve primarily the needs of the Free City, and of postal, telegraphic and telephonic communication between Poland and the port of Danzig;

(4) To ensure to Poland the right to develop and improve the waterways, docks, basins, wharves, railways and other works and means of communication mentioned in this Article, as well as to lease or purchase through appropriate processes such land and other property as may be necessary for these purposes;

(5) To provide against any discrimination within the Free City of Danzig to the detriment of citizens of Poland and other persons of Polish origin or speech;

(6) To provide that the Polish Government shall undertake the conduct of the foreign relations of the Free City of Danzig as well as the diplomatic protection of citizens of that city when abroad.

ARTICLE 105.

On the coming into force of the present Treaty German nationals ordinarily resident in the territory described in Article 100 will *ipso facto* lose their German nationality in order to become nationals of the Free City of Danzig.

ARTICLE 106.

Within a period of two years from the coming into force of the present Treaty, German nationals over 18 years of age ordinarily resident in the territory described in Article 100 will have the right to opt for German nationality.

Option by a husband will cover his wife and option by parents will cover their children under 18 years of age. Any persons who exercise the right of option referred to above must during the ensuing twelve months transfer their place of residence to Germany.

These persons will be entitled to preserve the immovable property possessed by them in the territory of the Free City of Danzig. They may carry with them their movable property of every description. No export or import duties shall be imposed upon them in this connection.

ARTICLE 107.

All property situated within the territory of the Free City of Danzig belonging to the German Empire or to any German State shall pass to the Principal Allied and Associated Powers for transfer to the Free City of Danzig or to the Polish State as they may consider equitable.

ARTICLE 108.

The proportion and nature of the financial liabilities of Germany and of Prussia to be borne by the Free City of Danzig shall be fixed in accordance with Article 254 of Part IX (Financial Clauses) of the present Treaty.

All other questions which may arise from the cession of the territory referred to in Article 100 shall be settled by further agreements.

SECTION XII.

SCHLESWIG.

ARTICLE 109.

The frontier between Germany and Denmark shall be fixed in conformity with the wishes of the population.

For this purpose, the population inhabiting the territories of the former German Empire situated to the north of a line, from East to West, (shown by a brown line on the map No. 4, annexed to the present Treaty)

leaving the Baltic Sea about 13 kilometres east-north-east of Flensburg,

running south-west so as to pass south-east of Szym, Ringsberg, Munkbrøst, Adelby, Tastrup, Jarlsborg, Oversee, and north-west of: Langhölz, Lugholm, Rönstrup, Rüllschau, Westby, Wschy, Kleinwolstrup, Gross-Solt.

thence westwards passing south of Frörup and north of Waderup,

thence in a south-westerly direction passing south-east of Oxlund, Stedglund and Østenaar and north-west of the villages on the Waderup-Kollund road.

thence in a north-westerly direction passing south-west of Låwenstedt, Jødelund, Gødelund, and north-east of Koikerheide and Høgel to the bend of the Søholmer Åa, about 1 kilometre east of Søholm, where it meets the southern boundary of the Kreis of Tønder,

following this boundary to the North Sea, thence in a south-easterly direction to the islands of Fohr and Amrum and north of the islands of Oland and Langeness, it shall be called upon to pronounce by a vote which will be taken under the following conditions:

(1) Within a period not exceeding ten days from the coming into force of the present Treaty, the German troops and authorities (including the *Oberpräsidenten, Regierungspräsidenten, Landräthe, Amtsvoersteher, Oberbürgermeister*) shall evacuate the zone lying to the north of the line above fixed.

Within the same period the Workmen's and Soldiers' Councils which have been constituted in this zone shall be dissolved; members of such Councils who are natives of another region and are exercising their functions at the date of the coming into force of the present Treaty, or who have gone out of office since March 1, 1919, shall also be evacuated.

The said zone shall immediately be placed under the authority of an International Commission, composed of five members, of whom three will be designated by the Principal Allied and Associated Powers, the Norwegian and Swedish Governments will each be requested to designate a member; in the event of their failing to do so, these two members will be chosen by the Principal Allied and Associated Powers.

The Commission, assisted in case of need by the necessary local officials, shall exercise general powers of administration. In particular, it shall at once provide for filling the places of the evacuated German authorities, and if necessary shall itself give orders for their evacuation, and proceed to fill the places of such local authorities as may be required. It shall take all steps which it thinks proper to ensure the freedom, fairness, and secrecy of the vote. It shall be assisted by German and Danish technical advisers chosen by it from among the local population. Its decisions will be taken by a majority.

General expenses of the Commission and of the expenditure occasioned by the plebiscite shall be paid by Germany.

(2) The right to vote shall be given to all persons, without distinction of sex, who:

(a) Have completed their twentieth year at the date of the coming into force of the present Treaty; and

(b) Were born in the zone in which the plebiscite is taken, or have been domiciled there since a date before January 1, 1900, or had been expelled by the German authorities without having retained their domicile there; every person will vote in the commune (*Gemeinde*) where he is domiciled or of which he is a native.

Military persons, officers, non-commissioned officers and soldiers of the German army, who are natives of the zone of Schleswig in which the plebiscite is taken, shall be given the opportunity to return to their native place in order to take part in the voting there.

(3) In the section of the evacuated zone lying to the north of a line, from East to West (shown by a red line on map No. 4 which is annexed to the present Treaty):

passing south of the island of Aisen and following the median line of Flensburg Fjord,

leaving the fjord about 6 kilometres north of Flensburg and following the course of the stream flowing past Kupferhede upstream to a point north of Niehus,

passing north of Pattburg and Ellund and south of Frøsløe to meet the eastern boundary of the Kreis of Tønder at its junction with the boundary between the old jurisdictions of Slogs and Kjaer (*Slogs Herred and Kjaer Herred*),

thence, in a west-north-westerly direction to meet the Scheidebek, following the course of the Scheidebek (Alte Au), Süder Au and Wied Au downstream successively to the point where the latter bends northwards about 1,500 metres west of Rattelbüll,

thence, in a west-north-westerly direction to meet the North Sea north of Slietoff,

thence, passing north of the island of Silt,

the vote above provided for shall be taken within a period not exceeding three weeks after the evacuation of the country by the German troops and authorities.

The result will be determined by the majority of votes cast in the whole of this section. This result will be immediately communicated by the Commission to the Principal Allied and Associated Powers and proclaimed.

If the vote results in favour of the reincorporation of this territory in the Kingdom of Denmark, the Danish Government in agreement with the Commission will be entitled to effect its occupation with their military and administrative authorities immediately after the proclamation.

(4) In the section of the evacuated zone situated to the south of the preceding section and to the north of the line which starts from the Baltic Sea 13 kilometres from Flensburg and ends in the north of the islands of Oland and Langeness,

the vote will be taken within a period not exceeding five weeks after the plebiscite shall have been held in the first section.

The result will be determined by communes (*Gemeinden*), in accordance with the majority of the votes cast in each commune (*Gemeinde*).

ARTICLE 110.

Pending a delimitation on the spot, a frontier line will be fixed by the Principal Allied and Associated Powers according to a line based on the result of the voting, and proposed by the International Commission, and taking into account the particular geographical and economic conditions of the localities in question.

From that time the Danish Government may effect the occupation of these territories with the Danish civil and military authorities, and the German Government may re-assign up to the said frontier line the German civil and military authorities whom it has evacuated.

Germany hereby renounces definitely in favour of the Principal Allied and Associated Powers all rights of sovereignty over the territories situated to the north of the frontier line fixed in accordance with the above provisions. The Principal Allied and Associated Powers will hand over the said territories to Denmark.

ARTICLE 111.

A Commission composed of seven members, five of whom shall be nominated by the Principal Allied and Associated Powers, one by Denmark, and one by Germany, shall be constituted within fifteen days from the date when the final result of the vote is known, to trace the frontier line on the spot.

The decisions of the Commission will be taken by a majority of votes and shall be binding on the parties concerned.

ARTICLE 112.

All the inhabitants of the territory which is returned to Denmark will acquire the Danish nationality *ipso facto*, and will lose their German nationality.

Persons, however, who had become habitually resident in this territory after October 1, 1918, will not be able to acquire Danish nationality without permission from the Danish Government.

ARTICLE 113.

Within two years from the date on which the sovereignty over the whole or part of the territory of Schleswig was subjected to the plebiscite is restored to Denmark:

Any person over 18 years of age, born in the territory restored to Denmark, not habitually resident in this region, and possessing German nationality, will be entitled to opt for Denmark;

Any person over 18 years of age habitually resident in the territory restored to Denmark will be entitled to opt for Germany.

Option by a husband will cover his wife and option by parents will cover their children less than 18 years of age.

Persons who have exercised the above right to opt must within the ensuing twelve months transfer their place of residence to the State in favour of which they have opted.

They will be entitled to retain the immovable property which they own in the territory of the other State in which they were habitually resident before opting. They may carry with them their movable property of every description. No export or import duties may be imposed upon them in connection with the removal of such property.

ARTICLE 114.

The proportion and nature of the financial or other obligations of Germany and Prussia which are to be assumed by Denmark will be fixed in accordance with Article 254 of Part IX (Financial Clauses) of the present Treaty.

Further stipulations will determine any other questions arising out of the transfer to Denmark of the whole or part of the territory of which she was deprived by the Treaty of October 30, 1864.

SECTION XIII.

HELIGOLAND.

ARTICLE 115.

The fortifications, military establishments, and harbours of the Islands of Heligoland and Dune shall be destroyed under the supervision of the Principal Allied Governments by German labour and at the expense of Germany within a period to be determined by the said Governments.

The term "harbours" shall include the north-east mole, the west wall, the outer and inner breakwaters and reclaimed land within them, and all naval and military works, fortifications and buildings, constructed or under construction between lines connecting the following positions taken from the British Admiralty chart No. 126 of April 19, 1918:

- (a) lat. 54° 10' 49" N.; long. 7° 53' 39" E.;
- (b) — 54° 10' 35" N.; — 7° 54' 18" E.;
- (c) — 54° 10' 14" N.; — 7° 54' 00" E.;
- (d) — 54° 10' 17" N.; — 7° 53' 37" E.;
- (e) — 54° 10' 44" N.; — 7° 53' 26" E.;

These fortifications, military establishments and harbours shall not be reconstructed nor shall any similar works be constructed in future.

SECTION XIV.

RUSSIA AND RUSSIAN STATES.

ARTICLE 116.

Germany acknowledges and agrees to respect as permanent and inalienable the independence of all the territories which were part of the former Russian Empire on August 1, 1914, in accordance with the provisions of Article 259 of Part IX (Financial Clauses) and Article 292 of Part X (Economic

Clauses) Germany accepts definitely the abrogation of the Brest-Litovsk Treaties and of all other treaties, conventions and agreements entered into by her with the Maximalist Government in Russia.

The Allied and Associated Powers formally reserve the rights of Russia to obtain from Germany restitution and reparation based on the principles of the present Treaty.

ARTICLE 117.

Germany undertakes to recognize the full force of all treaties or agreements which may be entered into by the Allied and Associated Powers with States now existing or coming into existence in future in the whole or part of the former Empire of Russia as it existed on August 1, 1914, and to recognize the frontiers of any such States as determined therein.

PART IV.

GERMAN RIGHTS AND INTERESTS OUTSIDE GERMANY.

ARTICLE 118.

In territory outside her European frontiers as fixed by the present Treaty, Germany renounces all rights, titles and privileges whatever in or over territory which belonged to her or to her allies, and all rights, titles and privileges whatever their origin which she held as against the Allied and Associated Powers.

Germany hereby undertakes to recognize and to conform to the measures which may be taken now or in the future by the Principal Allied and Associated Powers, in agreement where necessary with third Powers, in order to carry the above stipulation into effect.

In particular Germany declares her acceptance of the following Articles relating to certain special subjects.

SECTION I.

GERMAN COLONIES.

ARTICLE 119.

Germany renounces in favour of the Principal Allied and Associated Powers all her rights and titles over her overseas possessions.

ARTICLE 120.

All movable and immovable property in such territories belonging to the German Empire or to any German State shall pass to the Government exercising authority over such territories, on the terms laid down in Article 257 of Part IX (Financial Clauses) of the present Treaty. The decision of the local courts in any dispute as to the nature of such property shall be final.

ARTICLE 121.

The provisions of Sections I and IV of Part X (Economic Clauses) of the present Treaty shall apply in the case of these territories whatever be the form of Government adopted for them.

ARTICLE 122.

The Government exercising authority over such territories may make such provisions as it thinks fit with reference to the repatriation from them of German nationals and to the conditions upon which German subjects of European origin shall, or shall not, be allowed to reside, hold property, trade or exercise a profession in them.

ARTICLE 123.

The provisions of Article 260 of Part IX (Financial Clauses) of the present Treaty shall apply in the case of all agreements concluded with German nationals for the construction or exploitation of public works in the German overseas possessions, as well as any sub-concessions or contracts resulting therefrom which may have been made to or with such nationals.

ARTICLE 124.

Germany hereby undertakes to pay, in accordance with the estimate to be presented by the French Government and approved by the Reparation Commission, reparation for damage suffered by French nationals in the Cameroons or the frontier zone by reason of the action of the German civil and military authorities and of German private individuals during the period from January 1, 1900, to August 1, 1914.

ARTICLE 125.

Germany renounces all rights under the Conventions and Agreements with France of November 4, 1911, and September 28, 1912, relating to Equatorial Africa. She undertakes to pay to the French Government, in accordance with the estimate to be presented by that Government and approved by the Reparation Commission, all the deposits, credits, advances, etc., effected by virtue of these instruments in favour of Germany.

ARTICLE 126.

Germany undertakes to accept and observe the agreements made or to be made by the Allied and Associated Powers or some of them with any other Power with regard to the trade in arms and spirits, and to the matters dealt with in the General Act of Berlin of February 26, 1885, the General Act of Brussels of July 2, 1890, and the conventions completing or modifying the same.

ARTICLE 127.

The native inhabitants of the former German overseas possessions shall be entitled to the diplomatic protection of the Governments exercising authority over those territories.

Premier Lloyd George of Great Britain

President Wilson of the United States

SECTION II.

CHINA.

ARTICLE 128.

Germany renounces in favour of China all benefits and privileges resulting from the provisions of the final Protocol signed at Peking on September 7, 1901, and from all annexes, notes and documents supplementary thereto. She likewise renounces in favour of China any claim to indemnities accruing thereunder subsequent to March 14, 1917.

ARTICLE 129.

From the coming into force of the present Treaty the High Contracting Parties shall apply, in so far as concerns them respectively:

(1) The Arrangement of August 29, 1902, regarding the new Chinese customs tariff;

(2) The Arrangement of September 27, 1905, regarding Wang-Poo, and the provisional supplementary Arrangement of April 4, 1912.

China, however, will no longer be bound to grant to Germany the advantages or privileges which she allowed Germany under these Arrangements.

ARTICLE 130.

Subject to the provisions of Section VIII of this Part, Germany cedes to China all the buildings, wharves and ports, barracks, forts, arms and munitions of war, vessels of all kinds, wireless telegraphy installations and other public property belonging to the German Government, which are situated or may be in the German Concessions at Tientsin and Hankow or elsewhere in Chinese territory.

It is understood, however, that premises used as diplomatic or consular residences or offices are not included in the above cession, and furthermore, that no steps shall be taken by the Chinese Government to dispose of the German public and private property situated within the so-called Legation Quarter at Peking without the consent of the Diplomatic Representatives of the Powers which, on the coming into force of the present Treaty, remain Parties to the Final Protocol of September 7, 1901.

ARTICLE 131.

Germany undertakes to restore to China within twelve months from the coming into force of the present Treaty all the astronomical instruments which her troops in 1900-1901 carried away from China, and to defray all expenses which may be incurred in effecting such restoration, including the expenses of dismounting, packing, transporting, insurance and installation in Peking.

ARTICLE 132.

Germany agrees to the abrogation of the leases from the Chinese Government and to the German concessions at Hankow and Tientsin are now held.

China restored to the full exercise of her sovereign rights in the above areas, declares her intention of opening them to international residence and trade. She further declares that the abrogation of the leases under which these concessions are now held shall not affect the property rights of nationals of Allied and Associated Powers who are holders of lots in these concessions.

ARTICLE 133.

Germany waives all claims against the Chinese Government or against any Allied or Associated Government arising out of the internment of German nationals in China and their repatriation. She equally renounces all claims arising out of the capture and condemnation of German ships in China, on the liquidation, sequestration or control of German properties, rights and interests in that country since August 14, 1917. This provision, however, shall not affect the rights of the parties interested in the proceeds of any such liquidation, which shall be governed by the provisions of Part X (Economic Clauses) of the present Treaty.

ARTICLE 134.

Germany renounces in favour of the Government of His Britannic Majesty the German State property in the British Concession at Shameen at Canton. She renounces in favour of the French and Chinese Governments conjointly the property of the German school situated in the French Concession at Shanghai.

SECTION III.

SIAM.

ARTICLE 135.

Germany recognizes that all treaties, conventions and agreements between her and Siam, and all rights, title and privileges derived therefrom, including all rights of extra-territorial jurisdiction, terminated as from July 22, 1917.

ARTICLE 136.

All goods and property in Siam belonging to the German Empire or to any German State, with the exception of premises used as diplomatic or consular residences or offices, Government.

The goods, property and private rights of German nationals in Siam shall be dealt with in accordance with the provisions of Part X (Economic Clauses) of the present Treaty.

ARTICLE 137.

Germany waives all claims against the Siamese Government on behalf of herself or her nationals arising out of

the seizure or condemnation of German ships, the liquidation of German property, or the internment of German nationals in Siam. This provision shall not affect the rights of the parties interested in the proceeds of any such liquidation, which shall be governed by the provisions of Part X (Economic Clauses) of the present Treaty.

SECTION IV.

LIBERIA.

ARTICLE 138.

Germany renounces all rights and privileges arising from the arrangements of 1911 and 1912 regarding Liberia, and particularly the right to nominate a German Receiver of Customs in Liberia.

She further renounces all claim to participate in any measures whatsoever which may be adopted for the rehabilitation of Liberia.

ARTICLE 139.

Germany recognizes that all treaties and arrangements between her and Liberia terminated as from August 4, 1917.

ARTICLE 140.

The property, rights and interests of Germans in Liberia shall be dealt with in accordance with Part X (Economic Clauses) of the present Treaty.

SECTION V.

MOROCCO.

ARTICLE 141.

Germany renounces all rights, titles and privileges conferred on her by the General Act of Algiers of April 7, 1906, and by the Franco-German Agreements of February 9, 1909, and November 4, 1911. All treaties, agreements, arrangements and contracts concluded by her with the Sherifian Empire are regarded as abrogated as from August 3, 1914.

In no case can Germany take advantage of these instruments and she undertakes not to intervene in any way in negotiations relating to Morocco which may take place between France and the other Powers.

ARTICLE 142.

Germany having recognized the French Protectorate in Morocco, hereby accepts all the consequences of its establishment, and she renounces the régime of the capitulations therein.

This renunciation shall take effect as from August 3, 1914.

ARTICLE 143.

The Sherifian Government shall have complete liberty of action in regulating the status of German nationals in Morocco and the conditions in which they may establish themselves there.

German protected persons, *semaars* and "associés agricoles" shall be considered as having ceased, as from August 3, 1914, to enjoy the privileges attached to their status and shall be subject to the ordinary law.

ARTICLE 144.

All property and possessions in the Sherifian Empire of the German Empire and the German States pass to the Maghzen without payment.

For this purpose, the property and possessions of the German Empire and States shall be deemed to include all the property of the Crown, the Empire or the States, and the private property of the former German Emperor and other Royal personages.

All movable and immovable property in the Sherifian Empire belonging to German nationals shall be dealt with in accordance with Sections III and IV of Part X (Economic Clauses) of the present Treaty.

Mining rights which have been recognized as belonging to German nationals by the Court of Arbitration set up under the Moroccan Mining Regulations shall form the subject of a valuation, which the arbitrators shall be requested to make, and these rights shall then be treated in the same way as property in Morocco belonging to German nationals.

ARTICLE 145.

The German Government shall ensure the transfer to a person nominated by the French Government of the shares representing Germany's portion of the capital of the State Bank of Morocco. The value of these shares, as assessed by the Reparation Commission, shall be paid to the Reparation Commission for the credit of Germany on account of the sums due for reparation. The German Government shall be responsible for indemnifying its nationals so dispossessed.

This transfer will take place without prejudice to the repayment of debts which German nationals may have contracted towards the State Bank of Morocco.

ARTICLE 146.

Moroccan goods entering Germany shall enjoy the treatment accorded to French goods.

SECTION VI.

EGYPT.

ARTICLE 147.

Germany declares that she recognizes the Protectorate proclaimed over Egypt by Great Britain on December 18, 1914, and that she renounces the régime of the Capitulations in Egypt.

This renunciation shall take effect as from August 4, 1914.

ARTICLE 148.

All treaties, agreements, arrangements and contracts concluded by Germany with Egypt are regarded as abrogated as from August 4, 1914.

In no case can Germany avail herself of these instruments and she undertakes not to intervene in any way in negotiations relating to Egypt which may take place between Great Britain and the other Powers.

ARTICLE 149.

Until an Egyptian law of judicial organization establishing courts with universal jurisdiction comes into force, provision shall be made, by means of decrees issued by His Highness the Sultan, for the exercise of jurisdiction over German nationals and property by the British Consular Tribunals.

ARTICLE 150.

The Egyptian Government shall have complete liberty of action in regulating the status of German nationals and the conditions under which they may establish themselves in Egypt.

ARTICLE 151.

Germany consents to the abrogation of the decree issued by His Highness the Khedive on November 28, 1904, relating to the Commission of the Egyptian Public Debt, or to such changes as the Egyptian Government may think it desirable to make therein.

ARTICLE 152.

Germany consents, in so far as she is concerned, to the transfer to His Britannic Majesty's Government of the powers conferred on His Egyptian Majesty the Sultan by the Convention signed at Constantinople on October 29, 1888, relating to the free navigation of the Suez Canal.

She renounces all participation in the Sanitary, Maritime, and Quarantine Board of Egypt and consents, in so far as she is concerned, to the transfer to the Egyptian Authorities of the powers of that Board.

ARTICLE 153.

All property and possessions in Egypt of the German Empire and the German States pass to the Egyptian Government without payment.

For this purpose, the property and possessions of the German Empire and States shall be deemed to include all the property of the Crown, the Empire or the States, and the private property of the former German Emperor and other Royal personages.

All movable and immovable property in Egypt belonging to German nationals shall be dealt with in accordance with Sections III and IV of Part X (Economic Clauses) of the present Treaty.

ARTICLE 154.

Egyptian goods entering Germany shall enjoy the treatment accorded to British goods.

SECTION VII.

TURKEY AND BULGARIA.

ARTICLE 155.

Germany undertakes to recognise and accept all arrangements which the Allied and Associated Powers may make with Turkey and Bulgaria with reference to any rights, interests and privileges whatever which might be claimed by Germany or her nationals in Turkey and Bulgaria and which are not dealt with in the provisions of the present Treaty.

SECTION VIII.

SHANTUNG.

ARTICLE 156.

Germany renounces, in favour of Japan, all her rights, title and privileges—particularly those concerning the territory of Kiaochow, railways, mines and submarine cables—which she acquired in virtue of the Treaty concluded by her with China on March 6, 1898, and all other arrangements relative to the Province of Shantung.

All German rights in the Tsingtau-Tsuanfu Railway, including its branch lines, together with its subsidiary property of all kinds, stations, shops, fixed and rolling stock, mines, plant and material for the exploitation of the mines, are and remain acquired by Japan, together with all rights and privileges attaching thereto.

The German State submarine cables from Tsingtau to Shanghai and from Tsingtau to Chefoo, with all the rights, privileges and properties attaching thereto, are similarly acquired by Japan, free and clear of all charges and encumbrances.

ARTICLE 157.

The movable and immovable property owned by the German State in the territory of Kiaochow, as well as all the rights which Germany might claim in consequence of the works of improvements made or the expenses incurred by her, directly or indirectly, in connection with this territory, are and remain acquired by Japan, free and clear of all charges and encumbrances.

ARTICLE 158.

Germany shall hand over to Japan within three months from the coming into force of the present Treaty the archives, registers, plans, title-deeds and documents of every kind, wherever they may be, relating to the administration, whether civil, military, financial, judicial or other, of the territory of Kiaochow.

Within the same period Germany shall give particulars to Japan of all treaties, arrangements or agreements relating to the rights, title or privileges referred to in the two preceding Articles.

PART V.

MILITARY, NAVAL AND AIR CLAUSES.

In order to render possible the initiation of a general limitation of the armaments of all nations, Germany undertakes strictly to observe the military, naval and air clauses which follow.

SECTION I.

MILITARY CLAUSES.

CHAPTER I.

EFFECTIVES AND CADRES OF THE GERMAN ARMY.

ARTICLE 159.

The German military forces shall be demobilized and reduced as prescribed hereinafter.

ARTICLE 160.

(1) By a date which must not be later than March 31, 1920, the German Army must not comprise more than seven divisions of infantry and three divisions of cavalry.

After that date the total number of effectives in the Army of the States constituting Germany must not exceed one hundred thousand men, including officers and establishments of depots. The Army shall be devoted exclusively to the maintenance of order within the territory and to the control of the frontiers.

The total effective strength of officers, including the personnel of staffs, whatever their composition, must not exceed four thousand.

(2) Divisions and Army Corps headquarters staffs shall be organized in accordance with Table No. I annexed to this Section.

The number and strengths of the units of infantry, artillery, engineers, technical services and troops laid down in the aforesaid Table constitute maxima which must not be exceeded.

The following units may each have their own depot:

- An Infantry regiment;
- A Cavalry regiment;
- A regiment of Field Artillery;
- A battalion of Pioneers.

(3) The divisions must not be grouped under more than two army corps headquarters staffs.

The maintenance or formation of forces differently grouped or the other organizations forming the command of troops or for preparation for war is forbidden.

The Great German General Staff and all similar organizations shall be dissolved and may not be reconstituted in any form.

The officers, or persons in the position of officers, in the Ministries of War in the different States in Germany and in the Administrations attached to them, must not exceed three hundred in number and are included in the maximum strength of four thousand laid down in the third sub-paragraph of paragraph (1) of this Article.

ARTICLE 161.

Army administrative services consisting of civilian personnel not included in the number of effectives prescribed by the present Treaty will have such personnel reduced in each class to one-tenth of that laid down in the Budget of 1913.

ARTICLE 162.

The number of employees or officials of the German States, such as customs officers, forest guards and coastguards, shall not exceed that of the employees or officials functioning in these capacities in 1913.

The number of gendarmes and employees or officials of the local or municipal police may only be increased to an extent corresponding to the increase of population since 1913 in the districts or municipalities in which they are employed.

These employees and officials may not be assembled for military training.

ARTICLE 163.

The reduction of the strength of the German military forces as provided for in Article 160 may be effected gradually in the following manner:

Within three months from the coming into force of the present Treaty the total number of effectives must be reduced to 200,000 and the number of units must not exceed twice the number of those laid down in Article 160.

At the expiration of this period, and at the end of each subsequent period of three months, a Conference of military experts of the Principal Allied and Associated Powers will fix the reductions to be made in the ensuing three months, so that by March 31, 1920, at the latest the total number of German effectives does not exceed the maximum number of 100,000 men laid down in Article 160. In these successive reductions the same ratio between the number of officers and of men, and between the various kinds of units, shall be maintained as is laid down in that Article.

CHAPTER II.

ARMAMENT, MUNITIONS AND MATERIAL.

ARTICLE 164.

Up till the time at which Germany is admitted as a member of the League of Nations the German Army must not possess an armament greater than the amounts fixed in Table No. II annexed to this Section, with the exception of

an optical increase not exceeding one-twentyfifth part for small arms and one-fiftieth part for guns, which shall be exclusively used to provide for such eventual replacements as may be necessary.

Germany agrees that after she has become a member of the League of Nations the armaments fixed in the said Table shall remain in force until they are modified by the Council of the League. Furthermore she hereby agrees strictly to observe the decisions of the Council of the League on this subject.

ARTICLE 165.

The maximum number of guns, machine guns, trench-mortars, rifles and the ammunition as equipment of the units which Germany is allowed to maintain during the period between the coming into force of the present Treaty and the date of March 31, 1920, referred to in Article 160, shall bear the same proportion to the amount authorized in Table No. III annexed to this Section as the strength of the German Army as reduced from time to time in accordance with Article 163 bears to the strength permitted under Article 160.

ARTICLE 166.

At the date of March 31, 1920, the stock of munitions which the German Army may have at its disposal shall not exceed the amounts fixed in Table No. III annexed to this Section.

Within the same period the German Government will store these stocks at points to be notified to the Governments of the Principal Allied and Associated Powers. The German Government is forbidden to establish any other stocks, depots or reserves of munitions.

ARTICLE 167.

The number and calibre of the guns constituting at the date of the coming into force of the present Treaty the armament of the fortified works, fortresses, and any land or coast forts which Germany is allowed to retain must be notified immediately by the German Government to the Governments of the Principal Allied and Associated Powers, and will constitute maximum amounts which may not be exceeded.

Within two months from the coming into force of the present Treaty, the maximum stock of ammunition for these guns will be notified to, and maintained at the following uniform rates:—fifteen hundred rounds per piece for those the calibre of which is 10.5 cm. and under; five hundred rounds per piece for those of higher calibre.

ARTICLE 168.

The manufacture of arms, munitions, or any war material, shall only be carried out in factories or works the location of which shall be notified to and approved by the Governments of the Principal Allied and Associated Powers, and the number of which they retain the right to restrict.

Within three months from the coming into force of the present Treaty all other establishments for the manufacture, preparation, storage or design of arms, munitions, or any war material whatever shall be closed down. The same applies to all arsenals except those used as depots for the authorised stocks of munitions. Within the same period the personnel of these arsenals will be dismissed.

ARTICLE 169.

Within two months from the coming into force of the present Treaty German arms, munitions and war material, including anti-aircraft material, existing in Germany in excess of the quantities allowed, must be surrendered to the Governments of the Principal Allied and Associated Powers to be destroyed or rendered useless. This will also apply to any special plant intended for the manufacture of military material, except such as may be recognised as necessary for equipping the authorised strength of the German Army.

The surrender in question will be effected at such points in German territory as may be selected by the said Governments.

Within the same period arms, munitions and war material, including anti-aircraft material, of origin other than German, in whatever state they may be delivered to the said Governments, who will decide as to their disposal.

Arms and munitions which on account of the successive reductions in the strength of the German army become in excess of the amounts authorised by Tables II and III annexed to this Section must be handed over in the manner laid down above within such periods as may be decided by the Conferences referred to in Article 163.

ARTICLE 170.

Importation into Germany of arms, munitions and war material of every kind shall be strictly prohibited.

The same applies to the manufacture for, and export to, foreign countries of arms, munitions and war material of every kind.

ARTICLE 171.

The use of asphyxiating, poisonous or other gases and all analogous liquids, materials or devices being prohibited, their manufacture and importation are strictly forbidden in Germany.

The same applies to materials specially intended for the manufacture, storage and use of the said products or devices.

The manufacture and the importation into Germany of armoured cars, tanks and all similar constructions suitable for use in war are also prohibited.

ARTICLE 172.

Within a period of three months from the coming into force of the present Treaty, the German Government will disclose to the Governments of the Principal Allied and Associated Powers the nature and mode of manufacture of all explosives, toxic substances or other like chemical preparations used by them in the war or prepared by them for the purpose of being so used.

CHAPTER III.

RECRUITING AND MILITARY TRAINING.

ARTICLE 173.

Universal compulsory military service shall be abolished in Germany.

The German Army may only be constituted and recruited by means of voluntary enlistment.

ARTICLE 174.

The period of enlistment for non-commissioned officers and privates must be twelve consecutive years.

The number of men discharged for any reason before the expiration of their term of enlistment must not exceed in any year five per cent. of the total effectives fixed by the second sub-paragraph of paragraph (1) of Article 160 of the present Treaty.

ARTICLE 175.

The officers who are retained in the Army must undertake the obligation to serve in it up to the age of forty-five years.

Officers newly appointed must undertake to serve on the active list for twenty-five consecutive years at least.

Officers who have previously belonged to any formations whatever of the Army, and who are not retained in the units allowed to be maintained, must not take part in any military exercise whether theoretical or practical, and will not be under any military obligations whatever.

The number of officers discharged for any reason before the expiration of their term of service must not exceed in any year five per cent. of the total effectives of officers provided for in the third sub-paragraph (1) of Article 160 of the present Treaty.

ARTICLE 176.

