The bureau invites all who wish to undertake this course of reading under its direction to join its National Reading Circle. For admission to this circle it is only necessary to write to the "Home Education Division of the Bureau of Education, Washington, D. C.," giving your name, post-office address, your course, and a very brief statement of your education and occupation. You should also write the Home Education Division of the bureau for requirements.

To each person submitting satisfactory evidence of having read all the books on this list within three years from the time of joining circle, there will be awarded a certificate bearing the seal of the United States Bureau of Education and signed by the Commissioner of Education. All young men and women who wish to lay a good foundation for a knowledge of the best literature are invited to join this circle.

Charles Alphonso Smith, Edgar Allan Poe Professor of English in the University of Virginia; Charles Forster Smith, Professor of Greek in the University of Wisconsin; Richard Burton, Professor of English Literature in the University of Minnesota, and William Lyon Phelps, Professor of English Literature in Yale University, will assist the Bureau of Education in directing this course of reading.

In writing about this course refer to it as "United States Bureau of Education, Home Education Division, Reading Course No. II., or, Great Literature—Ancient, Mediæval, and Modern."

Readers may take one or more courses. They are required to read Course I. twice during the three years succeeding enrolment. Any other courses are to be read but once. No reading done previous to the date of enrolment will be considered adequate.

Let the bureau know when each book is begun and when it is completed. Send a description of the principal characters, the chief episodes, and impressions. When the nature of the book does not lend itself to this form of report, send a list of five important lessons or truths found in each book. When the course is completed a few questions as the final test will be sent.

Books may be purchased of publishers or borrowed from libraries elsewhere. The Bureau of Education does not furnish or lend books for this purpose.

If the editions named are not available, any editions may be used, but the advantage to be gained from Moulton's Modern Readers' Bible will more than pay for the additional cost.

## LITERATURE OF 1916.

BY FREMONT RIDER.

The book trade in this country revived in 1916 after the slump of 1914-15, the retail trade being especially prosperous. The book output was larger and of a high level of quality, making selection doubly difficult.

FICTION was one of the classes to show improvement, several new authors of promise being introduced to the reading public, and novels by foreign authors showing a marked increase. DRAMA, thanks to the Shakespeare centenary and moving picture interest, held its own. SPORTS and GAMES showed a large number of titles. TRAVEL and DESCRIPTION was comparatively scant this year, the place being taken by a flood of books on the WAR in all its various phases. There were several notable BIOGRAPHIES.

The following 900 odd titles out of some 11,000 published in 1916 aim to include the most important, not only in the sense of having more or less enduring value, but also because of their popularity, possibly transient, but no less significant, as evidenced by sales or repute. Where choice was necessary, emphasis has been laid on the popular and practical, rather than the scholarly and theoretical. Endeavor has been made, in other words, to list books of legitimate interest to the stenographer as well as the economist, to the farmer as well as the reader of belles-lettres. New editions are seldom listed unless of notable importance. The classification adopted is a rough adaptation of the Dewey Decimal classification for books, which is in wide international library and bibliographical use.

## THE LIBRARY OF CONGRESS.

The Library of Congress was established in 1800, destroyed in 1814 by the burning of the Capitol afterward replenished by the purchase by Congress of the library of ex-President Jefferson, 6,760 volumes (cost, \$23,950); in 1811, 38,000 volumes destroyed by fire; in 1853, partially replenished by an appropriation of \$75,000; increased (1) by regular appropriations by Congress; (2) by deposits under the Copyright Law (3) by gifts and exchanges; (4) by the exchanges of the Smithsonian Institution, the library of which (40,000 volumes) was, in 1866, deposited in the Library of Congress with the stipulation that future accessions should follow it. One hundred sets of Government publications are at the disposal of the Librarian of Congress to exchange, through the Smithsonian, with foreign Governments, and from this source are received about 12,000 volumes annually. In 1857, the collection of the Peter Force papers, purchased by an appropriation of \$7,000 pamphlets, purchased 1867, cost \$100,000; the Count de Rochambeau collection (manuscript), put chased 1883, cost \$20,000; the Toner collection (24,484 volumes, numerous pamphlets), gift in 1882 of Dr. Joseph M. Toner; the Hubbard collection (engravings).

The collection is now the largest in the Western Hemisphere, and third in the world. It comprised at the end of the fiscal year (June 30, 1916) about 2,451,974 printed books and pamphlets (including the lay library which, while a division of the Library of Congress, still remains at the Capitol), manuscripts, maps and charts, pieces of music, and photographs, prints, engravings and lithographs numbering about a million.

The collection is rich in history, political science, in official documents, National, State, and foreign and in Americana, including important files of American newspapers and original manuscripts (Colonial Revolutionary, and formative periods). Many of the rare books and manuscripts belonging to the library are exhibited in show cases on the second floor.

The library is rich in special collections acquired since 1897.

**In Prints**—The Hubbard collection, gift in 1898 of Mrs. Cordner G. Hubbard; Noyes works of Japanese artists; Garrett, 19,113 prints (on deposit); George Lodrop Bradley, 1,980 engravings; prints issued by the Government cartographers of France, Germany, Italy, Japan, and Austria-Hungary.

**Manuscripts**—The PAPERS OF NINE PRESIDENTS: Washington, Jefferson, Madison, Monroe, Jackson, Van Buren, Polk, Pierce, and Johnson. AMERICAN STATESMEN AND POLITICIANS: Franklin, R. Morris, Hamilton, Van Buren, Wm. L. Marcy, Duff Green, Washburne, Clayton, Chase, Crittenden, Lyman Trumbull, E. M. Stanton, John Sherman, Gideon Welles (deposited); James H. Hammond, M. L. M. Curry, Thomas Ewing, MILITARY PAPERS: Gen. George B. McClellan, Gen. W. T. Sherman, Gen. C. B. Grandin, P. L. M. B. Smith, Gen. Barlow, Davis, papers, NAVAL PAPERS: Preble, John Paul Jones. COMMERCIAL HISTORY: Ellis, 1805-1853; Bourne, 1776-1816; Galloway (early part of the eighteenth century); letters of William Taylor (the latter part of the eighteenth century); of John White, cashier of the Bank of the United States at Baltimore; Edward Dixon, merchant of Port Royal, 1743-1796. Bidde papers (Bank of the U. S.), deposited. DISTRICT OF COLUMBIA: Papers of William Thornton; George Waterson. EUROPEAN ARCHIVES: Stevens Index, 1763-1783; upward of 200,000 folios of transcripts of documents relating to American Colonial history; Mercey-Argenteau family papers, fifteenth to nineteenth century. STATE PAPERS: Continental Congress; House of Representatives. COLONIAL DOCUMENTARY HISTORY: Records of Virginia Company; Spanish papers of New Mexico and Florida; Philippine and Guam documents. SCIENTIFIC: Maury papers, Gibbs papers. MEXICAN HISTORY: Yturbiade papers; Inquisition papers, 1759. LITERARY: Louise Chandler Moulton collection of letters.

**Maps**—The Kohl collection; manuscript maps of Lord Howe (and many other manuscript maps); the Lowery collection of maps of Spanish possessions now within the limits of the United States.

**Printed Books**—The Weber library (Sanskrit literature, 3,018 volumes, 1,002 pamphlets); Hattala (Slavic, about 1,500 volumes); Yudin (Russian, 80,000 volumes); Chinese and Japanese literature, 45,000 volumes; the Huitfeldt-Kaas (Scandinavian, 5,000 volumes); the John Boyd Thacher collection of Incanabula (deposited); the Dehnard collections of Hebrews, comprising upward of 14,000 titles, were given to the library by Mr. Jacob H. Schiff in 1912 and 1914.

In 1897 the main collection was removed from the Capitol to the building erected for it under the Acts of Congress approved April 15, 1886; October 2, 1888, and March 2, 1889, at a cost of \$6,347,000 (limit by law, \$6,500,000), exclusive of the land, which cost \$585,000. The architects who furnished the original designs were John L. Smithmeyer and Paul J. Pelz. By the act of October 2, 1888, before the foundations were laid, Thomas L. Casey, Chief of Engineers of the Army, was placed in charge of the construction of the building, and the architectural details were worked out by Paul J. Pelz and Edward P. Casey. Upon the death of Gen. Casey, in March, 1896, the entire charge of the construction devolved upon Bernard R. Green, Gen. Casey's assistant, and under his superintendence the building was completed in February, 1897, opened to the public November, 1897. The building occupies three and three-quarter acres upon a site ten acres in extent at a distance of 1,270 feet east of the Capitol, and is the largest and most magnificent library building in the world. In the decorations some forty painters and sculptors are represented—all American citizens. The floor space is 326,195 square feet, or nearly eight acres. The book stacks including the new stack built over the southeast interior court, contain about 100 miles of shelving, affording space for 3,540,000 octavo volumes and 84,000 volumes of newspapers.

The library is maintained by annual appropriations by Congress for various purposes, including the purchase of books. Total appropriation for 1917, \$681,105. For service and contingent expenses, \$463,360; purchase of books, \$98,000; building and grounds, \$119,745.

**Library Service**—Library proper, 258 employes; copyright, 91; distribution of cards, 42; legislative reference, 22. Total, 413. By virtue of the act of 1897, employes in the library proper are appointed by the Librarian of Congress, "solely with reference to their fitness for their particular duties." Custody and care of the building is under the supervision of the Chief of Engineers of the Library Building and Grounds, who is also the disbursing officer and employs the 138 employes of his office.

Entitled by statute to draw books for home use are the following: The President, the Vice-President, Senators, Representatives, and Delegates in Congress (no books may be given out upon the orders of members in favor of those who are not members); Heads of Departments; the Justices, Reporter, and Clerk of the Supreme Court; the Judges and Clerk of the Court of Claims; Judges of the Court of Appeals of the District of Columbia and Judges of the Supreme Court of the District of Columbia; representatives at Washington of foreign Governments; the Solicitor-General and the Assistant Solicitor-General; the Secretary of the Senate; the Clerk of the House of Representatives; the Solicitor of the Treasury; ex-Presidents of the United States; the Chaplains of the two Houses of Congress; the Secretary and Regents of the Smithsonian Institution; members and Secretary of the Interstate Commerce Commission, and Chief of Engineers of the Army.

**Inter-Library Loans**—While not a lending library, but a reference library, primarily and essentially, the Library of Congress maintains an inter-library loan system by which special service is rendered to scholars by the lending of books to other libraries for the use of investigators engaged in serious research, which it is not within the power or duty of the library in question to supply, and which at the time are not needed in Washington.

**Copyright Office**—The Copyright Office is a distinct division of the Library of Congress, and is located on the ground floor, south side; open 9 to 4.30. It is under the immediate charge of the Register of Copyrights, who, by the acts of February 19, 1897, and March 4, 1909, is authorized "under the direction and supervision of the Librarian of Congress to perform all the duties pertaining to copyrighting under the Copyright Law as they are now in force, and to receive and forward to the Librarian of Congress by the act of July 3, 1870. Of most articles copyrighted two copies, and of some one copy, must be deposited in the Library of Congress to perfect copyright.

## COPYRIGHT LAW OF THE UNITED STATES.

The copyright law approved March 4, 1909, which took effect on July 1, 1909, provides that the application for registration of any work "shall specify to which of the following classes the work in which copyright is claimed belongs":

**SUBJECT MATTER OF COPYRIGHT.**  
 (a) Books, including composite and cyclopaedic works, directories, gazetteers and other compilations; (b) periodicals, including newspapers; (c) lectures, sermons, addresses, prepared for oral delivery; (d) dramatic or dramatico-musical compositions; (e) musical compositions; (f) maps; (g) works of art, models or designs for works of art; (h) reproductions of a work of art; (i) drawings or plastic works of a scientific or technical character; (j) photographs; (k) prints and pictorial illustrations. The amendment of August 24, 1912, adds: (l) motion picture photo-plays; (m) motion pictures other than photo-plays.

The application for registration of any article should distinctly specify to which one of these classes the work belongs. An article is not entitled to registration unless it is reasonably possible to class it under one or the other of the designations named in the statute.

## STEPS NECESSARY TO SECURE COPYRIGHT REGISTRATION.

For works reproduced in copies for sale or public distribution: 1. Publish the work with the copyright notice. The notice may be in the form "Copyright, 19... (year date of publication) by... (name of copyright proprietor), or in case of works specified above (f) to (k) the notice may consist of the letter C enclosed in a circle (C) accompanied by the initials, monogram, mark or symbol of the proprietor—provided that his name shall appear on some accessible part of the copies." 2. Promptly after publication send to the Copyright Office, Library of Congress, Washington, D. C., two copies (or if the work is by a foreign citizen and is first published in a foreign country, one copy only) of the best edition of the work, with an application for registration. In the case of motion picture photo-plays and of motion pictures other than photo-plays a description of the work must be filed, together with copies of the reels, and a money order payable to the Register of Copyrights for the statutory registration fee of \$1.

In the case of books by American authors, or permanent residents of the United States, the copies deposited must be accompanied by an affidavit, under the official seal of an officer authorized to administer oaths, stating that the typesetting, printing and binding of the book have been performed within the United States. Affidavit and application forms will be supplied by the Copyright Office on request.

Books of foreign origin in a language or languages other than English are required to be manufactured in the United States. In the case of a book in the English language published abroad before publication in this country, an *ad interim* copyright for 30 days from the day of the deposit of the foreign copy may be secured by depositing in the Copyright Office one complete copy of the foreign edition within 30 days after its publication abroad. If two copies of such book manufactured in this country are deposited with application for registration and fee (\$1) published during the *ad interim* term, the copyright shall be extended for the full term of 28 years.

For works not reproduced in copies for sale: Copyright may also be had of certain classes of works (see a, b, c, below) of which copies are not reproduced for sale, by filing in the Copyright Office an application for registration, with the statutory fee of \$1, sending therewith: (a) In the case of lectures or other oral addresses or of dramatic or musical compositions, one complete manuscript or typewritten copy of the work. This privilege of registration, however, does not exempt the copyright proprietor from the deposit of printed copies of a dramatic or musical composition or lecture where the work is later reproduced in copies for sale. A new application must be made in such cases and another fee of \$1 paid. (b) In the case of photographs not intended for general publication, or of photographic prints. (c) In the case of works of art (paintings, drawings, sculpture) or of drawings or plastic works of a scientific or technical character, one photograph or other identifying production of the work. In the case of a motion picture photo-play, a title and description and one print taken from each scene or act. In case of a motion picture other than a photo-play, a title and description with not less than two prints to be taken from different sections of a complete motion picture. In all these cases, if the work is later reproduced in copies for sale, two copies must then be deposited.

## COPYRIGHT FEES.

For registration of any work subject to copyright, \$1, which sum is to include a certificate of registration under seal. But only one registration at one fee is required in the case of several volumes of the same book deposited in the Copyright Office at the same time. For every additional certificate of registration, or copy of record under seal, 50 cents. In the case of photographs the fee shall be 50 cents where a certificate is not requested. For recording and certifying an assignment of copyright, or for a certified copy of an assignment, \$1, if the instrument is not over three hundred words in length; if more than three hundred and less than one thousand words in length, \$2; if more than one thousand words in length, \$1 additional for each additional one thousand words or fraction thereof over three hundred words. For comparing a copy of an assignment with the record of such document in the Copyright Office and certifying the same under seal, \$1. For recording the transfer of the proprietorship of copyright articles, 10 cents for each title of a book or other article, in addition to the fee prescribed for recording the instrument of assignment. For recording an extension or renewal of copyright, 50 cents. Remittances should be made by money order payable to the Register of Copyrights. Forms for application for copyright registration will be furnished on request.

## DURATION OF COPYRIGHT.

The original term of copyright runs for twenty-eight years. Within one year prior to the expiration of the original term, the author, if living, or the widow or widower of the author, or the children of the author if he be not living; or if none of these be living then the author's executors, or in the absence of a will, the author's next of kin may secure a renewal for a further term of twenty-eight years, making fifty-six years in all. In case of composite works, if the proprietor secured the original copyrights, he may also secure the renewal.

## ASSIGNMENTS.

Copyrights are assignable by any instruments of writing. Every assignment of copyright must be recorded in the Copyright Office within three calendar months after its execution in the United States or within six calendar months after its execution throughout the limits of the United States. "In default of which it shall be void as against any subsequent purchaser or mortgagee for a valuable consideration, without notice, whose assignment has been duly recorded." Every assignment of copyright executed in a foreign country must be acknowledged by the assignor before a consular officer or secretary of legation of the United States authorized by law to administer oaths or perform notarial acts. The certificate of such acknowledgment under the hand and official seal of such Consular Officer or Secretary of Legation is *prima facie* evidence of the execution of the instrument.

## INTERNATIONAL COPYRIGHT RELATIONS.

Copyright is not secured in foreign countries by action in the Copyright Office, but only by complying with the legislation of such countries.

Copyright relations have been established with the following foreign countries by proclamation of the President: Austria, Belgium, Chile, Costa Rica, Cuba, Denmark, France, Germany, Great Britain and the British possessions, Italy, Luxemburg, Mexico, Netherlands and possessions, Norway, Portugal, Spain, Sweden, Switzerland, Tunis.

Copyright treaties have also been entered into with China, Japan and Hungary (the latter in effect on October 18, 1912). The Copyright Convention of Mexico of 1902 has been ratified by the United States and is effective from July 1, 1908, as between the United States and Costa Rica, Guatemala, Honduras, Nicaragua and Salvador. The Pan-American Copyright Convention signed at Buenos Ayres in 1910 was proclaimed July 13, 1914, and is effective as between the United States and Bolivia, Brazil, Costa Rica, Dominican Republic, Ecuador, Guatemala, Honduras, Nicaragua, Panama and Salvador.

**CARNEGIE ENDOWMENT FOR INTERNATIONAL PEACE.**

ON December 14, 1910, Andrew Carnegie of New York transferred to a Board of Trustees \$10,000,000 in 5 per cent. first mortgage bonds, the income of which is to be devoted to "hastening the abolition of international war." The methods by which the annual income can best be expended for this purpose were left to be determined by the trustees. The Board of Trustees consists of the following members:

Elihu Root.  
Robert Bacon.  
Robert S. Brookings.  
Thomas Burke.  
Nicholas Murray Butler.  
Joseph H. Choate.  
Cleveland H. Dodge.  
Charles W. Eliot.  
R. A. Franks.  
Arthur William Foster.

John W. Foster.  
Austen G. Fox.  
George Gray.  
William M. Howard.  
Samuel Mather.  
Andrew J. Montague.  
Henry S. Pritchett.  
George W. Perkins.  
J. G. Schmidlapp.

James Brown Scott.  
James L. Slayden.  
Oscar S. Straus.  
Charles L. Taylor.  
Charlemagne Tower.  
Andrew D. White.  
John Sharp Williams.  
Robert S. Woodward.  
Luke E. Wright.

The officers of the endowment are Hon. Elihu Root, President; Hon. Joseph H. Choate, Vice-President; Dr. James Brown Scott, Secretary, and Hon. Charlemagne Tower, Treasurer. These officers have been annually re-elected. The Executive Committee consists of the President, the Secretary, the Treasurer, and Messrs. Butler, Fox, Montague, and Pritchett. The headquarters of the endowment is at Nos. 2 and 4 Jackson Place, Washington, D. C. The trustees operate under a series of by-laws.

They have divided the work of the endowment into three divisions, viz.: Division of Intercourse and Education, President Nicholas Murray Butler of Columbia University, Acting Director; Division of Economics and History, Prof. John Bates Clark of Columbia University, Director; and Division of International Law, Dr. Charles W. Eliot, Secretary, is the Director.

The first division has established a European Bureau at 24 Rue Pierre Curie, Paris, of which M. Jules-Jean Prudhommeaux is Secretary-General. A European Advisory Council has also been established, of which Baron d'Estournelles de Constant is the President.

This division has conducted its work of propaganda by co-operation with other existing peace organizations in this country and in other countries; by a series of international visits of representative men to and from this country; and by a series of publications, for gratuitous distribution, the most important of which thus far are "Some Roads Toward Peace," by Dr. Charles W. Eliot, containing observations and impressions in China and Japan in 1912; and the report of an international commission appointed to conduct an inquiry into the "Causes and conduct of the two Balkan wars."

The second division, the purposes of which are "to promote a thorough and scientific investigation and study of the causes of war, and of practical methods to prevent and avoid it," works in co-operation with a Committee of Research, consisting of seventeen of the leading economists of Europe, Japan, and the United States, who have blocked out an elaborate schedule of researches character have been arranged for, and several have been published.

The Division of International Law has for its purpose "to aid in the development of international law and a general agreement on the rules thereof, and the acceptance of the same among nations to establish a better understanding of international rights and duties and a more perfect sense of international justice among the inhabitants of civilized countries; to promote a general acceptance of peaceable methods in the settlement of international disputes." This division is now engaged in the preparation of a collection of international arbitrations, and a companion work consisting of all known arbitration treaties. It has also in process of preparation the following works: Cases Heard Before the Permanent Court of Arbitration; Treatise in Spanish International Law; Statement of Certain Principles of International Law; Decisions of Chief Justice Marshall Involving Questions of International Law; Decisions of National Courts Involving Principles of International Law; and a number of other works, including publications in French of the following works: Lawrence—*The Principles of International Law*. List—*Lehrbuch des Völkerrechts*. Scott—*The Hague Peace Conferences of 1899 and 1907*. Tripel—*Voelkerrecht und Landesrecht*. Westlake—*International Law*. Kleen—*Krigets Lagar*. De Louter—*Het Stellig Voelkerrecht*. The Institute of International Law has accepted its invitation to act as the adviser of the division regarding the conduct and development of its work. The trustees have approved a plan for the maintenance of a Summer or vacation school of international law at The Hague, of which teachers and students of the subject from all countries may take advantage.

The main activities of the endowment are thus arranged on scientific lines, the results of the activities and researches of the latter two divisions to be utilized and popularized as a part of the propaganda of the first division. The plans of the trustees contemplate a world-wide international co-operation in each branch of the endowment's work. While these plans have been seriously interrupted, and may be somewhat modified by the European war, the outbreak of that war enormously emphasizes and illustrates the importance and the necessity of its work.

The annual meeting of the trustees is held at Washington on the second Friday of April, and a special meeting of the board occurs on the second Friday of November in each year.

The offices of the first two divisions are at 407 West One Hundred and Seventeenth Street, New York City. The Division of International Law occupies the headquarters building of the endowment in Washington.

The endowment has published to date: five editions of the Year Book, ten publications of the Division of Intercourse and Education, four of the Division of Economics and History, twenty pamphlets and eleven books of the Division of International Law. A list of these publications will be sent on request, addressed to the Secretary, No. 2 Jackson Place, Washington, D. C.

**CARNEGIE MUSEUM.**

(Department of the Carnegie Institute, Pittsburgh, Pa.)

Founded 1897. W. J. Holland, LL. D., Director. Established on the broadest lines for the promotion of scientific research and the diffusion of knowledge. Collections, valued at more than \$1,250,000, especially rich in the fields of zoology, paleontology, ethnology, and industrial art. Publishes *Annals*, 8vo (10 vols. issued); *Memoirs*, 4vo (7 vols. issued); *Annual Reports*, 8vo (20 vols. issued).

**CARNEGIE FOUNDATION FOR THE ADVANCEMENT OF TEACHING.**

An institution founded by Andrew Carnegie in 1905, and incorporated by the Congress of the United States in 1906. The institution is endowed with \$15,000,000 to provide retiring allowances for teachers and officers of colleges, universities, and technical schools in the United States, Canada, and Newfoundland, and with \$1,250,000 to provide for educational inquiry and publication. By the tenth annual meeting of the trustees in 1915, 327 allowances were being paid to teachers and 118 pensions to widows of teachers, at an annual cost of \$690,668. The amount of the average retiring allowance is \$1,552.06, the average age of retirement being about sixty-eight years.

In the organization of its endowment the foundation has restricted its allowances to professors and officers in a list of seventy-three institutions selected for their educational standing, and has published a series of widely influential reports and bulletins concerning educational conditions. President, Dr. Henry S. Pritchett; Secretary, Clyde Furst; 576 Fifth Avenue, New York City.

### THE CARNEGIE INSTITUTION OF WASHINGTON.

The Carnegie Institution of Washington was founded by Mr. Andrew Carnegie, January 28, 1902, when he gave to a board of trustees \$10,000,000, in registered bonds, yielding 5 per cent. annual interest. In general terms, he stated that his purpose was to "found in the City of Washington an institution which, with the co-operation of institutions now or hereafter established, there or elsewhere, shall in the broadest and most liberal manner encourage investigation, research and discovery, show the application of knowledge to the improvement of mankind, and provide such buildings, laboratories, books, and apparatus as may be needed." Mr. Carnegie added \$2,000,000 to his gift in 1907, and \$10,000,000 in 1911, making a total endowment of \$22,000,000.

By an Act of Congress, approved April 28, 1904, the institution was placed under the control of a board of twenty-four trustees, all of whom had been members of the original board referred to above.

The trustees meet annually, and during the intervals between such meetings the affairs of the institution are conducted by an Executive Committee, chosen by and from the Board of Trustees, acting through the President of the institution as chief executive officer.

The Administration Building is situated on the S. E. corner of Sixteenth and P Streets, N. W., Washington, D. C.

*Trustees of the Institution*—*Chairman*—Elihu Root. *Vice-Chairman*—Charles D. Walcott. *Secretary*—Cleveland H. Dodge. Robert S. Brookings, Charles P. Fenner, Myron T. Herrick, Charles L. Hutchinson, Henry Cabot Lodge, Andrew J. Montague, William W. Morrow, William Barclay Parsons, Stewart Paton, George W. Pepper, Henry S. Pritchett, Martin A. Ryerson, Theobald Smith, William H. Taft, Henry P. Walcott, William H. Welch, Andrew D. White, Henry White, George W. Wickersham, Robert S. Woodward. One vacancy.

*President of the Institution*—Robert S. Woodward.

### CARNEGIE CORPORATION OF NEW YORK.

Carnegie Corporation of New York, incorporated by an act passed by the New York Legislature June 9, 1911, was organized November 10, 1911. As stated in the charter, it was organized "for the purpose of receiving and maintaining a fund or funds and applying the income thereof to promote the advancement and diffusion of knowledge and understanding among the people of the United States, by aiding technical schools, institutions of higher learning, libraries, scientific research, hero funds, use of publications, and by such other agencies and means as shall from time to time be found appropriate therefor."

Mr. Carnegie transferred to the corporation \$25,000,000 and later added \$100,000,000 to the original gift. The work carried on by Mr. Carnegie as an individual for many years in founding and aiding educational institutions and in the making of grants to churches for the purchase of organs has been turned over to the corporation.

The trustees are Andrew Carnegie, Elihu Root, Henry S. Pritchett, S. H. Church, Robert S. Woodward, Charles L. Taylor, Robert A. Franks, and James Bertram. The officers are: *President*—Andrew Carnegie. *Vice-Presidents*—Elihu Root and Robert A. Franks. *Treasurer*—Robert A. Franks. *Secretary*—James Bertram, 576 Fifth Avenue, New York City.

### THE CARNEGIE HERO FUND.

In April, 1904, Andrew Carnegie created a fund of \$5,000,000 for the benefit of the dependents of those losing their lives in heroic effort to save their fellow men, or for the heroes themselves if injured only. Provision was also made for medals to be given in commemoration of heroic acts.

The endowment known as "The Hero Fund" was placed in the hands of a commission composed of twenty-one persons, residents of Pittsburgh, Pa., of which Charles L. Taylor is President, and F. M. Wilmot, Secretary and Manager of the fund.

In his letter to the Hero Fund Commission Mr. Carnegie outlined the general scheme of the fund thus: "To place those following peaceful vocations, who have been injured in heroic effort to save human life, in somewhat better positions peculiarly than before, until able to work again. In case of death, the widow and children or other dependents are to be provided for until she remarries, and the children until they reach a self-supporting age. For exceptional children, exceptional grants may be made for exceptional education. Grants of sums of money may also be made to heroes or heroines as the commission thinks advisable—each case to be judged on its merits."

The fund applies only to acts performed within the United States of America, the Dominion of Canada, the Colony of Newfoundland, and the waters thereof, and such acts must have been performed on or after April 15, 1904, and brought to the attention of the commission within three years of the date of the act.

Applications should be made by letter addressed to the manager, Oliver Building, Pittsburgh, Pa.

During the year 1916 the commission has awarded 121 medals—101 bronze and 20 silver. In addition to the medals, pensions amounting to \$119,582 annually and also sums aggregating \$81,495 were granted for disablement benefits and for the dependents of heroes who lost their lives and for educational and other special purposes. Pensions in force as of December 31, 1916, amount to \$87,000 annually.

### ACTORS' FUND OF AMERICA.

*President*—Daniel Frohman. *First Vice-President*—Joseph R. Grismar. *Second Vice-President*—F. F. Mackay. *Treasurer*—William Harris, Jr. *Secretary*—Cus Hill.

The Actors' Fund was established in 1882 to provide assistance for disabled and needy members of the theatrical profession, and burial for such as leave no means therefor. The Actors' Fund Home, West New Brighton, Staten Island, under the direction of the Actors' Fund of America, was opened May 10, 1902. This is a home for aged and needy actors and actresses. There are 31 honorary members and 542 life members. Office, 1476 Broadway, New York City.

### RUSSELL SAGE FOUNDATION.

Russell Sage Foundation was incorporated under the laws of the State of New York, April 1, 1907, for the improvement of social and living conditions in the United States of America. The foundation does not attempt to relieve individual or family needs, but aims to eradicate the causes of distress.

*Trustees*—*President*—Mrs. Russell Sage. *Vice-President*—Robert W. de Forest. *Treasurer*—Cleveland H. Dodge; John H. Finley, John M. Glenn, Mrs. William B. Rice, Miss Louisa Lee Schuyler, Mrs. Finley J. Shepard, and Alfred T. White. *General Director*—John M. Glenn. Office, 130 E. 22d Street, New York City.

### DEPARTMENT OF SURVEYS AND EXHIBITS.

The social or community survey is described as an important means to a better democracy. The survey is shown to serve this end by informing the community upon community matters, and thereby providing a basis for intelligent public opinion. It is a school whose teaching is not confined to children and youth, but which aims to get its facts and message, expressed in the simple terms of household experience, before the whole people. It utilizes as many channels of education as possible.

## ESPERANTO, THE INTERNATIONAL LANGUAGE.

Esperanto is an artificial language invented by the Russian Dr. L. L. Zamenhof, of Warsaw, Poland. It has only one object in view, namely, to serve as an international auxiliary language; it is not in the least intended to replace the national languages. The first book in the new language was published in 1887.

The Esperanto words are mostly of Latin, but to some extent also of Anglo-German origin, so that at the first glance Esperanto has the familiar appearance of a Roman language.

The great success of Esperanto, which is now known and studied all over the world, is chiefly due to the facility with which it may be mastered. The pronunciation is strictly phonetic, making the study of spelling unnecessary. The grammar does not admit of any exceptions to the rules, and is so logical and simple that it may be learned completely in a few hours by any person who is familiar with the grammar of his mother tongue. The vocabulary consists of about 2,500 root words, a large majority of which is known to any one whose language contains a great number of Latin roots—for instance, English.

In spite of this small number of root words Esperanto has been made rich in words and expressions by the adoption of certain affixes and certain methods of word combination. By these simple and easy means a considerable vocabulary may be obtained. Esperanto is a well-sounding language when spoken.

Esperanto is now used for all civilized purposes by many hundreds of thousands of persons in all civilized countries. It made its appearance in the United States in an organized form in 1905, when the first society for its study was formed in Boston, and this was followed soon afterward by societies in New York and Philadelphia. It is now promoted by a large and flourishing national association, the "Esperanto Association of North America."

Esperanto has a large literature, over a hundred periodicals, including a number in the United States, being published and a large and powerful "Universal Esperanto Association" maintains a regular system of consulates all over the world, to facilitate the transaction of all kinds of legitimate business for its members by means of the common tongue.

International congresses of Esperantists have been held at Boulogne, Geneva, Cambridge, Dresden, Barcelona, Washington, Antwerp, Craeov, Berne, and San Francisco. Delegates representing the Esperantists of forty different nations and languages have been in attendance.

The Esperanto office at Oxford has established in Boston an office from which may be obtained without charge, any desired information of the movement. Address "Esperanto Office," West Newton (Boston Postal District), Mass.

Greater New York Esperanto Society, 243 Bedford Park Boulevard, the Bronx, New York City.

## THE RHODES SCHOLARSHIPS AT OXFORD UNIVERSITY.

CECIL J. RHODES, statesman and capitalist, who died at Cape Town, South Africa, March 26, 1902, directed in his will, dated July 1, 1899, that a part of his fortune should be applied for the creation of a fund for the support of a certain number of scholarships covering a three years' course at Oxford University. He directed that the selection of the recipients of this gift should be made as follows: From three to nine scholars from each of the British Colonies, two from each State and Territory of the United States, or one hundred in all. Mr. Rhodes desired that in awarding the scholarships account should be taken of different qualities—literary and scholastic attainments, love of outdoor sports, strong, manly qualities such as courage, generosity, kindness, etc., high moral character, and desire to serve in public affairs.

The agencies for final selection vary a good deal. Scholars from Cape Colony are chosen by the individual schools to which the scholarships are especially assigned. In several of the Canadian provinces it has been decided that an appointment shall be made in rotation by the leading universities. In most of the States of the Union, in outlying colonies like Bermuda, Jamaica and Newfoundland, in provinces of Canada, in New Zealand and the States of Australia, the final choice of the scholar is left in the hands of a Committee of Selection. Great care has been taken in the constitution of these committees, as it has been felt that on the wise and impartial exercise of their judgment depends more than upon anything else the full success of the scheme.

The conditions regulating the award of scholarships in the American States provide that the candidates shall have satisfactorily completed the work of at least two years in some college of liberal arts and sciences. The upper age limit must be twenty-four years at the time of entering upon the scholarship at Oxford. To be eligible the candidate must be a citizen of the United States, or the son of a citizen, and must be unmarried. Each student receives an allowance of £300 a year, which is equivalent to \$1,500, payable in quarterly instalments, which is just enough to enable a man to pay the expenses of vacations as well as terms. The first instalment is not payable until the student has actually gone into residence at Oxford, so he should go abroad with one or two hundred dollars in his possession.

The full number of scholarships, when all are filled, is, as at present, 189; and this number should be maintained from year to year, vacancies being filled as the men complete their three years' course. The last examination in the United States took place in October, 1915. The next qualifying examinations will be held in all States of the Union in October, 1917.

Hitherto scholars have been elected in all States of the Union in two successive years, while in each recurring third year none was chosen. In the future scholars will be selected each year from 32 States. The 48 States have for this purpose been divided into three groups (A, B and C) of sixteen each.

For the year 1916 scholars will be elected from groups A and B; for 1917 from groups A and C; and for 1918 from B and C, and subsequently in the same rotation year by year.

The qualifying examination, which is in essence the same as that for entrance into Oxford University, consisting of Latin, Greek and Mathematics, will be held in all the States each year.

The division of the States into groups, for the purpose above mentioned, is, as follows:

| A.             | A.          | B.          | B.           | C.          | C.              |
|----------------|-------------|-------------|--------------|-------------|-----------------|
| Maine.         | Maryland.   | California. | Michigan.    | Arizona.    | North Carolina. |
| New Hampshire. | New Jersey. | Washington. | Missouri.    | Delaware.   | North Dakota.   |
| Vermont.       | Virginia.   | Oregon.     | Iowa.        | Florida.    | Oklahoma.       |
| Massachusetts. | Ohio.       | Colorado.   | Georgia.     | Idaho.      | South Carolina. |
| Rhode Island.  | Indiana.    | Nebraska.   | Texas.       | Louisiana.  | South Dakota.   |
| Connecticut.   | Kentucky.   | Kansas.     | Alabama.     | Montana.    | Utah.           |
| Pennsylvania.  | Illinois.   | Minnesota.  | Arkansas.    | Nevada.     | West Virginia.  |
| New York.      | Tennessee.  | Wisconsin.  | Mississippi. | New Mexico. | Wyoming.        |

The examinations are not competitive, but qualifying. Inquiries as to particulars by intending candidates may be addressed to any college. Information may also be obtained from The Rhodes Trust, Seymour House, Waterloo Place, London S. W., or from F. J. Wylie, Secretary to the Rhodes trustees, 9 South Parks Road, Oxford, England.

There were five annual German Scholarships which were created by a codicil to the will of 1899, scholars for which were appointed by the German Emperor. These scholarships were for three years and had an annual value of £250. They have naturally stopped since the outbreak of hostilities. As they were created by a codicil to the original will of Mr. Rhodes, the English Parliament can divert this fund without affecting the other scholarships.

**NEW YORK PUBLIC LIBRARY.  
ASTOR, LENOX AND TILDEN FOUNDATIONS.**

ESTABLISHED by consolidation of the "Trustees of the Astor Library," the "Trustees of the Lenox Library," and the "Tilden Trust," May 23, 1895, twenty-one trustees being chosen from the Trustees of these corporations; in 1902 the number of Trustees was increased to twenty-five, of which number the Mayor of the City of New York, the Comptroller, and the President of the Board of Aldermen serve. The agreement of consolidation provided for the establishment and maintenance of a free public library and reading room in the City of New York, with such branches as might be deemed advisable for the continued promotion of the objects and purposes of these several corporations.

The Trustees soon after consolidation in 1895 determined to pursue a liberal policy and to create a great library system that would serve the needs of scholars and of the general reading public as well. An act was passed by the Legislature and approved May 19, 1897, giving the city the necessary authority to issue bonds for the construction of a building on the present site and to contract with the New York Public Library for its occupancy. Carrère & Hastings were appointed architects of the building on December 9, 1897. The corner-stone was laid November 10, 1902, and the building was opened to the public on May 23, 1911.

The building is in the form of a rectangle 390 feet long and 270 feet deep, built around two inner courts, each about 30 feet square; it has a cellar, basement, and three upper floors. The area covered is about 115,000 square feet, the cubic contents 10,350,000 cubic feet. The material is largely Vermont marble (375,000 cubic feet), bonded in brick walls. There are seats for 768 readers in the main reading room and seats in other public rooms bring the total capacity up to 1,760. In the main stack room are 331,530 feet (63.3 miles) of shelving, with capacity for about 2,500,000 volumes. Book stacks in the special reading rooms amount to about 70,000 feet, with capacity for about 500,000 volumes.

The building fronts on Fifth Avenue, looking east. On the basement floor, with entrance from Forty-second Street, are the rooms for circulation of books, for children's reading, for newspapers, a library school and its offices, and public telephones; on this basement floor, with entrance on Fourth Street, are the shipping rooms and the printing and binding offices. On the first floor are the business offices of the circulation department, the offices of the bursar, exhibition rooms, and reading rooms for current periodicals, technology, patents. On the second floor are the offices of the Director, a lecture room, the ordering and cataloguing rooms, and reading rooms for Jewish literature, Oriental literature, Slavonic literature, science, economics, and sociology, and public documents. On the third floor are the public catalogue room and the main reading room, the latter occupying nearly the whole of the west front of the building, in size about 300 feet long by 80 feet wide, with seats for 768 readers. Along the south side of the third floor are special reading rooms devoted to American history, maps, and engravings. Along the Fifth Avenue front are the art and architecture reading room, the Stuart room, the picture galleries, and the manuscripts division. Along the north front of the third floor are reading rooms for music and for genealogy and local history.

On March 12, 1901, Mr. Andrew Carnegie offered to give \$5,200,000 to the city for the construction and equipment of free circulating libraries upon condition that the city should provide the land and agree to maintain the libraries when built. This communication was submitted to the Mayor on March 15, and on April 26 an act was passed authorizing acceptance of the gift by the city upon the terms imposed by Mr. Carnegie. An agreement with the city was executed on July 17, the library acting as agent for Mr. Carnegie, under which forty-two buildings are to be erected in Manhattan, the Bronx, and Richmond (later increased to fifty), on sites to be selected and purchased by the city with the approval of the library, the buildings to be leased to the library and to be under its control. The city agrees to provide adequate yearly maintenance, 10 per cent. of the cost of each building being agreed upon as a minimum.

On November 7, 1901, an agreement was made with three firms of architects in New York to prepare plans and specifications for these branch libraries. On June 6, 1902, an issue of bonds for \$250,000 was authorized for purchase of sites. The first Carnegie building, known as the Yorkville branch, was opened December 13, 1902, at 222 East Seventy-ninth Street; the second, providing a new home for the Chatham Square branch, was opened November 2, 1903, at 33 East Broadway. By the end of 1916 thirty-seven branches had been opened under this contract.