On the expiration of two months from the coming into force of the present Treaty there must only exist in Germany the number of military schools which is absolutely indispensable for the recruitment of the officers of the units allowed. These schools will be exclusively intended for the recruitment of officers of each arm, in the proportion of one school per arm.

The number of students admitted to attend the courses of the said schools will be strictly limited in proportion to the vacancies to be filled in the cadres of officers. The students and the cadres will be reckoned in the effectives fixed by the second and third sub-paragraphs of paragraph (1) of Article 160 of the present Treaty.

Consequently, and during the period fixed above, all military academies or similar institutions in Germany, as well as the different military schools for officers, student officers (*Aspiranten*), cadets, non-commissioned officers or student non-commissioned officers (*Aspiranten*), other than the schools above provided for, will be abolished.

ARTICLE 177.

Educational establishments, the universities, societies of discharged soldiers, shooting or touring clubs and, generally speaking, associations of every description, whatever be the age of their members, must not occupy themselves with any military matters.

In particular they will be forbidden to instruct or exercise the members or to allow them to be instructed or exercised, in the profession or use of arms.

These societies, associations, educational establishments and universities must have no connection with the Ministries of War or any other military authority.

ARTICLE 178.

All measures of mobilization or appertaining to mobilization are forbidden.

In no case must formations, administrative services or General Staffs include supplementary cadres.

ARTICLE 179.

Germany agrees, from the coming into force of the present Treaty, not to accredit nor to send to any foreign country any military, naval or air mission, nor to allow any such mission to leave her territory, and Germany further agrees to take appropriate measures to prevent German nationals from leaving her territory to become enrolled in the Army, Navy or Air service of any foreign Power, or to be attached to such Army, Navy or Air service for the purpose of assisting in the military, naval or air training thereof, or otherwise for the purpose of giving military, naval or air instruction in any foreign country.

The Allied and Associated Powers agree, so far as they are concerned, from the coming into force of the present Treaty not to enroll in nor to attach to their armies or naval or air forces any German national for the purpose of assisting in the military training of such armies or naval or air forces or otherwise to employ any such German national as military, naval or aeronautical instructor.

The present provision does not, however, affect the right of France to recruit for the Foreign Legion in accordance with French military laws and regulations.

CHAPTER IV.
FORTIFICATIONS.
ARTICLE 180.

All fortified works, fortresses and field works situated in German territory to the west of a line drawn fifty kilometres to the east of the Rhine shall be disarmed and dismantled.

Within a period of two months from the coming into force of the present Treaty such of the above fortified works, fortresses and field works as are situated in territory not occupied by Allied and Associated troops shall be disarmed, and within a further period of four months they shall be dismantled. Those which are situated in territory occupied by Allied and Associated troops shall be disarmed

and dismantled within such periods as may be fixed by the Allied High Command.

The construction of any new fortification, whatever its nature and importance, is forbidden in the zone referred to in the first paragraph above.

The system of fortified works of the southern and eastern frontiers of Germany shall be maintained in its existing state.

TABLE NO. I.

STATE AND ESTABLISHMENT OF ARMY CORPS HEADQUARTERS STAFFS AND OF INFANTRY AND CAVALRY DIVISIONS.

These tabular statements do not form a fixed establishment to be imposed on Germany, but the figures contained in them (number of units and strength) represent maximum figures, which should not in any case be exceeded.

I.—ARMY CORPS HEADQUARTERS STAFFS.

Unit.	Maximum No. authorised.	Maximum strengths of each unit.	
		Officers.	N. C. O.'s and Men.
Army Corps Headquarters Staff.....	2	30	150
Total for Headquarters Staffs.....		60	300

II. ESTABLISHMENT OF AN INFANTRY DIVISION.

Unit.	Maximum No. of such units in a single division.	Maximum strengths of each unit.	
		Officers.	N. C. O.'s and men.
Headquarters of an infantry division.....	1	25	70
Headquarters of divisional infantry.....	1	4	30
Headquarters of divisional artillery.....	1	4	30
Regiment of infantry.....	3	70	2,300
(Each regiment comprises 3 battalions of infantry. Each battalion comprises 3 companies of infantry and 1 machine-gun company.)			
Trench mortar company.....	3	6	150
Divisional squadron.....	1	6	150
Field artillery regiment.....	1	85	1,300
(Each regiment comprises 3 groups of artillery. Each group comprises 3 batteries.)			
Pioneer battalion.....	1	12	400
(This battalion comprises 2 companies of pioneers, 1 pontoon detachment, 1 search-light section.)			
Signal detachment.....	1	12	300
(This detachment comprises 1 telephone detachment, 1 listening section, 1 carrier pigeon section.)			
Divisional medical service.....	1	20	400
Parks and convoys.....		14	800
Total for infantry division.....		410	10,830

III. ESTABLISHMENT OF A CAVALRY DIVISION.

Unit.	Maximum No. of such units in a single division.	Maximum strengths of each unit.	
		Officers.	N. C. O.'s and men.
Headquarters of a cavalry division.....	1	15	50
Cavalry regiment.....	6	40	800
(Each regiment comprises 4 squadrons.)			
Horse artillery group (3 batteries).....	1	20	400
Total for cavalry division.....		275	5,250

TABLE NO. II.

TABULAR STATEMENT OF ARMAMENT ESTABLISHMENT FOR A MAXIMUM OF SEVEN INFANTRY DIVISIONS, THREE CAVALRY DIVISIONS, AND TWO ARMY CORPS HEADQUARTERS STAFFS.

Material.	For 7 infantry divisions.		Cavalry division.	For 3 cavalry divisions.	Two army corps headquarters staffs.	Total of columns 2, 4, and 5.
	(1) *	(2)				
Rifles.....	12,000	84,000			This establishment must be drawn from the increased armaments of the divisional infantry.	84,000
Carbines.....	108	756	6,000	18,000		18,000
Heavy machine guns.....			12	36		792
Light machine guns.....	162	1,134				1,134
Medium trench mortars.....	9	63				63
Light trench mortars.....	27	189				189
7.7-cm. guns.....	24	168	12	36		204
10.5-cm. howitzers.....	12	84			84	

TABLE NO. III.

MAXIMUM STOCKS AUTHORISED.

Material.	Maximum number of Arms authorised.	Establishment, per unit.	Maximum, totals.	
			Rounds.	Rounds.
Rifles.....	84,000	400	34,080,000	40,800,000
Carbines.....	18,000			
Heavy machine guns.....	792	8,000	6,336,000	15,408,000
Light machine guns.....	1,134			
Medium trench mortars.....	63	400	25,200	25,200
Light trench mortars.....	189			
Field artillery:				
7.7 cm. guns.....	204	1,000	204,000	204,000
10.5 cm. howitzers.....	84	800	67,200	67,200

Premier Orlando of Italy

Premier Clemenceau of France

SECTION II.
NAVAL CLAUSES.
ARTICLE 181.

After the expiration of a period of two months from the coming into force of the present Treaty the German naval forces in commission must not exceed:

- 6 battleships of the *Deutschland* or *Lothringen* type,
 - 6 light cruisers,
 - 12 destroyers,
 - 12 torpedo boats,
- or an equal number of ships constructed to replace them as provided in Article 190.

No submarines are to be included.
All other warships, except where there is provision to the contrary in the present Treaty, must be placed in reserve or devoted to commercial purposes.

ARTICLE 182.

Until the completion of the minesweeping prescribed by Article 193 Germany will keep in commission such number of minesweeping vessels as may be fixed by the Governments of the Principal Allied and Associated Powers.

ARTICLE 183.

After the expiration of a period of two months from the coming into force of the present Treaty the total personnel of the German Navy, including the manning of the fleet, coast defenses, signal stations, administration and other land services, must not exceed fifteen thousand, including officers and men of all grades and corps.

The total strength of officers and warrant officers must not exceed fifteen hundred.

Within two months from the coming into force of the present Treaty the personnel in excess of the above strength shall be demobilized.

No naval or military corps or reserve force in connection with the Navy may be organized in Germany without being included in the above strength.

ARTICLE 184.

From the date of the coming into force of the present Treaty all the German surface warships which are not in German ports cease to belong to Germany, who renounces all rights over them.

Vessels which, in compliance with the Armistice of November 11, 1918, are now interned in the ports of the Allied and Associated Powers are declared to be finally surrendered.

Vessels which are now interned in neutral ports will be there surrendered to the Governments of the Principal Allied and Associated Powers. The German Government must address a notification to that effect to the neutral Powers on the coming into force of the present Treaty.

ARTICLE 185.

Within a period of two months from the coming into force of the present Treaty the German surface warships enumerated below will be surrendered to the Governments of the Principal Allied and Associated Powers in such Allied ports as the said Powers may direct.

These warships will have been disarmed as provided in Article XXVIII of the Armistice of November 11, 1918. Nevertheless they must have all their guns on board.

BATTLESHIPS.

<i>Oldenburg.</i>	<i>Posen.</i>
<i>Thüringen.</i>	<i>Westfalen.</i>
<i>Ostfriesland.</i>	<i>Rheinland.</i>
<i>Helgoland.</i>	<i>Nassau.</i>

LIGHT CRUISERS.

<i>Stettin.</i>	<i>Stralsund.</i>
<i>Danzig.</i>	<i>Augsburg.</i>
<i>München.</i>	<i>Koblenz.</i>
<i>Lübeck.</i>	<i>Stuttgart.</i>

and, in addition, forty-two modern destroyers and fifty modern torpedo boats, as chosen by the Governments of the Principal Allied and Associated Powers.

ARTICLE 186.

On the coming into force of the present Treaty the German Government must undertake under the supervision of the Governments of the Principal Allied and Associated Powers, the breaking-up of all the German surface warships now under construction.

ARTICLE 187.

The German auxiliary cruisers and fleet auxiliaries enumerated below will be disarmed and treated as merchant ships.

INTERBED IN NEUTRAL COUNTRIES:

<i>Berlin.</i>	<i>Scydlitz.</i>
<i>Santa Fé.</i>	<i>York.</i>

IN GERMANY:

<i>Ammon.</i>	<i>Eurat Bülow.</i>
<i>Arnswald.</i>	<i>Gertrud.</i>
<i>Rosnia.</i>	<i>Gigoma.</i>
<i>Cordoba.</i>	<i>Rufia.</i>
<i>Cassel.</i>	<i>Santa Elena.</i>
<i>Dania.</i>	<i>Schleswig.</i>
<i>Rio Negro.</i>	<i>Möve.</i>
<i>Rio Pardo.</i>	<i>Süra Ventana.</i>
<i>Santa Cruz.</i>	<i>Chemnitz.</i>
<i>Schroben.</i>	<i>Emil Georg von Strauss.</i>
<i>Söllingen.</i>	<i>Hapsburg.</i>
<i>Nietzperwald.</i>	<i>Melcar.</i>
<i>Franken.</i>	<i>Waltwite.</i>
<i>Gundomar.</i>	<i>Scharnhorst.</i>

ARTICLE 188.

On the expiration of one month from the coming into force of the present Treaty all German submarines, submarine air-sea vessels and docks for submarines, including the tubular dock, must have been handed over to the Governments of the Principal Allied and Associated Powers.

Such of these submarines, vessels and docks are considered by the said Governments to be fit to proceed under their own power or to be towed shall be taken by the German Government into such Allied ports as have been indicated.

The remainder, and also those in course of construction, shall be broken up entirely by the German Government under the supervision of the said Governments. The breaking-up must be completed within three months at the most after the coming into force of the present Treaty.

ARTICLE 189.

Articles, machinery and material arising from the breaking-up of German warships of all kinds, whether surface vessels or submarines, may not be used except for purely industrial or commercial purposes.

They may not be sold or disposed of to foreign countries.

ARTICLE 190.

Germany is forbidden to construct or acquire any warships other than those intended to replace the units in commission provided for in Article 181 of the present Treaty.

The warships intended for replacement purposes as above shall not exceed the following displacement:

Armored ships	10,000 tons,
Light cruisers	6,000 tons,
Destroyers	800 tons,
Torpedo boats	200 tons.

Except where a ship has been lost, units of the different classes shall only be replaced at the end of a period of twenty years in the case of battleships and cruisers, and fifteen years in the case of destroyers and torpedo boats, counting from the launching of the ship.

ARTICLE 191.

The construction or acquisition of any submarine, even for commercial purposes, shall be forbidden in Germany.

ARTICLE 192.

The warships in commission of the German fleet must have on board or in reserve only the allowance of arms, munitions and war material fixed by the Principal Allied and Associated Powers.

Within a month from the fixing of the quantities as above, the munitions and war material of all kinds, including mines and torpedoes, now in the hands of the German Government and in excess of the said quantities, shall be surrendered to the Governments of the said Powers at places to be indicated by them. Such arms, munitions and war material shall only be destroyed or rendered useless.

All other stocks, depots or reserves of arms, munitions or naval war material of all kinds are forbidden.

The manufacture of these articles in German territory for, and their export to, foreign countries shall be forbidden.

ARTICLE 193.

On the coming into force of the present Treaty Germany will forthwith sweep up the mines in the following areas in the North Sea to the eastward of longitude 4° 00' E. of Greenwich:

- (1) Between parallels of latitude 53° 00' N. and 59° 00' N.;
- (2) To the northward of latitude 60° 30' N.

Germany must keep these areas free from mines.

Germany must also sweep and keep free from mines such areas in the Baltic as may ultimately be notified by the Governments of the Principal Allied and Associated Powers.

ARTICLE 194.

The personnel of the German Navy shall be recruited entirely by voluntary engagements entered into for a minimum period of twenty-five consecutive years for officers and warrant officers; twelve consecutive years for petty officers and men.

The number engaged to replace those discharged for any reason before the expiration of their term of service must not exceed five per cent. per annum of the totals laid down in this Section (Article 183).

The personnel discharged from the Navy must not receive any kind of naval or military training or undertake any further service in the Navy or Army.

Officers belonging to the German Navy and not demobilized must engage to serve till the age of forty-five, unless discharged on sufficient reasons.
No officer or man of the German mercantile marine shall receive any training in the Navy.

ARTICLE 195.

In order to ensure free passage into the Baltic to all nations, Germany shall not erect any fortifications in the area comprised between latitudes 55° 27' N. and 54° 00' N. and longitudes 9° 00' E. and 16° 00' E. of the meridian of Greenwich, nor install any guns commanding the maritime routes between the North Sea and the Baltic. The fortifications now existing in this area shall be demolished and the guns removed under the supervisions of the Allied Governments and in periods to be fixed by them.

The German Government shall place at the disposal of the Governments of the Principal Allied and Associated Powers

all hydrographical information now in its possession concerning the channels and adjoining waters between the Baltic and the North Sea.

ARTICLE 196.

All fortified works and fortifications, other than those mentioned in Section X (Heligoland) of Part II (Political Clauses for Europe) and in Article 195, now established within fifty kilometres of the German coast or on German islands off that coast shall be considered as of a defensive nature and may remain in their existing condition.

No new fortifications shall be constructed within these limits. The armament of these defences shall not exceed, as regards the number and calibre of guns, those in position at the date of the coming into force of the present Treaty. The German Government shall communicate forthwith particulars thereof to all the European Governments.

On the expiration of a period of two months from the coming into force of the present Treaty the stocks of ammunition for these guns shall be reduced to and maintained at a maximum figure of fifteen hundred rounds per piece for calibres of 4.1-inch and under, and five hundred rounds per piece for higher calibres.

ARTICLE 197.

During the three months following the coming into force of the present Treaty the German high-power wireless telegraphy stations at Nauen, Hanover and Berlin shall not be used for the transmission of messages concerning naval, military or political questions of interest to Germany or any State which has been allied to Germany in the war, without the assent of the Governments of the Principal Allied and Associated Powers. These stations may be used for commercial purposes, but only under the supervision of the said Governments, who will decide the wave-length to be used.

During the same period Germany shall not build any more high-power wireless telegraphy stations in her own territory or that of Austria, Hungary, Bulgaria or Turkey.

SECTION III.

AIR CLAUSES.

ARTICLE 198.

The armed forces of Germany must not include any military or naval air forces.

Germany may, during a period not extending beyond October 1, 1919, maintain a maximum number of one hundred seaplanes or flying boats, which shall be exclusively employed in searching for submarine mines, shall be furnished with the necessary equipment for this purpose, and shall in no case carry arms, munitions or bombs of any nature whatever.

In addition to the engines installed in the seaplanes or flying boats above mentioned, one spare engine may be provided for each engine of each of these craft.

No dirigible shall be kept.

ARTICLE 199.

Within two months from the coming into force of the present Treaty the personnel of air forces on the rolls of the German land and sea forces shall be demobilized. Up to October 1, 1919, however, Germany may keep and maintain a total number of one thousand men, including officers, for the whole of the cadres and personnel, flying and non-flying, of all formations and establishments.

ARTICLE 200.

Until the complete evacuation of German territory by the Allied and Associated troops, the aircraft of the Allied and Associated Powers shall enjoy in Germany freedom of passage through the air, freedom of transit and of landing.

ARTICLE 201.

During the six months following the coming into force of the present Treaty, the manufacture and importation of aircraft, parts of aircraft, engines for aircraft, and parts of engines for aircraft, shall be forbidden in all German territory.

ARTICLE 202.

On the coming into force of the present Treaty, all military and naval aeronautical material, except the machines mentioned in the second and third paragraphs of Article 198, must be delivered to the Governments of the Principal Allied and Associated Powers.

Delivery must be effected at such places as the said Governments may select, and must be completed within three months.

In particular, this material will include all items under the following heads which are or have been in use or were designed for warlike purposes:

Complete aeroplanes and seaplanes, as well as those being manufactured, repaired or assembled.

Dirigibles able to take the air being manufactured, repaired or assembled.

Plant for the manufacture of hydrogen.

Dirigible sheds and shelters of every kind of aircraft.

Pending their delivery, dirigibles will, at the expense of Germany, be maintained inflated with hydrogen; the plant for the manufacture of hydrogen, as well as the sheds for dirigibles, may be the property of the said Powers, to be lent to Germany until the time when the dirigibles are handed over.

Engines for aircraft.

Rockets and missiles.

Armament (guns, machine guns, light machine guns, bomb-

dropping apparatus, torpedo-dropping apparatus, synchronization apparatus, aiming apparatus).

Munitions (cartridges, shells, bombs loaded or unloaded, stocks of explosives or of material for their manufacture).

Instruments for use on aircraft.

Wireless apparatus and photographic or cinematograph apparatus for use on aircraft.

Component parts of any of the items under the preceding heads.

The material referred to above shall not be removed without special permission from the said Governments.

SECTION IV.

INTER-ALLIED COMMISSIONS OF CONTROL.

ARTICLE 203.

All the military, naval and air clauses contained in the present Treaty, for the execution of which a time-limit is prescribed, shall be executed by Germany under the control of Inter-Allied Commissions specially appointed for this purpose by the Principal Allied and Associated Powers.

ARTICLE 204.

The Inter-Allied Commissions of Control will be specially charged with the duty of seeing to the complete execution of every destruction, demolition and rendering things useless to be carried out at the expense of the German Government in accordance with the present Treaty.

They will communicate to the German authorities the decisions which the Principal Allied and Associated Powers have reserved the right to take, or which the execution of the military, naval and air clauses may necessitate.

ARTICLE 205.

The Inter-Allied Commissions of Control may establish their organisations at the seat of the central German Government.

They shall be entitled as often as they think desirable to proceed to any point whatever in German territory, or to send sub-commissions, or to authorize one or more of their members to go, to any such point.

ARTICLE 206.

The German Government must give all necessary facilities for the accomplishment of their missions to the Inter-Allied Commissions of Control and to their members.

It shall attach a qualified representative to each Inter-Allied Commission of Control for the purpose of receiving the communications which the Commission may have to address to the German Government and of supplying or procuring for the Commission all information or documents which may be required.

The German Government must in all cases furnish at its own cost all labour and material required to effect the deliveries and the works of destruction, disarming, demolition, and of rendering things useless, provided for in the present Treaty.

ARTICLE 207.

The upkeep and cost of the Commissions of Control and the expenses involved by their work shall be borne by Germany.

ARTICLE 208.

The Military Inter-Allied Commission of Control will represent the Governments of the Principal Allied and Associated Powers in dealing with the German Government in all matters concerning the execution of the military clauses.

In particular it will be its duty to receive from the German Government the notifications relating to the location of the stocks and depots of munitions, the armament of the fortified works, fortresses and forts which Germany is allowed to retain, and the location of the works or factories for the production of arms, munitions and war material and their operations.

It will take delivery of the arms, munitions and war material, will see to supervise the breaking-up of the same, and will supervise the works of destruction, demolition, and of rendering things useless, which are to be carried out in accordance with the present Treaty.

The German Government must furnish to the Military Inter-Allied Commission of Control all such information and documents as the latter may deem necessary to ensure the complete execution of the military clauses, and in particular all legislative and administrative documents and regulations.

ARTICLE 209.

The Naval Inter-Allied Commission of Control will represent the Governments of the Principal Allied and Associated Powers in dealing with the German Government in all matters concerning the execution of the naval clauses.

In particular it will be its duty to proceed to the building yards and to supervise the breaking-up of the ships which are under construction there, to take delivery of all surface ships or submarines, salvage ships, docks and the tubular docks, and to supervise the destruction and breaking-up provided for in the present Treaty.

The German Government must furnish to the Naval Inter-Allied Commission of Control all such information and documents as the Commission may deem necessary to ensure the complete execution of the naval clauses, in particular the details of the warships, the composition of their armaments, the details and models of the guns, munitions, torpedoes, mines, explosives, wireless telegraphic apparatus and, in general, everything relating to naval war material, as well as all legislative or administrative documents or regulations.

ARTICLE 210.

The Aeronautical Inter-Allied Commission of Control will represent the Governments of the Principal Allied and Associated Powers in dealing with the German Government in all matters concerning the execution of the air clauses.

In particular it will be its duty to make an inventory of the aeronautical material existing in German territory, to inspect aeroplane, balloon and motor manufactories, and factories producing arms, munitions and explosives capable of being used by aircraft, to visit all aerodromes, sheds, landing grounds, parks and depots, to authorise, where necessary, a removal of material and to take delivery of such material.

The German Government must furnish to the Aeronautical Inter-Allied Commission of Control all such information and legislative, administrative or other documents which the Commission may consider necessary to ensure the complete execution of the air clauses, and in particular a list of the personnel belonging to all the German Air Services, and of the existing material, as well as of that in process of manufacture or on order, and a list of all establishments working for aviation, of their positions, and of all sheds and landing grounds.

SECTION V.
GENERAL ARTICLES.

ARTICLE 211.

After the expiration of a period of three months from the coming into force of the present Treaty, the German laws must have been modified and shall be maintained by the German Government in conformity with this Part of the present Treaty.

Within the same period all the administrative or other measures relating to the execution of this Part of the Treaty must have been taken.

ARTICLE 212.

The following portions of the Armistice of November 11, 1918: Article VI, the first two and the sixth and seventh paragraphs of Article VII; Article IX; Clauses 1, II and V of Annex n° 2, and the Protocol, dated April 4, 1919, supplementing the Armistice of November 11, 1918, remain in force so far as they are not inconsistent with the above stipulations.

ARTICLE 213.

So long as the present Treaty remains in force, Germany undertakes to give every facility for any investigation which the Council of the League of Nations, acting if need be by a majority vote, may consider necessary.

PART VI.
PRISONERS OF WAR AND GRAVES.SECTION I.
PRISONERS OF WAR.

ARTICLE 214.

The repatriation of prisoners of war and interned civilians shall take place as soon as possible after the coming into force of the present Treaty and shall be carried out with the greatest rapidity.

ARTICLE 215.

The repatriation of German prisoners of war and interned civilians shall be in accordance with Article 214, be carried out by a Commission composed of representatives of the Allied and Associated Powers on the one part and of the German Government on the other part.

For each of the Allied and Associated Powers a Sub-Commission, composed exclusively of Representatives of the Interested Power and of Delegates of the German Government, shall regulate the details of carrying into effect the repatriation of the prisoners of war.

ARTICLE 216.

From the time of their delivery into the hands of the German authorities the prisoners of war and interned civilians are to be returned without delay to their homes by the said authorities.

Those amongst them who before the war were habitually resident in territory occupied by the troops of the Allied and Associated Powers are likewise to be sent to their homes, subject to the consent and control of the military authorities of the Allied and Associated armies of occupation.

ARTICLE 217.

The whole cost of repatriation from the moment of starting shall be borne by the German Government, who shall also provide the land and sea transport and staff considered necessary by the Commission referred to in Article 215.

ARTICLE 218.

Prisoners of war and interned civilians awaiting disposal or undergoing sentence for offences against discipline shall be repatriated irrespective of the completion of their sentence or of the proceedings pending against them.

This stipulation shall not apply to prisoners of war and interned civilians punished for offences committed subsequent to May 1, 1919.

During the period pending their repatriation all prisoners of war and interned civilians shall remain subject to the existing regulations, more especially as regards work and discipline.

ARTICLE 219.

Prisoners of war and interned civilians who are awaiting disposal or undergoing sentence for offences other than those against discipline may be detained.

ARTICLE 220.

The German Government undertakes to admit to its territory without distinction all persons liable to repatriation.

Prisoners of war or other German nationals who do not desire to be repatriated may be excused from repatriation; but the Allied and Associated Governments reserve to themselves the right either to repatriate them or to take them to a neutral country or to allow them to reside in their own territories.

The German Government undertakes not to institute any exceptional proceedings against these persons or their families nor to take any repressive or vexatious measures of any kind whatsoever against them on this account.

ARTICLE 221.

The Allied and Associated Governments reserve the right to make the repatriation of German prisoners of war or German nationals in their hands conditional upon the immediate notification and release by the German Government of any prisoners of war who are the nationals of the Allied and Associated Powers and may still be in Germany.

ARTICLE 222.

Germany undertakes:

- (1) To give every facility to Commissions to enquire into the cases of those who cannot be traced; to furnish such Commissions with all necessary means of transport; to allow them access to camps, prisons, hospitals and all other places; and to place at their disposal all documents, whether public or private, which would facilitate their enquiries.
- (2) To impose penalties upon any German officials or private persons who have concealed the presence of any nationals of any of the Allied and Associated Powers and have neglected to reveal the presence of any such after it had come to their knowledge.

ARTICLE 223.

Germany undertakes to restore, without delay from the date of the coming into force of the present Treaty all articles, money, securities and documents which have belonged to nationals of the Allied and Associated Powers and which have been retained by the German authorities.

ARTICLE 224.

The High Contracting Parties waive reciprocally all repayment of sums due for the maintenance of prisoners of war in their respective territories.

SECTION II.

GRAVES.

ARTICLE 225.

The Allied and Associated Governments and the German Government will cause to be respected and maintained the graves of the soldiers and sailors buried in their respective territories.

They agree to recognise any Commission appointed by an Allied or Associated Government for the purpose of identifying, registering, caring for or erecting suitable memorials over the said graves and to facilitate the discharge of its duties.

Furthermore they agree to afford, so far as the provisions of their laws and the requirements of public health allow, every facility for giving effect to requests that the bodies of their soldiers and sailors may be transferred to their own country.

ARTICLE 226.

The graves of prisoners of war and interned civilians who are nationals of the different belligerent States and have died in captivity shall be properly maintained in accordance with Article 225 of the present Treaty.

The Allied and Associated Governments on the one part and the German Government on the other part reciprocally undertake also to furnish to each other:

- (1) A complete list of those who have died, together with all information useful for identification;
- (2) All information as to the number and position of the graves of all those who have been buried without identification.

PART VII.

PENALTIES.

ARTICLE 227.

The Allied and Associated Powers publicly arraign William II of Hohenzollern, formerly German Emperor, for a supreme offence against international morality and the sanctity of treaties.

A special tribunal will be constituted to try the accused, thereby assuring him the guarantees essential to the right of defence. It will be composed of five judges, one appointed by each of the following Powers, namely, the United States of America, Great Britain, France, Italy and Japan.

In its decision the tribunal will be guided by the highest motives of international policy, with a view to vindicating the solemn obligations of international undertakings and the validity of international morality. It will be its duty to fix the punishment which it considers should be imposed.

The Allied and Associated Powers will address a request

to the Government of the Netherlands for the surrender to them of the ex-Emperor in order that he may be put on trial.

ARTICLE 228.

The German Government recognizes the right of the Allied and Associated Powers to bring before military tribunals persons accused of having committed acts in violation of the laws and customs of war. Such persons shall, if found guilty, be sentenced to punishments laid down by law. This provision will apply notwithstanding any proceedings or prosecution before a tribunal in Germany or in the territory of her allies.

The German Government shall hand over to the Allied and Associated Powers, or to such one of them as shall so request, all persons accused of having committed an act in violation of the laws and customs of war, who are specified either by name or by the rank, office or employment which they held under the German authorities.

ARTICLE 229.

Persons guilty of criminal acts against the nationals of one of the Allied and Associated Powers will be brought before the military tribunals of that Power.

Persons guilty of criminal acts against the nationals of more than one of the Allied and Associated Powers will be brought before military tribunals composed of members of the military tribunals of the Powers concerned.

In every case the accused will be entitled to name his own counsel.

ARTICLE 230.

The German Government undertakes to furnish all documents and information regarding the production of which may be considered necessary to ensure the full knowledge of the incriminating acts, the discovery of offenders and the just appreciation of responsibility.

PART VIII.

REPARATION.

SECTION I.

GENERAL PROVISIONS.

ARTICLE 231.

The Allied and Associated Governments affirm and Germany accepts the responsibility of Germany and her allies for causing all the loss and damage to which the Allied and Associated Governments and their nationals have been subjected as a consequence of the war imposed upon them by the aggression of Germany and her allies.

ARTICLE 232.

The Allied and Associated Governments recognize that the resources of Germany are not adequate, after taking into account permanent diminutions of such resources which will result from other provisions of the present Treaty, to make complete reparation for all such loss and damage.

The Allied and Associated Governments, however, require, and Germany undertakes, that she will make compensation for all damage done to the civilian population of the Allied and Associated Powers and to their property during the period of the belligerency of each as an Allied or Associated Power against Germany by such aggression by land, by sea and from the air, and in general all damage as defined in Annex I hereto.

In accordance with Germany's pledges, already given, as to complete restoration for Belgium, Germany undertakes, in addition to the compensation for damage elsewhere in this Part provided for, as a consequence of the violation of the Treaty of 1839, to make reimbursement of all sums which Belgium has borrowed from the Allied and Associated Governments up to November 11, 1918, together with interest at the rate of five per cent. (5%) per annum on such sums. This amount shall be determined by the Reparation Commission. The German Government undertakes thereupon forthwith to make a special issue of bearer bonds to an equivalent amount payable in marks gold, on May 1, 1926, or, at the option of the German Government, on the 1st of May in any year up to 1926. Subject to the foregoing, the form of such bonds shall be determined by the Reparation Commission. Such bonds shall be handed over to the Reparation Commission, which has authority to take and acknowledge receipt thereof on behalf of Belgium.

ARTICLE 233.

The amount of the above damage for which compensation is to be made by Germany shall be determined by an inter-Allied Commission, to be called the *Reparation Commission* and constituted in the form and with the powers set forth hereunder and in Annexes II to VII inclusive hereto.

This Commission shall consider the claims and give to the German Government the opportunity to be heard.

The findings of the Commission as to the amount of damage defined as above shall be concluded and notified to the German Government on or before May 1, 1921, as representing the extent of that Government's obligations.

The Commission shall concurrently draw up a schedule of payments prescribing the time and manner for securing and discharging the entire obligation within a period of thirty years from May 1, 1921. It, however, within the period mentioned, Germany fails to discharge her obligations, any hereafter remaining unpaid may, within the discretion of the Commission, be postponed for the settlement in subsequent years, or may be handled otherwise in such manner as the Allied and Associated Governments, acting in accordance with the Commission laid down in this Part of the present Treaty, shall determine.

ARTICLE 234.

The Reparation Commission shall after May 1, 1921, from time to time consider the resources and capacity of Germany, and, after giving her representatives a just opportunity to be heard, shall have discretion to extend the date, and to modify the form of payments, such as are to be provided for in accordance with Article 233; but not to cancel any part, except with the specific authority of the several Governments represented upon the Commission.

ARTICLE 235.

In order to enable the Allied and Associated Powers to proceed at once to the restoration of their industry and economic life, pending the full determination of their claims, Germany shall pay in such instalments and in such manner (whether in gold, commodities, ships, securities or otherwise) as the Reparation Commission may fix, during 1919, 1920 and the first four months of 1921, the equivalent of 20,000,000,000 gold marks. Out of this sum the expenses of the armies of occupation subsequent to the Armistice of November 11, 1918, shall first be met, and such supplies of food and raw materials as may be judged by the Government of the Principal Allied and Associated Powers to be essential to enable Germany to meet her obligations for reparation may also, with the approval of the said Governments be paid for out of the above sum. The balance shall be reckoned towards liquidation of the amounts due for reparation. Germany shall further deposit bonds as prescribed in paragraph 12 (c) of Annex II hereto.