The Trustees of the library are William W. Appleton, Andrew Carnegie, Cleveland H. Dodge, John Murphy Farley, Samuel Greenbaum, Frederic R. Halsey, John Henry Hammond, Lewis Cass Ledyard, J. P. **CO-OPERATIVE EDUCATIONAL WORK OF THE BUREAU OF NATURALIZATION AND THE PUBLIC SCHOOLS OF THE UNITED STATES IN THE EDUCATION OF FOREIGN-BORN RESIDENTS.**

The Naturalization Laws of the United States are administered by the Federal Bureau of Naturalization in Washington City, which, by the act of June 23, 1906, provides for a uniform rule for the naturalization of aliens throughout the United States. Congress has placed with this bureau the administrative control of all matters relating to the naturalization of aliens, under the direction of the Secretary of Labor, of the United States Department of Labor, making the Commissioner of Naturalization, or, in his absence, the Deputy Commissioner of Naturalization, the administrative officer in charge of this Federal administration.

The public schools throughout the United States co-operate with the bureau by opening evening classes to train the uninformed candidate for citizenship in American government. The bureau furnishes them the names and addresses of the foreigners who declare their intention to become citizens, and who petition for naturalization, for the purpose of bringing these prospective citizens into contact at the earliest moment with the Americanizing influences of the public school system. By insuring a comprehension of the true spirit of our institutions on the part of the aliens admitted to citizenship the bureau strives to make their acquisition serve as a strengthening influence on the social, political, moral, and industrial qualities of these institutions.

Through reports from various public schools where classes in citizenship have been maintained for aliens seeking naturalization, the bureau disseminates information regarding these courses throughout the public school system. It thereby acts as a clearing house for information to civic instruction. It is endeavoring, through the public schools of the United States, to stimulate interest throughout the Nation in the preparation for citizenship responsibilities of all candidates for naturalization.

The Bureau of Naturalization has a field service extending throughout the United States composed of Naturalization Examiners. The entire country is divided into eleven districts with a central headquarters for each district, presided over by Chief Naturalization Examiners. Through these officers the Bureau of Naturalization examines all candidates for citizenship as to their attachment to the principles of the Constitution of the United States and their compliance with the requirements of the Naturalization Law. These Naturalization Examiners appear in the courts exercising naturalization jurisdiction, and there represent the United States at the hearing of the petitions for naturalization by the Judges of the courts. These examiners also advise the general public in response to personal inquiries, and aid the public school authorities in their co-operation with the Federal Bureau in Washington in its national educational movement.

The Bureau of Naturalization in Washington furnishes all of the naturalization supplies to the clerks of the naturalization courts. There are nearly 2,500 Federal and State courts that naturalize aliens. The clerks of these courts send to the bureau in Washington, on the first working day of each month, the duplicates of all naturalization papers issued and executed by them during the preceding month. This represents over 40,000 foreigners, including the wives of those who declare their intention, or

take out their first papers, and those who petition for naturalization, or secure their second papers. In all, the names of something over 500,000 foreigners come before the Bureau of Naturalization each year. Last year 207,935 declared their intention, and 108,069 filed their petitions for naturalization. Of these latter 93,911 were admitted to citizenship. With each of these foreigners who individually took steps to become a citizen of the United States there was on an average of one foreigner who became a citizen by reason of the family ties. The wives and minor children born abroad and living in the United States become citizens in this way. During the last year there were, therefore, upon this basis, 631,888 foreigners who came before the bureau to secure their first and final papers. During the ten years of Federal supervision there have been 1,726,544 who declared their intention, 1,647,473 who were admitted to citizenship, and 85,996 who were denied admission to citizenship. In the first three years of Federal supervision 9,921 were denied. These denials aroused public interest, and through the intervention of the Naturalization Examiners citizenship classes were organized as early as 1909 in various parts of the country.

The Judges of the naturalization courts agreed to send to these citizenship schools the candidates who were found ineligible through a failure to understand our governmental institutions.

In April, 1914, the plan of securing a nation-wide educational co-operation on the part of the public schools with the Bureau of Naturalization in citizenship preparedness was formulated in that bureau. With the opening of the school year in 1915 the co-operation of the public schools in every important city in the country had been secured by the bureau. This has been extended until the public schools of every State in the Union, representing over 750 cities and towns, have volunteered to co-operate through the organization of evening classes in citizenship to teach the adult foreigner citizenship responsibilities. The bureau has prepared individual cards for aiding the public schools in maintaining their records, and sent the names of 223,111 foreigners—men and women—to the public schools in these places. It also sent personally addressed letters to these men and women, urging the advantages of the public schools, both in securing better jobs and in the establishment of American homes. It also secured information from the public schools engaged in teaching foreigners, showing the various methods pursued by them in this instruction. From this it caused to be prepared and issued a pamphlet entitled "An Outline Course in Citizenship." Thousands of copies of this outline have been distributed for the use of the teachers of the foreign classes, and also in the high and upper graded schools among the native-born American children.

The bureau is now engaged in the preparation of a text-book for the candidate for citizenship in the public schools which is intended for free distribution to those who take out their first papers and enter the public schools.

Through the medium of the public schools and the Bureau of Naturalization, those alien friends who come forward for citizenship are becoming so enlightened that their true Americanization is resultant.

**OCCUPATIONS OF COLLEGE GRADUATES.**

The United States Bureau of Education in May, 1913, made public statistics showing the occupations of college graduates, from 1842 to 1900, from returns furnished by thirty-seven colleges and universities. Taking three periods a century apart gave these percentages:

## NATIONAL MODEL LICENSE LEAGUE.

*President*—T. M. Gilmore, Louisville, Ky. *Vice-President*—George G. Brown, Louisville, Ky. *Treasurer*—J. B. Wathen, Jr., Louisville, Ky. *Secretary*—G. R. Washburne, Louisville, Ky. *Chairman Executive Committee*—I. W. Bernheim, Louisville, Ky. *Chairman Model Law Committee*—A. C. Van Winkle, Louisville, Ky.

The purpose of the organization is to conduct a National educational campaign in favor of legislation intended to take the liquor question out of politics and to put law-breakers out of the liquor business. It advocates limitation of licenses in proportion to population, thus preventing undue competition; mandatory penalties suspending and cancelling licenses of law-breakers; moderate license fees enabling the license holder to make a legitimate profit, and the renewal of a license so long as the holder obeys the law, and so long as the business is not outlawed by vote of the people, thereby relieving the liquor dealer of the domination of politicians.

The league's legislative plan has been adopted as a whole by Indiana and Ohio, and in part by Texas, Arkansas, Michigan, Louisiana, and Connecticut. The league was organized in October, 1907. Its membership includes numerous professional and business men. Office, Commercial Building, Louisville, Ky.

PRINTING AND PUBLISHING.

CENSUS BUREAU'S SUMMARY, ISSUED AUGUST 28, 1916, CONCERNING THE INDUSTRY FOR 1914.

According to the census classification the printing and publishing industry is made up of three branches, comprising: (1) establishments whose chief business is book and job printing, book printing and publishing, or book publishing only; (2) establishments whose sole or chief business is music printing, or music printing and publishing, or music publishing only, and (3) establishments which are engaged in the printing and publishing, or in the publishing only, of newspapers and periodicals, some of the first-named doing job work also.

NEWSPAPERS.

The daily newspaper, according to the census definition, is a publication issued on each of the secular days of the week, Sunday editions being excluded. A morning and an evening paper issued by the same plant are counted as two papers.

A total of 2,580 dailies was reported for 1914, representing a slight decrease as compared with 2,600 in 1909. The aggregate circulation of the dailies in 1914 was 28,436,030, representing an increase of 17.4 per cent, as compared with the 1909 circulation. During the semi-decade a number of publishers of both morning and evening papers suspended publication of one or the other of their editions; in several instances dailies were consolidated; in others the daily, after an experiment, retired into the weekly field whence it came, and other dailies disappeared without transformation.

The number of Sunday papers published in the United States in 1914 was 570, as compared with 520 in 1909; and their combined circulation in the later year, 16,445,820, represented an increase of 23.2 per cent, as compared with the corresponding figure for the earlier year.

The number of weekly newspapers and periodicals reported for 1914, 15,166, shows a slight increase as compared with the corresponding number in 1909, 15,097. The 1914 circulation of such publications

was 50,454,738, an increase of 23.6 per cent, as compared with 1909.

There were also reported for 1914 84 tri-weekly newspapers, with an aggregate circulation of 549,495, representing increases of 15.1 per cent, and 63.8 per cent, respectively, as compared with 1909; 453 semi-weekly papers, with a circulation of 2,483,629, representing a decrease of 8.2 per cent, in number, together with an increase of 7.4 per cent, in circulation; 2,820 monthly publications, with a circulation of 79,190,838, the percentages of increase in number and circulation being 13.2 and 25.1, respectively; 500 quarterly publications, with a circulation of 18,852,401, representing increases amounting to 38.5 per cent, and 17.4 per cent., respectively; and 442 other periodicals, with a circulation of 8,946,567, the percentages of increase during the five-year period being 21.4 and 118.5, respectively.

LOCATION OF ESTABLISHMENTS.

Of the 31,612 establishments in the entire industry reported for 1914 4,159 were located in New York; 2,538 in Illinois; 2,352 in Pennsylvania; 1,685 in Ohio; 1,457 in California; 1,293 in Missouri; 1,206 in Massachusetts; 1,182 in Texas; 1,067 in Michigan; 1,058 in Iowa; 965 in Minnesota; 901 in Indiana; 789 in Wisconsin; 763 in Kansas; 689 in Nebraska; 681 in New Jersey; 622 in Washington; 619 in Oklahoma; 496 in Colorado; 438 in Georgia; 426 in Tennessee; 401 in Kentucky; 384 in Virginia; 379 in South Dakota; 363 in Oregon; 351 in North Dakota; 340 in Connecticut; 333 in Maryland; 329 in North Carolina; 305 in Arkansas; 278 in Alabama; 277 in Louisiana; 239 in West Virginia; 238 in Montana; 235 in Florida; 219 in Mississippi; 197 in Maine; 173 in Idaho; 168 in South Carolina; 156 in Utah; 147 in Rhode Island; 141 in the District of Columbia; 133 in New Hampshire; 111 in Vermont; 107 in New Mexico; 81 in Wyoming; 74 in Arizona; 54 in Delaware; and 42 in Nevada.

## THE ALFRED B. NOBEL PRIZES.

THE Swedish scientist Alfred B. Nobel, the inventor of dynamite, died in 1896, bequeathing his fortune, estimated at \$9,000,000, to the founding of a fund, the interest of which should yearly be distributed to those who had most contributed to the benefit of mankind improvement during the year immediately preceding. The interest is divided in five equal shares, given away: "One to the person who in the domain of physics has made the most important discovery or invention, one to the person who has made the most important chemical discovery or improvement, one to the person who has made the most important discovery in the domain of physiology or medicine, one to the person who in literature has produced the most distinguished work of an idealistic tendency, and one to the person who has promoted most or best the fraternity of nations, and the abolishment or diminution of standing armies, and the formation and increase of peace congresses."

The prizes for physics and chemistry are awarded by the Swedish Academy of Science, that for physiology and medicine by the Carolinæ Institute (the faculty of medicine in Stockholm), that for literature by the Swedish Academy in Stockholm, and the peace prize is awarded by a committee of five persons elected by the Norwegian Storting.

In accordance with these statutes the awarders of the prizes (the four above named institutions) elect fifteen delegates for two consecutive years, the Academy of Science electing six and the other prize awarders three each. These delegates elect for two consecutive years four members of the Board of Directors of the Nobel Foundation, which board, exclusively consisting of Swedes, must reside in Stockholm. A fifth member, the President of the board, is nominated by the Government. The Board of Directors has in its care the funds of the institution, and hands yearly over to the awarders of the prizes the amount to be given away. The value of each prize is on an average \$40,000. The distribution of the prizes takes place every year on December 10, the anniversary of Mr. Nobel's death. Full information can be obtained from "Nobelstiftelsens Styrelse" (the Board of Directors of the Nobel Foundation), Stockholm, Sweden.

Prizes awarded thus far as follows:

## COUNCIL.

*President*—J. Alden Welr. *Vice-President*—Howard Russell Butler. *Corresponding Secretary*—Harry W. Watrous. *Recording Secretary*—Charles C. Curran. *Treasurer*—Francis C. Jones. Kenyon Cox, William A. Coffin, Robert I. Aitken, Frederick W. Kost, Elliott Dalgnerfield, Douglas Volk.

The addresses given in the list refer to the City of New York when not otherwise specified. The National Academy was founded in 1826. The schools of the National Academy are open from the first Monday in October to the middle of May. Circulars containing rules and other details may be had on application at the academy, Amsterdam Avenue and West 109th Street.

## NATIONAL SCULPTURE SOCIETY.

The National Sculpture Society, with headquarters at New York, was incorporated in 1896. It is composed of lay and sculptor members, and has for its object the spreading of the knowledge of good sculpture, the fostering of the taste for ideal sculpture and its production, both for the household and museums; the promotion of the decoration of public and other buildings, squares, and parks with sculpture of a high class; the improvement of the quality of the sculptor's art as applied to industries, and the providing, from time to time, for exhibitions of sculpture and objects of industrial art in which sculpture enters. The officers are as follows:

*President*—Herbert Adams. *Vice-Presidents*—Lloyd Warren, A. A. Weinman. *Secretary*—Robert I. Aitken. *Treasurer*—I. Wyman Drummond. Class expiring May, 1917: Robert I. Aitken, Albert Jaegers, H. Augustus Lukeman, H. A. MacNeill, Everts Tracy, and Albert Weinert. Class expiring May, 1918: Herbert Adams, I. Wyman Drummond, A. A. Weinman, Lloyd Warren, Edward McCurtan, and Edmond T. Quinn. Class expiring May, 1919: Solon H. Borglum, A. Stirling Calder, R. H. Hunt, F. G. R. Roth, Janet Scudder, John De Witt Warner. Headquarters, 212 West Fifty-seventh Street, New York City.

## ROYAL ACADEMY.

*President*—Sir Edward John Poynter, Bart., K. C. V. O. *Keeper and Librarian*—A. C. Gow. *Treasurer*—Sir Aston Webb. *Secretary*—W. R. M. Lamb. *Registrar*—E. F. Dixon. *Honorary Retired Academicians*: 1878, Yeames, Wm. Frederick; 1911, Smythe, L. P.

AMERICAN ACADEMY OF ARTS AND LETTERS.

The first seven members of the American Academy of Arts and Letters were selected by the National Institute of Arts and Letters from its own body in 1904 by ballot. The seven were William Dean Howells Augustus Saint-Gaudens, Edmund Clarence Stedman, John La Farge, Samuel L. Clemens, John Hay and Edward MacDowell. In order to become eligible to the American Academy one must first be a member of the National Institute of Arts and Letters, which society was organized at a meeting of the American Social Science Association in 1898. The Academy received a national charter from Congress in April, 1916. The qualification for membership is stated in the Constitution, "It shall be notable achievement in art, music or literature." The number in the institute is limited to 250, and the election is by ballot. The American Academy of Arts and Letters numbers fifty members, and the officers are William Dean Howells, President; William Milligan Sloane, Chancellor and Treasurer; Robert Underwood Johnson, 70 Fifth Avenue, New York City, Permanent Secretary.

The following are the present members of the academy with two vacancies:

## ART PROGRESS IN THE UNITED STATES.

BY HENRY TYRRELL.

The greatest significance of the recent nationwide awakening of our art museums and institutes to the work of educational extension lies in their interpretation of the word "Art" in a practical vocational sense. It has come to involve not simply painting, sculpture and architecture but all the allied crafts and industries collectively, in which all the people have part or interest. The artistic wealth of great collections thus goes back into circulation in the business of everyday life, out of which originally it grew. In the new Renaissance, which this movement forecasts, all the arts of design, form and color will be applied arts, as they were in Europe in the magnificently creative Middle Ages. Already, painting is turning from desultory easel pictures to real mural and interior decoration, and sculpture's highest goal is architectural adornment, rather than the restricted or futile independent statue. The principal public museums, notably those of New York, Chicago, St. Louis, Buffalo, Minneapolis, Cleveland, Toledo and San Francisco, are putting their main resources into vocational teaching, in direct and ever closer cooperation with the universities and public schools. The Metropolitan Museum of Art, New York City, has compiled and published a forty-six-page pamphlet on "Art Education," with a list of 800 different professions, trades and lines of commercial occupation requiring knowledge of drawing, design, modelling or color; also specifying the schools (numbering eighteen in New York City alone) and about 100 throughout the United States) where an aggregate of 32,663 artisan-students find specialized instruction in these branches. And this is relatively but a small beginning as compared with actual economic needs, at a time of unprecedented dearth of expert labor in those productive industries into which art, in the broad sense here defined, enters. American architecture in the last two or three decades has undergone an evolution more remarkable than that in any other country or period. In the commercial "sky-scraper" of Manhattan, as typified by the soaring Renaissance-Gothic adaptation in the Woolworth tower, it has given to the world a new order of building consecrated no less to aesthetic beauty than to practical utility. It is fitting, therefore, that the country's principal architectural art exhibition, that given annually by the New York Architectural League, should occupy itself mainly with the assembling of such drawings, plans, models, photographs, sculptures, mural paintings, interior decorations and schemes for the treatment of landscape settings or accessories as illustrate and encourage the harmonious alliance of all the mutually related building arts. Looking to the same ultimate goal is the current work and enterprise of such societies of national scope as the American Institute of Architects, the Beaux Arts Architects, the American Academy in Rome, and the School of Architecture of Columbia University. In November, through the initiative of the Massachusetts Institute of Technology, the Boston Society of Architects, Architectural Club, Landscape Architects and Society of Arts and Crafts held a joint exhibition of their allied arts in the historic Rogers Building, Boylston Street, Boston. Sculpture's noteworthy advance is marked by the architectural use of statuary on an heroic scale on such important public buildings as the New York Public Library, the Museum of the Brooklyn Institute of Arts and Sciences and the House wing of the Federal Capitol at Washington, with its recently finished marble pediment, "America Urges Peace," by Paul W. Bartlett; by Christian W. Feigensohn's presentation to the City of Newark, N. J., of J. Massey Rhind's full-size bronze and marble copy of Verrocchio's equestrian statue of Bartolommeo Colleoni, the Venetian original of which ranks as the noblest monument of its kind known to this modern world; and by the unprecedented exhibition of contemporary American sculpture held under the auspices of the National Sculpture Society in

the Albright Art Gallery of Buffalo, N. Y. This new sculpture salon showed a selection of 400 objects from the Panama Pacific Exposition, to which were added an equal number of works solicited especially for the occasion.

Painting in America, as elsewhere, is in a state of chaotic, almost riotous, confusion. One immediate cause of this, undoubtedly, is reaction to the tense feeling and general unrest of the times. But the radical reason is that replacement of old, outworn and inadequate conceptions by a new and vigorous regrowth makes the present period a critical turning point in art's progress. In even a greater degree than sculpture, painting now tends toward the artisan side of its development, which affects at once technique, medium and the general spirit of composition. There is a marked revival of fresco, tempera, sgraffito and decorative panel work in varied styles, indicating the approaching decline of pseudo mural painting on canvas, put in place after the manner of wall paper, and not in any integral sense related to the architectural spaces which it is meant to complete as well as to cover. The aesthetic aim and spiritual vision of painters to-day seem to be broadly divided into academic conservatives on the one hand and lawless reactionaries on the other. The former in-trench themselves with the old masters, behind fixed scholastic traditions of the past, and continue to practise painting as a purely objective, imitative art, controlled by the inflexible laws of an exact and exacting technique. The latter reject the cumbersome, archaic symbolism of classic and mediæval art as inadequate and inappropriate to the expression of the eager, restless, scientific spirit and emotional intensity of the twentieth century. Art, they insist, can have no vital force unless it is the direct outgrowth and utterance of its time, and include such terms as "post-impressionism," "cubism," "futurism," "synthesism," "vorticism" and the like, groups of the younger men have experimented boldly, oftentimes rashly, with the technical subtleties of light, color, atmosphere, perspective, pattern, movement, rhythm, mass-form and inter-related spacing, in the hope of achieving some new and more effective kind of pictorial expression than that which merely copies the outward physical aspect of things. The impression which they would convey in their art is abstract, dynamic and mental rather than concrete, static and optical. They have not yet reached their goal, to the extent of producing a recognized masterpiece, though the effects of the new teaching are apparent everywhere, even in the academy exhibitions, the art auction sales and the dealers' galleries.

Commercially, the last season was a prosperous one, as a whole, for art. Circumstances have combined, of late years, to make New York the world's clearing house for picture and art objects of every description. The last metropolitan season's aggregate auction sales of paintings alone amounted to over \$1,000,000, this classification taking in such significant items as the celebrated Blakelock "Moonlight" at \$29,000 and George Fuller's "Romany Girl" at \$10,000. The record price for an American picture, a \$10,000 was fetched by "The Gale," one of Winslow Homer's Maine coast scenes, purchased last Spring by the Worcester (Mass.) Museum. At the Spring Academy nineteen paintings, two pieces of sculpture and two miniatures were sold for a total of \$27,760—one of the paintings, Horatio Walker's "De Profundis," bringing \$10,000. The outstanding rivalry of European artists and the unprecedented influx of antique and modern art of all kinds, due to war conditions, American art during the past year has come into its own as never before. That the prosperity is substantial and making for permanency is attested by the fact that the New York art sales are attracting, from all sections of the country, new classes of buyers, conservative yet independent, equipped with ample means, and at the same time restrained by a discrimination and sound

consciousness which a decade ago was not general even among the collectors of the "magnate" class. Further evidence of a popular art awakening is seen in the grand scale and equipment of the new museums, notably that of Cleveland, Ohio; the enlarged activities of the older established ones, and the increased amount of space devoted to intelligent and educational art criticism by the press throughout the country.

The Metropolitan Museum of Art, while no longer custodian of the Morgan collections in their entirety, has been enriched by the gifts from J. Pierpont Morgan of the great *Colonna Raphael*, "Virgin and Child Embroidered with Fraize," the French Gothic sculpture and the Hoenschel collection of mediæval ecclesiastical art. In addition to these some of the most famous of the Morgan tapestries remain on view at the museum as loans from their respective present owners, chief among whom is Joseph E. Widener, of Philadelphia, who bought the great

Cardinal Mazarin piece, "The Triumph of Christ and the New Dispensation," for \$600,000. The department of paintings has installed the seventy-one French, English and American pictures bequeathed by Mrs. Morris K. Jesup, which include eleven representative native works, mostly of the Hudson River school, by Thomas Cole, Asher B. Durand, Frederick E. Church, Kensett, Sanford R. Gifford and J. W. Casilear. The Egyptian department has reconstructed on the main floor of the central museum building the massive tomb of Merneptah (3,000 B. C.), given by Edward S. Harkness—a monument so important that a special handbook detailing its history, together with its archaeological and artistic features, has been prepared and issued. The spacious new south wing of the museum, fronting on Fifth Avenue, has been completed, and will open early in the current year with its installation of hitherto inadequately accommodated features of the Metropolitan's vast and rapidly growing collections.

## THE COMMISSION OF FINE ARTS.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That a permanent Commission of Fine Arts is hereby created to be composed of seven well-qualified judges of the fine arts, who shall be appointed by the President, and shall serve for a period of four years each, and until their successors are appointed and qualified. The President shall have authority to fill all vacancies. It shall be the duty of such commission to advise upon the location of statues, fountains, and monuments in the public squares, streets, and parks in the District of Columbia, and upon the selection of models for statues, fountains, and monuments erected under the authority of the United States and upon the selection of artists for the execution of the same. It shall be the duty of the officers charged by law to determine such questions in each case to call for such advice. The foregoing provisions of this act shall not apply to the Capitol building of the United States and the building of the Library of Congress. The commission shall also advise generally upon questions of art when required to do so by the President or by any committee of either House of Congress.

Sec. 2. That to meet the expenses made necessary by this act an expenditure of not exceeding ten thousand dollars a year is hereby authorized. Approved, May 17, 1910. This act has been supplemented by a number of executive orders by the President, broadening the scope of the commission's functions.

Headquarters, 1729 New York Avenue, N. W., Washington, D. C.

*Chairman*—Charles Moore, Detroit, Mich. *Vice-Chairman*—Frederick Law Olmsted, Brookline, Mass.; Thomas Hastings, New York City; Cass Gilbert, New York City; Herbert Adams, New York City; J. Alden Weir, New York City; Charles A. Platt, New York City. *Secretary and Executive Officer*—Col. Wm. W. Harts, U. S. A.

## ROCKEFELLER FOUNDATION.

The State of New York granted a charter to the Rockefeller Foundation in 1913. Principal funds \$101,324,576.78. The incorporators are John D. Rockefeller, John D. Rockefeller, Jr., Frederick T. Gates, Harry Pratt Judson, Simon Flexner, Starr J. Murphy, Jerome D. Greene, Wickliffe Rose, and Charles O. Heydt. The officers are: *President*—John D. Rockefeller, Jr.\* *Secretary*—Jerome D. Greene. *Treasurer*—L. G. Myers. *Assistant Treasurer*—L. M. Dashiell. *Comptroller*—Robert H. Kirk. Members of the Executive Committee are: John D. Rockefeller, Jr., Jerome D. Greene, Simon Flexner, Starr J. Murphy, Wickliffe Rose. Headquarters, 61 Broadway, New York City. \*Will be succeeded about May 1, 1917, by Dr. George E. Vincent.

## EDUCATIONAL DRAMATIC LEAGUE.

The Educational Dramatic League was organized in 1913 to give assistance to amateur clubs in churches, settlements, schools, and other organizations and to unrelated groups of young people, in order to bring the work of such clubs to a higher standard of literary and entertainment value, to combine education and self-expression with recreation.

The league is doing this by giving the clubs special advice and aid to meet their individual needs in the selection of good plays, prompt-books, costume-plates, and costumes, and by instructing teachers in the best educational methods of producing plays, or supplying clubs with competent directors. For the younger children classes have been formed in story-telling and story-playing.

A reference library of plays and general dramatic literature is at the disposal of members.

The league considers the public performance of a play but the smallest part of the work, and that the study of plays furnishes an interesting means of teaching literature, English, diction, bearing, and the correct management of a production.

The league's object is national, and every dramatic club of any kind, whether in New York or elsewhere, is eligible to become a member. Annual dues, \$2 and \$5.

*President*—Mrs. August Belmont. *Vice-President*—Miss Kate Oglebay. *Secretary*—Miss Rachel Crothers. *Treasurer*—Mr. James S. Cushman. *Executive Secretary*—Miss Marion A. Turner. Headquarters, the Tilden Building, 105 West Fortieth Street, New York City.

## ACTORS' EQUITY ASSOCIATION.

The Actors' Equity Association has for its object equitable arrangement of all business matters pertaining to those who follow the art of acting, and especially pertaining to those who are members of the association. It is a voluntary association, formed to advance, promote, and foster the profession of acting and those engaged therein; to protect and to secure the rights of actors; to inform them as to their legal rights and remedies; to procure appropriate legislation in matters affecting their profession; to do such things as shall appear advantageous, or refrain from doing such things as shall appear disadvantageous to the profession of acting or to the members of the association.

*President*—Francis Wilson. *Vice-President*—Bruce McRae. *Corresponding Secretary*—Howard Kyle. *Treasurer*—Richard A. Purdy. Headquarters, 603 Longacre Building, New York City.

## MUSIC.

BY MAZIE E. CLEMENS.

The general material prosperity which has come to the Nation will, from all indications, contribute to artistic development. In music especially is there continued and growing evidence of improved taste on the part of both producer and patron. The Metropolitan Opera Company began its ninth season on the evening of November 13, to work through a brilliant programme to extend over a season of twenty-three weeks. On the concert stage there was also a brilliant prospectus from the concert managers, while the standard orchestras were just as well advanced in their instrumental music.

In the operatic prospectus three novelties were listed, "Les Pecheurs de Perles," by Bizet, in French; "Iphigenie auf Tauris," by Gluck, in German, and "The Canterbury Pilgrims," by Reginald de Koven, in English. Mr. de Koven's composition is new and will have its first presentation at the Metropolitan. It is composed to the libretto of Percy Mackay, and is, of course, a modernization of Geoffrey Chaucer's quaint poem.

"Les Pecheurs de Perles" ("The Pearl Fishers") was produced first in 1863, and while perhaps not Bizet's first opera, was the first he composed when he was free of school and material environment. The story of the opera is not a very serious one. It tells of Zurka, the chief of the Chinese pearl fishers, and his closest friend, Nadir, falling simultaneously in love with an unknown maiden of Kandy. To protect their friendship they flee from her charms. The pearl fishers are under the protection of a veiled virgin, Leila, who, perched upon a high rock, sings while they work. Nadir recognizes in Leila the maid he and Zurka had loved in Kandy. She recognizes him and they sing a love duet, she thus neglecting her duty as the protectress of the fishers. A great storm comes up and the pearl fishers, investigating, find the two lovers together. Zurka, in fury, sentences both to death, but, approaching Nadir, he sees on his neck the necklace he has given him before to a child who had saved his life. He thereupon decides to permit the lovers to escape and plans to fire the fishers' village. While the fishers are busy with the fire Zurka sends Nadir and Leila away in a boat, but is caught in this act of treason and kills by the knife of the high priest, while the lovers sail away.

This opera was chosen as the attraction for the opening night of the season, Frieda Hempel singing the part of Leila, Caruso that of Nadir, Giuseppe de Luca that of Zurka and Leon Rother that of Nourabad. Georgio Polacco conducted. The opera was beautifully presented and sung and was so warmly received by the splendid audience that thronged the great auditorium that it was assured of a regular place in the repertoire.

"Iphigenie auf Tauris" had its premiere at a matinee on Saturday, November 25. It, too, was brilliantly successful, so much so that there was general wonder why it had not been given before. It had its first presentation, in Paris in 1779. Though similar in style to "Orfeo," "Iphigenie auf Tauris" has more color and a contrast in musical values that relieves it from the occasional monotony of "Orfeo." It is unquestionably an operatic masterpiece, and now that it has been heard it is sure of repetitions. In its premiere the principal parts were sung by Melanie Kurt, Carl Braun, Johannes Sembach and Hermann Weil. Artur Bodanzky conducted with rare skill and judgment of values.

The Gluck opera, as its name indicates, is based on the old mythological tale. Iphigenie, daughter of Agamemnon, was to be sacrificed to appease Diana, angered because Agamemnon had killed the favorite stag of the goddess. At the last moment Diana relented and carried Iphigenie to Tauris, where she was appointed to serve as a priestess. The scene of the opera is laid in Tauris, where Orestes, brother of Iphigenie, and his friend, Pylades, go to carry off the statue of Diana. They are captured by the Scythians and condemned to death. Iphigenie had previously, in a dream, seen her father being murdered by her mother

and herself stabbing Orestes through the heart. She did not recognize her brother when he was brought before her, and she questioned the two Greek strangers for news of her parents. Finally she offered to spare the life of one on condition he would carry a letter to her sister, Electra. The two friends contended as to who should thus be spared, each wishing to remain for the sacrifice while his friend escaped. In the end Iphigenie decided Pylades should carry the letter and Orestes be slain. Just as she is about to place the sacrificial knife into him, however, an exclamation he makes causes her to recognize him as her brother and she withholds her hand. The King of Tauris, furious at the bargain which is allowing Pylades to escape, orders both Orestes and Iphigenie put to death, whereupon Pylades stabs the King and terrifies the Scythians by his bravery. Then Diana again intervenes, orders the Scythians not to turn over the statue to Orestes, releases Iphigenie from her thraldom and orders her to return to Greece with Orestes and Pylades.

In addition to the novelties and revivals, the season is made up by reproductions of operas which have become popular favorites under the present regime at the Metropolitan Opera House. The annual addition of new operas to the repertoire has now made it perhaps the most comprehensive and complete which is being produced by any company of singers in the world, comprising, as it does, the work of composers of every school and of every form of expression. Another very striking feature of the management's contemporary and future plan is the development of American singers. In the long list of principals now under engagement are the following Americans: Soprani, Anna Case, Vera Curtis, Minnie Egner, Alice Eversman, Geraldine Farrar, Lila Fornia, Mabel Grissman, Odette Le Fontenay, Edith Martin, Alice Nielsen, Marie Rappold and Marie Sundelius; mezzo-soprani and contralti, Mariska Aldrich, Sophie Braslan, Louise Homer, Kathleen Howard, Florence Muford, Lila Robeson; tenor, Paul Althouse; baritone, Clarence Whitehill; bassi, Arthur Middleton, Basil Ruysdael, Henri Scott.

The immense growth in the general appeal of opera and classic music and of the spread of musical education and understanding is proved by the throngs which seek admission to the "popular price" performances. The first of these for the 1916-17 season was given on the night of Saturday, Nov. 18, with "Aida," when the authorities had to order the discontinuance of the sale of even simple admissions, while scores outside were still clamoring to get in.

The second performance of the season was "Tristan und Isolde," November 16, with Melanie Kurt as Isolde, Urlus as Tristan and Louise Homer as Brangane.

Strauss's "Der Rosenkavalier" was brilliantly given November 18, sung by the same cast as last year, with the exception of Miss Mason, who, as Sophie, gave a charming impersonation. The Russian opera, "Prince Igor," was the attraction at the matinee November 19 and "Aida," at the popular price performance in the evening, with Paul Althouse taking Luca Botta's place in singing the principal tenor role.

Gaudia Muzio, a new soprano, made a most successful debut at the Metropolitan Opera December 4. Despite the nervousness natural to a first American appearance, she gave an unmistakable evidence of artistic quality as to compel spontaneous applause. She chose the title role in Puccini's "Tosca," a part admirably suited to her strong, lyric soprano voice.

Other novelties and revivals to be produced during the season are Delibes's "Lakme," Donizetti's "L'Elisir d'Amore," Massenet's "Thais," Mozart's "Le Nozze di Figaro" and Zandonai's "Francesca da Rimini." There were also performances of "Parsifal" and an afternoon cycle of Wagner's "Der Ring des Nibelungen."

The following is a review of the season 1914-15, continued from the 1916 ALMANAC:

The end of the 1915-16 season found the patrons of the Metropolitan Opera a little in-

MUSIC—Continued.

dined to grumble and to feel that the management had not shown as great enterprise as it might have done in the production of new compositions. Only two were produced in the season, "Prince Igor," by the Russian composer Borodine, and "Goyescas," by Granados, considered the best of Spain's modern composition. "Prince Igor" did not entirely please, while "Goyescas" was regarded by most students as being merely a collection of pianoforte compositions. "Prince Igor" served an educational purpose, and the one fact that it gave opportunity for the introduction of the Tartar ballet music justified its production. It was a collection of episodes devoid of dramatic consistency, which seems typical of Russian operatic composition.

As to "Goyescas," its sole interest seemed to lie in its Spanish color and in the fact that it served to introduce the work of its composer and thus give American music lovers an opportunity to estimate the measure of Spanish composition. During the season there were several "revivals," a term applied by the Metropolitan Opera Company to any work which it has not produced within three or four seasons. These were the noted Saint-Saens's work, "Samson et Dalila," Plotow's "Marta," Verdi's "Rigoletto," Bellini's "La Sonnambula," and "Der Widerspaenigliche Zaechner" ("The Taming of the Shrew"), by Goetz. Of these, "Marta," with its smooth and steady flow of melody, was one of the season's most distinct successes, though the lovers of modern music were inclined to shrug their shoulders over it. "Rigoletto" ranked next. "The Taming of the Shrew" ranked last in interest and popularity.

Most of the new principals heard during the season proved disappointing. A striking exception was Giuseppe de Luca, an Italian baritone with a wonderfully sympathetic voice and an art so rare as to rouse enthusiasm. The new German conductor, Artur Bodanzky, attained a considerable measure of success.

Louise Homer was welcomed back to the Metropolitan on March 13 as Anneris in "Aida." She assumed the role of Dalila for the first time in America in the repetition of "Samson et Dalila" and gave a fully capable interpretation of that role.

Vienna—"The Guest of the King," text by Armin Friedmann, based upon Dickens's "Little Dorrit," and music by Heinrich Reinhardt was brought out at the Volksoer in February.

Berlin—At the Karlsruhe Court Opera Wein-gartner's "Genesis" was heard for the first time in February. "Rahab," the one-act opera of Von Franckenstein, was given at the Frankfurt opera. At the Royal Theatre Mozart's "La Finta Giardiniere" was resurrected along with other music of the period (1775) when the work was written.

Dresden—The opera season opened August 13 with a performance of "The Meistersinger," under the direction of Fritz Reiner.

Stuttgart—In September a new opera, "Sandro, the Fool," was given under Max Schulling's direction. The work is in three acts and the libretto is by Hans Hinkelmann.

Milan—The one-hundredth birthday of Rossini's "Barber of Seville" was celebrated at the Scala in April.

London—At the Aldwych Theatre in October was heard "Faust" with Miriam Licette as Marguerite, Edith Clegg as Martha, Webster Miller as Faust and Robert Radford as Mephisto. Other works heard were "Tristan and Isolde," with Buckmann and Mullins; "Samson and Delilah,"

"Magic Flute," Puccini's "La Boheme," with Webster Miller as Rudolph and Bessie Tras as Mimi; "Madama Butterfly," with Maurice D'Oisley as Pinkerton and "Il Seraglio," with Mignon Nevada, Bessie Tras, Maurice D'Oisley, Alfred Heathre, Robert Radford and Frederick Austin.

Toronto—The San Carlo Grand Opera Company gave a short season of opera at the Royal Alexandra in October. The operas heard included "Aida," "Marta," "Rigoletto" and "Carmen."

New Orleans—The Boston-Pavlowa Company gave a week of opera in February. Beginning with "L'Amore dei Tre Re," the company gave performances of "Pagliacci," "La Boheme," "Madama Butterfly."

Chicago—Leonovillo's "Zaza" was given for the first time here on January 17 at the Auditorium by the Chicago Opera Association. It is in four acts and follows the story of the play closely. Mr. Magnenat was Cascar, Carmen Melis was Zaza and Mr. Bassi was Milio. Ferrari conducted. For the first time in America this company brought out Massenet's last opera, "Cleopatra," in which Maria Kouszeoff, the Russian prima donna, made her bow in this country on January 10. This opera relates the story of the first meeting of Cleopatre and Mark Antony and his infatuation for her, his return to Rome, where he marries Octavia, a sister to Caesar, the jealousy of Cleopatre's slave, Snakos, and Antony's return to Cleopatre's garden. The opera ends with the death of the slave, whom Cleopatre kills, and her own self-inflicted death. In the cast were Alfred Magnenat as Mark Antony, Charles Dalmores as Snakos and Marcia Van Dresser as Octavia. The 1916-17 season opened November 13 with "Aida."

Louisville, Ky.—Three performances of opera were given by the Boston National Company at Keith's Theatre, beginning October 17, with Giordano's "Andrea Chenier," with Louisa Villani, Mabel Riekelman, Zenatella, Lazzari and Thomas Chalmers in the cast. The second opera given was "Tris" with Frank Muira. In the evening "Faust" was heard, with Riccardo Martin in the title role, Mardones as Mephistopheles, Maggie Teyte as Marguerite and Auguste Bouillie.

St. Louis, Mo.—The Ellis Opera Company gave a season of opera in the Coliseum. "Carmen" and "Trovatore" were among the works performed. The San Carlo Company, under Fortune Gallo, also gave a short season in this city. Their performances included "Trovatore," "La Gioconda," "Carmen," "Cavalleria Rusticana," "Pagliacci" and "Lucia."

November 20 the Aborn Grand Opera Company began an indeterminate season at the Park Theatre, New York City, with "The Jew of the Madonnas," which held the stage for the entire ensuing week. Lois Ewell and Edith Helena appeared at alternate performances in the prima donna role of Malibella. "The Jewels of the Madonna" was followed by equally pleasing productions of "Aida," "Madama Butterfly," "Lohengrin" and other operas of established popularity. Other principals in the company are Lillian Eubank, Marie Louise Biggers, Salvatore Giordano, Giuseppe Argostine, Louis d'Anzelo, Morton Adkins, Louis Derman, John Goldman, Joseph Istrate and Grace Baum. The operas are conducted by Ignacio de Castillo, formerly conductor of the National Grand Opera Company in Mexico City.

CONCERTS.

The Philharmonic Society opened its seventy-fourth season on the evening of October 26 with a splendid programme of music before it for the 1916-17 period. The strong position given the society by the million dollar bequest under the will of the late Joseph Pulitzer has enabled it to reach further and further near the high ideals of its founders, and of the many ardent lovers of music who have given their time, effort and

money to its development ever since its first concert in 1842.