ARTICLE 236.

Germany further agrees to the direct application of her economic resources to reparation as specified in Annexes III, IV, V, and VI, relating respectively to merchant shipping, to physical restoration, to coal and derivatives of coal and to dyestuffs and other chemical products; provided always that the value of the amounts due for reparation and any services rendered by her under these Annexes, assessed in the manner therein prescribed, shall be credited to her towards liquidation of her obligations under the above Articles.

ARTICLE 237.

The successive instalments, including the above sum, paid over by Germany in satisfaction of the above claims will be divided by the Allied and Associated Governments in proportions which have been determined upon by them in advance on a basis of general equity and of the rights of each.

For the purposes of this division the value of property transferred and services rendered under Article 234, and under Annexes III, IV, V, VI and VII, shall be reckoned in the same manner as cash payments effected in that year.

ARTICLE 238.

In addition to the payments mentioned above Germany shall effect, in accordance with the procedure laid down by the Reparation Commission, restitution in cash of cash taken away, seized or sequestered, and also restitution of animals, objects of every nature and securities taken away, seized or sequestered, in the cases in which it proves possible to identify them in territory belonging to Germany or her allies.

Until this procedure is laid down, restitution will continue in accordance with the provisions of the Armistice of November 11, 1918, and its renewals and the Protocols hereto.

ARTICLE 239.

The German Government undertakes to make forthwith the restitution contemplated by Article 238 and to make the payments and deliveries contemplated by Articles 233, 234, 235 and 236.

ARTICLE 240.

The German Government recognizes the Commission provided for by Article 233 of the same may be constituted by the Allied and Associated Governments in accordance with Annex II, and agrees irrevocably to the possession and exercise by such Commission of the power and authority given to it under the present Treaty.

The German Government will supply to the Commission all the information which the Commission may require relative to the financial situation and operations and to the property, productive capacity, and stocks and current production of raw materials and manufactured articles of Germany and her nationals, and further any information relative to military operations which in the judgment of the Commission may be necessary for the assessment of Germany's liability for reparation as defined in Annex I.

The German Government will accord to the members of the Commission and its authorized agents the same rights and immunities as are enjoyed in Germany by duly accredited diplomatic agents of friendly Powers.

Germany further agrees to provide for the salaries and expenses of the Commission and of such staff as it may employ.

ARTICLE 241.

Germany undertakes to pass, issue and maintain in force any legislation, orders and decrees that may be necessary to give complete effect to these provisions.

ARTICLE 242.

The provisions of this Part of the present Treaty do not apply to the property, rights and interests referred to in Sections III and IV of PART X (Economic Clauses) of the

German Delegates actually signing the German Treaty of Peace in the Palace at Versailles, France, June 28, 1919.

present Treaty, nor to the product of their liquidation, except so far as concerns any final balance in favour of Germany under Article 243.

ARTICLE 243.

The following shall be reckoned as credits to Germany in respect of her reparation obligations:

(a) Any final balance in favour of Germany under Section V (Alsace-Lorraine) of Part III (Political Clauses) and Sections III and IV of Part X (Economic Clauses) of the present Treaty.

(b) Amounts due to Germany in respect of transfers under Section IV (Saar Basin) of Part III (Political Clauses) for Europe, Part IX (Financial Clauses), and Part XII (Ports, Waterways and Railways);

(c) Amounts which, in accordance with the provisions of the Commission should be credited to Germany on account of any other transfers under the present Treaty of property, rights, concessions or other interests.

In no case, however, shall credit be given for property restored in accordance with Article 238 of the present Part.

ARTICLE 244.

The transfer of the German submarine cables which do not form the subject of particular provisions of the present Treaty is regulated by ANNEX VII hereto.

ANNEX I.

Compensation may be claimed from Germany under Article 232 above in respect of the total damage under the following categories:

(1) Damage to injured persons and to surviving dependents by personal injury to or death of civilians caused by acts of war, including bombardments or other attacks on land, on sea, or from the air, and all the direct consequences therefrom and operations of war by the two groups of belligerents wherever arising.

(2) Damage caused by Germany or her allies to civilian victims of acts of cruelty, violence or maltreatment (including injuries to life or health as a consequence of imprisonment, deportation, evacuation, or exposure to sea or of being forced to labour), wherever arising, and to the surviving dependents of such victims.

(3) Damage caused by Germany or her allies in their own territory or in occupied or invaded territory to civilian victims of all acts injurious to health or capacity to work, or to honour, as well as to the surviving dependents of such victims.

(4) Damage caused by any kind of maltreatment of prisoners of war.

(5) As damage caused to the peoples of the Allied and Associated Powers, all pensions and compensation in the nature of pensions to naval and military victims of war (including members of the air force), whether mutilated, wounded, sick or invalided, and to the dependents of such victims, the amount due to the Allied and Associated Governments being calculated for each of them as being the capitalised cost of such pensions and compensation at the basis of the scales in force in France at such date.

(6) The cost of assistance by the Government of the Allied and Associated Powers to prisoners of war and to their families and dependents.

(7) Allowances by the Governments of the Allied and Associated Powers to the families and dependents of mobilised persons or persons serving with the forces, the amount due to them for each calendar year in which hostilities occurred being calculated for each Government on the basis of the average scale for such payments in force in France during that year.

(8) Damage caused to civilians by being forced by Germany or her allies to labour without just remuneration.

(9) Damage in respect of all property wherever situated belonging to any of the Allied or Associated States or their nationals, with the exception of naval and military works or materials which have been seized, injured or destroyed by the acts of Germany or her allies on land, on sea or from the air, or damage directly in consequence of hostilities or of any operations of war.

(10) Damages in the form of levies, fines and other similar exactions imposed by Germany or her allies upon the civilian population.

ANNEX II.

1.

The Commission referred to in Article 233 shall be called "The Reparation Commission" and is hereinafter referred to as "the Commission".

2.

Delegates to this Commission shall be nominated by the United States of America, Great Britain, France, Italy, Japan, Belgium, the Serb-Croat-Slovene State. Each of these Powers will appoint one Delegate and also one Assistant Delegate, who will take his place in case of illness or necessary absence, but at other times will only have the right to be present at proceedings without taking any part therein.

On no occasion shall the Delegates of more than five of the above Powers have the right to take part in the proceedings of the Commission and to record their votes. The Delegates of the United States, Great Britain, France and Italy shall have this right on all occasions. The Delegate of Belgium shall have this right on all occasions other than those referred to below. The Delegate of Japan shall have this right on occasions when questions relating to damage at sea, and questions arising under Article 260 of Part IX (Financial Clauses) in which Japanese interests are con-

cerned, are under consideration. The Delegate of the Serb-Croat-Slovene State shall have this right, when questions relating to Austria, Hungary or Bulgaria are under consideration.

Each Government represented on the Commission shall have the right to withdraw therefrom upon two months' notice filed with the Commission and confirmed in the course of the sixth month after the date of the original notice.

3.

Such of the other Allied and Associated Powers as may be interested shall have the right to appoint a Delegate to be present and act as Assessor only while their respective claims and interests are under examination or discussion, but without the right to vote.

4.

In case of the death, resignation or recall of any Delegate, Assistant Delegate or Assessor, a successor to him shall be nominated as soon as possible.

5.

The Commission will have its principal permanent Bureau in Paris and will hold its first meeting in Paris as soon as practicable after the coming into force of the present Treaty, and thereafter will meet in such place or places and at such time as it may deem convenient and as may be necessary for the most expeditious discharge of its duties.

6.

At its first meeting the Commission shall elect, from among the Delegates referred to above, a Chairman and a Vice-Chairman, who shall hold office for one year and shall be eligible for re-election. If a vacancy in the Chairmanship or Vice-Chairmanship should occur during the annual period, the Commission shall proceed to a new election for the remainder of the said period.

7.

The Commission is authorised to appoint all necessary officers, agents and employees who may be required for the execution of its functions, and to fix their remuneration; to constitute committees, whose members need not necessarily be members of the Commission, and to take all executive steps necessary for the purpose of discharging its duties; and to delegate authority and discretion to officers, agents and committees.

8.

All proceedings of the Commission shall be private, unless, on particular occasions, the Commission shall otherwise determine for special reasons.

9.

The Commission shall be required, if the German Government so desire, to hear, within a period which it will fix from time to time, evidence and arguments on the part of Germany on any question connected with her capacity to pay.

10.

The Commission shall consider the claims and give to the German Government a just opportunity to be heard, but not to take any part whatever in the decisions of the Commission. The Commission shall afford a similar opportunity to the allies of Germany, when it shall consider that their interests are in question.

11.

The Commission shall not be bound by any particular code or rule of law, but by any particular rule of evidence or of procedure, but shall be guided by justice, equity and good faith. Its decisions must follow the same principles and rules in all cases where they are applicable. It will establish rules relating to methods of proof of claims. It may act on any trustworthy modes of computation.

12.

The Commission shall have all the powers conferred upon it, and shall exercise all the functions assigned to it by the present Treaty.

The Commission shall in general have wide latitude as to its control and handling of the whole reparations problem as dealt with in this Part of the present Treaty and shall have authority to interpret its provisions. Subject to the provisions of the present Treaty, the Commission is constituted by the several Allied and Associated Governments referred to in paragraphs 2 and 3 above as the exclusive agency of the said Governments respectively for receiving, selling, holding, and distributing the reparation payments to be made by Germany under this Part of the present Treaty. The Commission must comply with the following conditions and provisions:

(a) Whatever part of the full amount of the proved claims is not paid in gold, or in ships, securities and commodities or otherwise, Germany shall be required, under such conditions as the Commission may determine, to provide a guarantee by an equivalent issue of bonds, obligations or otherwise, in order to constitute an acknowledgment of the said part of the debt.

(b) In periodically estimating Germany's capacity to pay, the Commission shall examine the German system of taxation, first, to the end that the sums for reparation which Germany is required to pay shall become a charge upon all her revenues prior to that for the service or discharge of any other public debt, and secondly, so as to satisfy itself that, in general, the German scheme of taxation is fully as heavy proportionately as that of any of the Powers represented on the Commission.

(c) In order to facilitate and continue the immediate restoration of the economic life of the Allied and Associated countries, the Commission will, as provided in Article 235 take from Germany by way of security for an acknowledgment of her debt a first instalment of gold bearer bonds free

of all taxes and charges of every description established or to be established by the Government of the German Empire or of the German States, or by any authority subject to them; these bonds will be delivered on account and in three portions, the marks gold being payable in conformity with Article 192 of Part IX (Financial Clauses) of the present Treaty as follows:

(1) To be issued forthwith, 20,000,000,000 Marks gold bearer bonds, payable not later than May 1, 1921, without interest. There shall be specially applied towards the amortisation of these bonds the payments which Germany is pledged to make in conformity with Article 235, after deduction of the sums used for the reimbursement of expenses of the armies of occupation and for payment of foodstuffs and war materials. Such bonds as have not been redeemed by May 1, 1921, shall then be exchanged for new bonds of the same type as those provided for below (paragraph 12, c, (2)).

(2) To be issued forthwith, further 40,000,000,000 Marks gold bearer bonds, bearing interest at 3½ per cent. per annum between 1921 and 1926, and thereafter at 5 per cent. per annum with an additional 1 per cent. for amortisation beginning in 1926 on the whole amount of the issue.

(3) To be delivered forthwith a covering undertaking in accordance with Article 235, when the Commission is satisfied that Germany can meet such interest and sinking fund obligations, a further instalment of 40,000,000,000 Marks gold 5 per cent. bearer bonds, the time and mode of payment of principal and interest to be determined by the Commission.

The date for payment of interest, the manner of applying the amortisation fund, and all other questions relating to the issue, management and regulation of the bond issue shall be determined by the Commission from time to time. The terms of the issues by way of acknowledgment and security may be required as the Commission subsequently determines from time to time.

(d) In the event of bonds, obligations or other evidence of indebtedness issued by Germany by way of security or as evidence of her responsibility for a debt being deposited or outright, not by way of pledge, to persons other than the several Governments in whose favour Germany's original reparations indebtedness was created, an amount of such reparations indebtedness shall be deemed to be extinguished corresponding to the nominal value of the bonds, etc., so disposed of outright, and the obligation of Germany in respect of such bonds shall be confined to her liabilities to the holders of the bonds, as expressed upon their face.

(e) The damage for repairing, reconstructing and rebuilding property in the invaded and devastated districts, including reinstallation of furniture machinery and other equipment, will be calculated according to the cost at the dates when the work is done.

(f) In case of the Commission relating to the total or partial cancellation of the capital or interest of any verified debt of Germany must be accompanied by a statement of its reasons.

13. As to voting, the Commission will observe the following rules:

When a decision of the Commission is taken, the votes of all the Delegates entitled to vote, or in the absence of any of them, of their Assistant Delegates, shall be recorded, and the majority for voting is to be treated as a vote against the proposal under discussion. Assessors have no vote.

On the following questions unanimity is necessary:

(a) Questions involving the sovereignty of any of the Allied and Associated Powers, or the cancellation of the whole or any part of the debt or obligations of Germany;

(b) Questions of determining the amount and conditions of bonds or other obligations to be issued by the German Government and of fixing the time and manner for selling, negotiating or distributing special bonds;

(c) Any postponement, total or partial, beyond the end of 1930, of the payment of instalments falling due between May 1, 1921, and the end of 1926 inclusive;

(d) Any postponement, total or partial, of any instalment falling due after 1926 for a period exceeding three years;

(e) Questions of applying in any particular case a method of measuring damages different from that which has been previously applied in a similar case;

(f) Questions of the interpretation of the provisions of this Part of the present Treaty.

All other questions shall be decided by the vote of a majority. In case of any difference of opinion among the Delegates, which cannot be solved by reference to their Governments, and the question whether or not to refer to one which requires a unanimous vote for its decision or not, such difference shall be referred to the immediate arbitration of some impartial person to be agreed upon by their Governments, whose award the Allied and Associated Governments agree to accept.

14. Decisions of the Commission, in accordance with the powers conferred upon it, shall forthwith become binding and may be put into immediate execution without further proceedings.

15. The Commission will issue to each of the interested Powers, in such form as the Commission shall fix:

(1) a certificate stating that it holds for the account of the said Power bonds of the issues mentioned above, the

said certificate, on the demand of the Power concerned, being divisible in a number of parts not exceeding five;

(2) From time to time certificates stating the goods delivered by Germany on account of her reparations debt which it holds for the account of the said Power.

The said certificates shall be registered, and upon notice to the Commission, may be transferred by endorsement.

When bonds are issued for sale or negotiation, and when goods are delivered by the Commission, certificates to an equivalent value must be withdrawn.

16. Interest shall be debited to Germany as from May 1, 1921, in respect of her debt as determined by the Commission, after allowing for sums already covered by cash payments or their equivalent, or by bonds issued to the Commission, or under Article 243. The rate of interest shall be 5 per cent. unless the Commission shall determine at some future time that circumstances justify a variation of this rate.

The Commission, in fixing on May 1, 1921, the total amount of the debt of Germany, may take account of interest due on sums arising out of the reparations of material damage as from November 11, 1918, up to May 1, 1921.

17. In case of default by Germany in the performance of any obligation under this Part of the present Treaty, the Commission will forthwith give notice of such default to each of the interested Powers and may make such recommendations as to the action to be taken in consequence of such default as it may think necessary.

18. The measures which the Allied and Associated Powers shall have the right to take, in case of voluntary default by Germany, and which Germany agrees not to regard as acts of reprisal, may include economic and financial prohibitions and reprisals and in general such other measures as the respective Governments may determine to be necessary in the circumstances.

19. Payments required to be made in gold or its equivalent on account of the proved claims of the Allied and Associated Powers may at any time be accepted by the Commission in the form of chattels, properties, commodities, businesses, rights, concessions, within or without German territory, ships, bonds, shares or securities of any kind, or currencies of Germany or other States, the value of such substitutes for gold being fixed at a fair and just amount by the Commission itself.

20. The Commission, in fixing or accepting payment in specified properties or rights, shall have due regard for any legal or equitable interests of the Allied and Associated Powers or of neutral Powers or of their nationals therein.

No member of the Commission shall be responsible, except to the Government appointing him, for any action or omission as such member. No one of the Allied or Associated Governments assumes any responsibility in respect of any other Government.

22. Subject to the provisions of the present Treaty this Annex may be amended by the unanimous decision of the Governments represented from time to time upon the Commission.

23. When all the amounts due from Germany and her allies under the present Treaty or the decisions of the Commission have been discharged and all sums received, or their equivalents, shall have been distributed to the Powers interested, the Commission shall be dissolved.

ANNEX III.

1.

Germany recognises the right of the Allied and Associated Powers to the replacement, ton for ton (gross tonnage) and class for class, of all merchant ships and fishing boats lost or damaged owing to the war.

Notwithstanding in spite of the fact that the tonnage of German shipping at present in existence is much less than that lost by the Allied and Associated Powers in consequence of the German aggression, the right thus recognised will be enforced on German ships and boats under the following conditions:

The German Government, on behalf of themselves and so as to bind all other persons interested, cede to the Allied and Associated Governments the property in all the German merchant ships which are of 1,600 tons gross and upwards; in one-half, reckoned in tonnage, of the ships which are between 1,000 tons and 1,600 tons gross; in one-quarter, reckoned in tonnage, of the steam trawlers; and in one-quarter, reckoned in tonnage, of the other fishing boats.

The German Government will, within two months of the coming into force of the present Treaty, deliver to the Reparation Commission all the ships and boats mentioned in paragraph 1.

2.

The ships and boats mentioned in paragraph 1 include all ships and boats which (a) fly, or may be entitled to fly, the German merchant flag; or (b) are owned by any German national, company or corporation or by any company or corporation belonging to a country other than an Allied or Associated country and under the control or direction of German nationals; or (c) are now under construction (1) in Germany, (2) in other than Allied or Associated countries

for the account of any German national, company or corporation.

4. For the purpose of providing documents of title for the ships and boats to be handed over as above mentioned, the German Government will:

(a) Deliver to the Reparation Commission in respect of each vessel all bill of sale or other document of title evidencing the transfer to the Commission of the entire property in the vessel, free from all encumbrances, charges and liens of all kinds, as the Commission may require;

(b) Take all measures that may be indicated by the Reparation Commission for ensuring that the ships themselves shall be placed at its disposal.

5. As an additional part of reparation, Germany agrees to cause merchant ships to be built in German yards for the account of the Allied and Associated Governments as follows:

(a) Within three months of the coming into force of the present Treaty, the Reparation Commission will notify to the German Government the amount of tonnage to be laid down in German shipyards in each of the two years next succeeding the three months mentioned above.

(b) Within two years of the coming into force of the present Treaty, the Reparation Commission will notify to the German Government the amount of tonnage to be laid down in each of the three years following the two years mentioned above.

(c) The amount of tonnage to be laid down in each year shall not exceed 200,000 tons, gross tonnage.

(d) The specifications of the ships to be built, the conditions under which they are to be built and delivered, the price per ton at which they are to be accounted for by the Reparation Commission, and all other questions relating to the accounting, ordering, building and delivery of the ships, shall be determined by the Commission.

Germany undertakes to restore in kind and in normal condition of upkeep to the Allied and Associated Powers, within two months of the coming into force of the present Treaty, in accordance with procedure to be laid down by the Reparation Commission, all boats and other movable appliances belonging to inland navigation which since August 1, 1914, have by any means whatever come into her possession or into the possession of her nationals, and which can be identified.

With a view to make good the loss in inland navigation tonnage, from whatever cause arising, which has been incurred during the war by the Allied and Associated Powers, and which cannot be made good by means of the restitution prescribed above, Germany agrees to cede to the Reparation Commission a portion of the German river fleet up to the amount of the loss mentioned above, provided that such cession shall not exceed 20 per cent. of the river fleet as it existed on November 11, 1918.

The conditions of this cession shall be settled by the arbitrators referred to in Article 339 of Part XII (Ports, Waterways and Railways) of the present Treaty, who are charged with the settlement of difficulties relating to the apportionment of river tonnage resulting from the new international régime applicable to certain river systems or from the territorial changes affecting those systems.

7. Germany agrees to take any measures that may be indicated to her by the Reparation Commission for obtaining the full title to the property in all ships which during the war have been transferred, or are in process of transfer, to neutral flags, without the consent of the Allied and Associated Governments.

8. Germany waives all claims of any description against the Allied and Associated Governments and their nationals in respect of the detention, employment, loss or damage of any German ships or boats, exception being made of payments due in respect of the employment of ships in conformity with the Armistice Agreement of January 13, 1919, and subsequent Agreements.

The handing over of the ships of the German mercantile marine must be continued without interruption in accordance with the said Agreement.

9. Germany waives all claims to vessels or cargoes sunk by or in consequence of naval action and subsequently salvaged, in which any of the Allied or Associated Governments or their nationals may have any interest either as owners, charterers, insurers or otherwise, notwithstanding any decree of condemnation which may have been made by a Prize Court of Germany or of her allies.

ANNEX IV.

1. The Allied and Associated Powers require, and Germany undertakes, that in part satisfaction of her obligations expressed in the present Part she will, as hereinafter provided, devote her animals, machinery, equipment, tools and like articles of the invaded areas of the Allied and Associated Powers, to the extent that these Powers may determine.

2. The Allied and Associated Governments may file with the Reparation Commission lists showing:

(a) Animals, machinery, equipment, tools and like articles of a commercial character, which have been seized, con-

sumed or destroyed by Germany or destroyed in direct consequence of military operations, and which such Governments, for the purpose of meeting immediate and urgent needs, desire to have replaced by animals and articles of the same nature which are in being in German territory at the date of the coming into force of the present Treaty;

(b) Reconstruction materials (stones, bricks, refractory bricks, tiles, wood, window-glass, steel, lime, cement, etc.), machinery, heating apparatus, furniture and like articles of a commercial character which the said Governments desire to have produced and manufactured in Germany and delivered to them to permit of the restoration of the invaded area.

3. The lists relating to the articles mentioned in 2 (a) above shall be filed within sixty days after the date of the coming into force of the present Treaty.

The lists relating to the articles in 2 (b) above shall be filed on or before December 31, 1919.

The lists shall contain all such details as are customary in commercial contracts dealing with the subject matter, including specifications, dates of delivery (but not extending over more than four years), and places of delivery, but not price or value, which shall be fixed as hereinafter provided by the Commission.

4. Immediately upon the filing of such lists with the Commission, the Commission shall consider the amount and number of the materials and animals mentioned in the lists provided above which are to be required of Germany. In reaching a decision on this matter the Commission shall take into account such domestic requirements of Germany as it deems essential for the maintenance of Germany's social and economic life, the prices and dates at which similar articles are available in the Allied and Associated countries, as compared with those to be fixed for German articles, and the general interest of the Allied and Associated Governments that the industrial life of Germany be not so disorganised as to affect adversely the ability of Germany to perform the other acts of reparation stipulated for.

Machinery, equipment, tools and like articles of a commercial character in actual industrial use are not, however, to be demanded of Germany unless there is no free stock of such articles respectively which is not in use and is available, and then not in excess of thirty per cent. of the quantity of such articles in use in any one establishment or undertaking.

The Commission shall give representatives of the German Government every opportunity and time to be heard as to their capacity to furnish the said materials, articles and animals.

The decision of the Commission shall thereupon and at the earliest possible moment be communicated to the German Government and to the several interested Allied and Associated Governments.

The German Government undertakes to deliver the materials, articles and animals as specified in the said communication, and the interested Allied and Associated Governments severally agree to accept the same provided they conform to the specification given, or are not, in the judgment of the Commission, unfit to be utilized in the work of reparation.

5. The Commission shall determine the value to be attributed to the materials, articles and animals to be delivered in accordance with the foregoing, and the Allied or Associated Power receiving the same agrees to be charged with such value and the amount thereof shall be treated as a payment of this Part of the present Treaty.

In cases where the right to require physical restoration as above provided is exercised, the Commission shall ensure that the value of the materials, articles and animals in question of Germany shall be the fair value of work done or materials supplied by Germany, and that the claim made by the interested Power in respect of the damage so repaired by physical restoration shall be discharged to the extent of the proportion of the damage thus repaired bears to the whole of the damage thus claimed for.

6. As an immediate advance on account of the animals referred to in paragraph 2 (a) above, Germany undertakes to deliver in equal monthly instalments in the three months following the coming into force of the present Treaty the following quantities of live stock:

(1) To the French Government.
 500 stallions (3 to 7 years);
 30,000 fillies and mares (18 months to 7 years), Ardennes, Boulonnais or Belgian;
 2,000 bulls (18 months to 3 years);
 90,000 milch cows (2 to 6 years);
 1,000 rams;
 100,000 sheep;
 10,000 goats.

(2) To the Belgian Government.
 200 stallions (3 to 7 years), large Belgian type;
 5,000 mares (3 to 7 years), large Belgian type;
 100,000 fillies (18 months to 3 years), large Belgian type;
 2,000 bulls (18 months to 3 years);
 50,000 milch cows (2 to 6 years);
 40,000 heifers;
 100,000 rams;
 20,000 sheep;
 15,000 sows.

The animals delivered shall be of average health and condition.

To the extent that animals so delivered cannot be identified as animals taken away or seized, the value of such animals shall be credited against the reparation obligations of Germany in accordance with paragraph 5 of this Annex.

Without waiting for the decisions of the Commission referred to in paragraph 4 of this Annex to be taken, Germany must continue the delivery to France of the agricultural material referred to in Article III of the renewal dated January 16, 1919, of the Armistice.

ANNEX V.

1.

Germany accords the following options for the delivery of coal and derivatives of coal to the undermentioned signatories of the present Treaty.

Germany undertakes to deliver to France seven million tons of coal per year for ten years. In addition, Germany undertakes to deliver to France annually for a period not exceeding ten years an amount of coal equal to the difference between the annual production before the war of the coal mines of the Nord and Pas de Calais, destroyed as a result of the war, and the production of the mines of the same area during the years in question: such delivery not to exceed twenty million tons in any one year of the first five years, and eight million tons in any one year of the succeeding five years.

It is understood that due diligence will be exercised in the restoration of the destroyed mines in the Nord and the Pas de Calais.

2.

Germany undertakes to deliver to Belgium eight million tons of coal annually for ten years.

3.

Germany undertakes to deliver to Italy up to the following quantities of coal:

July 1919 to June 1920.....	4½ million tons, .
— 1920 — 1921.....	6 —
— 1921 — 1922.....	7½ —
— 1922 — 1923.....	8 —
— 1923 — 1924.....	8 —
and each of the following five years... 8½ —	

At least two-thirds of the actual deliveries to be land-borne.

4.

Germany further undertakes to deliver annually to Luxembourg, if directed by the Reparation Commission, a quantity of coal equal to the pre-war annual consumption of German coal in Luxembourg.

5.

The prices to be paid for coal delivered under these options shall be as follows:

(a) For overland delivery, including delivery by barge, the German pithead price to German nationals, plus the freight to French, Belgian, Italian or Luxembourg frontiers, provided that the pithead price does not exceed the pithead price of British coal for export. In the case of Belgian bunker coal, the price shall not exceed the Dutch bunker price.

Railroad and barge tariffs shall not be higher than the lowest similar rates paid in Germany.

(b) For sea delivery, the German export price f. o. b. German ports, or the British export price f. o. b. British ports, whichever may be lower.

The Allied and Associated Governments interested may demand the delivery, in place of coal, of metallurgical coke in the proportion of 3 tons of coke to 4 tons of coal.

6.

Germany undertakes to deliver to France, and to transport to the French frontier by rail or by water, the following products, during each of the three years following the coming into force of this Treaty:

Benzol	35,000 tons
Coal tar	50,000 tons
Sulphate of ammonia	30,000 tons

All or part of the coal tar may, at the option of the French Government, be replaced by corresponding quantities of products of distillation, such as light oils, heavy oils, anthracene, naphthalene or pitch.

7.

The price paid for coke and for the articles referred to in the preceding paragraph shall be the same as the price paid by German nationals under the same conditions of shipment to the French frontier or to the German ports, and shall be subject to any advantages which may be accorded similar products furnished to German nationals.

8.

The foregoing options shall be exercised through the intervention of the Reparation Commission, which, subject to the specific provisions hereof, shall have power to determine all questions relative to procedure and the quantities and nature of products, the quantity of coke which may be substituted for coal, and the times and modes of delivery and payment. In giving notice to the German Government of the foregoing options the Commission shall give at least 120 days' notice of deliveries to be made after January 1, 1920, and at least 30 days' notice of deliveries to be made between the coming into force of this Treaty

and January 1, 1920. Until Germany has received the demands referred to in this paragraph, the provisions of the Protocol of December 25, 1918 (Execution of Article VI of the Armistice of November 11, 1918) remain in force. The notice to be given to the German Government of the exercise of the right of substitution accorded by paragraphs 7 and 8 shall be such as the Reparation Commission may consider sufficient. If the Commission shall determine that the full exercise of the foregoing options would interfere unduly with the industrial requirements of Germany, the Commission is authorized to postpone or to cancel deliveries, and in so doing to settle all questions of priority; but the coal to replace coal from destroyed mines shall receive priority over other deliveries.

ANNEX VI.

1.

Germany accords to the Reparation Commission an option to require as part of reparation the delivery by Germany of such quantities and kinds of dyestuffs and chemical drugs as the Commission may designate, not exceeding 50 per cent. of the total stock of each and every kind of dyestuff and chemical drug in Germany or under German control at the date of the coming into force of the present Treaty.

This option shall be exercised within sixty days of the receipt by the Commission of such particulars as to stocks as may be considered necessary by the Commission.

2.

Germany further accords to the Reparation Commission an option to require delivery during the period from the date of the coming into force of the present Treaty until January 1, 1920, and during each period of six months thereafter until January 1, 1925, of any specified kind of dyestuff and chemical drug up to an amount not exceeding 25 per cent. of the German production of such dyestuffs and chemical drugs during the previous six months period. If in any case the production during such previous six months was, in the opinion of the Commission, less than normal, the amount required may be 25 per cent. of the normal production.

Such option shall be exercised within four weeks after the receipt of such particulars as to production and in such form as may be considered necessary by the Commission; these particulars shall be furnished by the German Government immediately after the expiration of each six months period.

3.

For dyestuffs and chemical drugs delivered under paragraph 1, the price shall be fixed by the Commission having regard to pre-war net export prices and to subsequent increases of cost.

For dyestuffs and chemical drugs delivered under paragraph 2, the price shall be fixed by the Commission having regard to pre-war net export prices and subsequent variations of cost, or the lowest net selling price of similar dyestuffs and chemical drugs to any other purchaser.

4.

All details, including mode and times of exercising the options, and making delivery, and all other questions arising under this arrangement, shall be determined by the Reparation Commission; the German Government will furnish to the Commission all necessary information and other assistance which it may require.

5.

The above expression "dyestuffs and chemical drugs" includes all synthetic dyes and drugs and intermediate or other products used in connection with dyeing, so far as they are manufactured for sale. The present arrangement shall also apply to cinchona bark and salts of quinine.

ANNEX VII.

Germany renounces on her own behalf and on behalf of her nationals in favour of the Principal Allied and Associated Powers all rights, titles or privileges of whatever nature in the submarine cables set out below, or in any portions thereof:

Emden-Vigo: from the Straits of Dover to off Vigo;
Emden-Brest: from off Cherbourg to Brest;
Emden-Tenerife: from off Dunkirk to off Tenerife;
Emden-Azores (1): from the Straits of Dover to Fayal;
Emden-Azores (2): from the Straits of Dover to Fayal;
Azores-New-York (1): from Fayal to New York;
Azores-New-York (2): from Fayal to the longitude of Halifax,
Tenerife-Monrovia: from off Tenerife to off Monrovia;
Monrovia-Lome:

from about.....

{ lat. 27° 30' N.;
{ long. 7° 40' W. of Greenwich;

to about.....

{ lat. 25° 20' N.;
{ long. 15° 30' W. of Greenwich;

and from about.....

{ lat. 3° 48' N.;
 { long. 0° 00',
 to Lome;
 Lome-Duala: from Lome to Duala;
 Monrovia-Pernambuco: from off Monrovia to off
 Pernambuco;
 Constantinople-Constanza: from Constantinople to
 Constanza;
 Yap-Shanghai, Yap-Guam, and Yap-Menado (Celebes):
 from Yap Island to Shanghai, from Yap Island to
 Guam Island, and from Yap Island to Menado.