The season will include twelve subscription concerts on Thursday evenings, sixteen Friday afternoons, four Saturday evenings and twelve Sunday afternoons—all subscription series at Carnegie Hall. The soloists who appeared during the season were Josef Hofmann, Mischa Elman, Frances Alda, Ernest Schelling, Guimar Novaes.

## CONCERTS—Continued.

Alma Gluck, Percy Grainger, Theo. Karle, Leo Schulz, Elena Gerhardt, Julia Culp, Maximilian Pilzer, Carl Friedberg, Yolando Mero, Eitem Zimbalist and Margarete Mezenauer.

Ureli Corelli Hill called the meeting of professional musicians, who, on April 2, 1842, brought the society into being. Hill was a violinist and conductor and his movement was inspired by the success achieved at a "Musical Solemnity" given in June, 1839, as a memorial to Daniel Schlessinger, one of the first genuinely qualified musicians to settle in New York. George Loder, one of the founders of the society, conducted the first performance in the United States of Beethoven's Ninth Symphony at a concert of the society May 20, 1846. In the society's first season three concerts were given. For the succeeding sixteen years four regular concerts were given, and for the next ten years there were five per season. From the twenty-sixth until the fifty-sixth season six concerts were given, and in the fifty-sixth season the number was increased to eight. Though there were but three concerts in the first season, there were five conductors, Ureli Corelli Hill, C. Timm, Mr. Alpers, Alfred Boucher and George Loder. In the second season Theodore Eisfeld and Max Maretzek came to the society, and in Mr. Eisfeld's second season he was elected sole conductor. Succeeding conductors were Carl Bergmann, H. C. Timm, Jr., Leopold Damrosch, Theodore Tammen, Robert Neuchdorf, Anton Seidl, Emil Paur and Walter Damrosch.

In the sixty-first season there was loss of interest, due to having a different conductor for each concert given. In the sixty-second season the guests were Edouard Colonne, Gustav F. Koenig, Henry J. Wood, Victor Herbert, Felix Weimarer and Richard Strauss, others who accented the society's invitations in succeeding years were William Mengelberg, Max Fiedler, Dr. Ernst Kunwald, Karl Panzer and Fritz Steinbach.

After the sixty-fourth season an arrangement was made by which Sefonoff became sole conductor for three years. Following him came Mahler, who died in 1911. Josef Stravsky succeeded that great musician and still wields the baton.

The Pulitzer endowment, bequeathed in 1911, carried the conditions that the society be incorporated, have an annual dues-paying membership of 1,000 and play more of the music of Beethoven, Liszt and Wagner and sell seats at reduced prices to students. By 1913 these conditions had been

complicated with and the society received \$750,000 of its endowment. Among the most brilliant members of the orchestra are Maximilian Pilzer, who succeeded Leopold Kramer at the first desk last year; Leo Schulz, cellist; J. J. Kovarik, viola; Xavier Reiter, horn; Fritz Stahlberg, assistant conductor; August Mesnard, bassoon; Albert Chaffarelli, clarinet; A. Friese, tympani; Frederick Angella, oboe; Benjamin Klitzkin, trumpet; Anton Faver, flute.

Mr. Stravsky, the conductor, was born in Bohemia and as a youth attracted the interested attention of Dvorak and Smetana. He studied in Leipzig and Vienna and later became director of the Royal Opera at Prague. From Prague he went to the Hamburg Opera, where he conducted for seven years. From Hamburg he came to New York.

Felix Leifels, the present manager of the Philharmonic, has been a member for twenty-five years. His instrument was the double bass. He "discovered" Stravsky and was made manager of the orchestra shortly before the leader came here. The second concert was given November 3, 1913. Mischak Elman as soloist. On the programme were "Voyevode" overture, violin concerto, Symphony No. 5, Tschajkovsky. At the first Sunday concert, on November 12, an entire Beethoven programme was rendered, with Josef Hofmann as the soloist. He played Beethoven's piano concerti in E flat. The orchestral numbers were the "Eroica" Symphony and the third "Leonore" overture.

Walter Damrosch, conductor of the New York Symphony Society, began his season at Aeolian Hall October 22, with a well balanced programme which consisted of Symphony in D, Mozart; sinfonia from the cantata, Domenico Cossimadomo; and arioso from the cantata "Ich stand mit einem Fuss im Grabe"; Bach; Symphony No. 6, "Pastoral," Beethoven. On November 5 Mr. Friedberg was the soloist, rendering the concerto for piano, in C minor, Beethoven.

The Diaghileff Ballet Russe opened its season on the night of October 16 at the Manhattan Opera House, the programme comprising "Les Sylphides," "Sadko," "Le Spectre de la Rose" and "Scheherazade." The company showed few changes from last year, and its work was fully up to the high standard attained in previous seasons. Mmes. Lopokova, Pflanz, Revalles, Sokolova and M. Mervetta are still the principal dancers, and among the men the leaders are Messrs. Bohm, Gavrilow, Kremneff, Pianowski and Sverew.

## THE DRAMA.

The plays that were mentioned in the 1916 Almanac and that were still running when the book went to press, with the number of their performances, are as follows:

"Eternal Magdalen," 90; "Fair and Warmer," 274; "Rolling Stones," 155; "Hip, Hip, Hooray," 425; "Abe and Mawruss," 192; "Hobson's Choice," 143; "Sadie Love," 50; "Common Clay," 328; "The House of Glass," 262; "Under Fire," 169; "The Chief," 33; "Quinneys," 50; "Princess Pat," 145; "A World of Pleasure," 129; "Alone at Last," 177; "Around the Map," 109.

If the growth of the pictured drama made serious inroads into the material prospects of theatre owners, who cling to the ring in staged production it had some compensation in rousing the managers to a realization that they had gone too far in their disregard of public taste in going to the extremes of crime and of the sordid side of passion in seeking themes for reproduction. The past year was the most brilliant of a specialty in an artistic genre in nearly a decade. The improved quality of the plays had its natural effect in bringing back patronage, for this popular form of entertainment will always hold its auditors and its spectators as long as it presents things worth while hearing and seeing. The previous year was something of a financial disaster to the theatrical profession, and at first thought the picture plays were blamed. But common sense came to the rescue and the old school of public entertainers finally realized that if the pictures were to be competed with a higher order of attractions was necessary.

This does not mean that the past year was one of unbroken successes. Managers still made

failures in their estimate of what the public desired, but in most cases, if not in this, it seemed to be that the plays presented were the best that were available, and they were staged in the hope rather than in the expectation that they would attract audiences of paying proportions. The truth of the matter is, according to many expert students of the New York stage, that the playwrights are unable to turn out sufficient plays of high class to keep the vast number of theatres in the metropolis supplied.

One of the most artistic contributions to the stage's rehabilitation was that of Miss Grace George at the Playhouse. Her principal success was based on the public liking for the wit and odd philosophy of George Bernard Shaw. His two comedies which she produced were "Major Barbara," new to the American stage (87 times), and "Capt. Brassbound's Conversion" (37 times), which had previously been presented here by Miss Ellen Terry. Miss George also produced James Bernard Fitzgerald's newspaper play, "The Earth," (23 times).

The most important and absorbing production

of the season, however, was John Galsworthy's powerful propaganda drama, "Justice," at the Candler April 3. Dealing with prison reform and the failure of conventional justice when applied to first offenders, the play reached New York at the psychological moment and met with instant success. John Barrymore, who had hitherto been identified with light comedy roles, instantly established himself in a distinguished position among actors of more serious roles by his performance of the leading part, that of William Folsler, the condemned lawyer. The fact that Mr. Galsworthy's great play being fire for six years before its production was a refutation, to that extent, at least, of managers' claims that they had to produce poor or indifferent plays because there were no good ones available. Yet, because London had not become enthusiastic over "Justice" when it was produced there, there was a lapse of six years before it was ventured here. (104 times.)

Mrs. Fiske chose for her return to the stage a play called "Erstwhile Susan" (107 times) at the Gaiety. Though a rather ordinary play, it enjoyed a brilliant success, mainly because of the excellence of Mrs. Fiske's performance. The play was a dramatization of the life of K. Tartine, the "Barnabette," and told the story of how a self-educated, self-developed Iowa woman brought enlightenment into a community of passionless Pennsylvania Dutch.

Augustus Thomas got away from the meta-physical trend which has marked his work in recent years and brought out a new play in the virile vein of his early success. It was a stirring melodrama of American Army life, called "Rio Grande." It was seen at the Empire April 4. (55 times.)

E. H. Sothern began his farewell season with "The Two Virtues," which was very successful for a time. His revivals of "Lord Dundreary" and "David Gawkick," however, failed to divert public attention from the splendid new plays. He completed his season with "If I Were King," April 29, at the Shubert. It aroused exceptional interest.

The outstanding feature of the Shakespearian Tercentenary was the transfer of Sir Herbert Tree's Shakespearian festival to New York. His glittering production of "Henry VIII," on March 14 at the New Amsterdam, in which he played Cardinal Wolsey, enjoyed the greatest popular favor through nine weeks. In "The Merchant of Venice," May 8, he sacrificed much of the play's poetry to panorama, but it was almost as cordially received. (20 times.) "The Merry Wives of Windsor," given May 24, completed a most successful season. (10 times.)

Meanwhile the native actors paid their tribute to the memory of the great dramatic poet by productions of high merit. James K. Hackett produced "Macbeth," though his portrayal of the title role did not appeal with great force to the critics. His production of "The Merry Wives of Windsor," however, met with great success. An accident prevented Mr. Hackett from carrying out his plan to play "Isham" and Thomas W. Church called in at the last moment, portrayed the bluff old braggart with exceptional skill.

In striking contrast to these two Shakespearian endeavors was the production of the seldom seen "The Tempest" in the Elizabethan manner. Thus handled, under the archaic conditions for which it was written, it was possible to use the entire text without the use of dramatic effects. The contrast proved that the modern picture stage is not adapted to genuinely imaginative productions of Shakespeare's works.

The general tendency toward the offer of a higher grade of attractions which began to govern the theatre managers in the preceding season seemed to hold its impetus when the new season opened in the Fall, or perhaps it would be better to say when it was resumed after a very brief let-up in the Summer. It used to be that the new season opened on Labor Day, apparently by common consent, but the Summer stay-at-homes and visitors have become so numerous in New York that the theatre season is getting closer and closer to being continuous. Comedy was the

predominant note of the new offerings. There was very little of the serious drama, and musical comedy was not plentiful. Some of the comedies, notably "Old Lady 31" and "Turn to the Right," mixed pathos with their humor, while others stuck to simple romance and humor. In this latter class "Capt. Kidd, Jr." and "Arms and the Girl" were pleasing examples.

Of all the plays, perhaps the most whimsical in basic idea was "Old Lady 31," which opened at the Thirty-ninth Street Theatre October 30. It tells the story of an old seaman, Capt. Abe, who through reckless speculation comes to want in his old age, and the auction of his effects nets just sufficient to establish his dotting wife in an old ladies' home, while he chooses to go to the poor farm. There is a prologue showing the old couple leaving the home that had been theirs since they entered it a bridal couple, and three acts set in and about the home. There are thirty inmates, and when Abe brings Angie to the home and is preparing to bid her goodby, while he trudges on to the poor farm, the old ladies decide not to separate them, but to take in the old man as well as his wife. He is called "Old Lady 31" and is immediately adopted by all the inmates, who cordially accept him. The youngest of the inmates has been deferring an answer to a persistent suitor, a friend of old Abe's, for twenty-five years, and she makes Abe her confidant in her love affair. The exchange of confidences between this pair rouses the jealousy of the other old women and matters boil for a time, but a real explosion is averted by the announcement that under Abe's urging Blossy has decided to accept her faithful suitor and that they have come away to get married. Meantime Angie is doing her best to forward a romance between a poor boy who does carpenter work about the home, but who has architectural promise, and the daughter of the richest man in town. Abe, however, has always resented his position of dependence and his shame at having brought Angie to such an end, but their troubles are ended when one of Abe's wildest speculations happens to turn out well and they are back in a position of affluence and return to their home with a programme of having regular visits from all the inmates in the home, that their lives might be brightened.

This simple and pretty comedy of character was written by Rachel Crothers from a story by Louise Forsslund.

Miss Emma Dunn played the part of Angie with a sweetness and grace that was notable, especially in a young woman taking the part of an old one. The artistry by which she brought out the perfect tact her part called for made an instant appeal to her auditors. She was exceptionally well supported by Reginald Barlow as old Abe, Vivian Ogden, Mrs. Felix Morris, Maud Sinclair, Anna Bates, May Galver and Edward O'Connor also gave admirable presentations of parts which possessed splendid opportunities for them. (L. Kugel.)

Grant Stewart and Robert Baker wrought a splendid comedy in "Arms and the Girl," produced at the Fulton Theatre on September 27. The fact that the title suggests a satire of Shaw's "Arms and the Man" is entirely misleading. "Arms and the Girl" is a delightful little romantic story laid in war-torn Belgium, told with a simplicity that has a delightful charm. Dramatic values were not sought by the authors and are not plentiful, the story being worked out with a pleasing mixture of heroics, sentiment and humor. Ruth Sherwood, the heroine, has her passport stolen by a Russian spy while she is waiting for her fiancé, Jack Martin. Wilfred Ferrens, another young American, has no passport at all and is on the point of being arrested as a spy. Ruth had met the German lieutenant in command of the soldiers who were about to arrest Ferrens and he believed her when she lied and said Ferrens was her fiancé. Then came a German general, stocky and pompous, who orders the immediate marriage of Ruth and Ferrens, and the order is obeyed with a reluctance which has to be concealed. Then arrives the real fiancé, Jack Martin, who was explained away as their chauffeur. Followed then a series of amusing complications out of which grew a real

romance between the newlyweds, at the same time establishing the unworthiness of the original fiancé. Miss Fay Bainter, who played the heroine, is a new actress, who gave a performance uncommonly clever. Cyril Scott played opposite her in his usual genial, laughable manner. Henry Vogel was delightful as the German General and J. Malcolm Dunn was amusing as the Lieutenant. (H. B. Harris.)\*

Rida Johnson Young's "Captain Kidd, Jr." had its premiere at the Cohan and Harris Theatre November 11 and attained immediate favor. It is a rather Cohanese affair that fairly bubbles with humor. It tells the story of an old Scotchman who keeps a bookstore in New York. His granddaughter is his partner, and a far from silent one. He has a protegee whom he rescued, a cold and hungry newsboy, from the street and raised and loved as a son. In a box of books purchased at an auction of a deceased millionaire is a book on buried treasure which includes a map showing where there is a fabulous treasure buried on Cape Cod. The treasure tale is a "plant" by the old millionaire to rouse some ambition in a spineless grandson, the last survivor of the family, but the bookseller's protegee finds it and the bookshop is closed up while the three go to Cape Cod to dig. The "lawyer" who helped the old millionaire to lay the "plant" is also made to appear as a seeker of the treasure, as well as the stenographer of the dead millionaire, with whom the grandson is in love. The treasure in the end is found to consist of a letter advising fresh air, hard work and a healthy interest in things in general, but it is not discovered until the old bookseller's granddaughter spends her heritage of \$2,000 in buying the worthless farm on which the treasure is buried, and the treasure hunters get back to New York destitute and in a sad frame of mind. Then a company decides to buy the farm to build a railroad and the granddaughter sells it for \$25,000, the old man protegee sells a story he has been hawking among the publishers, wins the granddaughter and every one is happy. It is splendidly acted, the work of Edith Taliaferro as the granddaughter, Otto Kruger as the protegee and Ernest Stallard as the old bookseller especially impressed the critics.\* (Among the plays that Cohan and Harris have accepted for production in the near future are "Under Pressure," by Sydney Rosenfeld; "The Road to Destiny," by Channing Pollock; "Love the Ladies," by Emile Nivray and John Richards and "Speed Up," by Owen Davis.)

An early comer and long stayer was the Belasco production of "Seven Chances," by Roi Cooper Megrue, which opened at the Cohan Theatre August 9 and was moved to the Belasco Theatre October 23. The play, which is somewhat farcical, revolves around the experiences of a poor young man who is suddenly informed he must marry within twenty-four hours in order to inherit his grandfather's millions. The development of the story is left largely to the leading character, capably played by Frank Craven, but Otto Kruger, who later in the season scored another success in "Captain Kidd, Jr.," gained plenty of praise as the friend who, chiefly by whistling, managed Jimmie, the hero.\*

Winchell Smith and John E. Hazzard are the co-authors of "Turn to the Right," a comedy of much novelty and entertainment. It was produced by Mr. Smith and John L. Golden at the Gaiety Theatre August 17. The play deals chiefly with Joe Bascome, who, after serving a prison term, turns to the right, under the influence of his mother and comes with him others who find themselves in the midst of gay and grave adventures. The play is unusual in that it utilizes all the details of the "Way Down East" type of melodrama, coupled with all the humor of the typical "crook comedy" of the "Get Rich Quick" "Walkford" sort. The cast includes Forest Winant, Edgar Nelson, Ruth Chester, Roy Fairchild, Sam Reed, Louise Rutter, William E. Meehan, Lucy Colton and Alice Hastings.\*

September 11 saw George Arliss open his season at the Criterion Theatre in "Paganini," a character story of the great musician, Edward Knoblauch, who wrote it, touched upon little more than

the personality of his subject. The action of the piece rests mainly upon an episode in which the sentimental young daughter of an English merchant had entertained the violinist. She followed him to Calais, where she sat, cold and hungry, while he, apparently nourished and warmed by the fires of genius, composed a concerto in her honor. The picture was broken in upon by the girl's angry father and the matter-of-fact young army Captain affianced to the girl. The romance holds the pair enchained until the Captain suddenly seizes Paganini's beloved violin and holding it aloft demands the musician choose between art and the woman. The alacrity with which he drops the maid and rushes to the rescue of the violin opens the girl's eyes and her head finds its natural resting place on the Captain's broad shoulder. Mr. Arliss was admirably supported by Sara Biala, Margery Maude, Mrs. Arliss and Charles Harburn. (48 times.)

Otis Skinner appeared at the Lyceum September 18 in a new Booth Tarkington play called "Mister Antonio." It was not a dramatization of any of Tarkington's books, but a play written especially for Mr. Skinner. Mr. Skinner's support were Joseph Brennan, Eleanor Woodruff, Robert Harrison, John McCabe, Walter F. Scott, Louise Sydmet, Frances Landy, Patterson McNutt and Ernest A. Elton. (48 times.)

"Pollyanna," the glad girl" of Eleanor H. Porter's very pretty stories, was made into a play by Catherine Chisholm Cushing, which made its appearance at the Hudson Theatre September 18. It toured the West before it was put on in New York, so its producers, Klav & Erlanger and George C. Tyler, were not worried much about its fate. That their judgment was good was proved by the success the play at once attained. Patricia Collinge gives a pretty touch to the name part, Effie Shannon's beauty adds a material share to the pleasingness of her portrayal of the part of Miss Polly Harrington, Philip Merivale, as John Pendleton, Esq., and Jessie Busley also add to the spirit of gladness the play is supposed to and does radiate.

Margaret Anglin opened the Empire's regular season on September 20 in "Caroline," an English comedy by William Somerset Maugham. The play revolved around the experiences of a man and woman who have waited ten years for each other, suddenly the barrier, in the shape of the woman's impossible husband, is effaced by death, and then, very much to their surprise, they find that they do not wish to marry. Miss Anglin's appearance in this comedy marked her return to the Frohman forces and her first appearance at the Empire since the stock company days. (46 times.)

"Upstairs and Down," the work of Frederic and Fanny Hatton, was produced at the Cort Theatre September 25. It was intended to reflect that the same vices which prevail in the drawing room are as common among the servants in the lower regions of the house. The critics seemed to think the picture was rather overdrawn and was unpleasant, though the dialogue was admittedly clever. Courtney Ester, Christine Norman, Mary Servoss, Arthur E. Ebbett and Iola St. Leon gave clever performances.\*

Beginning October 2, Taylor Holmes appeared in the name part of "His Majesty Bunker Bean," a dramatization by Lee Wilson Dodd of Harry Leon Wilson's stories of that title, at the Astor Theatre. The general theme is that a man can develop into anything he can make himself believe he is. Bunker Bean is a spineless stenographer, who is convinced by a psychic seer he is the reincarnation of a good and powerful Egyptian King. Acting in this faith, the stenographer acquires boldness in the business world, achieves wealth and marries the girl of his desire. In the supporting cast are Florence Shirley, Charles Abbe, Robert Kelly, Lillian Lawrence, Jack Depraux, Marie Gertrude and Clara Louise Moore. (Joseph Brooks—74 times.)