The value of the above mentioned cables or portions thereof in so far as they are privately owned, calculated on the basis of the original cost less a suitable allowance for depreciation, shall be credited to Germany in the reparation account.

SECTION II.

SPECIAL PROVISIONS.

ARTICLE 245.

Within six months after the coming into force of the present Treaty the German Government must restore to the French Government the trophies, archives, historical souvenirs or works of art carried away from France by the German authorities in the course of the war of 1870-1871 and during this war in accordance with a list which will be communicated to it by the French Government; particularly the French flags taken in the course of the war of 1870-1871 and all the political papers taken by the German authorities on October 10, 1870, at the chateau of Corcy, near Brunoy (Seine-et-Oise) belonging at the time to Mr. Rouher, formerly Minister of State.

ARTICLE 246.

Within six months from the coming into force of the present Treaty, Germany will restore to His Majesty the King of the Hedjaz the original Koran or the Caliph Ottoman, which was removed from Medina by the Turkish authorities and is stated to have been presented to the ex-Emperor William II.

Within the same period Germany will hand over to His Britannic Majesty's Government the skull of the Sultan Mikwaha which was removed from the Protectorate of German East Africa and taken to Germany.

The delivery of the articles above referred to will be effected in such place and in such conditions as may be laid down by the Governments to which they are to be restored.

ARTICLE 247.

Germany undertakes to furnish to the University of Louvain, within three months after a request made by it and transmitted through the intervention of the Reparations Commission, many incunabula, printed books, maps and objects of collection corresponding in number and value to those destroyed in the burning by Germany of the Library of Louvain. All details regarding such replacement will be determined by the Reparations Commission. Germany undertakes to deliver to Belgium, through the Reparation Commission, within six months of the coming into force of the present Treaty, in order to enable Belgium to reconstitute two great artistic works:

- (1) The leaves of the triptych of the Mystic Lamb painted by the Van Eyck brothers, formerly in the Church of St. Bavon at Ghent, now in the Berlin Museum;
- (2) The leaves of the triptych of the Last Supper, painted by Dierick Bouts, formerly in the Church of St. Peter at Leinin, two of which are now in the Berlin Museum and two in the Old Pinakothek at Munich.

PART IX.

FINANCIAL CLAUSES.

ARTICLE 248.

Subject to such exceptions as the Reparation Commission may approve, a first charge upon all the assets and revenues of the German Empire existing on August 1, 1918, shall be the cost of reparation and all other costs arising under the present Treaty or any treaties or agreements supplementary thereto or under arrangements concluded between Germany and the Allied and Associated Powers during the Armistice or its extensions.

Up to May 1, 1921, the German Government shall not export or dispose of, and shall forbid the export or disposal of, gold without the previous approval of the Allied and Associated Powers acting through the Reparation Commission.

ARTICLE 249.

There shall be paid by the German Government the total cost of all armies of the Allied and Associated Governments in occupied German territory from the date of the signature of the Armistice of the coming into force of the present Treaty, including the cost of transport, maintenance, pay and allowances, salaries and wages, bedding, heating, lighting, clothing, equipment, harness and saddlery, armament and rolling-stock, air services, treatment of sick and wounded, veterinary and remount services, transport service of all kinds (such as by rail, sea or river, motor lorries), communications and correspondence, and in general the cost of all administrative or technical services the working of which is necessary for the training of troops and for keeping their numbers up to strength and preserving their military efficiency.

The cost of such liabilities under the above heads so far

as they relate to purchases or requisitions by the Allied and Associated Governments in the occupied territories shall be paid by the German Government to the Allied and Associated Governments in marks at the current or agreed rate of exchange. All other of the above costs shall be paid in gold marks.

ARTICLE 250.

Germany confirms the surrender of all material handed over to the Allied and Associated Powers in accordance with the Armistice of November 11, 1918, and subsequent Armistice Agreements, and recognises the title of the Allied and Associated Powers to such material.

There shall be credited to the German Government, against the sums due from it to the Allied and Associated Powers for reparation, the value, as assessed by the Reparation Commission, referred to in Article 233 of Part VIII (Reparation) of the present Treaty, of the material handed over in accordance with Article VII of the Armistice of November 11, 1918, or Article III of the Armistice Agreement of January 16, 1919, as well as of any other material handed over in accordance with the Armistice of November 11, 1918, and of subsequent Armistice Agreements, for which, as having non-military value, credit should in the judgment of the Reparation Commission be allowed to the German Government.

Property belonging to the Allied and Associated Governments or their nationals restored or surrendered under the Armistice Agreements in specie shall not be credited to the German Government.

ARTICLE 251.

The priority of the charges established by Article 248 shall, subject to the qualifications made below, be as follows:

- (a) The cost of the armies of occupation as defined under Article 249 during the Armistice and its extensions;
- (b) The cost of any armies of occupation as defined under Article 249 after the coming into force of the present Treaty;
- (c) The cost of reparation arising out of the present Treaty or any treaties or conventions supplementary thereto;
- (d) The cost of all other obligations incumbent on Germany under the Armistice Conventions or under this Treaty or any treaties or conventions supplementary thereto.

The payment for such supplies of food and raw material for Germany and such other payments as may be judged by the Allied and Associated Powers to be essential to enable Germany to meet her obligations in respect of reparation will have priority to the extent and upon the conditions which have been or may be determined by the Governments of the said Powers.

ARTICLE 252.

The right of each of the Allied and Associated Powers to dispose of enemy assets and property within its jurisdiction at the date of the coming into force of the present Treaty is not affected by the foregoing provisions.

ARTICLE 253.

Nothing in the foregoing provision shall prejudice in any manner the charges of mortgages lawfully effected in favour of the Allied or Associated Powers or their nationals respectively, before the date at which a state of war existed between Germany and the Allied or Associated Power concerned, by the German Empire or its constituent States, or by German nationals, on assets in their ownership at that date.

ARTICLE 254.

The Powers to which German territory is ceded shall, subject to the qualifications made in Article 255, undertake to pay:

- (1) A portion of the debt of the German Empire as it stood on August 1, 1914, calculated on the basis of the ratio between the average for the three financial years 1911, 1912, 1913, of such revenues of the German Empire as the Reparations Commission for the same years of such revenues of the whole German Empire as in the judgment of the Reparation Commission are best calculated to represent the relative ability of the respective territories to make payments;
- (2) A portion of the debt as it stood on August 1, 1914, of the German State to which the ceded territory belonged, to be determined in accordance with the principle stated above.

Such portions shall be determined by the Reparation Commission.

The method of discharging the obligation, both in respect of capital and of interest, so assumed shall be fixed by the Reparation Commission. Such method may take the form, *inter alia*, of the assumption by the Power to which the territory is ceded of Germany's liability for the German debt held by her nationals. But in the event of the method adopted involving any payments to the German Government, such payments shall be transferred to the Reparation Commission due of the sums due for reparation so long as any balance in respect of such sums remains unpaid.

ARTICLE 255.

- (1) As an exception to the above provision and inas-

much as in 1871 Germany refused to undertake any portion of the burden of the French debt, France shall be, in respect of Alsace-Lorraine, exempt from any payment under Article 254.

(2) In the case of Poland that portion of the debt which, in the opinion of the Reparation Commission, is attributable to the measures taken by the German and Prussian Governments for the German colonisation of Poland shall be excluded from the apportionment to be made under Article 254.

(3) In the case of all ceded territories other than Alsace-Lorraine, that portion of the debt of the German Empire or German States which, in the opinion of the Reparation Commission, represents expenditure by the Governments of the German Empire or States upon the Government properties referred to in Article 256, shall be excluded from the apportionment to be made under Article 254.

ARTICLE 256.

Powers to which German territory is ceded shall acquire all property and possessions situated therein belonging to the German Empire or to the German States, and the value of such acquisitions shall be fixed by the Reparation Commission, and paid by the State acquiring the territory to the Reparation Commission for the territory to the German Government on account of the sums due for reparation.

For the purposes of this Article the property and possessions of the German Empire and States shall be deemed to include all the property of the Crown, the Empire or the States, the private property of the former German Emperor and other Royal personages.

In view of the terms on which Alsace-Lorraine was ceded to Germany in 1871, France shall be exempt in respect thereof from making any payment or credit under this Article for any property or possessions of the German Empire or States situated therein.

Belgium also shall be exempt from making any payment or any credit under this Article for any property or possessions of the German Empire or States situated in the German territory ceded to Belgium under the present Treaty.

ARTICLE 257.

In the case of the former German territories, including colonies, protectorates or dependencies, administered by a Mandatory under Article 22 of Part X (League of Nations) of the present Treaty, neither the territory nor the Mandatory Power shall be charged with any portion of the debt of the German Empire or States.

All property and possessions belonging to the German Empire or to the German States situated in such territory shall be transferred with the territories to the Mandatory Power in its capacity as such and no payment shall be made nor any credit given to those Governments in consideration of this transfer.

For the purposes of this Article the property and possessions of the German Empire and of the German States shall be deemed to include all the property of the Crown, the Empire or the States and the private property of the former German Emperor and other Royal personages.

ARTICLE 258.

Germany renounces all rights accorded to her or her nationals by treaties, conventions or agreements, of whatsoever kind, to representation upon or participation in the control or administration of commissions, state banks, agencies or other financial or economic organisations of an international character, exercising powers of control or administration, and operating in any of the Allied or Associated States, or in Austria, Hungary, Bulgaria or Turkey or in the dependencies of these States, or in the former Russian Empire.

ARTICLE 259.

(1) Germany agrees to deliver within one month from the date of the coming into force of the present Treaty, to such authority as the Principal Allied and Associated Powers may designate, the sum in gold which was to be deposited in the Reichsbank in the name of the Council of the Administration of the Ottoman Public Debt as security for the first issue of the Turkish Government currency notes.

(2) Germany recognises her obligation to make annually for the period of twelve years the payments in gold for which provision is made in the German Treasury Bonds deposited by her from time to time in the name of the Council of the Administration of the Ottoman Public Debt as security for the second and subsequent issues of Turkish Government currency notes.

(3) Germany undertakes to deliver, within one month from the coming into force of the present Treaty, to such authority as the Principal Allied and Associated Powers may designate, the gold deposit constituted in the Reichsbank or elsewhere, representing the residue of the advance in gold agreed to on May 5, 1915, by the Council of the Administration of the Ottoman Public Debt to the Imperial Ottoman Government.

(4) Germany agrees to transfer to the Principal Allied and Associated Powers any title that she may have to the sum in gold and silver transferred by her to the Turkish Ministry of Finance in November, 1918, in anticipation of payment to be made in May, 1919, for the service of the Turkish Internal Loan.

(5) Germany undertakes to transfer to the Principal Allied and Associated Powers within a period of one month from the coming into force of the present Treaty, any sums in gold transferred as pledge or as collateral security to the

German Government or its nationals in connection with loans made by them to the Austro-Hungarian Government.

(6) Without prejudice to Article 262 of Part X (Economic Clauses) of the present Treaty, Germany confirms the renunciation provided for in Article XV of the Armistice of November 11, 1918, of any benefit disclosed by the Treaties of Bucharest and of Brest-Litovsk and by the treaties supplementary thereto.

Germany undertakes to transfer, either to Roumania or to the Principal Allied and Associated Powers as the case may be, all monetary instruments, specie, securities and negotiable instruments, or goods, which she has received under the aforesaid treaties.

The sum of money and all securities, instruments and goods of whatsoever nature, to be delivered, paid and transferred under the provisions of this Article, shall be disposed of by the Principal Allied and Associated Powers in a manner hereafter to be determined by those Powers.

ARTICLE 260.

Without prejudice to the renunciation of any rights by Germany on behalf of herself or of her nationals in the other provisions of the present Treaty, the Reparation Commission may within one year from the coming into force of the present Treaty demand that the German Government become possessed of any rights and interests of German nationals in any public utility undertaking or in any concession operating in Russia, China, Turkey, Austria, Hungary and Bulgaria, or in the possessions or dependencies of these States or in any territory formerly belonging to Germany or her allies, to be ceded by Germany or her allies to any Power or to be administered by any Power, and may require that the German Government transfer, within six months of the date of demand, all such rights and interests and any similar rights and interests the German Government may itself possess to the Reparation Commission.

Germany shall be responsible for indemnifying her nationals so dispossessed, and the Reparation Commission shall credit Germany, on account of sums due for reparation, with such sums in respect of the value of the transferred rights and interests as may be assessed by the Reparation Commission, and the German Government shall, within six months from the coming into force of the present Treaty, communicate to the Reparation Commission all such rights and interests, whether already granted, contingent or not yet exercised, and shall renounce on behalf of itself and its nationals in favour of the Allied and Associated Powers all such rights and interests which have not been so communicated.

ARTICLE 261.

Germany undertakes to transfer to the Allied and Associated Powers any claims she may have to payment of sums payable by the Governments of Austria, Hungary, Bulgaria or Turkey, and, in particular, any claims which may arise, now or hereafter, from the fulfilment of undertakings made by Germany during the war to those Governments.

ARTICLE 262.

Any monetary obligation due by Germany arising out of the present Treaty and expressed in terms of gold marks shall be payable at the option of the creditors in pounds sterling payable in London or in gold dollars of the United States of America payable in New York; gold francs payable in Paris; or gold lire payable in Rome.

For the purpose of this Article the gold coins mentioned above shall be defined as being of the weight and fineness of gold as enacted by law on January 1 1914.

ARTICLE 263.

Germany gives a guarantee to the Brazilian Government that all sums representing the sale of coffee belonging to the State of Sao Paulo in the ports of Hamburg, Bremen, Antwerp and Trieste, which were deposited with the Bank of Bleichröder at Berlin, shall be reimbursed together with interest at the rate or rates agreed upon by Germany with the Principal Allied and Associated Powers upon the transfer of the sums in question to the State of Sao Paulo at the proper time, guarantees also that the reimbursement shall be effected at the rate of exchange of the day of the deposit.

PART X.

ECONOMIC CLAUSES.

SECTION I.

COMMERCIAL RELATIONS.

CHAPTER I.

CUSTOMS REGULATIONS, DUTIES AND RESTRICTIONS.

ARTICLE 264.

Germany undertakes that goods the produce or manufacture of any one of the Allied or Associated States imported into German territory, from whatsoever place arriving, shall not be subjected to other or higher duties or charges (including internal charges) than those to which the like goods the produce or manufacture of any other such State or of any other foreign country are subject.

Germany will not maintain or impose any prohibition or restriction on the importation into German territory of any goods the produce or manufacture of any of the territories of any one of the Allied or Associated States, from whatsoever place arriving, which shall not equally extend to the importation of the like goods the produce or manufacture of any other such State or of any other foreign country.

ARTICLE 265.

Germany further undertakes that, in the matter of the régime applicable on importation, no discrimination against the commerce of any of the Allied and Associated States as compared with any other of the said States or any other foreign country shall be made, even by indirect means, such as customs regulations or procedure, methods of verification or analysis, conditions of payment of duties, tariff classification or interpretation, or the operation of monopolies.

ARTICLE 266.

In all that concerns exportation Germany undertakes that goods, natural products or manufactured articles, exported from German territory to the territories of any one of the Allied or Associated States, shall not be subjected to other or higher duties or charges (including internal charges) than those paid on the like goods exported to any other such State or to any other foreign country.

Germany will not maintain or impose any prohibition or restriction on the exportation of any goods sent from her territory to any one of the Allied or Associated States which shall not equally extend to the exportation of the like goods, natural products or manufactured articles, sent to any other such State or to any other foreign country.

ARTICLE 267.

Every favour, immunity or privilege in regard to the importation, exportation or transit of goods granted by Germany to any Allied or Associated State or to any other foreign country, whatever shall simultaneously and unconditionally, without request and without compensation, be extended to all the Allied and Associated States.

ARTICLE 268.

The provisions of Articles 264 to 267 inclusive of this Chapter and of Article 322 of Part XI (River Waterways and Railways) of the present Treaty are subject to the following exceptions:

(a) For a period of five years from the coming into force of the present Treaty, natural or manufactured products which both originate in and come from the territories of Alsace and Lorraine reunited to France shall, on importation into German customs territory, be exempt from all customs duty.

The French Government shall fix each year, by decree communicated to the German Government, the nature and amount of the products which shall enjoy this exemption.

The amount of each product which may be thus sent annually into Germany shall not exceed the average of the amounts sent annually in the years 1911-1913.

Further, during the period mentioned the German Government shall allow the free export from Germany, and the free re-importation into Germany, exempt from all customs duties and other charges (including internal charges), of yarns, tissues, and other textile materials or textile products of any kind and in any condition, sent from Germany into the territories of Alsace or Lorraine, to be subjected there to any finishing process, such as bleaching, dyeing, printing, mercerisation, gassing, twisting or dressing.

(b) During a period of three years from the coming into force of the present Treaty natural or manufactured products which both originate in and come from Polish territories which before the war were part of Germany shall, on importation into German customs territory, be exempt from all customs duty.

The Polish Government shall fix each year, by decree communicated to the German Government, the nature and amount of the products which shall enjoy this exemption.

The amount of each product which may be thus sent annually into Germany shall not exceed the average of the amounts sent annually in the years 1911-1913.

(c) The Allied and Associated Powers reserve the right to require Germany to accord freedom from customs duty on importation into German customs territory, to natural products and manufactured articles which both originate in and come from the Grand Duchy of Luxembourg, for a period of five years from the coming into force of the present Treaty.

The nature and amount of the products which shall enjoy the benefits of this régime shall be communicated each year to the German Government.

The amount of each product which may be thus sent annually into Germany shall not exceed the average of the amounts sent annually in the years 1911-1913.

ARTICLE 269.

During the first six months after the coming into force of the present Treaty, the duties imposed by Germany on imports from Allied and Associated States shall not be higher than the most favourable duties which were applied to imports into Germany on July 31, 1914.

During a further period of thirty months after the expiration of the first six months, this provision shall continue to be applied exclusively with regard to products to which, being enumerated in Section A of the First Category of the German Customs Tariff of December 25, 1902, enjoyed at the above-mentioned date (July 31, 1914) rates conventionalised by treaties with the Allied and Associated Powers, with the addition of all kinds of wine and vegetable oils, of artificial silk and of waxes of commerce, wool, whether or not they were the subject of special conventions before July 31, 1914.

ARTICLE 270.

The Allied and Associated Powers reserve the right to apply to German territory occupied by their troops a special customs régime as regards imports and exports, in the event of such a measure being necessary in their opinion in order to safeguard the economic interests of the population of these territories.

CHAPTER II.

SHIPPING.

ARTICLE 271.

As regards sea fishing, maritime coating trade, and maritime towage, vessels of the Allied and Associated Powers shall enjoy, in German territorial waters, the treatment accorded to vessels of the most favoured nation.

ARTICLE 272.

Germany agrees that, notwithstanding any stipulation to the contrary contained in the Conventions relating to the North Sea fisheries and liquor traffic, all rights of inspection and police shall, in the case of fishing-boats of the Allied Powers, be exercised solely by ships belonging to those Powers.

ARTICLE 273.

In the case of vessels of the Allied or Associated Powers, all classes of certificates or documents relating to the vessel, which were recognised as valid by Germany before the war, or which may hereafter be recognised as valid by the principal maritime States, shall be recognised by Germany as valid and as equivalent to the corresponding certificates issued to German vessels.

A similar recognition shall be accorded to the certificates and documents issued to their vessels by the Governments of new States, whether they have a sea-coast or not, provided that such certificates and documents shall be issued in conformity with the general practice observed in the principal maritime States.

The High Contracting Parties agree to recognise the flag flown by the vessels of an Allied or Associated Power having no sea-coast which are registered at some one specified place situated in its territory; such place shall serve as the port of registry of such vessels.

CHAPTER III.

UNFAIR COMPETITION.

ARTICLE 274.

Germany undertakes to adopt all the necessary legislative and administrative measures to protect goods the produce or manufacture of any one of the Allied and Associated Powers from all forms of unfair competition in commercial transactions.

Germany undertakes to prohibit and repress by seizure and by other appropriate remedies the importation, exportation, manufacture, distribution, sale or offering for sale in its territory of all goods bearing on themselves or their usual get-up or wrappings any marks, names, devices, or description whatsoever which are calculated to convey directly or indirectly a false indication of the origin, type, nature, or special characteristics of such goods.

ARTICLE 275.

Germany undertakes on condition that reciprocity is accorded in these matters to respect any law, or any administrative or judicial decision given in conformity with such law, in force in any Allied or Associated State and duly communicated to her by the proper authorities, defining or regulating the right to any regional appellation in respect of wine or spirits produced in the State to which the region belongs, or the conditions under which the use of any such appellation may be permitted; and the importation, exportation, manufacture, distribution, sale or offering for sale of products or articles bearing regional appellations inconsistent with any law or administrative or judicial decision by the German Government and repressed by the measures prescribed in the preceding Article.

CHAPTER IV.

TREATMENT OF NATIONALS OF ALLIED AND ASSOCIATED POWERS

ARTICLE 276.

Germany undertakes:

(a) Not to subject the nationals of the Allied and Associated Powers to any prohibition in regard to the exercise of occupations, professions, trade and industry, which shall not be equally applicable to all aliens without exception; and (b) Not to subject the nationals of the Allied and Associated Powers in regard to the rights referred to in paragraph (a) to any regulation or restriction which might contravene directly or indirectly the stipulations of the said paragraph, or which shall be either more disadvantageous than those which are applicable to nationals of the most favoured nation;

(c) Not to subject the nationals of the Allied and Associated Powers, their property, rights or interests, including companies and associations in which they are interested, to any charge, tax or impost, direct or indirect, other or higher than those which are or may be imposed on her own nationals or their property, rights or interests;

(d) Not to subject the nationals of any one of the Allied and Associated Powers to any restriction which was not applicable on July 31, 1914, to the nationals of such Powers unless such restriction is likewise imposed on her own nationals.

ARTICLE 277.

The nationals of the Allied and Associated Powers shall enjoy in German territory a constant protection for their persons and for their property, rights and interests, and shall have free access to the courts of law.

ARTICLE 278.

Germany undertakes to recognize any new nationality which may be acquired by her nationals under the laws of the Allied and Associated Powers and in accordance with the decisions of the competent authorities of these Powers pursuant to naturalisation laws or under treaty stipulations, and to regard such persons as having, in consequence of the acquisition of such new nationality, in all respects severed their allegiance to their country of origin.

ARTICLE 279.

The Allied and Associated Powers may appoint consular-general, consuls, vice-consuls, and consular agents in German towns and ports. Germany undertakes to approve the designation of the consular-general, consuls, vice-consuls, and consular agents, whose names shall be notified to her, and to admit them to the exercise of their functions in conformity with the usual rules and customs.

CHAPTER V.
GENERAL ARTICLES.

ARTICLE 280.

The obligations imposed on Germany by Chapter I and by Articles 271 and 272 of Chapter II above shall cease to have effect five years from the date of the coming into force of the present Treaty, unless otherwise provided in the text, or unless the Council of the League of Nations shall, at least twelve months before the expiration of that period, decide that these obligations shall be maintained for a further period, with or without amendment. Article 276 of Chapter IV shall remain in operation, with or without amendment, after the period of five years for such further period, if any, not exceeding five years, as may be determined by a majority of the Council of the League of Nations.

ARTICLE 281.

If the German Government engages in international trade, it shall not in respect thereof have or be deemed to have any rights, privileges or immunities of sovereignty.

SECTION II.
TREATIES.

ARTICLE 282.

From the coming into force of the present Treaty and subject to the provisions thereof the multilateral treaties, conventions and agreements of an economic or technical character enumerated below and in the subsequent Articles shall continue to be applied as between Germany and those of the Allied and Associated Powers party thereto:

- (1) Conventions of March 14, 1884, December 1, 1886, and March 23, 1887, and Final Protocol of July 7, 1887, regarding the protection of submarine cables.
- (2) Convention of October 1, 1903, regarding the international circulation of motor-cars.
- (3) Agreement of May 15, 1886, regarding the sealing of railway trucks subject to customs inspection, and Protocol of May 18, 1907.
- (4) Agreement of May 15, 1886, regarding the technical standardisation of railways.
- (5) Convention of July 5, 1890, regarding the publication of customs tariffs and the organisation of an International Union for the publication of customs tariffs.

(23) Convention of June 7, 1905, regarding the creation of an International Agricultural Institute at Rome.

(24) Conventions of November 3, 1881, and April 15, 1889, regarding precautionary measures against phylloxera.

(25) Convention of March 19, 1902, regarding the protection of birds useful to agriculture.

(26) Convention of June 12, 1902, as to the protection of minors.

ARTICLE 283.

From the coming into force of the present Treaty the High Contracting Parties shall apply the conventions and agreements hereinafter mentioned, in so far as concerns them, on condition that the special stipulations contained in this Article are fulfilled by Germany.

Postal Conventions:

Conventions and agreements of the Universal Postal Union concluded at Vienna, July 4, 1891.

Conventions and agreements of the Postal Union signed at Washington, June 15, 1897.

Conventions and agreements of the Postal Union signed at Rome, May 26, 1906.

Telegraphic Conventions:

International Telegraphic Conventions signed at St. Petersburg July 10-22, 1875.

Regulations and Tariffs drawn up by the International Telegraphic Conference, Lisbon, June 11, 1908.

Germany undertakes not to withhold her assent to the conclusion of the special arrangements referred to in the conventions and agreements relating to the Universal Postal Union and to the International Telegraphic Union, to which the said new States have adhered or may adhere.

ARTICLE 284.

From the coming into force of the present Treaty the High Contracting Parties shall apply, in so far as concerns them, the International Radio-Telegraphic Convention of July 5, 1912, on condition that Germany fulfils the provisional regulations which will be indicated to her by the Allied and Associated Powers.

If within five years after the coming into force of the present Treaty a new convention regulating international radio-telegraphic communications should have been concluded to take the place of the Convention of July 5, 1912, this new convention shall bind Germany, even if Germany should refuse either to take part in drawing up the convention, or to subscribe thereto.

This new convention will likewise replace the provisional regulations in force.

ARTICLE 285.

From the coming into force of the present Treaty, the High Contracting Parties shall apply in so far as concerns them and under the conditions stipulated in Article 272, the conventions hereinafter mentioned:

(1) The Conventions of May 6, 1882, and February 1, 1889, regulating the fisheries in the North Sea outside territorial waters.

(2) The Conventions and Protocols of November 16, 1887, February 14, 1893, and April 11, 1894, regarding the North Sea liquor traffic.

ARTICLE 286.

The International Convention of Paris of March 20, 1883, for the protection of industrial property, revised at Washington on June 2, 1911; and the International Convention of Berne of September 9, 1886, for the protection of literary and artistic works, revised at Berlin on November 13, 1908, and completed by the additional Protocol signed at Berne on March 20, 1914, will again come into effect as from the coming into force of the present Treaty, in so far as they are not affected or modified by the exceptions and restrictions resulting therefrom.

ARTICLE 287.

From the coming into force of the present Treaty the High Contracting Parties shall apply, in so far as concerns them, the Convention of the Hague of July 17, 1905, relating to civil procedure. This renewal, however, will not apply to France, Portugal and Roumania.

ARTICLE 288.

The special rights and privileges granted to Germany by Article 3 of the Convention of December 2, 1899, relating to Saragosa shall be considered to have terminated on August 4, 1914.

ARTICLE 289.

Each of the Allied or Associated Powers, being guided by the general principles or special provisions of the present Treaty, shall notify to Germany the bilateral treaties or conventions which such Allied or Associated Power wishes to revive with Germany.

The notification referred to in the present Article shall be made either directly or through the intermediary of another Power. Receipt thereof shall be acknowledged in writing by Germany. The date of the revival shall be that of the notification.

The Allied and Associated Powers undertake among themselves not to revive with Germany any conventions or treaties which are not in accordance with the terms of the present Treaty.

The notification shall mention any provisions of the said

The Glass Gallery in the Palace at Versailles, France, with Allied and German Peace Delegates assembled to sign the German Peace Treaty, June 28, 1919.

conventions and treaties which, not being in accordance with the terms of the present Treaty, shall not be considered as ratified.

In case of any difference of opinion, the League of Nations will be called on to decide.

A period of six months from the coming into force of the present Treaty is allowed to the Allied and Associated Powers within which to make the notification.

Only those bilateral treaties and conventions which have been the subject of such a notification shall be revived between the Allied and Associated Powers and Germany; all the others are and shall remain abrogated.

Only those multilateral treaties and conventions or conventions existing between all the Allied and Associated Powers signatories to the present Treaty and Germany, even if the said Allied and Associated Powers have not been in a state of war with Germany.

ARTICLE 290.

Germany recognises that all the treaties, conventions or agreements which she has concluded with Austria, Hungary, Bulgaria or Turkey since August 1, 1914, until the coming into force of the present Treaty are and remain abrogated by the present Treaty.

ARTICLE 291.

Germany undertakes to secure to the Allied and Associated Powers, and to the officials and nationals of the said Powers, the enjoyment of all the rights and advantages of any kind which she may have granted to Austria, Hungary, Bulgaria or Turkey, or to the officials and nationals of these States by treaties, conventions or arrangements concluded before August 1, 1914, so long as those treaties, conventions or arrangements remain in force.

The Allied and Associated Powers reserve the right to accept or not the enjoyment of these rights and advantages.

ARTICLE 292.

Germany recognises that all treaties, conventions or arrangements which she concluded with Russia, or with any State or Government of which the territory previously formed a part of Russia, or with Roumania, before August 1, 1914, or after that date until coming into force of the present Treaty, are and shall remain abrogated.

ARTICLE 293.

Should an Allied or Associated Power, Russia, or a State or Government of which the territory formerly constituted a part of Russia, have been forced since August 1, 1914, by reason of military occupation or by any other means or for any other cause, to grant or to allow to be granted by the said Power to any individual, firm or corporation, privileges and favours of any kind to Germany or to a German national, such concessions, privileges and favours are *ipso facto* annulled by the present Treaty.

No claims or indemnities which may result from this annulment shall be charged against the Allied or Associated Powers or the Powers, States, Governments or public authorities which are released from their engagements by the present Article.

ARTICLE 294.

From the coming into force of the present Treaty Germany undertakes to give the Allied and Associated Powers and their nationals the benefit *ipso facto* of the rights advantages of any kind which she has granted by treaties, conventions, or arrangements to non-belligerent States or their nationals since August 1, 1914, until the coming into force of the present Treaty, so long as those treaties, conventions or arrangements remain in force.

ARTICLE 295.

Those of the High Contracting Parties who have not yet signed, or who have signed but not yet ratified, the Opium Convention signed at The Hague on January 23, 1912, agree to bring the said Convention into force, and for this purpose to enact the necessary legislation without delay and, in any case within a period of twelve months from the coming into force of the present Treaty.

Furthermore, they agree that ratification of the present Treaty should in the case of Powers which have not yet ratified the Opium Convention be deemed in all respects equivalent to the ratification of that Convention and to the signature of the Special Protocol which was opened at The Hague in accordance with the resolutions adopted by the Third Opium Conference in 1914 for bringing the said Convention into force.

For this purpose the Government of the French Republic will communicate to the Government of the Netherlands a certified copy of the protocol of the deposit of ratifications of the present Treaty, and request the Government of the Netherlands to accept and deposit the said certified copy as if it were a deposit of ratifications of the Opium Convention and a signature of the Additional Protocol of 1914.

SECTION III.

DEBTS.

ARTICLE 296.

There shall be settled through the intervention of clearing offices to be established by each of the High Contracting Parties within three months from the notification referred to in paragraph (e) hereafter the following classes of pecuniary obligations:

(1) Debts payable before the war and due by a national of one of the Contracting Powers, residing within its terri-

tory, to a national of an Opposing Power, residing within its territory;

(2) Debts which became payable during the war to nationals of one Contracting Power residing within its territory and arose out of transactions or contracts with the nationals of an Opposing Power, resident within its territory, of which the total or partial execution was suspended on account of the declaration of war.

(3) Interest which has accrued due before and during the war to a national of one of the Contracting Powers in respect of securities issued by an Opposing Power, provided that the payment of interest on such securities to the national of that Power or to neutrals has not been suspended during the war;

(4) Capital sums which have become payable before and during the war to nationals of one of the Contracting Powers in respect of securities issued by one of the Opposing Powers, provided that the payment of such capital sums to nationals of that Power or to neutrals has not been suspended during the war.

The proceeds of liquidation of enemy property, rights and interests mentioned in Section I and in the Annex thereto will be accounted for through the Clearing Offices, in the currency and at the rate of exchange hereinafter provided in paragraph (d), and disposed of by them under the conditions provided by the said Section and Annex.

The settlements provided for in this Article shall be effected according to the following principles and in accordance with the Annex to this Section:

(a) Each of the High Contracting Parties shall prohibit, as from the coming into force of the present Treaty, both the payment of debts and the acceptance of payment of such debts, and also all communications between the interested parties with regard to the settlement of the said debts otherwise than through the Clearing Offices;

(b) Each of the High Contracting Parties shall be responsible for the payment of such debts due to its nationals, except in the cases where before the war the debtor was in a state of bankruptcy or failure, or had given formal indication of insolvency or where the debt was due by a company whose business has been liquidated under court supervision during the war, or where the debts due by the inhabitants of territory invaded or occupied by the enemy before the Armistice will not be guaranteed by the States of which those territories form part;

(c) The sums due to the nationals of one of the High Contracting Parties by the nationals of an Opposing State will be debited to the Clearing Office of the country of the debtor, and paid to the creditor by the Clearing Office of the country of the creditor;

(d) Debts shall be paid or credited in the currency of such one of the Allied and Associated Powers, or protectorates, or the British Dominions or India, as may be concerned, if the debts are payable in some other currency they shall be paid or credited in the currency of the country concerned, whether an Allied or Associated Power, Colony, Protectorate, British Dominion or India, at the pre-war rate of exchange.

For the purpose of this provision the pre-war rate of exchange shall be defined as the average cable transfer rate prevailing in the Allied or Associated country concerned during the month immediately preceding the outbreak of war between the said country concerned and Germany.

If a contract provides for a fixed rate of exchange governing the conversion of the currency in which the debt is stated into the currency of the Allied or Associated country concerned, then the above provisions concerning the rate of exchange shall not apply.

In the case of new States the currency in which and the rate of exchange at which debts shall be paid or credited shall be determined by the Reparation Commission provided for in Part VIII (Reparation);

(e) The provisions of this Article and of the Annex hereto shall not apply as between Germany on the one hand and any one of the Allied and Associated Powers, their colonies or protectorates, or any one of the British Dominions or India on the other hand, unless within a period of one month from the deposit of the ratification of the present Treaty by the Power in question, or of the ratification on behalf of such Dominion or of India, notice to that effect is given to Germany by the Government of such Allied or Associated Power or of such Dominion or of India as the case may be;

(f) The Allied and Associated Powers who have adopted this Article and the Annex hereto may agree between themselves to apply them to their respective nationals established in their territory so far as regards matters between their nationals and German nationals. In this case the payments made by application of this provision will be subject to arrangements between the Allied and Associated Clearing Offices concerned.

ANNEX.

1.

Each of the High Contracting Parties will, within three months from the notification provided for in Article 296, paragraph (e), establish a Clearing Office for the collection and payment of enemy debts.

Local Clearing Offices may be established for any particular portion of the territory of the High Contracting Parties. Such local Clearing Offices may perform all the functions of a central Clearing Office in their respective districts, except that all transactions with the Clearing Office in the Opposing State must be effected through the central Clearing Office.

2. In this Annex the peculiar obligations referred to in the first paragraph of Article 296 are described "as enemy debts", the persons from whom the same are due as "enemy debtors", the persons to whom they are due as "enemy creditors", the Clearing Office in the country of the creditor is called the "Creditor Clearing Office" and the Clearing Office in the country of the debtor is called the "Debtor Clearing Office."

3. The High Contracting Parties will subject contraventions of paragraph (a) of this Article 296 to the same penalties as are at present provided by their legislation for trading with the enemy. They will similarly prohibit within their territory all legal processes relating to payment of enemy debts, except in accordance with the provisions of this Annex.

The Government guarantee specified in paragraph (b) of Article 296 shall take effect whenever, for any reason, a debt shall not be recoverable, except in a case where at the date of the outbreak of war the debt was barred by the laws of prescription in force in the country of the debtor, or where the debtor was at that time in a state of bankruptcy or failure or had given formal indication of insolvency, or where the debt was due by a company whose business has been liquidated under emergency legislation during the war. In such case the procedure specified by this Annex shall apply to payment of the dividends.

The terms "bankruptcy" and "failure" refer to the application of legislation providing for such juridical conditions. The expression "formal indication of insolvency" bears the same meaning as it has in English law.

4. Creditors shall give notice to the Creditor Clearing Office within six months of its establishment of debts due to them, and shall register the Clearing Office with any documents and information required of them.

The High Contracting Parties will take all suitable measures to trace and punish collusion between enemy creditors and debtors. The Clearing Office will communicate to one another any evidence or information which might help to the discovery and punishment of such collusion.

The High Contracting Parties will facilitate as much as possible postal and telegraphic communication at the expense of the parties concerned and through the intervention of the Clearing Offices between debtors and creditors desirous of coming to an agreement as to the amount of their debt.

5. The Creditor Clearing Office will notify the Debtor Clearing Office of all debts declared to it. The Debtor Clearing Office will, in due course, inform the Creditor Clearing Office which debts are admitted and which debts are contested. In the latter case, the Debtor Clearing Office will give the grounds for the non-admission of debt.

6. When a debt has been admitted, in whole or in part, the Debtor Clearing Office will at once credit the Creditor Clearing Office with the amount admitted, and at the same time notify it of such credit.

7. The debt shall be deemed to be admitted in full and shall be credited forthwith to the Creditor Clearing Office unless within three months from the receipt of the notification or such longer time as may be agreed to by the Creditor Clearing Office notice has been given by the Debtor Clearing Office that it is not admitted.

8. When the whole or part of a debt is not admitted the two Clearing Offices will examine into the matter jointly and will endeavor to bring the parties to an agreement.

9. The Creditor Clearing Office will pay to the individual creditor the sums credited to it out of the funds placed at its disposal by the Government in its country and in accordance with the conditions fixed by the said Government, retaining any sums considered necessary to cover risks, expense or commissions.

10. Any person having claimed payment of an enemy debt which is not admitted in whole or in part shall pay to the clearing office, by way of fine, interest at 5 per cent. on the part not admitted. Any person having unduly refused to admit the whole or part of a debt claimed from him shall pay, by way of fine, interest at 5 per cent. on the amount which he refused to admit, and such refusal shall be disallowed.

Such interest shall run from the date of expiration of the period provided for in paragraph 7 until the date on which the claim shall have been disallowed or the debt paid.

Each Clearing Office shall, in so far as it is concerned take steps to collect the fines above provided for, and will be responsible if such fines cannot be collected.

The fines will be credited to the other Clearing Office, which shall retain them as a contribution towards the cost of carrying out the present provisions.

11. The balance between the Clearing Offices shall be struck monthly and the credit balance paid in cash by the debtor State within a week.

Nevertheless, any credit balances which may be due by one or more of the Allied and Associated Powers shall be retained until complete payment shall have been effected of the sums due to the Allied and Associated Powers or their nationals on account of the war.

12. To facilitate discussion between the Clearing Offices each of them shall have a representative at the place where the other is established.

13. Except for special reasons all discussions in regard to claims will, so far as possible, take place at the Debtor Clearing Office.

14. In conformity with Article 296, paragraph (b), the High Contracting Parties are responsible for the payment of the enemy debts owing by their nationals.

The Debtor Clearing Office will therefore credit the Creditor Clearing Office with all debts admitted, even in case of inability to collect them from the individual debtor. The Governments concerned will, nevertheless, invest their respective Clearing Offices with all necessary powers for the recovery of debts which have been admitted.

As an exception, the admitted debts owing by persons having suffered injury from acts of war shall only be credited to the Creditor Clearing Office when the compensation due to the person concerned in respect of such injury shall have been paid.

15. Each Government will defray the expenses of the Clearing Office set up in its territory, including the salaries of the staff.

16. Where the two Clearing Offices are unable to agree whether a debt claimed is due, or in case of a difference between an enemy debtor and an enemy creditor or between the Clearing Offices, the dispute shall either be referred to arbitration if the parties so agree under conditions fixed by agreement between them, or referred to the Mixed Arbitral Tribunal provided for in Section VI hereafter.

At the request of the Creditor Clearing Office the dispute may, however, be submitted to the jurisdiction of the Courts of the place of domicile of the debtor.

17. Recovery of sums found by the Mixed Arbitral Tribunal, the Court, or the Arbitration Tribunal to be due shall be effected through the Clearing Offices as if these sums were debts admitted by the Debtor Clearing Office.

18. Each of the Governments concerned shall appoint an agent who will be responsible for the presentation to the Mixed Arbitral Tribunal of the cases conducted on behalf of its Clearing Office. This agent will exercise a general control over the representatives or counsel employed by its nationals.

Decisions will be arrived at on documentary evidence, but it will be open to the Tribunal to hear the parties in person, or according to their preference by their representatives appointed by the two Governments, or by the agent referred to above, who shall be competent to intervene along with the party or to re-open and maintain a claim abandoned by the same.

19. The Clearing Offices concerned will lay before the Mixed Arbitral Tribunal all the information and documents in their possession, so as to enable the Tribunal to decide rapidly on the cases which are brought before it.

20. Where one of the parties concerned appeals against the joint decision of the two Clearing Offices he shall make a deposit against the costs, which deposit shall only be refunded when the first judgment is modified in favour of the appellant and in proportion to the success he may attain, his opponent in case of such a refund being required to pay an equivalent proportion of the costs and expenses. Security accepted by the Tribunal may be substituted for a deposit.

A fee of 5 per cent. of the amount in dispute shall be charged in respect of all cases brought before the Tribunal. This fee shall, unless the Tribunal directs otherwise, be borne by the unsuccessful party. Such fee shall be added to the deposit referred to. It is also independent of the security.

The Tribunal may award to one of the parties a sum in respect of the expenses of the proceedings.

Any sum payable under this paragraph shall be credited to the Clearing Office of the successful party as a separate item.

21. With a view to the rapid settlement of claims, due regard shall be paid in the appointment of all persons connected with the Clearing Offices or with the Mixed Arbitral Tribunal to their knowledge of the language of the other country concerned.

Each of the Clearing Offices will be at liberty to correspond with the other and to forward documents in its own language.

22. Subject to any special agreement to the contrary between the Governments concerned, debts shall carry interest in accordance with the following provisions:

Interest shall not be payable on sums of money due by way of dividend, interest or other periodic payments which themselves represent interest on capital.

The rate of interest shall be 5 per cent. per annum except in cases where, by contract, law or custom, the creditor is entitled to a different rate or a different rate. In such cases the rate to which he is entitled shall prevail.

Interest shall run from the date of commencement of

hostilities (or, if the sum of money to be recovered fell due during the war, from the date at which it fell due) until the sum is credited to the Clearing Office of the creditor.

Sum due by way of interest shall be treated as debts admitted by the Clearing Offices and shall be credited to the Creditor Clearing Office in the same way as such debts.

23.

Where by decision of the Clearing Offices or the Mixed Arbitral Tribunal a claim is held not to fall within Article 236, the creditor shall be at liberty to prosecute the claim before the Courts or to take such other proceedings as may be open to him.

The presentation of a claim to the Clearing Office suspends the operation of any period of prescription.

24.

The High Contracting Parties agree to regard the decisions of the Mixed Arbitral Tribunal as final and conclusive, and to render them binding upon their nationals.

25.

In any case where a Creditor Clearing Office declines to notify a claim to the Debtor Clearing Office, or to take any step provided for in this Annex, intended to make effective in whole or in part a request of which it has received due notice, the enemy creditor shall be entitled to receive from the Clearing Office a certificate setting out the amount of the claim, and shall then be entitled to prosecute the claim before the courts or to take such other proceedings as may be open to him.

SECTION IV.

PROPERTY, RIGHTS AND INTERESTS.

ARTICLE 297.

The question of private property, rights and interests in an enemy country shall be settled according to the principles laid down in this Section and to the provisions of the Annex hereto.

(a) The exceptional war measures and measures of transfer (defined in paragraph 3 of the Annex hereto) taken by Germany with respect to the property, rights and interests of nationals of Allied or Associated Powers, including companies and associations in which they are interested when liquidation has not yet been completed, shall be immediately annulled or stayed and the property, rights and interests concerned restored to their owners, who shall enjoy full rights therein in accordance with the provisions of Article 298.

Subject to any contrary stipulations which may be provided for in the present Treaty, the Allied and Associated Powers reserve the right to retain and liquidate all property, rights and interests belonging at the date of the coming into force of the present Treaty to German nationals, or companies controlled by them within their territories, colonies, possessions and protectorates, including territories ceded to them by the present Treaty.

The liquidation shall be carried out in accordance with the laws of the Allied or Associated State concerned, and the measure of transfer of the present Treaty with respect to property, rights or interests nor to subject them to any charge without the consent of that State.

German nationals who acquire *ipso facto* the nationality of an Allied or Associated Power in accordance with the provisions of the present Treaty will not be considered as German nationals within the meaning of this paragraph.

(c) The price or the amount of compensation in respect of the exercise of the right referred to in the preceding paragraph (b) will be fixed in accordance with the method of sale or valuation adopted by the laws of the country in which the property has been retained or liquidated.

(d) As between the Allied and Associated Powers or their nationals on the one hand and Germany or her nationals on the other hand, all measures of transfer or of such measures as defined in paragraphs 1 and 3 of the Annex hereto shall be considered as final and binding upon all persons except as regards the reservations laid down in the present Treaty.

(e) The nationals of Allied and Associated Powers shall be entitled to compensation in respect of damage or injury inflicted upon their property, rights or interests, including any company or association in which they are interested, in German territory as it existed on August 1, 1914, by the application either of the exceptional war measures or measures of transfer mentioned in paragraphs 1 and 3 of the Annex hereto. The claims made in this respect by such nationals shall be investigated, and the total of the compensation shall be determined by the Mixed Arbitral Tribunal provided for in Section VI or by an Arbitrator appointed by that Tribunal. This compensation shall be borne by Germany, and may be charged upon the property of German nationals within the territory of the creditor in accordance with the laws of that State. This property may be constituted as a pledge for enemy liabilities under the conditions fixed by paragraph 4 of the Annex hereto. The payment of this compensation may be made by the Allied or Associated State, and the amount will be limited to Germany.

Whenever a national of an Allied or Associated Power is entitled to property which has been subjected to a measure of transfer in German territory and expresses a desire for its restitution, his claim for compensation in accordance with paragraph (e) shall be satisfied by the application of the said property if it still exists in specie.

In such case Germany shall take all necessary steps to restore the evicted owner to the possession of his property,

free from all encumbrances or burdens with which it may have been charged after the liquidation, and to indemnify all third parties injured by the restitution.

If the restitution provided for in this paragraph cannot be effected, private agreements arranged by the intermediation of the Powers concerned or the Clearing Offices provided for in the Annex to Section III may be made, in order to secure that the national of the Allied or Associated Power may secure compensation for the injury referred to in paragraph (e) by the grant of advantages or equivalents which he agrees to accept in place of the property, rights or interests of which he was deprived.

Through restitution in accordance with this Article, the price or the amount of compensation fixed by the application of paragraph (e) will be reduced by the actual value of the property restored, account being taken of compensation in respect of loss of use of the property.

(g) The rights conferred by paragraph (f) are reserved to owners who are nationals of Allied or Associated Powers within whose territory legislative measures prescribing the general liquidation of enemy property, rights or interests were not applied before the signature of the Armistice.

(h) Except in cases where, by application of paragraph (f), restitutions in specie have been made, the net proceeds of sales of enemy property, rights or interests wherever situated carried out either by virtue of war legislation, or by application of the present Article, of the national of the Allied or Associated Power shall be dealt with as follows:

(1) As regards Powers adopting Section III and the Annex thereto, the said proceeds and cash assets shall be credited to the Power of which the owner is a national, through the Clearing Office existing in that country; any credit balance in favour of Germany resulting therefrom shall be dealt with as provided in Article 243.

(2) As regards Powers not adopting Section III and the Annex thereto, the proceeds of the property, rights and interests and the cash assets of the national of the Allied or Associated Powers held by Germany shall be paid immediately to the person entitled thereto or to his Government; the proceeds of the property, rights and interests, and the cash assets of German nationals received by an Allied or Associated Power shall be subject to the laws of that Power in accordance with its laws and regulations and may be applied in payment of the claims and debts defined by this Article or paragraph 4 of the Annex hereto. Any property, rights or interests or proceeds thereof not retained by the said Allied or Associated Power and if retained the cash value thereof shall be dealt with as provided in Article 243.

In the case of liquidations effected in new States, which are signatories to the present Treaty, the national of an Allied or Associated Power in such States which are not entitled to share in the reparation payments to be made by Germany, the proceeds of liquidations effected by such States shall, subject to the rights of the Reparation Commission under the present Treaty, particularly under Articles 256 and 260, be paid direct to the owner. If on the application of that owner, the Mixed Arbitral Tribunal, provided for by Section VI of this Part, or an arbitrator appointed by that Tribunal, is satisfied that the conditions of the sale or measures taken by the Government of the State in question or its general legislation were unfairly prejudicial to the price obtained, they shall have discretion to award to the owner equitable compensation to be paid by that State.

(i) Germany undertakes to compensate her nationals in respect of the sale or retention of their property, rights or interests in Allied or Associated States.

(j) The amount of all taxes and imposts upon capital levied or to be levied by Germany on the property, rights and interests of the nationals of the Allied or Associated Powers from November 1, 1918, until three months from the coming into force of the present Treaty, or, in the case of property, rights or interests which have been subjected to exceptional measures of war, until restitution in accordance with the present Treaty, shall be restored to the owners.

ARTICLE 298.

Germany undertakes, with regard to the property, rights and interests, including companies and associations in which they were interested, restored to nationals of Allied and Associated Powers in accordance with the provisions of Article 297, paragraph (a) or (b):

(a) to restore and maintain, except as expressly provided in the present Treaty, the property, rights and interests of the nationals of Allied or Associated Powers in the legal position obtaining in respect of the property, rights and interests of German nationals under the laws in force before the war;

(b) Not to subject the property, rights or interests of the nationals of the Allied or Associated Powers to any measure in derogation of property rights which are not applied equally to the property, rights and interests of German nationals, and to pay adequate compensation in the application of these measures.

ANNEX.

In accordance with the provisions of Article 297, paragraph (d), the validity of vesting orders and of orders for the winding up of businesses or companies, and of any other orders or decisions of the courts, or of the courts or any department of the Government of any of the High Contracting Parties made or given, or purporting to be made or given, in pursuance of war legislation with re-

gard to enemy property, rights and interests is confirmed. The interests of all persons shall be regarded as having been effectively dealt with by any order, direction, decision or instruction dealing with property in which they may be interested, whether or not such interests are specifically mentioned in the order, direction, decision, or instruction. No question shall be raised as to the regularity of a transfer of any property, rights or interests dealt with in pursuance of any such order, direction, decision or instruction. Every action taken with regard to any property, business, or company, whether as regards its investigation, sequestration, compulsory administration, liquidation, supervision or winding up, the sale or management of property, rights or interests, the collection or discharge of debts, the payment of costs, charges or expenses, or any other matter whatsoever, in pursuance of orders, directions, decisions or instructions of any court or of any department of the Government of any of the High Contracting Parties, made or given, or purporting to be made or given, in pursuance of war legislation with regard to enemy property, rights or interests, is confirmed. It is provided that the provisions of this paragraph shall not be held to prejudice the titles to property heretofore acquired in good faith and for value and in accordance with the laws of the country in which the property is situated by nationals of the Allied and Associated Powers.

The provisions of this paragraph do not apply to such of the above-mentioned measures as have been taken by the German authorities in invaded or occupied territory, nor to such of the above-mentioned measures as have been taken by Germany or the German authorities since November 11, 1918, all of which shall be void.

2.

No claim or action shall be made or brought against any Allied or Associated Power or against any person acting on behalf of or under the direction of any legal authority or Department of the Government of any Allied or Associated Power or by any German national wherever residing in respect of any act or omission with regard to his property, rights or interests during the war or in preparation for the war. Similarly no claim or action shall be made or brought against any person in respect of any act or omission under or in accordance with the exceptional war measures, laws or regulations of any Allied or Associated Power.

3.

In Article 297 and this Annex the expression "exceptional war measures" includes measures of arrests, legislative, administrative, judicial or others, that have been taken or will be taken hereafter with regard to enemy property, and which have had or will have the effect of removing from the proprietors the power of disposition over their property, though without the character of such as those of sequestration, or of compulsory administration, and of seizure; or measures which have had or will have as an object the seizure of, the use of, or the interference with enemy assets, for whatsoever motive, under whatsoever form or in whatsoever place. Acts in the execution of these measures include all detentions, instructions, orders or decrees of Government departments or courts applying these measures to enemy property, as well as acts performed by any person connected with the administration or the supervision of enemy property, such as the payment of debts, the collecting of credits, the payment of any costs, charges or expenses, or the collecting of fees.

Measures of transfer are those which have affected or will affect the ownership of enemy property by transferring it in whole or in part to a person other than the enemy owner, and without his consent, such as measures directing the sale, liquidation, or devolution of ownership in enemy property, or the cancelling of titles or securities.

4.

All property, rights and interests of German nationals within the territory of any Allied or Associated Power and the net proceeds of their sale, liquidation or other dealing therewith may be charged by that Allied or Associated Power in the first place with payment of amounts due in respect of claims by the nationals of that Allied or Associated Power with regard to their property, rights and interests, including companies and associations in which they are interested, in German territory, or debts owing to them by German nationals, and with payment of claims growing out of acts committed by the German Government or any German authorities since July 31, 1914, and before that Allied or Associated Power entered into the war. The amount of such claims may be assessed by an arbitrator appointed by Mr. Gustave Ador. If he is willing, or if no such appointment is made, by him or any arbitrator appointed by the Mixed Arbitral Tribunal provided for in Section VI. They may be charged in the second place with payment of the amounts due in respect of claims by the nationals of such Allied or Associated Power with regard to their property, rights and interests in the territory of other enemy Powers, in so far as those claims are otherwise unsatisfied.

5.

Notwithstanding the provisions of Article 297, where immediately before the outbreak of war a company incorporated in an Allied or Associated Power had been merged with another company and the latter had been incorporated in Germany to the use of trade-marks in third countries, or enjoyed the use in common with such company of unique means of reproduction of goods or articles for sale in third countries, the former company shall have the right to use these trade-marks in third countries to the exclusion of the Ger-

man company, and these unique means of reproduction shall be handed over to the former company, notwithstanding any action taken under German war legislation with regard to the latter company or its business, industrial property or shares. Nevertheless, the former company, if requested, shall deliver the latter company derivative copies concerning the continuation of reproduction of articles for use within German territory.

6.

Up to the time when restitution is carried out in accordance with Article 297, Germany is responsible for the conservation of property, rights and interests of the nationals of Allied or Associated Powers, including companies and associations in which they are interested, that have been subjected by her to exceptional war measures.

Within one year from the coming into force of the present Treaty the Allied or Associated Powers will specify the property, rights and interests over which they intend to exercise the right provided in Article 297, paragraph (f).

The restitution provided in Article 297 will be carried out by order of the German Government or of the authorities which have been substituted for it. Detailed accounts of the action of administrators shall be furnished to the interested Powers by the German Government upon request, which may be made at any time after the coming into force of the present Treaty.

9.

Until completion of the liquidation provided for by Article 297, paragraph (g), the property, rights and interests of German nationals will continue to be subject to exceptional war measures that have been or will be taken with regard to them.

10.

Germany will, within six months from the coming into force of the present Treaty, deliver to each Allied or Associated Power all securities, certificates, deeds, or other documents of title held by its nationals and relating to property, rights or interests situated in the territory of that Allied or Associated Power, including any shares, stock, debenture, debenture stock, or other obligations of any company incorporated in accordance with the laws of that Power.

Germany will at any time on demand of any Allied or Associated Power furnish such information as may be required by that Power with regard to the property, rights and interests of German nationals within the territory of such Allied or Associated Power, or with regard to any transactions concerning such property, rights or interests effected since July 1, 1914.

11.

The expression "cash assets" includes all deposits or funds established before or after the declaration of war, as well as all assets coming from deposits, revenues, or profits of enemy administrators, securities, or accounts from funds placed on deposit or otherwise, but does not include sums belonging to the Allied or Associated Powers or to their component States, Provinces, or Municipalities.

12.

All investments whatsoever effected with the cash assets of nationals of the High Contracting Parties, including companies and associations in which such nationals were interested, by persons responsible for the administration of enemy properties or having control over such administration, or by order of such persons or of any authority whatsoever shall be annulled. These cash assets shall be accounted for irrespective of any such investment.

13.

Within one month from the coming into force of the present Treaty, or on demand at any time, Germany will deliver to the Allied or Associated Powers all accounts, vouchers, records, documents and information of any kind which may be within German territory, and which concern the property, rights and interests of the nationals of those Powers, including companies and associations in which they are interested, that have been subjected to an exceptional war measure, or to a measure of transfer either in German territory or in territory occupied by Germany or her allies.

The controllers, supervisors, managers, administrators, sequestrators, liquidators and receivers shall be personally responsible under guarantee of the German Government for the immediate delivery in full of these accounts and documents, and for their accuracy.

14.

The provisions of Article 297 and this Annex relating to property, rights and interests in an enemy country, and the proceeds of the liquidation thereof, apply to debts, credits and account, Section III regulating only the method of payment.

In the settlement of matters provided for in Article 297 between Germany and the Allied or Associated States, their colonies or protectorates, or any one of the British Dominions or India, in respect of any of which a declaration shall not have been made that they adopt Section III, and between their respective nationals, the provisions of Section III in respect of currency and any payment to be made and the rate of exchange and of interest shall apply unless the Government of the Allied or Associated Power concerned shall within six months of the coming into force of the present Treaty notify Germany that the said provisions are not to be applied.

15.

The provisions of Article 297 and this Annex apply to

industrial, literary and artistic property which has been or will be dealt with in the liquidation of property, rights, interests, companies or businesses under war legislation by the Allied or Associated Powers, or in accordance with the stipulations of Article 297, paragraph (b).

SECTION V.

CONTRACTS, PRESCRIPTIONS, JUDGMENTS.

ARTICLE 299.

(a) Any contract concluded between enemies shall be regarded as having been dissolved as from the time when any two of the parties became enemies, except in respect of any debt or pecuniary obligation arising out of any act done or money paid thereunder, and subject to the exceptions and special rules with regard to particular contracts or classes of contracts contained herein or in the Annex hereto.

(b) Any contract of which the execution shall be required in the general interest, within six months from the date of the coming into force of the present Treaty, by the Allied or Associated Governments of which one of the parties is a national, shall be excepted from dissolution under this Article.

When the execution of the contract thus kept alive would, owing to the alteration of trade conditions, cause one of the parties substantial prejudice, the Mixed Arbitral Tribunal provided for by Section VI shall be empowered to grant to the prejudiced party equitable compensation.

(c) Having regard to the provisions of the constitution and law of the United States of America, of Brazil, and of Japan, neither the present Article, nor Article 300, nor the Annex hereto shall apply to contracts made between nationals of these States and German nationals; nor shall Article 305 apply to the United States of America or its nationals.

(d) The present Article and the annex hereto shall not apply to contracts the parties to which became enemies by reason of one of them being an inhabitant of territory of which the sovereignty has been transferred, if such party shall acquire under the present Treaty the nationality of an Allied or Associated Power, nor shall they apply to contracts between nationals of the Allied and Associated Powers between whom trading has been prohibited by reason of one of the parties being in Allied or Associated territory in the occupation of the enemy.

(e) Nothing in the present Article or the Annex hereto shall be deemed to invalidate a transaction lawfully carried out in accordance with a contract between enemies if it has been carried out with the authority of one of the belligerent Powers.

ARTICLE 300.

(a) All periods of prescription, or limitation of right of action, whether they began to run before or after the outbreak of war, shall be treated in the territory of the High Contracting Parties, so far as regards relations between Contracting Parties, as having been suspended for the duration of the war. They shall begin to run again at earliest three months after the coming into force of the present Treaty. This provision shall apply to the period prescribed for the presentation of interest or dividend coupons or for the presentation for repayment of securities drawn for repayment or repayable on any other ground.

(b) Where, on account of failure to perform any act or comply with any formality during the war, measures of execution have been taken in German territory to the prejudice of a national of an Allied or Associated Power, the claim of such national shall, if the matter does not fall within the competence of the Courts of an Allied or Associated Power, be heard by the Mixed Arbitral Tribunal provided for by Section VI.

Upon the application of any interested person who is a national of an Allied or Associated Power the Mixed Arbitral Tribunal shall order the restoration of the rights which have been prejudiced by the measures of execution referred to in paragraph (b), wherever, having regard to the particular circumstances of the case, such restoration is equitable and possible.

If such restoration is inequitable or impossible the Mixed Arbitral Tribunal may grant compensation to the prejudiced party to be paid by the German Government.

(d) Where a contract between enemies has been dissolved by reason either of failure on the part of either party to carry out its provisions or of the exercise of a right stipulated in the contract itself, prejudice may be applied to the Mixed Arbitral Tribunal for relief. The Tribunal will have the powers provided for in paragraph (c).

(e) The provisions of the preceding paragraphs of this Article shall apply to the nationals of Allied and Associated Powers who have been prejudiced by reason of measures referred to above taken by Germany in invaded or occupied territory, if they have not been otherwise compensated.

(f) Germany shall compensate any third party who may be prejudiced by any restitution or restoration ordered by the Mixed Arbitral Tribunal under the provisions of the preceding paragraphs of this Article.

(g) As regards negotiable instruments, the period of three months provided under paragraph (a) shall commence as from the date on which any exceptions or regulations applied in the territories of the interested Power with regard to negotiable instruments shall have definitely ceased to have force.

ARTICLE 301.

As between enemies no negotiable instrument made before the war shall be deemed to have become invalid by reason only of failure within the required time to present the instrument for acceptance or payment or to give notice of non-acceptance or non-payment to drawers or indorsers or to protest the instrument, nor by reason of failure to complete any formality during the war.

Where the period within which a negotiable instrument should have been presented for acceptance or for payment, or within which notice of non-acceptance or non-payment should have been given to the drawer or indorser, or within which the instrument should have been protested, has elapsed during the war, and the party who should have presented or protested the instrument or have given notice of non-acceptance or non-payment has failed to do so during the war, a period of not less than three months from the coming into force of the present Treaty shall be allowed within which presentation, notice of non-acceptance or non-payment or protest may be made.

ARTICLE 302.

Judgments given by the Courts of an Allied or Associated Power in all cases which, under the present Treaty, they are competent to decide, shall be recognised in Germany as final, and shall be enforced without it being necessary to have them declared executory.

If a judgment in respect of any dispute which may have arisen in Germany during the war by a German Court against a national of an Allied or Associated State in a case in which he was not able to make his defence, the Allied and Associated national who has suffered prejudice thereby shall be entitled to request compensation to be given by the Mixed Arbitral Tribunal provided for in Section VI.

At the instance of the national of the Allied or Associated Power the compensation above-mentioned may, upon order to that effect of the Mixed Arbitral Tribunal, be effected where it is possible by replacing the parties in the situation which they occupied before the judgment was given by the German Court.

The above compensation may likewise be obtained before the Mixed Arbitral Tribunal by the national of Allied or Associated Powers who have suffered prejudice by judicial measures taken in invaded or occupied territories if they have not been otherwise compensated.

ARTICLE 303.

For the purpose of Sections III, IV, V and VII, the expression "during the war" means for each Allied or Associated Power the period between the commencement of the state of war in that Power and Germany and the coming into force of the present Treaty.

ANNEX.

I. General Provisions.

1. Within the meaning of Articles 299, 300 and 301, the parties to a contract shall be regarded as enemies when trading between them shall have been prohibited by or otherwise became unlawful under law, orders or regulations to which one of those parties was subject. They shall be deemed to have become enemies from the date when such trading was prohibited or otherwise became unlawful.

The following classes of contracts are excepted from dissolution by Article 299 and, without prejudice to the rights contained in Article 297 (b) of Section IV, remain in force subject to the application of domestic laws, orders or regulations made during the war by the Allied and Associated Powers and subject to the terms of the contracts:

(a) Contracts having for their object the transfer of estates or of real or personal property where the property therein had passed or the object had been delivered before the parties became enemies;

(b) Leases and agreements for leases of land and houses;

(c) Contracts of mortgage, pledge or lien;

(d) Concessions concerning mines, quarries or deposits;

(e) Contracts between individuals or companies and persons charged with administrative functions, and concessions granted by States, provinces, municipalities, or other similar jurisdictions with administrative functions.

2. If the provisions of a contract are in part dissolved under Article 299, the remaining provisions of that contract shall, subject to the same application of domestic laws as is provided for in paragraph 2, continue in force if they are severable, but where they are not severable the contract shall be deemed to have been dissolved in its entirety.