Winthrop Ames produced "Hush," an English comedy by Miss Violet Pearn, the novelist, at the Little Theatre October 3. It deals with a young woman of advanced ideas, who writes a play which she hopes will shock London. Her

fiance, stolid and stodgy, takes his parents to see his sweetheart's play and the humor is developed from the resulting contrasts. Miss Cathleen Nesbitt impersonated the heroine, and the cast also included Miss Estelle Winwood and Cecil Yapp. (37 times.)

October 4 William Hodze appeared in a four-act comedy depicting contemporary life, called "Fixing Sister," by Maxine Elliott's Theatre. The play was by "Lawrence Whittman," which is Mr. Hodze's pen name. Mr. Hodze took the part of a Kansas City business man who rushes to New York to save his sister from the toils of two foreign adventurers. Yankee shrewdness winning in the end. Miss Miriam Collins had the leading feminine role.\*

John Drew appeared at the Criterion Theatre October 26 in "Major Pendennis," a dramatization by Langdon Mitchell of Thackeray's novel "Pendennis." As impersonated by Mr. Drew, the Major was a somewhat more worthy character than might be inferred from a reading of the book. Most of Thackeray's books lack dramatic quality and the play is chiefly delightful for its sketches of character. Excellent support was given the star by Jane Houston, Lester Longren, Brandon Tynan, Alison Skipworth, Edith Shayne and Helen Mencken.\*

"The Basker," chosen by Cyril Maude for his New York reappearance, was put on at the Empire October 30. It is an essentially English comedy by Clifford Mills, which had little in it to appeal to American sentiment. The Basker is an idler of forty who dawdles through life, following the line of least resistance and who is reluctantly compelled, through the working of mortality, to become a Duke. In the end he awakes to his responsibilities, becomes vigorous, takes an impending bride in a loveless marriage from the cad she is to wed and leads her to a loving marriage with himself. In the play Mr. Maude succeeded in being amiable, which is about all the part permits. Maud Milton acted the part of the old Duchess with dignity and humor, and Marguerite Leslie, Muriel Martin Harvey, Hassard Short and Edgar Norton handled their parts of the production with ability and smoothness. (42 times.)

Ruth Chatterton opened at the Cohan Theatre October 31 in "Out of the Kitchen," a comedy built on Alice Duer Miller's novel of the same title. Miss Chatterton has the role of a Southern girl whose family has been impoverished by the war and is forced to rent the home to a rich Northerner. The newcomer stipulates that a corps of white servants shall be furnished and out of this arrangement a love story develops. With Miss Chatterton were Bruce McRae, Marguerite St. John, Alice Lindahl, Mrs. Charles G. Craig, Barbara Milton, Francis Goodrich, William Royd, Charles Trowbridge, William W. Sams, Walter Connolly and Robert Ames.\*

George Bernard Shaw's "Getting Married" had its first production in this country at the Booth Theatre November 6, with William Faversham in the leading role. The play deals, with all of Shaw's whimsical wit and humor, with phases of the marriage question, the problems that beset young lovers, the perplexing temptations of the married and the issue of divorce. Supporting Mr. Faversham are Henrietta Crossman, Charles Cherry, Hilda Spots, Luluenden Hart, John Harwood, Virginia Fox Brooks, Arleen Hackett, Mrs. Edmund Gurney, George Fitzgerald and Hugh Dillman.\*

"The Yellow Jacket," the Chinese comedy by George C. Hazleton and Harry Benrimo, was received by Mr. and Mrs. Coburn at the Cort Theatre November 9 for a series of ten matinees. The play had a peculiar history in that four years ago it failed to prove profitable when produced at the Fulton Theatre. Since then it has toured the great cities of the world and has everywhere been most enthusiastically received. The ten matinee performances showed that New York had learned to appreciate the odd mixture of Oriental poetry and nonchalant comedy which go to make up the play.

Sam Sothern, a brother of E. H. Sothern, appeared in a comedy named "Such Is Life" at the

Princess Theatre November 25. Harold Owen was the author, and the three acts of the comedy were placed about London. The story tells of an "Intellectual" who thinks he thoroughly understands the psychology of woman. A situation develops which causes him to suspect his wife and his closest friend, a hard-headed, practical engineer, but the proof of her innocence is so absolutely conclusive that the "Intellectual" is compelled to admit he doesn't even understand his own wife. Mr. Sothern took the part of the engineer, Ferdinand Gottschalk and Cathleen Nesbitt taking the other two leading parts.

Laurette Taylor made her reappearance in New York after an absence of more than two years when she opened in "The Harp of Life," a comedy by her husband, J. Hartley Manners, at the Globe Theatre, November 27. It was with the announced determination of showing her versatility that Miss Taylor chose a play so different from "Peg o' My Heart," in which she made her greatest success. Her new role is that of a middle aged woman, the mother of a headstrong youth who falls in love with an ideal to marry a notorious woman. The efforts of the mother to prevent the marriage form the development of the play. Others in the company are Gail Kane, Philip Merivale, Frank Kemble Cooper, Lynn Fontaine, Ffoliot Paget and Dion Titheradge.\*

"Mile-a-Minute Kendall" is the title of a three-act comedy by Owen Davis which was produced at the Lyceum Theatre November 28. The play deals with the culmination of the career of a reckless young man in an unattractive love affair and his ultimate redemption. In the producing company are Tom Powers, Joseph Kilgour, Adele Blood, Edith Lyle, William Samson, Helen Lowell, Burr McIntosh, John Flood and others.\*

There were several successful farces produced. William Collier brought out a new farce called "Nothing But the Truth," at the Lyceum Theatre September 14, which seemed destined for a long run. James Montgomery is the author of the piece, which follows traditional lines along the story of a man who wagered with his partners that he could tell the unvarnished truth for twenty-four hours. The stake he put up was \$10,000 his sweetheart had entrusted to him for investment. She had collected it for charitable purposes. By sticking to the truth for the allotted time the hero almost bankrupted his firm, got every one around him as well as himself in hot water and came close to wrecking his romance. Others in the company were Rapley Holmes, Arnold Lucy, Ned A. Sparks, Miss Margaret Brainard, Miss Iona Bright, Miss Vivian Wessell and Morgan Coman.\*

"Good Gracious Annabelle," a new play by Clare Knupper, was produced at the Republic Theatre October 31. It tells the adventures of Annabelle looking for her lost bank account and her husband, Lola Fisher, Mrs. Lokes, E. E. Nicander, Walter Hamard, Helen Lee, Ruth Harding and other actors in the cast.\*

"Our Little Wife," which opened at the Harris Theatre November 19, is a typical Avery Hopwood farce. The author indulges his usual propensity to follow the school of the French farceurs, and while keeping his dialogue and situations, within bounds, delights to smoke on his divorce proceedings. Margaret Illington failed to please the critics in the title role, which is so different in character from those parts in which she attained fame that there was some wonder she would consent to assume the part of an airy, flirtatious young matron. Robert Fischer, as a waiter in the play, scored great success. Others in the excellent cast are Lowell Storms, Walter Jones, Gwendolyn Piers, Effingham Pinto, Charles Hamden, Ray Selwyn, Thomas P. O'Malley and Lyle Clement.\*

The detective story still holds its thrall for playwright and public and Bayard Veiller's "The 13th Chair," a melodrama of this type, scored a success from its production at the Forty-eighth Street Theatre November 20. Naturally and unavoidably, the play turns upon a mysterious murder committed some few weeks before the opening scene, and the remainder of the play is devoted to unraveling the mystery which is built up in a thrilling first act. While the guilty party seems rather obvious to the auditor throughout the action and the detective's avoidance of suspecting this one man seems rather pointed, the play holds its interest keenly throughout. The play is splendidly produced. The commanding figure is Margaret Wycherly as Rosalie La Grange, an old Irish medium, Katherine La Salle as the younger heroine, Calvin Thomas, Eva Condon and George Graham, among the large cast necessary to the action of the play, earned the favor of the public by a manner in which they handled their roles. (H. B. Harris,\*)

A notable event of the theatrical year was David Warfield's revival of "The Music Master" after nine years rambling in other fields. It was put on at the Knickerbocker Theatre October 10 with every indication that it would get the same amazing success as the emotions it did at the time of its original production.

Sarah Bernhardt was able to give New York but three weeks of her American season, opening at the Empire Theatre on the night of December 4. In her repertoire were several plays new to New York and others in which she had been seen here before. Those in which she appeared were as follows: "Cleopatre," "L'Holocauste," "Le Paix Chez Soi" ("Peace at Home"), "Du Theatre au Champ d'Honneur" ("From the Theatre to the Field of Honor"), "Cendres d'Opium" ("Ashes of Opium"), "Jeanne d'Arc," "La Chanson du Mari" ("The Husband's Luck"), "Le Sifflet," "Hecube," "Rosalie," "Le Faux Modelé" ("The Sham Model"), Portia and Shylock in "The Merchant of Venice," at alternate performances; "Camille," "L'Toile dans le Nuit" ("The Star in the Night"), "English as It Is Spoken," "Une d'Elles," "L'Aiglon" and "Adrienne Lecouvreur."

"The Master," in which Arnold Daly made his reappearance in New York at the Fulton Theatre December 5, will appeal with greatest force to those who prefer that the sex problems it presents should be demonstrated on their neighbors rather than upon themselves. This ironic drama is the work of Hermann Bahr, best known as the author of "The Concert." When presented several years ago at the Irving Place Theatre, "The Master" made no concessions to what is probably the American point of view, but has been considerably modified by its adapter, Benjamin F. Glazer. Most notable in Mr. Glazer's support were Edward Abeles, Edyth Lamer and Hamegy Thompson.\*

"Margery Daw," produced at the Princess December 5, with Kathlene MacDonell in the title role, is a frank and serious consideration of the marriage question. Margery comes from a convent to the house of her guardian, who, filled by her mother, becomes a recluse. He falls in love with her, but she discovers facts about her mother's early life, including the fact that she herself was born outside of the convents. In the following revulsion she accepts her guardian's proposal of marriage, but the play works out to a happy ending. Frederick Perry, Forrest Robinson, Louise McIntosh, Sarah McVicker, George Robert Maude, Eburne and Jacques Martin shared in the triumph of the star. The play was written by George D. Parker.\*

"Treasure Island" reflected great credit on Charles Hopkins, who chose it again for his season's offering at the Punch and Judy Theatre. Jules Eckert Goodman made the thrilling story into a play and succeeded in preserving its atmosphere of adventure and courage.

Charles Dillingham's second season at the Hippodrome is marked by as brilliant a succession of incidents and pictures as his first. The ice ballet of last year is retained and there are

elephants that play ball, Pavlova to dance, stirring army and navy pictures, flying pianos, a dancing skeleton, an immense minstrel show and a great deal of new music, to say nothing of the Six Musical Browns, with their saxophones.\*

#### MUSICAL PIECES.

In musical comedy the season was an average one. There was much that was sprightly and amusing and much music that was pleasing and catchy, but the average was not high. "The Blue Paradise" held the stage at the Casino throughout the season. "The Princess Pat," score by Victor Herbert and book by Henry Blossom, found popularity. Rudolph Friml's enticing score brought prosperity to "Katinka," enticing

Among the most successful works given during the present season was "Miss Springtime," a pretty Hungarian operetta, by Emmerich Kalman, adapted by Guy Bolton. It had its American premiere at the New Amsterdam Theatre September 23 and introduced to New York a new actress and singer in Miss Sari Petras, who has a high place on the stage of Budapest. The piece scored a success. Its pretty lyrics, supplied by P. G. Wodehouse and Herbert Reynolds, fitted the Kalman score smoothly and fluently. Miss Petras had not been long upon the stage before her audience understood why she had gained such favor at home. She is graceful and displayed undoubted artistic quality. She sings with a voice very pure as to tone and admirably adaptable. George MacFarlane, John E. Hazzard, Jed Prouty and Miss Georgie O'Raye contribute much to the general success of the production. Lina Abarbanell received a York welcome when she returned to Broadway with a new operetta of composite origin called "Flora Bella," which opened at the Casino September 12. Felix Doermann wrote the book, Cosmo Hamilton adapted it and Dorothy Donnelly helped him. The music is by Charles Cuivlier and Milton Schwarzwald. The result combines the charm of "The Merry Widow" with the spirit of a cabaret show. The leading role was sung in delightful fashion by Miss Abarbanell. Lawrence Grossmith was always amusing and Charles Purcell and Adolph Link did their allotted portions in a most satisfactory manner.

"Broadway and Buttermilk," a comedy with many song numbers, was chosen by Maxine Elliott for her 1916-17 season and opened at the Maxine Elliott, (23 times.) The Thirty-ninth Street Theatre saw the production of "Yvette," August 10, with Chapine. The scenes were laid at Trouville. The book was written by Benjamin Thorne Gilbert and the music and lyrics by Frederick Herenden.

Anna Held was away from the Broadway stage for a long time, but she found her way back in a three-act musical comedy called "Follow Me," produced at the Casino November 29. Felix Doermann and Leo Ascher were responsible for it in its original Viennese form and its adaptation to Broadway was made by Sigmund Romberg, Mr. Ascher and R. B. Smith. Miss Held takes the part of a much courted Parisian actress, who leads on one of her most ardent admirers until she learns that as a result his young wife is miserable. Then she proceeds to teach him a lesson. Included in her support are Henry Lewis, Florence Moore, Carl Tigue, Letty York and William P. Carleton and a very large chorus.

Another operetta built on a Viennese base was "Her Soldier Boy," which opened at the Astor Theatre December 6. Victor Leon, librettist of "The Merry Widow," was the author of the original book, which was made over by Rida Johnson Young. The score is by Emmerich Kalman, who had already achieved fame here with "Sari" and "Miss Springtime." Clifton Crawford was at the head of the cast. Among the other principals were John Charles Thomas, Adele Rowland, Beth Lydy, Louise Galloway, Mildred Richardson, Cyril Chase, Guy Harold Vize and George Schiller. An adventurous young American caught in the toils of the European war, a winsome Belgian maid and a gallant French officer furnish most of the action of the piece. (Shubert,)\*

Dillingham and Ziegfeld opened the Century Theatre November 6 with a big show called "The Century Girl," which was a hodge-podge of musical comedy, farce, dancing and vaudeville. Among the notables who helped to make the

show were Elsie Janis, Hazel Dawn, Sam Bernard, Leon Errol, Frank Tinney, Maurice and Walton, Doyle and Dixon, Harry Kelly and Van and Schenck.

## MOTION PICTURES IN 1916.

The close of the year 1916 finds the motion picture an accepted factor in educational work and an entertainment that no longer makes its appeal only to certain classes. The premier performance of an important motion picture is now ranked with the "first night" of a drama on the stage. Likewise in its appeal to the more popular taste the motion picture has reached far beyond the dreams of even a few years ago.

The year of Presidential election has seen the motion picture called upon for new uses. "President Wilson and His Cabinet," a three-reel production, was one of the most popular subjects used by the Democrats in the furtherance of their campaign, while the Republicans found one of their most useful means of reaching the electorate in "A Re-United Party," a two-reel production. Motion pictures were called into play in State and local campaigns also, notably in New York, where Gov. Whitman had earned the favor of the picture interests by vetoing a bill providing State censorship.

Most important among the screen productions of the year was "Intolerance," by D. W. Griffith, whose "Birth of a Nation" had earned premier honors in 1915. "Intolerance" is an innovation in that it departs from all past dramatic methods and carries four distinct stories along simultaneously. The theme indicated by the title is driven home by means of stories laid in the Byzantine era, the time of Christ, France in the days of the Huguenots, and the present in the United States. In elaborateness and effectiveness of massive spectacle and in expenditures "Intolerance" set new marks of achievement.

"Civilization," inspired by the war in Europe and aiming to drive home the horrors of strife,

was another of the big spectacles of the year, being produced by Thomas H. Ince. Picture manufacturers also made their contribution to the Shakespeare centennial, Sir Herbert Tree's appearance in "Macbeth" for Triangle being one of the evidences of the heights of prestige reached by the screen. E. H. Sothern is another star of the Chatterton being his initial subject for Vitagraph in a series of three to mark his permanent retirement to private life. Nazimova, and Rose Melville, the famous "Sis Hopkins," are among the other recruits from the galaxy of stage stars, the latter coming from her retirement to appear in a special series of comedies for the Borden company. Geraldine Farrar devoted practically all of her time during the last half of the year to a spectacular production of "Joan of Arc," to be shown early in 1917. In the closing months of the year Mary Garden and George M. Cohan announced that they would soon appear on the screen.

But the development of the year that has been considered most important by picture men was the steadily increasing desire among a large class of patrons for a return to the varied programme of short subjects. The swing in sentiment, which will work in the cases of both long and short pictures toward a survival of the fittest, in the matter of quality, has been given impetus by the fact that many of the short pictures now meet the long pictures on their own ground, i. e., in prominence of star, author and costliness of production.

For example, the Kalem Company, which has been a consistent advocate of the short picture, started the year with "The Social Pirates," a two-

reel series by George Bronson Howard. This was followed by "The Girl From Frisco" and "Grant, Police Reporter," two series of short pictures by Robert Welles Ritchie. Then, for the closing event of 1916, the company induced E. W. Hornung, author of "Raftles," to write a series of stories specially for the Nation by bringing to life once more his famous character, "Stingaree," in a series of two-reel adventures. This company has produced series of stories by prominent authors carrying a central character through different adventures, each picture being a complete story.

The formation of the National Association of the Motion Picture Industry representing manufacturers, distributors and exhibitors, has been an other important step of the year 1916. It has found its most important field thus far in educational work, making clear the evils of official censorship.

The most significant event of the year from the standpoint of the motion picture exhibitor was the opening of the Rialto, the stageman theatre on the site formerly occupied by Hammerstein's Victoria Theatre, at Forty-second Street and Seventh Avenue. The fact that this playhouse was designed without a stage and with no possibility of its being altered for any purpose other than the presentation of motion pictures and music showed that this form of entertainment had come to stay.

The Rialto is owned by a corporation and is under the managing directorship of S. L. Rothapel, who originated the type of amusement given at this house. It represents an investment of \$1,250,000. The corner it occupies is 135 by 100 feet and its seating capacity is 2,000. The lower floor seats 900 people. The others are seated in the boxes and the single balcony. This theatre boasts a symphonic orchestra of forty pieces and one of the largest pipe organs ever installed in any theatre. Its singers are drawn from the ranks of grand opera and concert artists. The indirect lighting system, arranged in color cycles, is a step in advance of anything hitherto attempted. By means of an electrical switchboard it is possible for the management to light all parts of the auditorium in whatever soft combination of colors desired. The combination of color and light is also used in conjunction with the music, color harmonies being created for their psychological relation to the harmonies of the orchestra.

From the time it was opened, on April 21, 1916, until the latter part of the year, the Rialto used the Triangle programme of releases, with the exception of one week when Sir Herbert Beerbohm Tree was presented in "Machbeth." During the week of Nov. 26 E. H. Sothern was shown in "An Enemy to the King," a Vitagraph feature. Donald C. Thompson's scenes on European battlefields and the British Government's pictures of Admiral Sir John Jellicoe's fleet proved excellent drawing cards when introduced as added features. For the rest of the year such favorites as Douglas Fairbanks, William S. Hart, H. B. Warner, Norma Talmadge, Bessie Barriscale, Frank Keenan, Bessie Love, Roscoe Arbuckle and Mae Marsh kept up the pictorial portion of the programme to a high standard of excellence.

The "serial picture" idea received a strong indorsement when the Kleine-Edison-Selig-Essanay combination was effected. Billie Burke was featured in a forty-reel picture under the title of "Gloria's Romance." The picture was five months in the making, during which period Miss Burke was under contract at a salary of \$4,000 a week. It cost, it is estimated, altogether \$500,000 and was made under the personal supervision of Mr. Kleine, who had previously achieved fame by his production of "Quo Vadis?" It was released two reels a week. Other noted actors and actresses under contract to the new combination are Henry Waltham, Max Linder, Mary Charlson, Sydney Ainsworth, Mabelle Truanelle, Fritz Brunette and Vivian Reed.

The moving pictures have been used in a new way as a result of the European war, in the production of actual fighting scenes. While they are not half so thrilling and spectacular as the pictured sham battles of previous years, they have had a tremendous grip on the imagination and are expected to be of ultimate use to the various movements organized throughout the world to prevent wars.