3. Provisions relating to certain classes of Contracts.

Stock Exchange and Commercial Exchange Contracts.

(a) Rules made during the war by any recognised Exchange or Commercial Association providing for the closure of contracts entered into during the war by its members as confirmed by the High Contracting Parties, as also any action taken thereunder, provided:

(1) That the contract was expressed to be made subject to the rules of the Exchange or Association in question;

(2) That the rules applied to all persons concerned;

(3) That the conditions attaching to the closure were fair and reasonable.

(b) The preceding paragraph shall not apply to rules made during the occupation by Exchanges or Commercial Associations in the districts occupied by the enemy.

(c) The closure of contracts relating to cotton "futures", which were closed as on July 31, 1914, under the decision of the Liverpool Cotton Association, is also confirmed.

Security.

5.

The sale of a security held for an unpaid debt owing by an enemy shall be deemed to have been valid irrespective of notice to the owner if the creditor acted in good faith and with reasonable care and prudence, and no claim by the debtor on the ground of such sale shall be admitted.

This stipulation shall not apply to any sale of securities effected by an enemy during the occupation in regions invaded or occupied by the enemy.

Negotiable Instruments.

6.

As regards Powers which adopt Section III and the Annex thereto the pecuniary obligations existing between enemies and resulting from the issue of negotiable instruments shall be adjusted in conformity with the said Annex by the instrumentality of the Clearing Offices, which shall assume the rights of the holder as regards the various remedies open to him.

7.

If a person has either before or during the war become liable upon a negotiable instrument in accordance with an undertaking given to him by a person who has subsequently become an enemy, the latter shall remain liable to indemnify the former in respect of his liability notwithstanding the outbreak of war.

III. Contracts of Insurance.

8.

Contracts of insurance entered into by any person with another person who subsequently became an enemy will be dealt with in accordance with the following paragraphs.

Fire Insurance.

9.

Contracts for the insurance of property against fire entered into by a person interested in such property with another person who subsequently became an enemy shall not be deemed to have been dissolved by the outbreak of war, or by the fact of the person becoming an enemy, or on account of the failure during the war and for a period of three months thereafter to perform his obligation under the contract, but they shall be dissolved at the date when the annual premium becomes payable for the first time after the expiration of a period of three months after the coming into force of the present Treaty.

A settlement shall be effected of unpaid premiums which became due during the war, or claims for losses which occurred during the war.

10.

Where by administrative or legislative action an insurance against fire effected before the war has been transferred during the war from the original to another insurer, the transfer will be recognised and the liability of the original insurer will be deemed to have ceased as from the date of the transfer. The original insurer will, however, be entitled to receive on demand full information as to the terms of the transfer, and if it should appear that these terms were not equitable they shall be amended so far as may be necessary to render them equitable.

Furthermore the insured shall, subject to the concurrence of the original insurer, be entitled to retransfer the contract to the original insurer as from the date of the demand.

Life Insurance.

11.

Contracts of life insurance entered into between an insurer and a person who subsequently became an enemy shall not be deemed to have been dissolved by the outbreak of war, or by the fact of the person becoming an enemy.

Any sum which during the war has been due upon a contract deemed not to have been dissolved under the preceding provision shall be recoverable after the war with the addition of interest at five per cent. per annum from the date of its becoming due up to the day of payment.

Where the contract has lapsed during the war owing to non-payment of premiums, or has become void from breach of the conditions of the contract, the assured or his representatives or the person entitled shall have the right at any time within twelve months of the coming into force of the present Treaty to claim from the insurer the surrender value of the policy at the date of its lapse or avoidance.

Where the contract has lapsed during the war owing to non-payment of premiums the payment of which has been prevented by the enforcement of measures of war, the assured or his representative or the persons entitled shall have the right to restore the contract or payment of the premiums with interest at five per cent. per annum within three months from the coming into force of the present Treaty.

12.

Any Allied or Associated Power may within three months of the coming into force of the present Treaty cancel all the contracts of insurance running between a German insurance company and its nationals under conditions which shall protect its nationals from any prejudice.

To this end the German insurance company will hand over to the Allied or Associated Government concerned the

proportion of its assets attributable to the policies so cancelled and will be relieved from all liability in respect of such policies. The assets to be handed over shall be determined by an actuary appointed by the Mixed Arbitral Tribunal.

13.

Where contracts of life insurance have been entered into by a local branch of an insurance company established in a country which subsequently became an enemy country, the contract shall, in the absence of any stipulation to the contrary in the contract itself, be governed by the local law, but the insurer shall be entitled to demand from the insured or his representatives the refund of sums paid on claims made or enforced under measures taken during the war, if the making or enforcement of such claims was not in accordance with the terms of the contract itself or was not consistent with the laws or treaties existing at the time when it was entered into.

14.

In any case where by the law applicable to the contract the insurer remains bound by the contract notwithstanding the non-payment of premiums until notice is given to the insured of the termination of the contract, he shall be entitled where the giving of such notice was prevented by the war to recover the unpaid premiums with interest at five per cent. per annum from the insured.

Insurance contracts shall be considered as contracts of life assurance for the purpose of paragraphs 11 to 14 when they depend on the probabilities of human life combined with the rate of interest for the calculation of the reciprocal engagements between the two parties.

Marine Insurance.

15.

Contracts of marine insurance including time policies and voyage policies entered into between an insurer and a person who subsequently became an enemy shall be deemed to have been dissolved on his becoming an enemy, except in cases where the risk undertaken in the contract had attached before he became an enemy.

Where the risk had not attached, money paid by way of premium or otherwise shall be recoverable from the insurer.

Where the risk had attached effect shall be given to the contract notwithstanding the party becoming an enemy and sums due under the contract either by way of premiums or in respect of losses shall be recoverable after the coming into force of the present Treaty.

In the event of any agreement being come to for the payment of interest on sums due before the war to or by the nationals of States which have been at war and recovered after the war, such sums shall be recoverable under contracts of marine insurance run from the expiration of a period of one year from the date of the loss.

17.

No contract of marine insurance with an insured person who subsequently became an enemy shall be deemed to cover losses due to belligerent action by the Power of which the insurer was a national or by the allies or associates of such Power.

18.

Where it is shown that a person who had before the war entered into a contract of marine insurance with an insurer who subsequently became an enemy entered after the outbreak of war into a new contract covering the same risk with an insurer who was not an enemy, the new contract shall be deemed to be substituted for the original contract as from the date when it was entered into, and the premiums payable shall be adjusted on the basis of the original insurer having remained liable on the contract only up till the time when the new contract was entered into.

Other Insurances.

19.

Contracts of insurance entered into before the war between an insurer and a person who subsequently became an enemy, other than contracts dealt with in paragraphs 9 to 13, shall be treated in all respects on the same footing as contracts of fire insurance between the same persons would be dealt with under the said paragraphs.

Re-insurance.

20.

All treaties of re-insurance with a person who became an enemy shall be regarded as having been abrogated by the present Treaty, but the insurer who has previously become an enemy, other than contracts dealt with in paragraphs 9 to 13, shall be treated in all respects on the same footing as contracts of fire insurance between the same persons would be dealt with under the said paragraphs.

Nevertheless, if, owing to an invasion, it has been impossible for the re-insured to find another re-insurer, the treaty shall remain in force until three months after the coming into force of the present Treaty.

Where a re-insurance treaty becomes void under this paragraph, there shall be an adjustment of accounts between the parties in respect both of premiums paid and payable and of liabilities for losses in respect of life or marine risks which had attached before the war. In the case of risks other than those mentioned in paragraphs 11 to 13 the adjustment of accounts shall be made as at the date of the parties becoming an enemy, without regard to claims for losses which may have occurred since that date.

Signing the German Treaty of Peace. The various delegates to the Peace Conference signing the German Treaty of Peace for their respective countries in the Palace at Versailles, France, June 28, 1919.

21.

The provisions of the preceding paragraph will extend equally to re-insurances existing at the date of the parties becoming enemies of particular risks undertaken by the insurer in a contract of insurance against any risks other than life or marine risks.

22.

Re-insurance of life risks effected by particular contracts and not under any general treaty remain in force.

The provisions of paragraph 12 apply to treaties of re-insurance of life insurance contracts in which enemy companies are the re-insurers.

23.

In case of a re-insurance effected before the war of a contract of marine insurance, the cession of a risk which had been ceded to the reinsurer, if it had attached before the outbreak of war, remain valid and effect be given to the contract notwithstanding the outbreak of war; sums due under the contract of re-insurance in respect either of premiums or of losses shall be recoverable after the war.

24.

The provisions of paragraphs 17 and 18 and the last part of paragraph 16 shall apply to contracts for the re-insurance of marine risks.

SECTION VI.

MIXED ARBITRAL TRIBUNAL.

ARTICLE 304.

(a) Within three months from the date of the coming into force of the present Treaty, a Mixed Arbitral Tribunal shall be established between each of the Allied and Associated Powers on the one hand and Germany on the other hand. Each such Tribunal shall consist of three members. Each of the Governments concerned shall appoint one of its members. The President shall be chosen by agreement between the two Governments concerned.

In case of failure to reach agreement, the President of the Tribunal and two other persons either of whom may in case of need take his place, shall be chosen by the Council of the League of Nations, or, until this is set up, by M. Gustave Ador if he is willing. These persons shall be nationals of Powers that have remained neutral during the war.

If any Government does not proceed within a period of one month in case there is a vacancy to appoint a member of the Tribunal, such member shall be chosen by the other Government from the two persons mentioned above other than the President.

The decision of the majority of the members of the Tribunal shall be the decision of the Tribunal.

(b) The Mixed Arbitral Tribunals established pursuant to paragraph (a), shall decide all questions within their competence under Sections III, IV, V and VI.

In addition to all questions whatsoever their nature, relating to contracts concluded before the coming into force of the present Treaty between nationals of the Allied and Associated Powers and German nationals shall be decided by the Mixed Arbitral Tribunal, always excepting questions which, under the laws of the Allied, Associated or Neutral Powers, are within the jurisdiction of the National Courts of those Powers. Such questions shall be decided by the National Courts in question, to the exclusion of the Mixed Arbitral Tribunal. The party who is a national of an Allied or Associated Power may nevertheless bring the case before the Mixed Arbitral Tribunal if this is not prohibited by the laws of his country.

(c) If the number of cases justifies it, additional members shall be appointed and each Mixed Arbitral Tribunal shall sit in divisions. Each of these divisions will be constituted as above.

(d) Each Mixed Arbitral Tribunal will settle its own procedure except in so far as it is provided in the following Annex, and is empowered to award the costs to be paid by the loser in respect of the costs and expenses of the proceedings.

(e) Each Government will pay the remuneration of the member of the Mixed Arbitral Tribunal appointed by it and of any agent whom it may appoint to represent it before the Tribunal. The remuneration of the President will be determined by special agreement between the Governments concerned; and this remuneration and the joint expenses of each Tribunal will be paid by the two Governments in equal moieties.

The High Contracting Parties agree that their courts and authorities shall render to the Mixed Arbitral Tribunals direct all the assistance in their power, particularly as regards transmitting notices and collecting evidence.

The High Contracting Parties agree to regard the decisions of the Mixed Arbitral Tribunal as final and conclusive, and to render them binding upon their nationals.

ANNEX.

1.

Should one of the members of the Tribunal either die, retire, or be unable for any reason whatever to discharge his function, the same procedure will be followed for filling the vacancy as was followed for appointing him.

2.

The Tribunal may adopt such rules of procedure as shall be in accordance with justice and equity and decide the order and time at which each party must conclude its arguments, and may arrange all formalities required for dealing with the evidence.

3.

The agent and counsel of the parties on each side are authorized to present orally and in writing to the Tribunal arguments in support or in defence of each case.

The Tribunal shall keep record of the questions and cases submitted and the proceedings thereon, with the dates of such proceedings.

5.

Each of the Powers concerned may appoint a secretary. These secretaries shall act together as joint secretaries of the Tribunal and shall be subject to its direction. The Tribunal may appoint and employ any other necessary officer or officers to assist in the performance of its duties.

The Tribunal shall decide all questions and matters submitted upon such evidence and information as may be furnished by the parties concerned.

7.

Germany agrees to give the Tribunal all facilities and information required by it for carrying out its investigations.

8.

The language in which the proceedings shall be conducted shall, unless otherwise agreed, be English, French, Italian or Japanese, as may be determined by the Allied or Associated Power concerned.

9.

The place and time for the meetings of each Tribunal shall be determined by the President of the Tribunal.

ARTICLE 305.

Whenever a competent court has given or gives a decision in a case covered by Sections III, IV, V or VII, and such decision is inconsistent with the provisions of this Section, the party who is prejudiced by the decision shall be entitled to obtain redress which shall be fixed by the Mixed Arbitral Tribunal. At the request of the national of an Allied or Associated Power, the redress may, whenever possible, be effected by the Mixed Arbitral Tribunal, or restored, as from the coming into force of the present Treaty, by them before the judgment was given by the German court.

SECTION VII.

INDUSTRIAL PROPERTY.

ARTICLE 306.

Subject to the stipulations of the present Treaty, rights of industrial, literary and artistic property, as such property is defined by the International Conventions of Paris and of Berne, mentioned in Article 296, shall be re-established, as from the coming into force of the present Treaty, in the territories of the High Contracting Parties, in favour of the persons entitled to the benefit of them at the moment when the state of war commenced or their legal representatives. Equally, rights which, except for the war, would have been acquired during the war in consequence of an application made for the protection of industrial property, or the publication of a literary or artistic work, shall be recognised and established in favour of those persons who would have been entitled thereto, from the coming into force of the present Treaty.

Nevertheless, all acts done by virtue of the special measures taken during the war under legislative, executive or administrative authority of any Allied or Associated Power in regard to the rights of German nationals in industrial, literary or artistic property shall remain in force and shall continue to maintain their full effect.

No claims shall be made or action brought by Germany or German nationals in respect of the use during the war by the Government of a property belonging to the nationals, or by any persons acting on behalf or with the assent of such Government, of any rights in industrial, literary or artistic property, nor in respect of the sale, offering for sale, or use of any products, articles or apparatus whatsoever to which such rights applied.

Unless the legislation of any one of the Allied or Associated Powers in force at the moment of the signature of the present Treaty otherwise directs, sums due or paid in virtue of any act or operation resulting from the execution of the special measures mentioned in paragraph 1 of this Article shall be dealt with in the same way as other sums due to German nationals are directed to be dealt with by the present Treaty; and sums produced by any special measures taken by the German Government in respect of rights in industrial, literary or artistic property belonging to the nationals of the Allied or Associated Powers shall be considered and treated in the same way as other debts due from German nationals.

Each of the Allied and Associated Powers reserves to itself the right to impose such limitations, conditions or restrictions on the rights of industrial, literary or artistic property (with the exception of trade-marks) acquired before or during the war, or which may be subsequently acquired in accordance with its legislation, by German nationals, whether by granting licences, or by the working, or by preserving control over the exploitation, or any other measure, as may be considered necessary for national defence, or in the public interest, or for assuring the fair treatment by Germany of the rights of industrial, literary and artistic property held by German nationals, or for securing the due fulfilment of all the obligations undertaken by Germany in the present Treaty. As regards rights of industrial, literary and artistic property acquired after the coming into force of

the present Treaty, the right so reserved by the Allied and Associated Powers, shall only be exercised in cases where these limitations, conditions or restrictions may be considered necessary for national defence or in the public interest.

In the event of the application of the provisions of the preceding paragraph by any Allied or Associated Power, there shall be paid reasonable indemnities or royalties, which shall be dealt with in the same way as other sums due to German nationals are directed to be dealt with by the present Treaty.

Each of the Allied or Associated Powers reserves the right to treat as void and of no effect any transfer in whole or in part or other dealing with rights of or in respect of industrial, literary or artistic property effected after August 1, 1914, or in any case in which it would have the result of defeating the objects of the provisions of this Article.

The provisions of this Article shall not apply to rights in industrial, literary or artistic property which have been dealt with in the liquidation of businesses or companies under war legislation by the Allied or Associated Powers, or which may be so dealt with by virtue of Article 297, paragraph (b).

ARTICLE 307.

A minimum of one year after the coming into force of the present Treaty shall be accorded to the nationals of the High Contracting Parties without extension fees or other penalty, in order to enable such persons to accomplish any act, fulfil any formality, pay any fees, and generally satisfy any obligation prescribed by the laws or regulations of any respective States relating to the obtaining, preserving, or opposition to rights of or in respect of industrial property either acquired before August 1, 1914, or which, except for the war, might have been acquired since that date as a result of an application made before the war or during its continuance, but nothing in this Article shall give any right to re-open interference proceedings in the United States of America where a final hearing has taken place.

All rights in, or in respect of, such property which may have lapsed by reason of any failure to accomplish any act, fulfil any formality or make any payment, shall remain but subject to the case of patents and designs to the imposition of such conditions as each Allied or Associated Power may deem reasonably necessary for the protection of persons who have manufactured or made use of the subject matter of such property when the rights had lapsed. Further, where rights to patents or designs belonging to German nationals are revived under this Article, they shall be subject in respect of the grant of licences to the same provisions as would have been applicable to them during the war, as well as to all the provisions of the present Treaty.

The period from August 1, 1914, until the coming into force of the present Treaty shall be excluded in considering the time within which a patent should be made, or a trade mark or design registered, or if they further agreed that no patent, registered trade mark or design in force on August 1, 1914, shall be subject to revocation or cancellation by reason only of the failure to work such patent or use such trade mark or design for two years after the coming into force of the present Treaty.

ARTICLE 308.

The rights of priority, provided by Article 4 of the International Convention for the Protection of Industrial Property of Paris, of March 20, 1883, revised at Washington in 1911 or by any other Convention or Statute for the filing or registration of applications for patents or models of utility, and for the registration of trade marks, designs and models which had not expired on August 1, 1914, and those which have arisen during the war or would have arisen but for the war, shall be extended by each of the High Contracting Parties in favour of all nationals of the other High Contracting Parties for a period of six months after the coming into force of the present Treaty, and no such extension shall in no way affect the rights of any of the High Contracting Parties or of any person who before the coming into force of the present Treaty was *bona fide* in possession of any rights in industrial property conflicting with rights applied for by another person who claims rights of priority in respect of them, to exercise such rights by itself or himself personally, or by such agents as he may employ, or by such persons as he may employ, or licensees as derived their rights from it or claim before the coming into force of the present Treaty, and such persons shall not be deemed to be in any action or other process of law in respect of infringement.

ARTICLE 309.

No action shall be brought and no claim made by persons residing or carrying on business within the territories of Germany on the one part and of the Allied or Associated Powers on the other, or persons who are nationals of such Powers respectively, or by any one deriving title during the war from such persons, by reason of any action which has taken place within the territory of the other party between the date of the declaration of war and that of the coming into force of the present Treaty, which might constitute an infringement of the rights of industrial property or rights in literary and artistic property, either existing at any time during the war or revived under the provisions of Articles 307 and 308.

Equally, no action for infringement of industrial, literary or artistic property rights by such persons shall at any time

be permissible in respect of the sale or offering for sale for a period of one year after the signature of the present Treaty in the territories of the Allied or Associated Powers of articles manufactured, or of literary or artistic works published, during the period between the declaration of war and the signature of the present Treaty, or again of those who have acquired or obtained the right to use them, in so far as the possessor of the rights was domiciled or had an industrial or commercial establishment in the districts occupied by Germany during the war.

This Article shall not apply as between the United States of America on the one hand and Germany on the other.

ARTICLE 310.

Licences in respect of industrial, literary or artistic property concluded before the war between nationals of the Allied or Associated Powers or persons residing in their territory or carrying on business therein, on the one part, and German nationals, on the other part, shall be considered as cancelled as from the date of the declaration of war in any case, the former beneficiary of a contract of this kind shall have the right, within a period of six months after the coming into force of the present Treaty, to demand from the proprietor of the rights the grant of a new licence, the terms of which, in default of agreement between the parties, shall be fixed by the duly qualified tribunal in the country under whose legislation the rights had been acquired, except in the case of licences held in respect of rights under German law. In all cases the conditions shall be fixed under the Mixed Arbitral Tribunal referred to in Section VI of this Part. The tribunal may, if necessary, fix also the amount which it may deem just should be paid by reason of the use of the rights during the war.

No licence in respect of industrial, literary or artistic property granted under the special war legislation of any Allied or Associated Power, shall be affected by the continued existence of any licence entered into before the war, but shall remain valid and of full effect, and a licence so granted to the former beneficiary of a licence entered into before the war shall be considered as substituted for such licence.

Where sums have been paid during the war by virtue of a licence or agreement concluded before the war in respect of the rights of industrial property or for the reproduction or the representation of literary, dramatic or artistic works, these sums shall be dealt with in the same manner as other debts or credits of German nationals, as provided by the present Treaty.

This Article shall not apply as between the United States of America on the one hand and Germany on the other.

ARTICLE 311.

The inhabitants of territories separated from Germany by virtue of the present Treaty shall, notwithstanding this separation and the change of nationality consequent thereon, continue to enjoy in Germany all the rights in industrial, literary and artistic property to which they were entitled under German legislation at the time of the separation. The rights in industrial, literary and artistic property which are in force in the territories separated from Germany under the present Treaty at the moment of the separation of these territories from Germany, or which will be re-established or restored in accordance with the provisions of Article 306 of the present Treaty, shall be recognized by the State to which the said territory is transferred and shall remain in force in that territory for the same period of time given them under the German law.

SECTION VIII.

SOvereign AND STATE INSURANCE IN CEDED TERRITORY.

ARTICLE 312.

Without prejudice to the provisions contained in other Articles of the present Treaty, the German Government undertakes to transfer to any Power to which German territory in Europe is ceded, and to any Power administering Part I (League of Nations), such portion of the reserves accumulated by the Government of the German Empire or of German States, or by public or private organisations under its control, as is attributable to the carrying on of Social State Insurance in such territory.

The Powers to which these funds are transferred must apply them to the performances of the obligations arising from such insurances.

The conditions of the transfer will be determined by special conventions to be concluded between the German Government and the Governments concerned.

In case these special conventions are not concluded in accordance with the above paragraph within three months after the coming into force of the present Treaty, the conditions of transfer shall be determined by a Commission consisting of one member, one of whom shall be appointed by the German Government, one by the other interested Government and three by the Governing Body of the International Labour Office from the nationals of other States. This Commission shall meet within one month after the coming into force of the present Treaty, and its recommendations for submission to the Council of the League of Nations, and the decisions of the Council shall forthwith be accepted as final by Germany and the other Government concerned.

PART XI.
AERIAL NAVIGATION.
ARTICLE 313.

The aircraft of the Allied and Associated Powers shall have full liberty of passage and landing over and in the territory and territorial waters of Germany, and shall enjoy the same privileges as German aircraft, particularly in case of distress by land or sea.

ARTICLE 314.
The aircraft of the Allied and Associated Powers shall, while in transit to any port or country whatever, enjoy the right of flying over the territory and territorial waters of Germany without landing, subject always to any regulations which may be made by Germany, and which shall be applied equally to the aircraft of Germany and to those of the Allied and Associated countries.

ARTICLE 315.
All aerodromes in Germany open to national public traffic shall be open for the aircraft of the Allied and Associated Powers, and in any such aerodrome such aircraft shall be treated on a footing of equality with German aircraft as regards charges of every description, including charges for landing and accommodation.

ARTICLE 316.
Subject to the present provisions, the rights of passage, transit and landing, provided for in Articles 313, 314 and 315, are subject to the observance of such regulations as Germany may consider it necessary to enact, but such regulations shall be applied without distinction to German aircraft and to those of the Allied and Associated countries.

ARTICLE 317.
Certificates of nationality, airworthiness, or competency, and licences, issued or recognised as valid by any of the Allied or Associated Powers, shall be recognised in Germany as valid and as equivalent to the certificates and licences issued by Germany.

ARTICLE 318.
As regards internal commercial air traffic, the aircraft of the Allied and Associated Powers shall enjoy in Germany most favoured nation treatment.

ARTICLE 319.
Germany undertakes to enforce the necessary measures to ensure that all German aircraft flying over her territory shall comply with the Rules as to lights and signals, Rules of the Air and Rules for Air Traffic on and in the neighbourhood of aerodromes, which have been laid down in the Convention relative to Aerial Navigation concluded between the Allied and Associated Powers.

ARTICLE 320.
The obligations imposed by the preceding provisions shall remain in force until January 1, 1926, unless before that date Germany shall have been admitted into the League of Nations or shall have been authorised, by consent of the Allied and Associated Powers, to adhere to the Convention relative to Aerial Navigation concluded between those Powers.

PART XII.
PORTS, WATERWAYS AND RAILWAYS.

SECTION I.
GENERAL PROVISIONS.

ARTICLE 321.

Germany undertakes to grant freedom of transit through her territories on the routes most convenient for international transit, either by rail, navigable waterway, or canal, to persons, goods, vessels, carriages, wagons and mails coming from or going to the territories of any of the Allied and Associated Powers (whether contiguous or not); for this purpose the crossing of international waters shall be allowed. Such persons, goods, vessels, carriages, wagons and mails shall not be subjected to any transit duty, or to any undue delays or restrictions, and shall be entitled in Germany to national treatment as regards charges, facilities, and all other matters.

Goods in transit shall be exempt from all Customs or other similar duties.

All charges imposed on transport in transit shall be reasonable, having regard to the conditions of the traffic. No charge, facility or restriction shall depend directly or indirectly on the ownership or on the nationality of the ship or other means of transport on which any part of the through journey has been, or is to be, accomplished.

ARTICLE 322.

Germany undertakes neither to impose nor to maintain any control over transmigration traffic through her territories beyond measures necessary to ensure that passengers or other private bodies, corporations, or person interested in the traffic to take any part whatever in, or to exercise any direct or indirect influence over, any administrative service that may be necessary for this purpose.

ARTICLE 323.

Germany undertakes to make no discrimination or preference, direct or indirect, in the duties, charges and prohibitions relating to importations into or exportations from her

territories, or, subject to the special engagements contained in the present Treaty, in the charges and conditions of transport of goods or persons entering or leaving her territories, based on the frontier crossed; or on the kind, ownership or flag of the means of transport (including aircraft) employed; or on the original or immediate place of departure of the vessel, wagon or aircraft or other means of transport employed, or its ultimate or intermediate destination; or on the route or its places of trans-shipment on the journey; or on whether any port through which the goods are imported or exported is a German port or a port belonging to any foreign country or on whether the goods are imported or exported by sea, by land or by air.

Germany particularly undertakes not to establish against Powers any surtax or any direct or indirect bounty for export or import by German ports or vessels, or by those of She further undertakes that persons or goods passing through a port or using a vessel of any of the Allied and Associated Powers shall not be subjected to any formality not be subjected if they passed through a German port or a vessel of any other Power, or used a German vessel or a vessel of any other Power.

ARTICLE 324.

All necessary administrative and technical measures shall be taken to shorten, as much as possible, the transmission of goods across the German frontiers and to ensure their forwarding and transport from such frontiers, irrespective of whether such goods are coming from or going to the territories of the Allied and Associated Powers or are in transit to or to those territories, under the same material conditions in such matters as rapidity of carriage and care as are enjoyed by other goods of the same kind carried on German territory under similar conditions of transport.

In particular, the transport of perishable goods shall be promptly and regularly carried out, and the customs formalities shall be effected in such a way as to allow the goods to be carried straight through by trains which make connection.

ARTICLE 325.

The seaports of the Allied and Associated Powers are entitled to all favours and to all reduced tariffs granted on German railways or navigable waterways for the benefit of German ports or of any part of another Power.

ARTICLE 326.

Germany may not refuse to participate in the tariffs or combinations of tariffs intended to secure for ports of any of the Allied and Associated Powers advantages similar to those granted by Germany to her own ports or the ports of any other Power.

SECTION II.
NAVIGATION.

CHAPTER I.
FREEDOM OF NAVIGATION.

ARTICLE 327.

The nationals of any of the Allied and Associated Powers as well as their vessels and property shall enjoy in all German ports and on the inland navigation routes of Germany the same treatment in all respects as German nationals, vessels and property.

In particular the vessels of the Allied or Associated Powers shall be entitled to transport goods of any description, and passengers, to or from any ports or places in German territory to which German vessels or places of access under conditions which shall not be more onerous than those applicable to the case of national vessels; they shall be treated on a footing of equality with national vessels as regards port and harbour facilities and national vessels as description, including facilities for stationing, loading and unloading, and duties and charges of tonnage, harbour, pilot-charges of whatsoever nature, and all analogous duties and the profit of the Government, public functions, private individuals, corporations or establishments of any kind.

In the event of Germany granting a preferential régime to any of the Allied or Associated Powers or to any other foreign Power, this régime shall be extended immediately and unconditionally to all the Allied and Associated Powers. There shall be no impediment to the movement of persons or goods, or to the free sale, import, export and transmigration of customs, postage, sanitation, emigration and immigration, and those relating to the import and export of prohibited goods. Such regulations must be reasonable and uniform and must not impede traffic unnecessarily.

CHAPTER II.

FREE ZONES IN PORTS.

ARTICLE 328.

The free zones existing in German ports on August 1, 1914, shall be maintained. These free zones, and any other free zones which may be established in German territory by the present Treaty, shall be subject to the régime provided for in the following articles.

Goods entering or leaving a free zone shall not be subjected to any import or export duty, other than those provided for in Article 330.

Vessels and goods entering a free zone may be subjected

to the charges established to cover expenses of administration, upkeep and improvement of the port, as well as to the charges for the use of various installations, provided that these charges shall be reasonable having regard to the expenditure incurred, and shall be levied in the conditions of equality provided for in Article 327.

Goods shall not be subjected to any other charge except a statistical duty which shall not exceed 1 per mille *ad valorem*, and which shall be devoted exclusively to defray the expenses of compiling statements of the traffic in the port.

ARTICLE 329.

The facilities granted for the erection of warehouses, for packing and for unpacking goods, shall be in accordance with trade requirements for the time being. All goods allowed to be consumed in the free zone shall be exempt from duty, whether of excise or of any other description, apart from the statistical duty provided for in Article 328 above. There shall be no discrimination in regard to any of the provisions of the present Article between persons belonging to different nationalities or between goods of different origin or destination.

ARTICLE 330.

Import duties may be levied on goods leaving the free zone for consumption in the country on the territory of which the port is situated. Conversely, export duties may be levied on goods coming from such country and brought into the free zone. These import and export duties shall be levied on the same basis and at the same rates as similar duties levied on the other Customs frontiers of the country concerned. On the other hand, Germany shall not levy, under any denomination, any import, export or transit duty on goods carried by land or water across her territory or out from the free zone to any other State. Germany shall draw up the necessary regulations to secure and guarantee such freedom of transit over such railways and waterways in her territory as normally give access to the free zone.

CHAPTER III.

CLAUSES RELATING TO THE ELBE, THE ODER, THE NIEMEN (RUSSFROM-MEDEL-NIEMEN) AND THE DANUBE.

(1)—General Clauses.

ARTICLE 331.

The following rivers are declared international:

the Elbe (*Labe*) from its confluence with the Vltava (*Moldau*), and the Vltava (*Moldau*) from Prague; the Oder (*Odra*) from its confluence with the Oppa; the Niemen (*Russfrom-Memel-Niemen*) from Grodno; the Danube from its confluence with the Rha; and all navigable parts of these river systems which naturally provide more than one State with access to the sea, with or without transhipment from one vessel to another, together with lateral canals and channels constructed either to duplicate or to improve naturally navigable sections of the said river systems, or to connect two naturally navigable sections of the same river.

The same shall apply to the Rhine-Danube navigable waterway, should such a waterway be constructed under the conditions laid down in Article 353.

ARTICLE 332.

On the waterways declared to be international in the preceding Article, the nationals, property and flags of all Powers shall be treated on a footing of perfect equality, no distinction being made to the detriment of the nationals, property or flag of any Power between them and the nationals, property or flag of the riparian State itself or of the most favoured nation.

Nevertheless, German vessels shall not be entitled to carry passengers or goods by regular services between the ports of any Allied or Associated Power, without special authority from such Power.

ARTICLE 333.

Where such charges are not precluded by any existing conventions, charges varying on different sections of a river may be levied on vessels using the navigable channels or their approaches, provided that they are intended solely to cover equitably the cost of maintaining in a navigable condition, or of improving, of the river and its approaches, or to meet expenditure incurred in the interests of navigation. The schedule of such charges shall be calculated on the basis of such expenditure and shall be posted up in the ports. These charges shall be levied in such a manner as to render any detailed examination of cargoes unnecessary, except in cases of suspected fraud or contravention.