#### MOTION PICTURES IN OTHER LANDS.

Motion picture theatres are well patronized throughout Greece and Italy. In Athens there are four modern establishments, more than half a dozen others charging popular prices and about ten open air theatres. In the provinces of old and new Greece there are about one hundred and twenty-five cinemas, most of them poorly housed. The total business of the country is estimated at about \$20,000,000 feet of film. Those most in vogue are from Italian, French, Danish, American, German and occasionally English companies. Because of the war there has been, in general, a decline in the quality of the pictures sent to Greece. Striking exceptions to this, however, have been the various historical works sent out by Italian companies. On the other hand, the war pictures have been of absorbing interest to the public and attract large crowds. Up to the present the American films shown in Greece have not been successful. Many of them were so tinged with local color as to be unintelligible to a Greek audience. The making of motion pictures in Greece is as yet in its infancy; an Athens attempt at gay results owing to lack of capital and experience.

The Italians are great supporters of motion picture shows and the business is developing rapidly in all parts of the kingdom. This is remarkable because of the high prices which prevail, tickets ranging from 10 cents for third class to 48 cents for first class, with extra prices for expensive films. Since the war began some managers show the daily positions of the various armies by the aid of a map and tiny flags. To this is added a short bulletin of the important events of the day. These pictures attract many people to the motion picture houses. Great attention is paid to the orchestra. In some of the better houses it is the practice to employ twenty musicians, and the music furnished is one of the features of the entertainment. "I Pagliacci" was presented as a motion picture, with the music of the opera as an accompaniment, some time ago and the experiment proved a success, and it is likely that similar motion plays or other operas under like conditions will be frequent.

In Florence, however, there are few motion picture houses. It is estimated that of the 2,500 theatres devoted to the screen in Italy only 230 are in the Florence consular district. Of the films in use 50 per cent. are Italian, 25 per cent. French and 15 per cent. German. The demand for American films is confined to those illustrating supposedly typical American characteristics and scenes. These are always popular.

The only cinematograph theatre in Teheran, Persia, has a seating capacity of 200, is open every day and is well patronized. French, German and Russian pictures are mostly shown and the most popular pictures are comic, tragic, war and chases with amusing falls.

The motion picture business in China is practically confined to the treaty ports and the large commercial centres. It has developed almost exclusively in the higher priced theatres ranging from 50 to 75 cents a seat. In Shanghai there are six such houses, while Tientsin and Peking have smaller numbers.

The Kobe district in Japan has about sixty motion picture theatres. There are no low price, continuous houses. Ordinarily only one performance of six or eight reels, lasting about three hours, is given each day. The price of admission varies from 5 to 10 cents. Some of the theatres show a complete programme of Japanese films and others foreign films, but the great majority of houses combine the two classes in about equal proportion. Most of the foreign plays there are French, Italian or English dramas or American comedies. A tendency to exhibit the serial adventure films has developed recently.

In Colombia the war has affected the business adversely. Medellin had three theatres for its 60,000 inhabitants, but the high class one has been closed and the other two run combined vaudeville and picture shows three times weekly, for admission fees of from ten to twenty-five cents. American films have not thus far proved a success.

## MOTION PICTURES IN 1916—Continued.

In Costa Rica French and Italian films are used almost exclusively in Fort Limon and district, though the people seem to prefer the American pictures when, on rare occasions, they are shown. As a result of this disregard of the public wishes the business is falling off.

In Honduras there is but one picture house in the Tegucigalpa consular district, which is open three or four nights weekly. Old films are shown for admission prices of from 10 to 30 cents; new films of the ordinary run command a fifty cents admission fee, and for big films, like "Les Miserables," the prices are doubled. No attempt has been made to try the continuous show idea. Among the most popular of the American pictures are the Wild West series.

In Leeds it is reported that American films are more popular there than ever. Leeds has more picture houses in proportion to population

than any other city in England, the investment amounting to nearly \$1,250,000.

Bolivia is the first country to use the film to advertise its resources in the United States. Four such reels have been prepared and shown before many clubs and business men's associations in this country.

Karachi, India, has two modern picture theatres which do a good business with two shows nightly.

In Honolulu the business is so prosperous that the Liberty Theatre has installed a \$10,000 pipe organ. The city has several first class houses, the largest seating 1,800. The great tourist traffic helps to make a demand for pictures of the most artistic sort. Negotiations are under way for the foundation of a moving picture colony in Hawaii to take advantage of the wonderful climate and scenery for picture settings.

## THE GIRLS NATIONAL HONOR GUARD.

(Incorporated June, 1916.)

Founded and organized by Miss Theodora Booth, for the purpose of creating a spirit of patriotism and duty among the girls of America.

The duties of 'The Girls National Honor Guard' shall be to inculcate the spirit of unity and learning to do one thing well, which shall prove of helpfulness and value both in duration of peace as well as times of war. Hence it shall be the duty of each girl of the Honor Guard to maintain the honor of the country, the principles of the Government of the United States and the respect and honor of its flag.

Any girl while having full freedom to express her views respecting any policy, action or conduct on the part of those holding executive office in the United States, shall yet respect the position of the same and accord that position the sustained respect and deference due it.

Any young woman between the ages of fourteen and thirty years with a knowledge of the working of her Government and a recognition of the needs of her country and an appreciation of the sacredness of her obligations, is eligible for admission.

There are three divisions—

First aid to the wounded—Comprising emergency treatment in accidents, sterilizing, bandaging, diet-cooking, etc.

The second division—First aid to families, comprising care of children, plain cooking, sewing, social service, nursing, etc.

The third division—First aid in general utility, comprising riding, swimming, telegraphy, stenography, agriculture, etc.

The Honor Guard is a strictly first aid organization.

In all disasters, local or National, the Honor Guard girls will be ready to give practical aid. Co-operation with the Government eliminates duplication. No one in the organization receives a salary. Dues are twenty-five (25) cents a year. There are no creed or social restrictions. There are members of the Guard in almost every State in the Union. Over five thousand girls are enrolled in the organization, each one of whom is earnestly and efficiently preparing to serve her country in at least one definite way.

Forty-five active Governors have indorsed "The Girls National Honor Guard." It has the approval of the leading preparedness organizations and the officials of the country. It is financially supported by benefits given by the members themselves, each local Guard always having a reserve fund. The National advisers of the Honor Guard are as follows:

Edward J. Wheeler, Editor Current Opinion; William Conant Church, Editor Army and Navy Journal; Nathaniel R. Usher, Rear-Admiral U. S. Navy; B. L. Bunting Booth, President Veterans of America; Leonard Wood, Major-General U. S. Army; James E. Clarke, National Secretary Conference Common National Preparedness; Henry L. West, National Secretary National Security League; John F. O'Ryan, Major-General New York National Guard.

The National officers of "The Girls National Honor Guard" are: President, Miss Theodora Booth; Vice-President, Miss Agnes Smith; Treasurer, Miss Reed Askin; Secretary, Miss Dorothy Hoar.

National headquarters, 34 West Twenty-eighth Street, New York City.

## NATIONAL DEMOCRATIC LEAGUE OF CLUBS.

President, Frank S. Clark, Indianapolis, Ind.; Secretary, William C. Liller, Indianapolis, Ind.; Treasurer, C. Arthur Hafenbeck, Jr., Portland, Ore.

The National Democratic League of Clubs is engaging actively in the work of adding to the Democratic vote in the nation. Its labors are purely a party work, aiming simply at the increase of Democratic strength. The league exists as a vote-getting auxiliary of the regular Democratic organizations, and its success depends upon the hearty co-operation of Democrats throughout the country. It is the aim and endeavor of the National Democratic League of Clubs to aid in work of organization and to help the regular organizations to achieve greater success.

The league is a union or federation of Democratic clubs and associations. In all parts of the country. It is now in its seventh year. At the bi-annual meeting held in Washington, D. C., December 3-4, 1912, thirty-three States of the Union were represented. Its management is entrusted to a board of directors composed of some of the foremost men in the party, who take an active interest in its success.

The National Democratic League of Clubs is not organized for the purpose of either advocating or opposing any Democrat before he shall have been chosen by the constituted bodies or of furthering the interests of any man or set of men, before being indorsed by the party, but for the attainment and preservation of unity, the upbuilding of the party, and the promotion of its principles and welfare. Nor is it intended that any club or the League of Clubs shall usurp the functions of the several State, county or district committees, but rather work in harmony and in co-operation with them.

The National Democratic League of Clubs aims:

To make loyal Democrats of young men who are about to cast their first votes.

To explain clearly to the foreign-born voters the practical helpfulness and patriotic purposes of the Democratic party, and to enlist the new-made citizen in its ranks, thus making them good Democrats and therefore better Americans.

To confirm in the wavering an inclination toward Democracy and to make a habit of party fealty.

To preach early and late, day in and day out, the politics of Jefferson and Jackson.

To enlist voters, regardless of previous party affiliations, in the cause of Democracy, by every honorable means.

State Leagues or Federations of Democratic clubs, co-operating with the National League, have been organized in forty of the States and have a membership in excess of 875,000. Affiliated clubs have been organized in every State.

The league has headquarters in Indianapolis, Ind., and at Washington, D. C.

**EXHIBITION OF MANUFACTURES IN URUGUAY.**

(Statement of United States Vice-Consul at Montevideo.)

A PERMANENT exposition will be established in the Museum of Manufactures of the Uruguayan National School of Commerce, according to an announcement furnished by the Ministry of Foreign Affairs (a translated copy of which may be had from the Bureau of Foreign and Domestic Commerce, Washington, D. C.). The Ministry requests that the contents of this announcement be made known in the United States in order that manufacturers may have an opportunity to contribute to the exposition.

The exposition will be free to exhibitors and will be an important factor in developing direct business by informing local merchants of the origin of the different articles, with data that will facilitate their purchase. It is hoped that many American manufacturers will take advantage of this opportunity to display samples. Correspondence should be addressed to the Ministerio de Instrucción Pública, Montevideo, and the samples marked "Para el Museo Merciológico de la Escuela Nacional de Comercio." It is requested that manufacturers who send samples, etc., inform this consulate of that fact for its own information.

THE DICKENS FELLOWSHIP.

THE Dickens Fellowship is a world-wide league of English-speaking men and women whose purpose is to exemplify the teachings of Charles Dickens and to cultivate and diffuse the spirit which pervades his writings—the spirit of innocent festivity and mirth, of religion without bigotry, of charity without coldness, of universal philanthropy and human kinship. The society began its existence in London in October, 1902. The object and aims of the Fellowship are:

"To knit together in a common bond of friendship lovers of that great master of humor and pathos, Charles Dickens. To spread the love of humanity, which is the keynote of all his work. To take such measures as may be expedient to remedy or ameliorate those existing social evils which would have appealed so strongly to the heart of Charles Dickens, and to help in every possible direction the cause of the poor and the oppressed. To assist in the preservation and purchase of buildings and objects associated with his name and mentioned in his works. To do all such things as are incidental or conducive to the attainment of the above objects or any of them."

The Fellowship is open to all, without restriction as to class, creed or nationality. Headquarters, Whitehall House, 30 Charing Cross, London, S. W. 1. Branches of the fellowship have been formed not only throughout Great Britain but in the United States and Canada, India, Australia, and New Zealand. There are probably 24,000,000 copies of Dickens's works extant. The Life Presidents are the two surviving children of Charles Dickens, namely, Henry F. Dickens, K. C., and Mrs. Kate Perugini.

The total number of teachers and scholars in the world, according to this report, was 30,015,037. The Bible does not include the schools of the Catholic and Non-Evangelical Protestant churches. The next World's Convention will be held in Tokio, Japan. According to Joseph H. Meter, editor of Kenedy's Official Catholic Directory, there are 10,555 Catholic Sunday-Schools attended by 2,817,600 Catholic children in the United States. No official Sunday-School figures are gathered by the Church authorities.

ACADEMIC DRESS.

(From a statement prepared by G. C. Leonard, Albany, N. Y.)

Academic dress, the acknowledged badge of the scholar, is now worn by the majority of universities and colleges in this country.

There are three distinct types of gowns and hoods—the bachelor's, the master's, and the doctor's. The bachelor's gown is most commonly worn and has long pointed sleeves; the master's gown has long closed sleeves with a slit through which the forearm protrudes; the doctor's gown has velvet bars on round open sleeves and velvet facings down the front. Caps worn with such gowns are the regulation mortar boards with black silk tassels. Doctors may wear gold tassels on caps.

The hoods are separate from the gowns, hanging down the back from colored velvet bands across the throat. They indicate the degrees by the size of the hoods and their velvet trimmings and show the institutions granting the degrees by the college colors in distinctive arrangements in the exposed linings of the hoods. The velvet trimmings are two inches wide on the bachelor hoods, three inches wide on masters' hoods, four and a half inches on doctors' hoods. The doctors' hoods are also widened by panels edged with ermine of the college colors. The colored velvet trimmings indicate degrees as follows:

White, Arts and Letters; scarlet, Theology; purple, Laws; gold-yellow, Science; brown, Fine Arts; pink, Music; orange, Engineering; olive, Pharmacy; maize, Agriculture; lilac, Dentistry; gray, Veterinary Science; russet, Forestry; lemon, Library Science; light blue, Pedagogy; silver-gray, Oratory; drab, Commerce and Accountancy; sage-green, Physical Education; crimson, Humanities; copper, Economics.

## MISSISSIPPI CENTENNIAL EXPOSITION

The State of Mississippi will celebrate her one hundredth anniversary of statehood with an exposition that already has received national and international indorsement. The event will be known as "The Mississippi Centennial Exposition," and it will open on December 10, 1911, and close June 10, 1918. The exposition will be held at Gulfport, Miss., a site comprising 146 acres of land, fronting 2,000 feet on the shores of the Mississippi Sound, having been purchased at a cost of more than \$80,000.

The exposition will retain most of the features of like events held in different parts of the United States in years gone by and at the same time include many others which will prove of peculiar interest in the light of more recent agricultural and industrial development. Among the buildings, most of which will be permanent, are the Administration Building, Coliseum, to cost about \$60,000 and seat 5,000 people; Manufactures Building; Girls' Boys' and Women's Building; Efficiency Building; Education Building; Automobile Building; Nursery Building; Negro Building; Government Building; Mississippi Building; Arts and Crafts Building; Hospital; Horticultural Building; Natatorium and Music Pavilion. Other features will include a monster lake, built pond and wading pool for children, palm court, Italian gardens, pergola, dancing pavilion and a giant pier for salt water bathing. The features also will include an athletic field and stadium, where sports of various kinds will be staged. It will be provided with a drill ground, baseball diamond, football gridiron and a quarter mile race track.

The United States Government has arranged to transfer its big exhibit at the San Diego Exposition to Gulfport, where it will be stored until the opening of the exposition here, when additions now contemplated will make it the largest and most comprehensive Government exhibit that has ever been installed at an exposition in this country. The sum of \$75,000 appropriated by Congress to defray the expenses of transfer, installation and maintenance. The exhibit is valued at more than \$750,000.

Many foreign countries have applied for exhibit spaces in the exhibit buildings, while different States will either erect their own buildings or have large exhibits. There will also be exhibits by the various counties in Mississippi. The educators of Mississippi have arranged a unique educational exhibit and physicians a medical and surgical exhibit.

The amusement street has been named "Dixie Reef," and it will be similar to "The Midway" and "The Pike" of other expositions.

The exposition site is but a short distance from Beauvoir, the home of Jefferson Davis, President of the Confederacy, and where he wrote his celebrated book, "The Rise and Fall of the Confederacy."

The Mississippi Centennial Exposition, in addition to being a celebration staged by the State, will be an event to exploit the undeveloped resources of the State of Mississippi and show in concise form the progress made by Mississippi and other Southern States since the war between the States.

There are 18,000 regularly established libraries in the United States, according to statistics compiled by the United States Bureau of Education. Number of volumes is an increase of 20,000,000 since 1903.

Of the 2,849 libraries containing 5,000 volumes or over, 1,844 are classified as "public and society libraries," and 1,005 are school and college libraries. Public and society libraries have an aggregate of over 50,000,000 volumes, with 7,000,000 borrowers' cards in force; 1,446 of these libraries were entirely free to the public.

Libraries reporting from 1,000 to 5,000 volumes numbered 5,453, of which 2,188 were public and society libraries and 3,265 school libraries. These libraries contained 11,689,942 volumes. Another group of still smaller libraries, comprising those that reported from 300 to 1,000 volumes, increased the total by 2,961,007 volumes.

The distribution of library facilities is still uneven;

of the 1,844 public and society libraries reported for the entire United States, more than half were in the North Atlantic States, and they contained 24,627,921 volumes out of the total of 50,000,000; and of the 3,000,000 volumes added to library collections for the year 1913 almost one-half were for the same section.

New York State had 7,842,621 volumes in her 214 libraries; Massachusetts, 7,350,024; 288 libraries in Pennsylvania, 3,728,070; and Illinois, 3,168,765 volumes. Four-fifths of the borrowers' cards in use were in the North Atlantic and Northern Central States.

There are at least five libraries in the world which hold over a million books: The Bibliotheque Nationale of Paris (which claims over 3,000,000); the British Museum, the Imperial Library at Petrograd, the Congressional Library at Washington, and the New York Public Library.

HONORARY AND MISCELLANEOUS FRATERNITIES.

United Chapters of Phi Beta Kappa—The Phi Beta Kappa Society was founded at William and Mary College, Williamsburg, Va., December 5, 1776, and now consists of 86 chapters located in as many of the leading colleges and universities in the land. The total living membership is about 30,500—22,500 men and 8,000 women. Until 1883 the growth of the society was comparatively slow, but since the organization of the United Chapters the development has been rapid, many chapters having been organized. Women were first admitted in 1875, and the first charter to a woman's college, Vassar, was granted in 1898. Smith, Wellesley, Mt. Holyoke and Goucher College of Baltimore, and Radcliffe, have since received charters. The first woman to be honored by election to the Senate was President Mary E. Woolley of Mt. Holyoke College. The present officers are: *President*—Prof. Edwin A. Grosvenor, LL. D., Amherst, Mass. *Vice President*—Dean Edward A. Birge, Madison, Wis. *Secretary*—Rev. Oscar M. Voorhees, D. D., 350 East 146th Street, New York City. *Treasurer*—David L. Taylor, M. S., New York, N. Y. The "Phi Beta Kappa Key" is the official publication of the United Chapters, which was authorized by the tenth National Council. The society is growing rapidly, many new members being received each year. The twelfth National Council of the United Chapters of Phi Beta Kappa was held at Philadelphia, September 12 and 13, 1916, at which time three new charters were granted. The new members of the Senate are: Dean Virginia C. Gildersleeve of Barnard, President Hollis Godfrey of Drexel Institute, and Prof. Felix E. Schelling of the University of Pennsylvania. The three new chapters are in connection with Randolph-Macon Woman's College, Lynchburg, Va., Bates College, Lewiston, Me., and Knox College, Galesburg Ill. Woodrow Wilson, William H. Taft, Theodore Roosevelt and Charles E. Hughes are Phi Beta Kappa men, as are also Presidents Lowell of Harvard, Hadley of Yale, Hibben of Princeton, Judson of Chicago, Thwing of Western Reserve, Butler of Columbia, Frown of Utah, Schuman of Cornell. Sigma Xi—An honorary scientific society founded at Cornell University in 1886, and having thirty chapters in the principal colleges and universities of the country. It is not secret. The performance of creditable scientific research in the natural and applied sciences, together with a high standard of scholarship, constitutes the basis of membership. Women are admitted as well as men. Sigma Tau—An honorary engineering fraternity for juniors and seniors with three requirements, viz., scholarship, practicality and sociability. It

was founded February 22, 1904, at University of Nebraska and now has 790 members and 11 chapters. Prof. F. A. Wirt of Manhattan, Kan., is National Secretary.

Tau Beta Pi—An engineering honorary society founded at Lehigh University in 1885. It now has 31 active chapters and over 7,600 members. R. C. Mathews, University of Tennessee, at Knoxville, is the National Secretary and Treasurer.

Alpha Omega Alpha—An honorary medical society in which scholarship is the membership qualification, and which admits women on the same basis as men. It was founded by Dr. William W. Root at the College of Physicians and Surgeons of Chicago, in 1902. It now has 22 chapters and 2,000 members. Dr. William W. Root, Slaterville Springs, N. Y., is the National Secretary.