ARTICLE 334.

The transit of vessels, passengers and goods on these waterways shall be effected in accordance with the general conditions prescribed for transit in Section I above.

When the two banks of an international river are within the same State goods in transit may be placed under seal or in the custody of customs agents. When the river forms a frontier goods and passengers in transit shall be exempt from all customs formalities; the loading and unloading of goods, and the embarkation and disembarkation of passengers, shall only take place in the ports specified by the riparian State.

ARTICLE 335.

No dues of any kind other than those provided for in the

present Part shall be levied along the course or at the mouth of these rivers.

This provision shall not prevent the fixing by the riparian States of customs, local octroi or consumption duties, or the creation of reasonable and uniform charges levied in the ports, in accordance with public tariffs, for the use of cranes, elevators, quays, warehouses, etc.

ARTICLE 336.

In default of any special organisation for carrying out the works connected with the upkeep and improvement of the international portion of a navigable system, each riparian State shall be bound to take suitable measures to remove any obstacles or danger to navigation and to ensure the maintenance of good conditions of navigation.

If a State neglects to comply with this obligation any riparian State, or any State represented on the International Commission, may there is one, appeal to the tribunal instituted for this purpose by the League of Nations.

ARTICLE 337.

The same procedure shall be followed in the case of a riparian State undertaking any works of a nature to impede navigation in the international section. The tribunal mentioned in the preceding Article shall be entitled to enforce the suspension or suppression of such works, making due allowance in its decisions for all rights in connection with irrigation, water-power, fisheries and other national interests, which, with the consent of all the riparian States or of all the States represented on the International Commission, if there is one, shall be given priority over the requirements of navigation.

Appeal to the tribunal of the League of Nations does not require the suspension of the works.

ARTICLE 338.

The régime set out in Articles 332 to 37 above shall be superseded by one that is to be laid down in a General Convention drawn up by the Allied and Associated Powers, and approved by the League of Nations, relating to the waterways recognised in such Convention as having an international character. This Convention shall apply in particular to the whole or part of the above-mentioned river systems of the Elbe (*Labe*), the Oder (*Odra*), the Niemen (*Russfrom-Memel-Niemen*), and the Danube, and such other parts of these river systems as may be covered by a general definition.

Germany undertakes, in accordance with the provisions of Article 379, to adhere to the said General Convention as well as to all projects prepared in accordance with Article 343 below for the revision of existing international agreements and regulations.

ARTICLE 339.

Germany shall cede to the Allied and Associated Powers concerned, within a maximum period of three months from the date on which notification shall be given her, a proportion of the tugs and vessels remaining registered in the ports of the river systems referred to in Article 331 after the deduction of those surrendered by way of restitution or repatriation. Germany shall in the same way cede material of all kinds necessary to the Allied and Associated Powers concerned for the utilisation of those river systems.

The number of the tugs and boats, and the amount of the material so ceded and their distribution, shall be determined by an arbitrator or arbitrators nominated by the United States of America, due regard being had to the legitimate needs of the parties concerned, and particularly to the shipping traffic during the five years preceding the war.

All craft so ceded shall be provided with their fittings and gear, shall be in a good state of repair and in condition to carry goods, and shall be selected from among those most recently built.

The cessions provided for in the present Article shall entail a sum of which the total amount, settled in a lump sum by the arbitrator or arbitrators, shall not in any case exceed the value of the capital expended in the initial establishment of the material ceded, and shall be set off against the total sums due from Germany in consequence of the indemnification of the proprietors shall be a matter for Germany to deal with.

(2) *Special Clauses relating to the Elbe, the Oder and the Niemen (Russfrom-Memel-Niemen).*

ARTICLE 340.

The Elbe (*Labe*) shall be placed under the administration of an International Commission, which shall comprise:

- 4 representatives of the German States bordering on the river;
- 2 representatives of the Czechoslovak State;
- 1 representative of Great Britain;
- 1 representative of France;
- 1 representative of Italy;
- 1 representative of Belgium.

Whatever be the number of members present, each delegation shall have the right to record a number of votes equal to the number of representatives allotted to it.

If certain of these representatives are not appointed at the time of the coming into force of the present Treaty, the decisions of the Commission shall nevertheless be valid.

ARTICLE 341.

The Oder (*Odra*) shall be placed under the administration of an International Commission, which shall comprise:

LII TREATY OF PEACE WITH GERMANY

- 1 representative of Poland;
- 3 representatives of Prussia;
- 1 representative of the Czecho-Slovak State;
- 1 representative of Great Britain;
- 1 representative of France;
- 1 representative of Denmark;
- 1 representative of Sweden.

If certain of these representatives cannot be appointed at the time of the coming into force of the present Treaty, the decisions of the Commission shall nevertheless be valid.

ARTICLE 342.

On a request being made to the League of Nations by any riparian State, the Niemen (*Russrostr-Memel-Niemen*) Commission, which shall comprise one representative of each riparian State, and three representatives of other States specified by the League of Nations.

ARTICLE 343.

The International Commissions referred to in Articles 340 and 341 shall meet within three months of the date of the coming into force of the present Treaty. The international Commission referred to in Article 342 shall meet within three months from the date of the request made by a riparian State. Each of these Commissions shall proceed immediately to prepare a project for the revision of the existing international agreements and regulations, drawn up in conformity with the General Convention referred to in Article 335, should such Convention have been already concluded. In the absence of such convention, the project for revision shall be in conformity with the principles of Articles 332 to 337 above.

ARTICLE 344.

The projects referred to in the preceding Article shall, *inter alia*:

- (a) designate the headquarters of the International Commission, and prescribe the manner in which its President is to be nominated;
- (b) specify the extent of the Commission's powers, particularly in regard to the execution of works of maintenance, control and improvement on the river system, the financial régime, the fixing and collection of charges, and regulations for navigation;
- (c) define the sections of the river or its tributaries to which the international régime shall be applied.

ARTICLE 345.

The international agreements and regulations at present governing the navigation of the Elbe (*Labé*), the Oder (*Odre*), and the Niemen (*Russrostr-Memel-Niemen*) shall be provisionally maintained in force until the ratification of the above-mentioned Convention. Nevertheless, in all cases where such agreements and regulations are in conflict with the provisions of Articles 332 to 337 above, or of the General Convention to be concluded, the latter provisions shall prevail.

(3) Special Clauses relating to the Danube.

ARTICLE 346.

The European Commission of the Danube resumes the powers it possessed before the war. Nevertheless, as a provisional measure, only representatives of Great Britain, France, Italy and Roumania shall constitute this Commission.

ARTICLE 347.

From the point where the competence of the European Commission ceases, the Danube system referred to in Article 331 shall be placed under the administration of an International Commission composed as follows:

- 2 representatives of German riparian States;
- 1 representative of each other riparian State;
- 1 representative of each non-riparian State represented in the Commission of the Danube.

If certain of these representatives cannot be appointed at the time of the coming into force of the present Treaty, the decisions of the Commission shall nevertheless be valid.

ARTICLE 348.

The International Commission provided for in the preceding Article shall meet as soon as possible after the coming into force of the present Treaty, and shall undertake provisionally the administration of the river in conformity with the provisions of Articles 332 to 337, until such time as a definitive statute regarding the Danube is concluded by the Powers nominated by the Allied and Associated Powers.

ARTICLE 349.

Germany agrees to accept the régime which shall be laid down for the Danube by a Conference of the Powers nominated by the Allied and Associated Powers, which shall meet within one year after the coming into force of the present Treaty, and at which German representatives may be present.

ARTICLE 350.

The mandate given by Article 57 of the Treaty of Berlin of July 13, 1878, to Austria-Hungary, and transferred by her to Hungary, to carry out works at the Iron Gates, is abrogated. The Commission entrusted with the administration of this part of the river shall lay down provisions for the settlement of accounts subject to the financial provisions of the present Treaty. Charges which may be necessary shall in no case be levied by Hungary.

ARTICLE 351.

Should the Czecho-Slovak State, the Serb-Croat-Slovene State or Roumania, with the authorisation of or under mandate from the International Commission, undertake maintenance, improvement, works or other works on a part of the river system which forms a frontier, these States shall enjoy on the opposite bank, and also on the part of the bed which is outside their territory, all necessary facilities for the survey, execution and maintenance of such works.

ARTICLE 352.

Germany shall be obliged to make to the European Commission of the Danube all restitutions, reparations and indemnities for damages inflicted on the Commission during the war.

ARTICLE 353.

Should a deep-draught Rhine-Danube navigable waterway be constructed, Germany undertakes to apply thereto the régime prescribed in Articles 332 to 338.

CHAPTER IV.

CLAUSES RELATING TO THE RHINE AND THE MOSELLE.

ARTICLE 354.

As from the coming into force of the present Treaty, the Convention of Mannheim of October 17, 1868, together with the Final Protocol thereof, shall continue to govern navigation on the Rhine, subject to the conditions hereinafter laid down.

In the event of any provisions of the said Convention being in conflict with those laid down by the General Convention referred to in Article 335 (which shall apply to the Rhine) the provisions of the General Convention shall prevail.

Within a maximum period of six months from the coming into force of the present Treaty, the Central Commission referred to in Article 355 shall meet to draw up a project of revision of the Convention of Mannheim. This project shall be drawn up in harmony with the provisions of the General Convention referred to above, should this have been concluded by that time, and shall be submitted to the Powers agreed to adhere to the project so drawn up.

Further, the modifications set out in the following Articles shall immediately be made in the Convention of Mannheim. The Allied and Associated Powers reserve to themselves the right to arrive at an understanding in this connection with Holland, and Germany hereby agrees to accept if required to any such understanding.

ARTICLE 355.

The Central Commission provided for in the Convention of Mannheim shall consist of nineteen members, viz.:

- 2 representatives of the Netherlands;
- 2 representatives of Switzerland;
- 4 representatives of German riparian States;
- 4 representatives of France, which in addition shall appoint the President of the Commission;
- 2 representatives of Great Britain;
- 2 representatives of Italy;
- 2 representatives of Belgium.

The headquarters of the Central Commission shall be at Strasbourg.

Whatever be the number of members present, each Delegation shall have the right to record a number of votes equal to the number of representatives allotted to it.

If certain of these representatives cannot be appointed at the time of the coming into force of the present Treaty, the decisions of the Commission shall nevertheless be valid.

ARTICLE 356.

Vessels of all nations, and their cargoes, shall have the same rights and privileges as those which are granted to vessels belonging to the Rhine navigation, and to their cargoes.

None of the provisions contained in Articles 15 to 20 and 26 of the above-mentioned Convention of Mannheim, in Article 4 of the Final Protocol thereof, or in later Conventions of all nations on the Rhine and on waterways to which such Conventions apply, subject to compliance with the regulations concerning pilotage and other police measures drawn up by the Central Commission.

The provisions of Article 22 of the Convention of Mannheim and of Article 5 of the Final Protocol thereof shall be applied only to vessels registered on the Rhine. The Central Commission shall decide on the steps to be taken to ensure that other vessels satisfy the conditions of the general regulations applying to navigation on the Rhine.

ARTICLE 357.

Within a maximum period of three months from the date on which notification shall be given Germany shall cede to France tugs and vessels, from among those remaining registered in German Rhine navigation companies, which have surrendered by way of restitution, repair, or shares in German Rhine navigation companies.

When vessels and tugs are ceded, such vessels and tugs, together with their fittings and gear, shall be in good state of repair, shall be in condition to carry on commercial traffic recently built.

The same procedure shall be followed in the matter of the cession by Germany to France or:

(1) the installations, berthing and anchorage accommodation, platforms, docks, warehouses, plant, etc., which German subjects or German companies owned on August 1, 1914, in the port of Rotterdam, and

(2) the shares or interests which Germany or German nationals possessed in such installations at the same date.

The amount and specifications of such cessions shall be determined within one year of the coming into force of the present Treaty by an arbitrator or arbitrators appointed by the United States of America, due regard being had to the legitimate needs of the parties concerned.

The cessions provided for in the present Article shall entail a credit of which the total amount, settled in a lump sum by the arbitrator or arbitrators mentioned above, shall not in any case exceed the value of the stipulations of the initial establishment of the ceded material and installations, and shall be set off against the total sums due from Germany; in consequence, the indemnification of the proprietors shall be a matter for Germany to deal with.

ARTICLE 358.

Subject to the obligation to comply with the provisions of the Convention of Mannheim or of the Convention water of the may be substituted therefor, and to the stipulations of the present Treaty, France shall have the right on the whole course of the Rhine included between the two extreme points of the French frontiers:

(a) the right to take water from the Rhine to feed navigation and irrigation canals (constructed or to be constructed) or for any other purpose, and to execute on the German bank all works necessary for the exercise of this right;

(b) the exclusive right to the power derived from works of regulation on the river, subject to the payment to Germany of the value of half the power actually produced; this payment, which will take into account the cost of the works necessary for producing the power, being made either in money or in power and in default of agreement being determined by arbitration. For the purpose France alone shall have the right to carry out in this part of the river all works of regulation (weirs or other works) which she may consider necessary for the production of power. Similarly, the right of taking water from the Rhine is accorded to Belgium to feed the Rhine-Meuse navigable waterway provided for below.

The exercise of the rights mentioned under (a) and (b) of the present Article shall not be in such a way as to reduce the facilities for navigation, either in the bed nor in the derivations which may be substituted for the same. The present Article shall not, therefore, nor shall it involve any increase in the tolls formerly levied under the Convention in force. All proposed schemes shall be laid before the Central Commission in order that the Commission may assure itself that these conditions are complied with.

France shall ensure the prompt and faithful execution of the provisions contained in (a) and (b) above, Germany:

(1) binds herself not to undertake or to allow the construction of any lateral canal or any derivation on the right bank of the river opposite the French frontiers;

(2) recognises the possession by France of the right of support on and the right of way over all lands situated on the right bank which may be required or to allow to be built, and to operate weirs which France, with the consent of the Central Commission, may subsequently decide to establish. In accordance with such consent, France shall be entitled to decide upon and fix the limits of the necessary sites, and she shall be permitted to occupy such lands after a period of two months after simple notification, subject to the payment by her to Germany of indemnities of which the total amount shall be fixed by the Central Commission. Germany shall make it her business to indemnify the proprietors whose property will be burdened with such servitudes or permanently occupied by the works, should Switzerland approve, the same rights shall be accorded to Switzerland for the part of the river forming her frontier with other riparian States;

(3) shall hand over to the French Government, during the month following the coming into force of the present Treaty, all projects, designs, drafts of concessions and of specifications concerning the regulation of the Rhine to any purpose whatever which have been drawn up or received by the Governments of Alsace-Lorraine or of the Grand Duchy of Baden.

ARTICLE 359.

Subject to the preceding provisions, no works shall be carried out in the bed or on either bank of the Rhine where it forms the boundary of France and Germany without the previous approval of the Central Commission or of its agents.

ARTICLE 360.

France reserves the option of substituting herself as regards the rights and interests resulting from agreements arrived at between the Government of Alsace-Lorraine and the Grand Duchy of Baden concerning the works to be carried out on the Rhine; she may also denounce such agreements within a term of five years dating from the coming into force of the present Treaty.

France shall also have the option of causing works to be carried out which may be recognised as necessary by the

Central Commission for the upkeep or improvement of the navigability of the Rhine above Mannheim.

ARTICLE 361.

Should Belgium within a period of 25 years from the coming into force of the present Treaty decide to create a deep-water Rhine-Meuse navigable waterway, in the region of Kuuroot, Germany shall be bound to construct, in accordance with plans to be submitted to her by the Belgian Government, after agreement with the Central Commission, the portion of this navigable waterway situated within her territory.

The Belgian Government shall, for this purpose, have the right to carry out on the ground all necessary surveys.

Should Germany fail to carry out all or part of these works, the Central Commission shall be entitled to carry them out instead; and, for this purpose, the Commission may decide upon and fix the limits of the necessary sites and occupy the ground after a period of two months after simple notification, subject to the payment of indemnities to be fixed by it and paid by Germany.

This navigable waterway shall be placed under the same administrative régime as the Rhine itself, and the division of the cost of initial construction, including the above indemnities, among the States crossed thereby shall be made by the Central Commission.

ARTICLE 362.

Germany hereby agrees to offer no objection to any proposals of the Central Rhine Commission for extending its jurisdiction:

(1) to the Moselle below the Franco-Luxembourg frontier down to the Rhine, subject to the consent of Luxembourg;

(2) to the Rhine above Basle up to the Lake of Constance, subject to the consent of Switzerland;

(3) to the lateral canals and channels which may be established either to duplicate or to improve naturally navigable sections of the Rhine or the Moselle, or to connect two naturally navigable sections of these rivers, and any other parts of the Rhine river system the above may be covered by the General Convention provided for in Article 338 above.

CHAPTER V.

CLAUSES GIVING TO THE CZECHO-SLOVAK STATE THE USE OF NORTHERN PORTS.

ARTICLE 363.

In the ports of Hamburg and Stettin Germany shall lend to the Czecho-Slovak State, for a period of 99 years, areas which shall be placed under the general régime of free zones and shall be used for the direct transit of goods coming from or going to that State.

ARTICLE 364.

The delimitation of these areas, and their equipment, their exploitation, and in general all conditions for their utilisation, including the amount of the rental, shall be decided by a Commission consisting of one delegate of Germany, one delegate of the Czecho-Slovak State and one delegate of Great Britain. These conditions shall be susceptible of renewal every ten years in the same manner.

Germany declares in advance that she will adhere to the decisions so taken.

SECTION III.

RAILWAYS.

CHAPTER I.

CLAUSES RELATING TO INTERNATIONAL TRANSPORT.

ARTICLE 365.

Goods coming from the territories of the Allied and Associated Powers, and going to Germany, or in transit through Germany from or to the territories of the Allied and Associated Powers, shall enjoy on the German railways as regulated by law charges to be collected (rebates and drawbacks being taken into account), facilities, and all other matters, the most favourable treatment applied to goods of the same kind carried on any German line, either in internal traffic, or for export, or in transit, under similar conditions of transport, for example as regards length of route. The same rule shall be applied, on the request of one or more of the Allied and Associated Powers, to goods specially designated by such Powers, or goods coming from Germany and going to their territories.

International tariffs established in accordance with the rates referred to in the preceding paragraph and involving through waybills shall be established when one of the Allied and Associated Powers shall require it from Germany.

ARTICLE 366.

From the coming into force of the present Treaty the High Contracting Parties shall renew, in so far as concerns them and under the reserves indicated in the second paragraph of the present Article, the conventions and arrangements signed at Bern on October 14, 1880, September 19, 20, 1893, July 16, 1895, June 16, 1898, and October 18, 1906, regarding the transportation of goods by rail.

If within five years from the date of the coming into force of the present Treaty a new convention for the transportation of passengers, luggage and goods by rail shall have been concluded to replace the Bern Convention of October 14, 1890, and the subsequent additions referred to above, this new convention and the supplementary provisions for international transport by rail which may be based on

The American Commission at the Peace Conference in the Palace at Versailles, France. Front row, from left to right: Colonel House, Secretary Lansing, President Wilson, Henry White and Major-General Bliss.

it shall bind Germany, even if she shall have refused to take part in the preparation of the convention or to subscribe to it. Until a new convention shall have been concluded Germany shall conform to the provisions of the Berne Convention and the subsequent additions referred to above, and to the current supplementary provisions.

ARTICLE 367.

Germany shall be bound to co-operate in the establishment of through ticket services (for passengers and their luggage) which shall be required by any of the Allied and Associated Powers to ensure their communication by rail with each other and with all other countries by rail with the territories of Germany; in particular Germany shall, for this purpose, accept trains and carriages coming from the territories of the Allied and Associated Powers and shall forward them with a speed at least equal to that of her best long-distance trains on the same lines. The rates applicable to such through services shall not in any case be higher than the rates collected on German internal services for the same distance, under the same conditions of speed and comfort.

The tariffs applicable under the same conditions of speed and comfort to the transportation of emigrants going to or coming from ports of the Allied and Associated Powers and using the German railways shall not be at a higher kilometer rate than the most favourable tariffs (drawbacks, metric rate and rebates being taken into account) enjoyed on the said railways by emigrants going to or coming from any other ports.

ARTICLE 368.

Germany shall not apply specially to such through services, or to the transportation of emigrants going to or coming from the ports of the Allied and Associated Powers, any technical, fiscal or administrative measures, such as measurement, customs examination, general police, sanitary police, and control, the result of which would be to impede or delay such services.

ARTICLE 369.

In case of transport partly by rail and partly by internal navigation, with or without through way-bill, the preceding Articles shall apply to the part of the journey performed by rail.

CHAPTER II.

ROLLING-STOCK.

ARTICLE 370.

Germany undertakes that German wagons shall be fitted with apparatus allowing:

(1) of their inclusion in goods trains on the lines of such of the Allied and Associated Powers as are parties to the Berne Convention of May 15, 1886, as modified on May 18, 1907, without hampering the action of the continuous brake which may be adopted in such countries within ten years of the coming into force of the present Treaty, and

(2) of the acceptance of wagons of such countries in all goods trains on the German lines.

The rolling stock of the Allied and Associated Powers shall enjoy on the German lines the same treatment as German rolling stock as regards movement, upkeep and repairs.

CHAPTER III.

SESSIONS OF RAILWAY LINES.

ARTICLE 371.

Subject to any special provisions concerning the session of ports, waterways and railways situated in the territories over which Germany abandons her sovereignty, and to the financial conditions relating to the concessionaires and the pensioning of the personnel, the session of railways will take place under the following conditions:

(1) The works and installations of all the railroads shall be handed over complete and in good condition.

(2) When a railway system possessing its own rolling-stock is handed over in its entirety by Germany to one of the Allied and Associated Powers, such stock shall be handed over complete, in accordance with the last inventory before November 11, 1918, and in a normal state of upkeep.

(3) As regards lines without any special rolling-stock, Commissions of experts designed by the Allied and Associated Powers, which Germany shall be represented, shall fix the proportion of the stock existing on the system to which those lines belong to be handed over. These Commissions shall have regard to the amount of the material registered on these lines in the last inventory before November 11, 1918, the length of track (slidings included) and the nature and amount of the traffic. These Commissions shall also specify the locomotives, carriages and wagons to be handed over in each case; they shall decide upon the conditions of their acceptance, and shall make the provisional arrangements necessary to ensure their repair in German workshops.

(4) Stocks of stores, fittings and plant shall be handed over under the same conditions as the rolling-stock.

The provisions of paragraphs 3 and 4 above shall be applied to the material of the Russian Poland converted by Germany to the German gauge, such lines being regarded as detached from the Prussian State lines.

CHAPTER IV.

PROVISIONS RELATING TO CERTAIN RAILWAY LINES.

ARTICLE 372.

When as a result of the fixing of new frontiers a railway connection between two parts of the same country crosses

another country, or a branch line from one country has its terminus in another, the conditions of working, if not specifically provided for in the present Treaty, shall be laid down in a convention between the railway administrations concerned. If the administrations cannot come to an agreement as to the terms of such convention, the points of difference shall be decided by commissions of experts composed as provided in the preceding Article.

ARTICLE 373.

Within a period of five years from the coming into force of the present Treaty the Czechoslovak State may require the construction of a railway line in German territory between the stations of Schlattau and Nachod. The cost of construction shall be borne by the Czechoslovak State.

ARTICLE 374.

Germany undertakes to accept, within ten years of the coming into force of the present Treaty, on request being made by the Swiss Government after agreement with the Italian Government, the denunciation of the International Convention of October 13, 1909, relative to the St. Gothard railway. In the absence of agreement as to the conditions of such denunciation, Germany hereby agrees to accept the decision of an arbitrator designated by the United States of America.

CHAPTER V.

TRANSITORY PROVISIONS.

ARTICLE 375.

Germany shall carry out the instructions given her, in regard to transport, by an authorized body acting on behalf of the Allied and Associated Powers:

(1) For the carriage of troops under the provisions of the present Treaty, and of material, ammunition and supplies for army use;

(2) As a temporary measure, for the transportation of supplies for certain regions, as well as for the restoration, as rapidly as possible, of the normal conditions of transport, and for the organization of postal and telegraphic services.

SECTION IV.

DISPUTES.

AND REVISION OF PERMANENT CLAUSES.

ARTICLE 376.

Disputes which may arise between interested Powers with regard to the interpretation and application of the preceding Articles shall be settled as provided by the League of Nations.

ARTICLE 377.

At any time the League of Nations may recommend the revision of such of these Articles as relate to a permanent administrative régime.

ARTICLE 378.

The stipulations in Articles 321 to 330, 332, 365, and 367 to 369 shall be subject to revision by the Council of the League of Nations at any time after five years from the coming into force of the present Treaty.

Failure of such revision, no Allied or Associated Power can claim after the expiration of the above period of five years the benefit of any of the stipulations in the Articles enumerated above on behalf of any portion of its territories in which reciprocity is not accorded in respect of such stipulations. The period of five years during which reciprocity cannot be demanded may be prolonged by the Council of the League of Nations.

SECTION V.

SPECIAL PROVISION.

ARTICLE 379.

Without prejudice to the special obligations imposed on her by the present Treaty for the benefit of the Allied and Associated Powers, Germany undertakes to adhere to any General Conventions regarding the international régime of transit, waterways, ports or airways which may be concluded by the Allied and Associated Powers, with the approval of the League of Nations, within five years of the coming into force of the present Treaty.

SECTION VI.

CAUSES RELATING TO THE KIEL CANAL.

ARTICLE 380.

The Kiel Canal and its approaches shall be maintained free and open to the vessels of commerce and of war of all nations at peace with Germany on terms of entire equality.

ARTICLE 381.

The nationals, property and vessels of all Powers shall, in respect of charges, facilities, and in all other respects, be treated on a footing of perfect equality in the use of the Canal, no distinction being made to the detriment of nationals, property and vessels of any Power between them and the nationals, property and vessels of Germany or of the most favoured nation.

No impediment shall be placed on the movement of persons or vessels other than those arising out of police, customs, sanitary, emigration or immigration regulations and those relating to the import or export of prohibited goods. Such regulations must be reasonable and uniform and must not unnecessarily impede traffic.

ARTICLE 382.

Only such charges may be levied on vessels using the Canal or its approaches as are intended to cover in an equitable manner the cost of maintaining in a navigable con-

dition, or of improving, the Canal or its approaches, or to meet expenses incurred in the interests of navigation. The schedule of such charges shall be calculated on the basis of such expenses, and shall be posted up in the ports.

These charges shall be levied in such a manner as to render any detailed examination of cargoes unnecessary, except in the case of suspected fraud or contravention.

ARTICLE 383.

Goods in transit may be placed under seal or in the custody of customs agents; the loading and unloading of goods, and the embarkation and disembarkation of passengers, shall only take place in the ports specified by Germany.

ARTICLE 384.

No charges of any kind other than those provided for in the present Treaty shall be levied along the course or at the approaches of the Kiel Canal.

ARTICLE 385.

Germany shall be bound to take suitable measures to remove any obstacle or danger to navigation, and to ensure the maintenance of good conditions of navigation. She shall not undertake any works of a nature to impede navigation on the Canal or its approaches.

ARTICLE 386.

In the event of violation of any of the conditions of Articles 380 to 386, or of disputes as to the interpretation of these Articles, any interested Power can appeal to the jurisdiction instituted for the purpose by the League of Nations.

In order to avoid reference of small questions to the League of Nations, Germany will establish a local authority at Kiel qualified to deal with disputes in the first instance and to give satisfaction so far as possible to complaints which may be presented through the consular representatives of the interested Powers.

PART XIII.

LABOUR.

SECTION I.

ORGANISATION OF LABOUR.

Whereas the League of Nations has for its object the establishment of universal peace, and such a peace can be established only if it is based upon social justice;

And whereas conditions of labour exist involving such injustice, hardship and privation to large numbers of people as to produce unrest so great that the peace and harmony of the world are imperilled; and an improvement of those conditions is urgently required, as, for example, by the regulation of the hours of work, including the establishment of a maximum working day and week, the regulation of the labour supply, the prevention of unemployment, the provision of an adequate living wage, the protection of the worker against sickness, disease and injury arising out of his employment, the protection of children, young persons and women, provision for old age and injury, protection of the interests of workers when employed in countries other than their own, recognition of the principle of freedom of association, the organisation of vocational and technical education and other measures;

Whereas also the failure of any nation to adopt humane conditions of labour is an obstacle in the way of other nations which desire to improve the conditions in their own countries;

The High Contracting Parties, moved by sentiments of justice and humanity as well as by the desire to secure the permanent peace of the world, agree to the following:

CHAPTER I.

ORGANISATION.

ARTICLE 387.

A permanent organisation is hereby established for the promotion of the objects set forth in the Preamble.

The original Members of the League of Nations shall be the original Members of this organisation, and hereafter membership of the League of Nations shall carry with it membership of the said organisation.

ARTICLE 388.

The permanent organisation shall consist of:

- (1) a General Conference of Representatives of the Members and

- (2) an International Labour Office controlled by the Governing Body described in Article 393.

ARTICLE 389.

The meetings of the General Conference of Representatives of the Members shall be held from time to time as occasion may require, and at least once in every year. It shall be composed of four Representatives of each of the Members, of whom two shall be Government Delegates and the two others shall be Delegates representing respectively the employers and the workpeople of each of the Members.

Each Delegate may be accompanied by advisers, who shall not exceed two in number for each item on the agenda of the meeting. In such questions specially affecting women are to be considered by the Conference, one at least of the advisers shall be a woman.

The Members undertake to nominate non-Government Delegates and advisers chosen in agreement with the industrial organisations, if such organisations exist, which

are most representative of employers or workpeople, as the case may be, in their respective countries.

Advisers shall not speak except on a request made by the Delegate whom they accompany and by the special authorization of the President of the Conference, and may not vote.

A Delegate may by notice in writing addressed to the President appoint one of his advisers to act as his deputy, and the adviser, while so acting, shall be allowed to speak and vote.

The names of the Delegates and their advisers will be communicated to the International Labour Office by the Government of the Members.

The credentials of Delegates and their advisers shall be subject to scrutiny by the Conference, which may, by two-thirds of the votes cast by the Delegates present, refuse to admit any Delegate or adviser whom it deems not to have been nominated in accordance with this Article.

ARTICLE 390.

Every Delegate shall be entitled to vote individually on all matters which are taken into consideration by the Conference.

If one of the Members fails to nominate one of the non-Government Delegates whom it is entitled to nominate, the other non-Government Delegate shall be allowed to sit and speak at the Conference, but not to vote.

If in accordance with the Conference refuses admission to a Delegate of one of the Members, the provisions of the present Article shall apply as if that Delegate had not been nominated.

ARTICLE 391.

The meetings of the Conference shall be held at the seat of the League of Nations, or at such other place as may be decided by the Conference at a previous meeting by two-thirds of the votes cast by the Delegates present.

ARTICLE 392.

The International Labour Office shall be established at the seat of the League of Nations as part of the organisation of the League.

ARTICLE 393.

The International Labour Office shall be under the control of a Governing Body consisting of twenty-four persons, appointed in accordance with the following provisions:

The Governing Body of the International Labour Office shall be constituted as follows:

Twelve persons representing the Governments:
Six persons elected by the Delegates to the Conference representing the employers;

Six persons elected by the Delegates to the Conference representing the workers.

Of the twelve persons representing the Governments eight shall be nominated by the Members which are of the chief industrial importance, and four shall be nominated by the Members selected for the purpose by the Government Delegates to the Conference, excluding the Delegates of the eight Members mentioned above.

Any question as to which are the Members of the chief industrial importance shall be decided by the Council of the League of Nations.

The period of office of the Members of the Governing Body will be three years. The method of filling vacancies and other similar questions may be determined by the Governing Body subject to the approval of the Conference.

The Governing Body shall, from time to time, elect one of its members to act as its Chairman, shall regulate its own procedure and shall fix its own times of meeting. A special meeting shall be held if a written request to that effect is made by at least ten members of the Governing Body.

ARTICLE 394.

There shall be a Director of the International Labour Office, who shall be appointed by the Governing Body, and, subject to the instructions of the Governing Body, shall be responsible for the efficient conduct of the International Labour Office and for such other duties as may be assigned to him.

The Director or his deputy shall attend all meetings of the Governing Body.

ARTICLE 395.

The staff of the International Labour Office shall be appointed by the Director, who shall, so far as is possible with due regard to the efficiency of the work of the Office, select persons of different nationalities. A certain number of these persons shall be women.

ARTICLE 396.

The functions of the International Labour Office shall include the collection and distribution of information on all subjects relating to the international adjustment of conditions of industrial life and labour, and particularly the examination of subjects which it is proposed to bring before the Conference with a view to the conclusion of the international conventions, and the conduct of such special investigations as may be ordered by the Conference.

It will prepare the agenda for the meetings of the Conference.

It will carry out the duties required of it by the provisions of this Part of the present Treaty in connection with international disputes.

It will edit and publish in French and English, and in such

other languages as the Governing Body may thing desirable, a bi-lingual paper dealing with problems of industry and employment of international interest.

Generally, in addition to the functions set out in this Article, it shall have such other powers and duties as may be assigned to it by the Conference.

ARTICLE 397.

The Government Departments of any of the Members which deal with questions of industry and employment may communicate directly with the Director through the Representative of their Government on the Governing Body of the International Labour Office, or failing any such Representative, through such other qualified official as the Government may nominate for the purpose.

ARTICLE 398.

The International Labour Office shall be entitled to the assistance of the Secretary-General of the League of Nations in any matter in which it can be given.

ARTICLE 399.

Each of the Members will pay the travelling and subsistence expenses of its Delegates and their advisers and of its Representatives attending the meetings of the Conference or Governing Body, as the case may be. All the other expenses of the International Labour Office and of the meetings of the Conference or Governing Body shall be paid to the Director by the Secretary-General of the League of Nations out of the general funds of the League.

The Director shall be responsible to the Secretary-General of the League of Nations for the proper expenditure of all moneys paid to him in pursuance of this Article.

CHAPTER II.

PROCEDURE.

ARTICLE 400.

The agenda for all meetings of the Conference will be settled by the Governing Body, who shall consider any suggestion as to the agenda that may be made by the Government of any of the Members or by any representative organisation recognised for the purpose of Article 359.

ARTICLE 401.

The Director shall act as the Secretary of the Conference, and shall transmit the agenda so as to reach the Members four months before the meeting of the Conference, and through them, the non-Government Delegates when appointed.

ARTICLE 402.

Any of the Governments of the Members may formally object to the inclusion of any item or items in the agenda. The grounds for such objection shall be set forth in a resolution addressed to the Secretary-General, who shall circulate it to all the Members of the Permanent Organisation.

Items to which such objection has been made shall not, however, be excluded from the agenda, if at the Conference a majority of two-thirds of the votes cast by the Delegates present is in favour of considering them.

If the Conference decides (otherwise than under the preceding paragraph) by two-thirds of the votes cast by the Delegates present that any subject shall be considered by the Conference, that subject shall be included in the agenda for the following meeting.

ARTICLE 403.

The Conference shall regulate its own procedure, shall elect its own President, and may appoint committees to consider and report on any matter.

Except as otherwise expressly provided in this Part of the present Treaty, all matters shall be decided by a simple majority of the votes cast by the Delegates present. The voting is void unless the total number of votes cast is equal to half the number of the Delegates attending the Conference.

ARTICLE 404.

The Conference may add to any committees which it appoints technical experts, who shall be assessors without power to vote.

ARTICLE 405.

When the Conference has decided on the adoption of proposals with regard to an item in the agenda, it will rest with the Conference to determine whether these proposals should take the form: (a) of a recommendation to be submitted to the Members for consideration with a view to effect being given to it by national legislation or otherwise, or (b) of a draft international convention for ratification by the Members.

In either case a majority of two-thirds of the votes cast by the Delegates present shall be necessary on the final vote for the adoption of the recommendation or draft convention, as the case may be, by the Conference.

In framing any recommendation or draft convention of general application the Conference shall have due regard to those countries in which climatic conditions, the imperfect development of industrial organisation or other special circumstances make the industrial conditions substantially different and shall suggest the modifications, if any, which it considers may be required to meet the case of such countries.

A copy of the recommendation or draft convention shall be authenticated by the signature of the President of the Conference and of the Director and shall be deposited with

the Secretary-General of the League of Nations. The Secretary-General will communicate a certified copy of the recommendation or draft convention to each of the Members.

Each of the Members undertakes that it will, within the period of one year at most from the closing of the session of the Conference, or if it is impossible owing to exceptional circumstances to do so within the period of one year, then at the earliest practicable moment and in no case later than eighteen months from the closing of the session of the Conference, bring the recommendation or draft convention before the authority or authorities within whose competence the matter lies, for the enactment of legislation or other action.

In the case of a recommendation, the Members will inform the Secretary-General of the action taken.

In case of a draft convention, the Member will, if it obtains the consent of the authority or authorities within whose competence the matter lies, communicate the formal ratification of the convention to the Secretary-General and will take such action as may be necessary to make effective the provisions of such convention.

If on a recommendation no legislative or other action is taken to make a recommendation effective, or if the draft convention fails to obtain the consent of the authority or authorities within whose competence the matter lies, no further obligation shall rest upon the Member.

In the case of a federal State, the power of which to enter into conventions on labour matters is subject to limitations, it shall be in the discretion of that Government to treat a draft convention to which such limitations apply as a recommendation only, and the provisions of this Article with respect to recommendations shall apply in such case.

The above Article shall be interpreted in accordance with the following principle:

In no case shall any Member be asked or required, as a result of the adoption of any recommendation or draft convention by the Conference, to lessen the protection afforded by its existing legislation to the workers concerned.

ARTICLE 406.

Any convention so ratified shall be registered by the Secretary-General of the League of Nations, but shall only be binding upon the Members which ratify it.

ARTICLE 407.

If any convention coming before the Conference for final consideration fails to secure the support of two-thirds of the votes cast by the Delegates present, it shall nevertheless be open to the Members of the Permanent Organisation to agree to such convention among themselves.

Any convention so agreed to shall be communicated by the Governments concerned to the Secretary-General of the League of Nations, who shall register it.

ARTICLE 408.

Each of the Members agrees to make an annual report to the International Labour Office on the measures which it has taken to give effect to the provisions of conventions to which it is a party. These reports shall be made in such form and shall contain such particulars as the Governing Body may request. The Director shall lay a summary of these reports before the next meeting of the Conference.

ARTICLE 409.

In the event of any representation being made to the International Labour Office by an industrial association of employers or of workers that any of the Members has failed to secure in any respect the effective observance within its jurisdiction of any convention to which it is a party, the Governing Body may communicate this representation to the Government against which it is made and may invite that Government to make such statement on the subject as it may think fit.

ARTICLE 410.

If no statement is received within a reasonable time from the Government in question, or if the statement when received is not deemed to be satisfactory by the Governing Body, the latter shall have the right to publish the representation and the statement, if any, made in reply to it.

ARTICLE 411.

Any of the Members shall have the right to file a complaint with the International Labour Office if it is not satisfied that any other Member is securing the effective observance of any convention which both have ratified in accordance with the foregoing Articles.

The Governing Body may, if it thinks fit, before referring such a complaint to a Commission of Enquiry, as hereinafter provided for, communicate with the Government in question in the manner described in Article 409.

If the Governing Body does not think it necessary to communicate the complaint to the Government in question or if, when they have made such communication, no statement in reply has been received within a reasonable time which the Governing Body considers to be satisfactory, the Governing Body may apply to the appointment of a Commission of Enquiry to consider the complaint and to report thereon.

The Governing Body may adopt the same procedure either of its own motion or on receipt of a complaint from a Delegate to the Conference.

When any matter arising out of Articles 410 or 411 is being considered by the Governing Body, the Government in question shall, if not already represented thereon, be en-

titled to send a representative to take part in the proceedings of the Governing Body while the matter is under consideration. Adequate notice of the date on which the matter will be considered shall be given to the Government in question.

ARTICLE 412.

The Commission of Enquiry shall be constituted in accordance with the following:

Each of the Members agrees to nominate within six months of the date on which the present Treaty comes into force three persons of industrial experience, of whom one shall be a representative of employers, one a representative of workers, and one a person of independent standing, who shall together form a panel from which the Members of the Commission of Enquiry shall be drawn.

The qualifications of the persons so nominated shall be subject to scrutiny by the Governing Body, which may by two-thirds of the votes cast by the representatives present refuse to accept the nomination of any person whose qualifications do not in its opinion comply with the requirements of the present Article.

Upon the application of the Governing Body, the Secretary-General of the League of Nations shall nominate three persons, one from each section of this panel, to constitute the Commission of Enquiry, and shall designate one of them as the President of the Commission. None of these three persons shall be a person nominated to the panel by any Member directly concerned in the complaint.

ARTICLE 413.

The Members agree that, in the event of the reference of a complaint to a Commission of Enquiry under Article 411, they will each, when the votes cast by the representatives are equal or not, place at the disposal of the Commission all the information in their possession which bears upon the subject-matter of the complaint.

ARTICLE 414.

When the Commission of Enquiry has fully considered the complaint, it shall prepare a report embodying its findings on all questions of fact relevant to determining the issue between the parties and containing such recommendations as it may think proper as to the steps which should be taken to meet the complaint and the time within which they should be taken.

It shall also indicate in this report the measures, if any, of an economic character against a defaulting Government which it considers to be appropriate, and which other Governments would be justified in adopting.

ARTICLE 415.

The Secretary-General of the League of Nations shall communicate the report of the Commission of Enquiry to each of the Governments concerned in the complaint, and shall cause it to be published.

Each of these Governments shall within one month inform the Secretary-General of the League of Nations whether or not it accepts the recommendations contained in the report of the Commission; and if not, whether it proposes to refer the complaint to the Permanent Court of International Justice of the League of Nations.

ARTICLE 416.

In the event of any Member failing to take the action required by Article 405, with regard to a recommendation or draft Convention, any other Member shall be entitled to refer the matter to the Permanent Court of International Justice.

ARTICLE 417.

The decision of the Permanent Court of International Justice in regard to a complaint or matter which has been referred to it in pursuance of Article 415 or Article 416 shall be final.

ARTICLE 418.

The Permanent Court of International Justice may affirm, vary or reverse any of the findings or recommendations of the Commission of Enquiry, if any, and shall in its decision indicate the measures, if any, of an economic character which it considers to be appropriate, and which other Governments would be justified in adopting against a defaulting Government.

ARTICLE 419.

In the event of any Member failing to carry out within the time specified the recommendations, if any, contained in the report of the Commission of Enquiry, or in the decision of the Permanent Court of International Justice, as the case may be, any other Member may take against that Member the measures of an economic character indicated in the report of the Commission or in the decision of the Court as appropriate to the case.

ARTICLE 420.

The defaulting Government may at any time inform the Governing Body that it has taken the steps necessary to comply with the provisions of Articles 412, 413, 414, 415, 417 and 418 shall apply, and if the report of the Commission of Enquiry or the decision of the Permanent Court

of International Justice is in favour of the defaulting Government the other Governments shall forthwith discontinue the measures of an economic character that they have taken against the defaulting Government.

CHAPTER III.

GENERAL.

ARTICLE 421.

The Members engage to apply conventions which they have ratified in accordance with the provisions of this Part of the Present Treaty to their colonies, protectorates and possessions which are not fully self-governing:

- (1) Except where owing to the local conditions the convention is inapplicable.
 - (2) Subject to such modifications as may be necessary to adapt the convention to local conditions.
- And each of the Members shall notify to the International Labour Office the action taken in respect of each of its colonies, protectorates and possessions which are not fully self-governing.

ARTICLE 422.

Amendments to this Part of the present Treaty which are adopted by the Conference by a majority of two-thirds of the votes cast by the Delegates present shall take effect when ratified by the States whose representatives compose the Council of the League of Nations and by three-fourths of the Members.

ARTICLE 423.

Any question or dispute relating to the interpretation of this Part of the present Treaty or of any subsequent convention concluded by the Members in pursuance of the provisions of the present Treaty shall be referred for decision to the Permanent Court of International Justice.

CHAPTER IV.

TRANSITORY PROVISIONS.

ARTICLE 424.

The first meeting of the Conference shall take place in October, 1919. The place and agenda for this meeting shall be as specified in the Annex hereto.

The arrangements for the convening and the organisation of the first meeting of the Conference will be made by the Government designated for the purpose in the said Annex. That Government shall be assisted in the preparation of the documents for submission to the Conference by an International Committee constituted as provided in the said Annex.

The expenses of the first meeting and of all subsequent meetings held before the League of Nations has been able to establish a general fund, other than the expenses of Delegates and their advisers, will be borne by the Members in accordance with the apportionment of the expenses of the International Bureau of the Universal Postal Union.

ARTICLE 425.

Until the League of Nations has been constituted all communications which under the provisions of the foregoing Articles should be addressed to the Secretary-General of the League will be preserved by the Director of the International Labour Office, who will transmit them to the Secretary-General of the League.

ARTICLE 426.

Pending the creation of a Permanent Court of International Justice disputes which in accordance with this Part of the present Treaty would be submitted to it for decision will be referred to a tribunal of three persons appointed by the Council of the League of Nations.

ANNEX.

FIRST MEETING OF ANNUAL LABOUR CONFERENCE, 1919.
The place of meeting will be Washington.
The Government of the United States of America is requested to convene the Conference.

The International Organising Committee will consist of seven Members, appointed by the United States of America, Great Britain, France, Italy, Japan, Belgium and Switzerland. The Committee may, if it thinks necessary, invite other Members to appoint representatives.

- (1) Application of principle of the 8-hours day or of the 48-hours week.
- (2) Question of preventing or providing against unemployment.

- (3) Women's employment:
 - (a) Before and after child-birth including the maternity benefit;
 - (b) During the night;
 - (c) In unhealthy processes.
- (4) Employment of children and young persons:
 - (a) Minimum age of employment;
 - (b) During the night;
 - (c) In unhealthy processes.
- (5) Extension and application of the International Conventions adopted at Berne in 1906 on the prohibition of night work for women employed in industry and the prohibition of the use of white phosphorus in the manufacture of matches.

SECTION II.

GENERAL PRINCIPLES.

ARTICLE 427.

The High Contracting Parties, recognising that the well-being, physical, moral and intellectual, of industrial wage-

Hermann Mueller, German Foreign Minister and One of the Chief Signers of German Peace Treaty for Germany.

Dr. Johannes Bell, German Minister of Colonies and One of the Chief Signers of German Peace Treaty for Germany.

A Conference on the Danzig Question by Representatives of the Allies and Germans in a Parlor Car Near Spa.

earnings is of supreme international importance, have framed, in order to further this great end the permanent machinery provided for in Section I and associated with that of the League of Nations.

They recognise that differences of climate, habits and customs, of economic opportunities and industrial tradition, make strict uniformity in the conditions of labour difficult of immediate attainment. But, holding as they do, that labour should not be regarded merely as an article of commerce, they think that there are methods and principles for regulating labour conditions which all industrial communities should endeavour to apply, so far as their special circumstances will permit.

Among these methods and principles, the following seem to the High Contracting Parties to be of special and urgent importance:

First.—The guiding principle above enunciated that labour should not be regarded merely as a commodity or article of commerce.

Second.—The right of association for all lawful purposes by the employed as well as by the employers.

Third.—The payment to the employed of a wage adequate to maintain a reasonable standard of life as this is understood in their time and country.

Fourth.—The adoption of an eight hours day or a forty-eight hours week as the standard to be aimed at where it has not already been attained.

Fifth.—The adoption of a weekly rest of at least twenty-four hours, which should include Sunday wherever practicable.

Sixth.—The abolition of child labor and the imposition of such limitations on the labour of young persons as shall permit the continuation of their education and assure their proper physical development.

Seventh.—The principle that men and women should receive equal remuneration for work of equal value.

Eighth.—The standard set by law in each country with respect to the conditions of labour should have due regard to the equitable economic treatment of all workers lawfully resident therein.

Ninth.—Each State should make provision for a system of inspection in which women should take part, in order to ensure the enforcement of the laws and regulations for the protection of the employed.

Without denying that these methods and principles are either complete or final, the High Contracting Parties are of opinion that they are well fitted to guide the policy of the League of Nations; and that, if adopted by the Industrial Communities who are members of the League, and safeguarded in practice by an efficient system of such inspection, they will confer lasting benefits upon the wage-earners of the world.

PART XIV.
GUARANTEES.

SECTION 1.
WESTERN EUROPE.

ARTICLE 428.

As a guarantee for the execution of the present Treaty by Germany, the German territory situated to the west of the Rhine, together with the bridgeheads, will be occupied by Allied and Associated troops for a period of fifteen years from the coming into force of the present Treaty.

ARTICLE 429.

If the conditions of the present Treaty are faithfully carried out by Germany, the occupation referred to in Article 428 will be successively restricted as follows:

(1) At the expiration of five years there will be evacuated: the bridgehead of Cologne and the territories north of a line running along the Ruhr, then along the railway Jülich, Düren, Euskirchen, Rheinbach, thence along the road Rembach to Sinszig, and reaching the Rhine at the confluence with the Moselle, the railways and places mentioned above being excluded from the area evacuated.

(2) At the expiration of ten years there will be evacuated: the bridgehead of Coblenz and the territories north of a line to be drawn from the intersection between the frontiers of Belgium, Germany and Holland, running about from 4 kilometres south of Aix-la-Chapelle, then to and following the crest of Forst Gemünd, then east of the railway of the Urft Valley, then along Blankenheim, Valdorf, Dreis, Ulmen to and following the Moselle from Bremm to Nehren, then passing by Kappel and Simmern, then following the ridge of the heights between Simmern and the Rhine and reaching this river at Bacharach; all the places, valleys, roads and railways mentioned above being excluded from the area evacuated.

(3) At the expiration of fifteen years there will be evacuated: the bridgehead of Mainz, the bridgehead of Kehl and the remainder of the German territory under occupation.

If at that date the guarantees against unprovoked aggression by Germany are not considered sufficient by the Allied and Associated Governments, the evacuation of the Allied troops may be delayed to the extent regarded as necessary for the purpose of obtaining the required guarantees.

ARTICLE 430.

In case either during the occupation or after the expiration of the fifteen years referred to above the Reparation Commission find that Germany refused to observe the whole or part of her obligations under the present Treaty with regard to reparation, the whole or part of the areas specified

in Article 429 will be re-occupied immediately by the Allied and Associated forces.

ARTICLE 431.

If before the expiration of the period of fifteen years Germany complies with all the undertakings resulting from the present Treaty, the occupying forces will be withdrawn immediately.

ARTICLE 432.

All matters relating to the occupation and not provided for by the present Treaty shall be regulated by subsequent agreements, which Germany hereby undertakes to observe.

SECTION II.
EASTERN EUROPE.

ARTICLE 433.

As a guarantee for the execution of the provisions of the present Treaty, by which Germany accepts definitely the abrogation of the Brest-Litovsk Treaty, and of all treaties, conventions and agreements entered into by her with the Maximalist Government in Russia, and in order to ensure the restoration of peace and good government in the Baltic Provinces and Lithuania, all German troops at present in the said territories shall return to within the frontiers of Germany as soon as the Governments of the Principal Allied and Associated Powers shall think the moment suitable, having regard to the internal situation of these territories. These troops shall abstain from all requisitions and seizures and from any other coercive measures, with a view to obtaining supplies intended for Germany, and shall in no way interfere with such measures for national defence as may be adopted by the Provisional Governments of Estonia, Latvia and Lithuania.

No other German troops shall, pending the evacuation or after the evacuation is complete, be admitted to the said territories.

PART XV.
MISCELLANEOUS PROVISIONS.

ARTICLE 434.

Germany undertakes to recognise the full force of the Treaties of Peace and Additional Conventions which may be concluded by the Allied and Associated Powers with the Powers who fought on the side of Germany and to recognise whatever dispositions may be made concerning the territories of the former Austro-Hungarian Monarchy, of the Kingdom of Bulgaria and of the Ottoman Empire, and to recognise the new States within their frontiers as there laid down.

ARTICLE 435.

The High Contracting Parties, while they recognise the guarantees stipulated by the Treaties of 1815, and especially by the Act of November 20, 1815, in favour of Switzerland, the said guarantees constituting international obligations for the maintenance of peace, declare nevertheless that the provisions of these treaties, conventions, declarations and other supplementary Acts concerning the neutralized zone of Savoy, as laid down in paragraph 1 of Article 92 of the Final Act of the Congress of Vienna and in paragraph 2 of Article 3 of the Treaty of Paris of November 20, 1815, are no longer consistent with present conditions. For this reason the High Contracting Parties take note of the agreement reached between the French Government and the Swiss Government for the abrogation of the stipulations relating to this zone which are and remain abrogated.

The High Contracting Parties also agree that the stipulations of the Treaties of 1815 and of the other supplementary Acts concerning the free zones of Upper Savoy and the Gex district are no longer consistent with present conditions, and that it is for France and Switzerland to come to an agreement together with a view to settling between themselves the status of these territories under such conditions as shall be considered suitable by both countries.

ANNEX.

The Swiss Federal Council has informed the French Government on May 5, 1919, that after examining the provisions of Article 435 in a like spirit of sincere friendship it has happily reached the conclusion that it was possible to acquiesce in it under the following conditions and reservations:

(a) The neutralized zone of Haute-Savoie:
(1) It will be understood that as long as the Federal Chambers have not ratified the agreement come to between the two Governments concerning the abrogation of the stipulations in respect of the neutralized zone of Savoy, nothing will be definitively settled, on one side or the other, in regard to this subject.

(b) The assent given by the Swiss Government to the abrogation of the above mentioned stipulations presupposes, in conformity with the text adopted, the recognition of the guarantees formulated in favour of Switzerland by the Treaties of 1815 and particularly by the Declaration of November 20, 1815.

(c) The agreement between the Governments of France and Switzerland for the abrogation of the above mentioned stipulations will only be considered as valid if the Treaty of Peace contains this Article in its present wording. In addition the Parties to the Treaty of Peace should endeavor to obtain the assent of the signatory Powers of the Treaties of 1815 and of the Declaration of November 20, 1815,

which are not signatories of the present Treaty of Peace.

(2) Free zone of Haute-Savoie and the district of Gex: The Federal Council makes the most express reservations as to the interpretation to be given to the statement mentioned in the last paragraph of the above Article for insertion in the Treaty of Peace, which provides that "the stipulations of the Treaties of 1815 and other supplementary acts concerning the free zones of Haute-Savoie and the Gex district are no longer consistent with present conditions". The Federal Council would not wish that its acceptance of the above wording should lead to the conclusion that it would agree to the suppression of a system intended to give neighbouring territory the benefit of a special régime which is appropriate to the geographical and economic situation and which has been well tested.

In the opinion of the Federal Council the question is not the modification of the customs system of the zones as set up by the Treaties mentioned above, but only the regulation in a manner more appropriate to the economic conditions of the present day of the terms of the exchange of goods between the regions in question. The Federal Council has been led to make the preceding observations by the perusal of the draft Convention concerning the future constitution of the zones which was annexed to the note of April 26 from the French Government. While making the above reservations the Federal Council declares its readiness to examine in the most friendly spirit any proposals which the French Government may deem it convenient to make on the subjects.

(b) It is conceded that the stipulations of the Treaties of 1815 and other supplementary acts relative to the free zones will remain in force until a new arrangement is come to between France and Switzerland to regulate matters in this territory.

II

The French Government have addressed to the Swiss Government, on May 18, 1919, the following note in reply to the communication set out in the preceding paragraph:

In a note dated May 5 the Swiss Legation in Paris was good enough to inform the German Legation in Paris that the Federal Government adhered to the proposed Article to be inserted in the Treaty of Peace between the Allied and Associated Governments and Germany.

The French Government have taken note with much pleasure of the agreement between the German Legation in Paris and the proposed Article, which had been accepted by the Allied and Associated Governments, has been inserted under No. 435 in the Peace conditions presented to the German Plenipotentiaries.

The Swiss Government, in their note of May 5 on this subject, had expressed various views and reservations.

Concerning the observations relating to the free zones of Haute-Savoie and the Gex district, the French Government have the honour to observe that the provisions of the last paragraph of Article 435 are so clear that their purport cannot be misapprehended, especially where it implies that no other Power but France and Switzerland will in future be interested in that question.

The French Government, on their part, are anxious to protect the interests of the French territories concerned, and, with that object, having their special situation in view, they bear in mind the desirability of assuring them a suitable customs régime and determining, in a manner better suited to present conditions, the methods of exchanges between these territories and the adjacent Swiss territories, while taking into account the reciprocal interests of both regions.

It is understood that this must in no way prejudice the right of France to adjust her customs line in this region in conformity with her political frontier, as is done on the other portions of her territorial boundaries, and as was done by Switzerland long ago on her own boundaries in this region.

The French Government are pleased to note on this subject in what a friendly disposition the Swiss Government take this opportunity of declaring their willingness to consider any French proposal dealing with the system to be substituted for the present régime of the said free zones, which the French Government intend to formulate in the same friendly spirit.

Moreover, the French Government have no doubt that the provisional maintenance of the régime of 1815 as to the free zones referred to in the above mentioned paragraph of the note from the Swiss Legation of May 5, whose object is to provide for the passage from the present régime to the conventional régime, will cause no delay whatsoever in the establishment of the new situation which has been found necessary by the two Governments. This remark applies also to the ratification by the Federal Chambers, dealt with in paragraph 1 (a), of the Swiss note of May 5, under the heading "Neutralized zone of Haute-Savoie".

ARTICLE 436.

The High Contracting Parties declare and place on record that they have taken note of the Treaty signed by the

Government of the French Republic on July 17, 1918, with His Serene Highness the Prince of Monaco defining the relations between France and the Principality.

ARTICLE 437.

The High Contracting Parties agree that, in the absence of a subsequent agreement to the contrary, the Chairman of any Commission established by the present Treaty shall in the event of an equality of votes be entitled to a second vote.

ARTICLE 438.

The Allied and Associated Powers agree that where Christian religious missions were being maintained by German societies or persons in territory belonging to them, or of which the government is entrusted to them in accordance with the present Treaty, the property of which these missions or missionary societies possessed, including that of of missions, shall continue to be devoted to missionary purposes. In order to ensure the due execution of this undertaking the Allied and Associated Governments will hand over such property to boards of trustees appointed by or approved by the Governments and composed of persons holding the faith of the Mission whose property is involved.

The Allied and Associated Governments, while continuing to maintain full control as to the individuals by whom the Missions are conducted, will safeguard the interests of such Missions.

Germany, taking note of the above undertaking, agrees to accept all arrangements made or to be made by the Allied or Associated Government concerned for carrying on the work of the said missions or trading societies and waives all claims on their behalf.

ARTICLE 439.

Without prejudice to the provisions of the present Treaty, Germany undertakes not to put forward directly or indirectly against any Allied or Associated Power, signatory of the present Treaty, including those which without having declared war, have broken off diplomatic relations with the German Empire, any pecuniary claim based on events which occurred at any time before the coming into force of the present Treaty.

The present stipulation will bar completely and finally all claims of this nature, which will be thenceforward extinguished, whoever may be the parties in interest.

ARTICLE 440.

Germany accepts and recognises as valid and binding all decrees and orders concerning German shops and goods and all orders relating to the payment of costs made by any Prize Court of any of the Allied or Associated Powers, and undertakes not to put forward any claim arising out of such decrees or orders on behalf of any German national.

The Allied and Associated Powers reserve the right to examine in such manner as they may determine all decisions and orders of German Prize Courts, whether affecting the property rights of nationals of those Powers or of neutral Powers. Germany agrees to furnish copies of all the documents constituting the record of the cases, including the decisions and orders made, and to accept and give effect to the recommendations made after such examination of the cases.

THE PRESENT TREATY, of which the French and English texts are both authentic, shall be ratified.

The deposit of ratifications shall be made at Paris as soon as possible.

Powers of which the seat of the Government is outside Europe will be entitled merely to inform the Government of the French Republic through their diplomatic representative at Paris that their ratification has been given; in that case they must transmit the instrument of ratification as soon as possible.

A first procès-verbal of the deposit of ratifications will be drawn up as soon as the Treaty has been ratified by Germany on the one hand, and by three of the Principal Allied and Associated Powers on the other hand.

From the date of this first procès-verbal the Treaty will come into force between the High Contracting Parties who have ratified it. For the determination of all periods of time provided for in the present Treaty this date will be the date of its coming into force of the Treaty.

In all other respects the Treaty will enter into force for each Power at the date of the deposit of its ratification.

The French Government will transmit to all the signatory Powers a certified copy of the procès-verbaux of the deposit of ratifications.

IN FAITH WHEREOF the above-named Plenipotentiaries have signed the present Treaty.

Done at Versailles, the twenty-eighth day of June, one thousand nine hundred and nineteen, in a single copy which will remain deposited in the archives of the French Republic, and of which authenticated copies will be transmitted to each of the Signatory Powers.

The Famous Hall of Mirrors in the Historic Palace of Versailles, France, Where the Peace Treaties Were Signed.

FRANCO-AMERICAN AGREEMENT

U. S. PLEDGED TO AID FRANCE

The following is the full text of the treaty as translated from the official French version:

"Arrangement between the United States of America and France.

"Considering that the United States of America and the government of the French republic are equally animated by the desire to maintain the peace of the world, so happily restored by the treaty of peace signed at Versailles June 28, 1919, which put an end to the war begun by the aggression of the German empire and terminated by the defeat of this power:

"Considering that the United States of America and the government of the French republic are clearly convinced that any act of unprovoked aggression directed by Germany against France violates not only the letter and the spirit of the treaty of Versailles, to which the United States of America and the French republic are parties, exposing France anew to the intolerable losses of an unprovoked war, but that this aggression on the part of Germany constitutes and is regarded by the treaty of Versailles as a hostile act against all the powers signatory of said treaty and intended to disturb the peace of the world and involving inevitably and directly the states of Europe and indirectly the entire world, as experience has amply and happily demonstrated:

"Considering that the United States of America and the government of the French republic recognize that the stipulations concerning the left bank of the Rhine and contained in the said treaty of Versailles are not able to assure security and appropriate protection at once to France on the one hand, and on the other hand to the United States:

CONCLUDE TREATY FOR PROTECTION

"Therefore, the United States of America and the government of the French republic, having decided to conclude a treaty to realize these necessary ends, Woodrow Wilson, president of the United States of America, and Robert Lansing, secretary of state of the United States, specially authorized to this effect by the president of the United States, and Georges Clemenceau, president of the council, minister of war, and Stephen Pichon, minister of foreign affairs, especially authorized to this effect by Raymond Poincaré, president of the French republic, have reached an accord upon the following dispositions:

"ARTICLE 1.

"In case where the following stipulations concerning the left bank of the Rhine and contained in the treaty of peace with Germany signed at Versailles June 28, 1919, by the United States of America and the government of the French republic as well as by the British empire among other powers—

"Article 42. Germany is prohibited from maintaining or constructing fortifications either on the left bank of the Rhine or on the right bank to the west of a line drawn fifty kilometers east of this river.

"Article 43. In the area defined above the maintenance

and the assembly of armed forces, either permanently or temporarily, and military maneuvers of any kind, as well as the upkeep of all permanent works for mobilization are in the same way forbidden.

GERMANY CHIEF AIM OF PACT

"Article 44. In case Germany violated in any manner whatever the provisions of articles 42 and 43 she shall be regarded as committing a hostile act against the powers signatory of the present treaty and as calculated to disturb the peace of the world— do not assure immediately to France security and appropriate protection, the United States of America will be bound to come immediately to its aid (les États Unis d'Amérique seront tenus de venir immédiatement à son aide) in case of any act of unprovoked aggression directed against France by Germany.

ARTICLE 2

"The present treaty conceived in terms analogous to those of the treaty concluded on the same date and to the same ends between Great Britain and the French republic, of which a copy is annexed herewith, will come into force at the moment when the latter is ratified.

ARTICLE 3

"The present treaty must be submitted to the council of the league of nations and must be recognized if the council decides by majority vote that it is an engagement conforming to the pact of the league; it will remain in force up to the time when, at the request of one of the parties to the said treaty, the council duly decides that the league assures sufficient protection.

TO BE SUBMITTED TO THE SENATE

ARTICLE 4

The present treaty before ratification will be submitted to the French chambers for approval. It will be submitted to the senate of the United States at the same time as the treaty of Versailles will be submitted to the senate for judgment and assent to ratification. The ratifications will be exchanged at the time of the deposit in Paris of the ratifications of the treaty of Versailles or as soon thereafter as possible.

"In testimony whereof the plenipotentiaries, to-wit: For the French republic, Georges Clemenceau, president of the council of ministers, and minister of war, and Stephen Pichon, minister of foreign affairs; and for the United States of America, Woodrow Wilson, president, and Robert Lansing, secretary of state of the United States, have signed the preceding articles, done in the English language and in the French language, and have thereunto placed their seals.

"Done in duplicate, in the city of Versailles, the 28th day of the month of June of the year of grace, 1919, and the 143d of the independence of the United States of America.

"CLEMENCEAU,

"S. PICHON,

"WOODROW WILSON,

"ROBERT LANSING."