Acacia Fraternity—An intercollegiate organization and fraternity for Master Masons founded at the University of Michigan in 1904, now has a membership of 3,436 and 25 active chapters. The Grand Secretary is A. Arthur Jenkins, 85 Devonshire St., Boston, Mass.

Phi Mu Sigma National Sunday School Fraternity—This society has 1,240 members and 49 active chapters. It was founded in Washington, D. C., in 1908. *Supreme Master*—Clifton P. Clark, M. C.; *National Secretary*—Willis W. Warren, Washington, D. C.

Theta Nu Epsilon—Is the only national Greek letter inter-fraternal society. It was founded at Wesleyan University in 1870, and was reorganized in 1907. The society is incorporated under New York laws and is represented in fifty-three colleges and universities of the United States, 2 Rector Street, New York City, is President and the National Secretary is Walter Erlenkotter, New York City.

Mu Phi Epsilon—An honorary musical sorority founded at the Metropolitan College of Music, Cincinnati, November 13, 1903. It has a membership of 1,378 and 21 active chapters. Mrs. William E. Wright, Philadelphia, Pa., is Supreme Secretary.

The professional fraternities now number over 50, with a membership exceeding 40,000. They are located in both technical and professional schools. With the exception of Theta Xi (Engineering-Scientific), members of professional fraternities may also belong to the general college fraternities.

Local or "one-college" fraternities exist in nearly all colleges, and some date back as early as 1825. There are over 75, with a membership exceeding 10,000. The women's local fraternities number about 50, with a total membership of about 5,000.

## NEW YORK STATE PARKS AND RESERVATIONS.

The State of New York possesses several reservations, two forest preserves, and several parks. One, the Niagara Reservation, comprises the land about the great cataract, purchased at a cost of \$1,000,000. The other is the Watkins Glen Reservation, 1 1/2 miles in length, and containing 103.5 acres. The State Reservation at Saratoga Springs now comprises approximately 600 acres of land, and includes 110 springs and borings. In addition, the State has acquired mineral rights in other lands approximating 72 acres, adding 45 springs to those upon the State-owned land. In accordance with the policy of the State to acquire every spring of value, the reservation now includes every naturally mineralized and naturally carbonated spring in the Saratoga region, with the exception of one on private property that is not open to the public. The Saratoga Reservation is divided into High Rock Park of 2 acres; Congress Park, 3 acres; Lincoln Park, 65 acres, and Geyser Park of 32 1/2 acres. The other mineral rights cover 72 acres.

The State also owns Letchworth Park, about the Falls of the Genesee River; islands in the St. Lawrence River, and John Boyd Thacher Park, near the City of Albany.

The great forest preserve of the State is divided into two preserves, one in the Adirondack region and the other in the Catskill region. The State now owns in the counties composing the Adirondack and Catskill preserves 1,814,550 acres of forests and lakes. The voters of the State in 1916 adopted a proposition to bond the State to the amount of \$10,000,000, of which \$7,500,000 is to be expended in the purchase of additional land for State park purposes within the forest preserve counties; which land, if now owned by the State under existing law, would be part of the forest preserve. The Legislature has by law defined the central portions of the Adirondack and Catskill mountain divisions as the vital areas, over which the people of the State of New York should maintain a continuous forest cover. Nevertheless, the State of New York now owns only 45 per cent. of the land within the park lines of the Adirondack and Catskill parks. The State holdings occur in parcels of larger or smaller area, intermixed everywhere with tracts of privately owned forest which is fully subject to uncontrolled exploitation. The \$7,500,000 just voted by the people will be used in acquiring as much as possible of the 52 per cent. of privately owned land within the forest preserve parks, the object being to guard water supply, to increase rainfall and give a place for recreation.

Another portion of the \$10,000,000 bond issue adopted in 1916, amounting to \$2,500,000, is to be used in the acquisition of lands for the extension of the Palisades Interstate Park. Already the Palisades Interstate Park Commission has obtained private subscriptions of \$2,500,000, which are to be added to the State's bond issue for the further development of the property. The total amount to be further expended on the Palisades Park is thus \$5,000,000.

The Palisades Interstate Park is situated in the Counties of Orange and Rockland, and comprises at present about 27,000 acres. The jurisdiction of the Interstate Park Commission extends northward from the New Jersey line along the Hudson River to the City of Newburgh and westward so as to include the entire Ramapo Mountains. South of the New Jersey line 1,000 acres along the Hudson, owned by the State of New Jersey, are under the control of a legally distinct commission, which, however, acts in close cooperation with the Commissioners of the State of New York. In the creation of the Palisades Interstate Park the State of New York has thus far appropriated in money and lands \$3,150,000, and the State of New Jersey appropriated \$500,000 for the building of the Henry Hudson Drive along the Palisades. In addition, the Palisades Interstate Park Commission has received private contributions in moneys and lands amounting to a grand total of \$4,480,000, or more than the total investment thus far of both the States of New York and New Jersey.

The Englewood approach to the Henry Hudson

Drive, up the sheer face of the Palisades cliffs at Englewood, N. J., was completed and opened for traffic in the month of August, 1915. A portion of this approach constitutes part of the Henry Hudson Drive. From the northerly loop of the approach the drive is now under construction for a distance of five miles to Alpine, N. J. At Alpine the Alpine approach is now under construction up the face of the cliffs at that point. At the foot of the Englewood approach a motor boat basin, 1,100 feet long by 150 feet wide, has been constructed.

From the southerly end of the Palisades properties, in the neighborhood of Port Lee, N. J., the commission is constructing a footpath which will, within a short time, run along the full length of the Palisades at the water's edge. Eight and one-half miles of this path are now completed.

Camping under the Palisades was, this year, for the first time, confined to the district north of Excelsior Landing, which is one mile north of Alpine, N. J. The charge for the camping permit is fixed at \$1 per week for the space occupied by the tent.

It is estimated that 1,000,000 people went to the Palisades section of the Interstate Park during the season of 1916.

The camp which has for four years been established at Blaurelt, N. Y., for the use of working girls was used during the season of 1916 by 1,877 individuals. This camp is under the charge of the Young Women's Christian Association of New York.

During 1916 approximately 650,000 people came to the Bear Mountain section of the Interstate Park. This section is located on the west shore of the Hudson River, about 45 miles from New York City. A daily boat service was continued to Bear Mountain Park during the season of 1916. Two hundred thousand people came to Bear Mountain on these excursion boats during 1916. Practically every Saturday, Sunday and holiday throughout the season the park was patronized by organizations holding their annual outings. On one day 900 people from three different organizations partook of the table d'hôte dinner at the Bear Mountain Inn. At times during the Summer as many as three sets of athletic contests were being conducted at the same time on the Bear Mountain playground. A feature of the playground is baseball, there being three fully equipped diamonds. On Highland Lake, at Bear Mountain, the commission has installed 120 rowboats, free for one-half hour to the public. In the groves on the shores of Hessian Lake many rustic shelters have been constructed, and also a large, covered dancing pavilion.

At Bear Mountain Park, the Bear Mountain Inn was established by the commission with the idea of supplying visitors to the park and camping parties with the best food at reasonable prices. The inn is operated by the commission, and is managed and conducted by its salaried employees. Everything is to be had there, from a quick lunch to table d'hôte and finest a la carte service. The restaurant building is 200 feet long by 90 feet wide. The lower floor is devoted entirely to lunch-counter service. Tables are provided in the inn and in the surrounding groves to which this food may be carried. By the Spring of 1917 there will have been completed a well-equipped garage and automobile repair shop at Bear Mountain Park.

The New Park Drive, through the Bear-Mountain-Harriman sections of the park, was finished and opened for traffic in August, 1915. This drive is 1 1/2 miles long, and carefully located and graded. It is the main artery of traffic through the park, with which all other drives and trails connect. In conjunction with County Highway No. 416 this drive passes 7 lakes between the Hudson River and the Ramapo Valley. Six of these lakes have been artificially constructed by the commission.

The New Park Drive has been the Mecca for thousands of motorists all over the country. During the 1916 season 50,000 automobiles were parked within a short distance of the Bear Mountain Inn. As many as 2,200 cars occupied the parking space on one Sunday in October. It is

## NEW YORK STATE PARKS AND RESERVATIONS—Continued.

estimated that over 200,000 people came to Bear Mountain Park by automobile during the season of 1916.

Upon the shores of two lakes in the Harriman section 6,000 Boy Scouts encamped during the season of 1916. On another lake 428 boys suffering from the effects of malnutrition were camped under the direction of the Bureau of Welfare for School Children. This camp was in the nature of an experiment, and the results were highly satisfactory. The boys were kept in the woods as long as they could possibly stay. The plan is to increase the capacity of the present camp and to establish more camps of a like nature, and possibly in time to keep one of the camps open throughout the year.

General camping was permitted at Bear Mountain Park upon grounds set aside for this purpose at the northerly end of Hessian Lake, under permits issued by the commission at a charge of \$1 for the space occupied by the tent.

In all the commission's lakes fishing is allowed without formal permit. During the past season many millions of pike-perch fry have been planted in the commission's lakes and trout fry have been put in the brooks.

The Palisades Interstate Park is a game refuge in which firearms of any description are not allowed.

In the Fall of 1916 the park comprised about 27,000 acres, of which 721 acres constitute the park in New Jersey; 536 acres the park at Blauevelt; 458 acres the park at Hook Mountain; the balance in the Harriman and Bear Mountain sections.

During the past year the commission, working in conjunction with the State Highway Department of New York, has completed the Popolopen Bridge, spanning the 600-foot gorge between Forts Clinton and Montgomery, at an elevation which is 5 feet higher than the Brooklyn Bridge.

A careful survey of the Revolutionary Forts Clinton and Montgomery has been made by members of the American Scenic and Historic Preservation Society and of the Society of the American Museum of Natural History, and the restoration of these forts is now in progress.

The Palisades and the State roads will be connected. Route 3 is one of the great routes provided for in the Highway Law of 1909, under which provision was made for a road through the westerly portion of Rockland, Orange and Ulster Counties to Kingston and thence to Albany. By co-operation with the county, State and national authorities, the Palisades Commissioners have succeeded in having this route so planned that, in conjunction with the Henry Hudson Drive it will ultimately constitute a great interstate highway from Fort Lee to Albany. From the State line to Congress the route has not yet been constructed. From Congress, through Haverstraw, Stony Point and Bear Mountain the road is completed to Highland Falls. The Federal authorities have agreed that from Highland Falls the road may be constructed through the Military Reservation by following for two miles the road to Central Valley. When this road reaches Crows Nest the new highway will be constructed along the southerly slope of Crows Nest until it approaches the Hudson River. Then it will follow the river side of Crows Nest to Storm King.

The State Highway Department is now engaged in constructing sections of the road in the vicinity of Crows Nest and Storm King Mountain. Around the face of Storm King Mountain the road is at an elevation of 380 feet directly above the Hudson River.

When the entire road from Albany to Fort Lee is completed it will run almost its entire length in full view of the Hudson River and will afford a scenic highway unsurpassed anywhere in the world.

## FEDERAL IMPEACHMENTS IN HISTORY.

The Constitution of the United States, Article II, Section IV, provides that civil officers of the United States may be removed from office on impeachment and conviction of treason, bribery or other high crimes and misdemeanors; that the House of Representatives has the sole power of impeachment, and the Senate the sole power to try impeachments; that the Vice-President shall preside at impeachments except when the President is tried, when the Chief Justice of the Supreme Court shall preside; and that two-thirds of the members present must vote for conviction before a person impeached shall be deemed guilty. Only nine persons have been impeached and tried before the Senate, and only three of them have been convicted. The record is as follows:

William Blount, Senator from Tennessee; impeached July 7, 1797, for conspiring to wage war with Spain in favor of Great Britain, to excite the Cherokee Indians against Spain, and to create disaffection among the Indians toward the United States; trial, December 17, 1798, to January 14, 1799; vote, 11 guilty, 14 not guilty; verdict, acquittal.

John Pickens, Judge of the District Court of the United States for the District of New Hampshire; impeached 1803 for drunkenness and disregard of the terms of the statutes; trial, March 3 to March 12, 1803; vote, 19 guilty, 7 not guilty; verdict, guilty; punishment, removal from office.

Samuel Chase, Associate Justice of the Supreme Court of the United States; impeached 1807 for misconduct at trials of persons charged with breach of the Sedition Law; trial, November 26, 1804, to March 1, 1805; vote, 9 guilty, 30 not guilty, and 15 guilty, 19 not guilty, on different counts; verdict, acquittal.

James Peck, Judge of the District Court of the United States for the District of Missouri; impeached for tyrannous treatment of counsel, 1830; trial, May 11 to May 30, 1830, and from December 13, 1830, to January 31, 1831; vote, 21 guilty, 22 not guilty; verdict, acquittal.

West H. Humphreys, Judge of the District Court of the United States for the District of Tennessee; impeached 1862 for supporting the secession movement and unlawfully acting as Judge of the Confederate District Court; trial May 22 to June 26, 1862; vote, 32 guilty, 4 not guilty, and 38 guilty; verdict, guilty; punishment, removal from office.

Andrew Johnson, President of the United States; impeached for usurpation of the law, corrupt use of the veto power, interference at elections and high crimes and misdemeanors; trial, March 30 to May 26, 1868; vote, 35 guilty, 19 not guilty; verdict, acquittal.

William W. Belknap, Secretary of War of the United States; impeached for accepting bribes; trial, April 5 to August 1, 1876; vote, 5 guilty, 25 not guilty; verdict, acquittal.

Charles Swaine, Judge of the District Court of the United States for the District of Florida; impeached 1905 for misconduct in office; trial, February 6 to February 27, 1905; vote, 55 guilty, 37 not guilty; verdict, acquittal.

Robert W. Archbald, Associate Judge of United States Commerce Court, was impeached July 11, 1912, on thirteen articles charging him with corrupt collusion with coal mine owners and railroad officials while in office. The Senate began his trial December 3, 1912, and ended January 13, 1913. Verdict, guilty; removal from office.

On June 12, 1914, District Judge Alston G. Dayton was impeached. Proceedings dropped. March 3, 1915.

## THE LINCOLN HIGHWAY.

The Lincoln Highway is the longest road in the world. It connects twelve States, and is laid out between New York and San Francisco, as directly as possible, consistent with the topography of the country. Its length is about 3,284 miles, and it is constantly being shortened by improvements and the elimination of curves.

The idea of an ocean-to-ocean highway was presented to the public in the early Fall of 1913, by a National proclamation issued by the Lincoln Highway Association, an organization incorporated with headquarters in Detroit, Mich. The originator of the idea was Carl G. Fisher of Indianapolis, now Vice-President of the Lincoln Highway Association. The object of the association was:

"The establishment of a continuous improved highway from the Atlantic to the Pacific, open to lawful traffic of all descriptions, without toll charges, and to be of concrete wherever practicable—this highway to be known, in memory of Abraham Lincoln, as the 'Lincoln Highway.'

National interest has attached to the development of this great thoroughfare, and the effort of the public in the States through which it passes has been devoted to its rapid improvement and marking. In the three years since the establishment and dedication of the route, the road has been marked for practically its entire distance, and construction has progressed as rapidly as possible in every State.

The Lincoln Highway Association was not organized to construct the road, but to promote and aid in its construction by the local communities, counties and States through which it passes. In round figures \$10,000,000 have been spent in the improve-

ment of the Lincoln Highway. The eastern section of the great road is almost completely hard-surfaced. The Middle Western States have devoted every effort to the grading and maintenance of the route, and are progressing to hard-surfacing as fast as means will allow. Much work on the road has been done in the West, but it is there, particularly in the States of Utah and Nevada, that outside aid solicited by the association is particularly needed, due to the long mileages and sparse population, which makes the raising of sufficient funds from the regular road improvement sources impossible.

The following table indicates the amount spent on the Lincoln Highway during the last year in each of the States crossed by the highway:

| State          | State Aid | State Aid      |             |
|----------------|-----------|----------------|-------------|
| New Jersey...  | \$183,675 | Nebraska.....  | \$367,360   |
| Pennsylvania.. | 193,034   | Wyoming.....   | 60,650      |
| Ohio.....      | 925,000   | Utah.....      | 275,500     |
| Indiana.....   | 706,108   | Nevada.....    | 69,140      |
| Illinois.....  | 256,800   | California.... | 256,000     |
| Iowa.....      | 904,955   | Total.....     | \$4,198,165 |

The officers and directors of the Lincoln Highway Association are given below:

## 17 BUSIEST CORNERS IN LONDON AND NEW YORK.

London has seventeen corners where more than 10,000 vehicles pass between 8 A. M. and 8 P. M. The total movement at these points is 255,832. Seventeen similar corners in New York show a total movement greater by 18,473, with this important distinction to be borne in mind—the count in New York was made in the hours between 8.30 A. M. and 6.30 P. M., ten hours, as compared with twelve in London.

The corners compare as follows:

## ROSAEUCRUCIAN ORDER IN AMERICA.

The American Jurisdiction of the Ancient and Mystical Order Rosae Crucis was established in 1915 and operates under a properly sealed and signed charter or patent signed by the officials of the order in France by direction of the Supreme Council of the World, in Memphis, Egypt. The order was originally established in Egypt in 1500 B. C. and divided into jurisdictions in 1850 B. C. It is the oldest secret and fraternal organization in the world to-day, with several million members in every civilized country. Its teachings embrace all that is occult, mystical, scientific, philosophical and helpful to one's health, happiness and success. The order conducts its work with initiations, convocations and lectures which constitute a schooling in practical laws and work without speculation or abstract theory. It has nothing whatever to sell, but operates as did the old schools and temples of philosophy in the past. Membership is limited to men and women of 21 years or older who are of good moral habits, well recommended and professing a firm belief in God. The order is non-sectarian and members are invited to join after having felt a desire to do so. Grand and local lodges are established in every State. The national officers for America are: Imperator and Most Worshipful Grand Master, H. Spencer Lewis, Commandant of the American Commandery Knights of the Rosae Crucis; Financial Secretary, A. B. Erassard, 306 West 48th Street, New York; Supreme Secretary-General and Archivist, Thor Kilmalchto, K. R. C., Supreme Grand Lodge Temple, 306 West 48th Street, New York City. Meetings in practically all Temples are held Thursday evenings. Visitors always welcome at 7.30 P. M.

## CITIES UNDER COMMISSION FORM OF GOVERNMENT.

(From a Report of the Census Bureau of June 12, 1914.)

Washington, D. C., was the first city in the United States to be governed for any number of years by a commission, coming under that form of government by the terms of an act of Congress that became effective June 11, 1878. The application of this form of government to the Capital of the United States grew out of the relation of the National Government to this particular city, and the City of Washington was not considered as an example to other municipalities with reference to its form of government.

The great need of improvement in sanitary conditions of Memphis, Tenn., following a severe visitation of yellow fever in 1878, combined with the fact that at the time the city had incurred an indebtedness equal to its authority for borrowing money, led the Legislature of Tennessee in 1879 to put an end to the existence of the city as a municipal corporation and to create in its stead a taxing district whose affairs were conducted by a small body of officers having practically the authority of the Commissioners in the cities under the new or commission form of government. After the recovery of the city from the difficulties which made this form of government necessary, Memphis was reincorporated as a city, with its earlier form of government, and its experience was not deemed such as to encourage the substitution of this form of government for that of Mayor and Council.

A disastrous fire having destroyed Galveston, Tex., on September 1, 1900, and left the city prostrate financially, as Memphis had been in 1878, Galveston was placed under a government by a commission in 1901. The experience of Galveston under this form of government was such that in 1905 it was adopted by Houston, Tex. Two other cities, having 30,000 inhabitants, adopted it in 1907, two in 1908, eight in 1909, six in 1910, fifteen in 1911, nine in 1912, twenty-one in 1913, and three in 1914.

## THE CITY MANAGER PLAN.

An act of the Ohio Legislature, approved May 6, 1913, provided for a form of municipal government to be known as the "City Manager plan," the council to consist of five members: in cities of less than 10,000 inhabitants, of seven members in cities of from 10,000 to 25,000 inhabitants, and of nine members in cities having over 25,000 inhabitants, the council being elected in all cases for a term of four years. This council is to constitute a governing body with power to pass ordinances, adopt regulations, appoint a chief administrative officer to be known as the "City Manager," fix his salary, approve all appointments made by him (except as otherwise provided), and appoint a Civil Service Commission and all boards or commissions created by ordinances.

Cities under commission form of government revised to October 1, 1916.

In addition there are officers called managers in the following towns, which do not have commission-manager charters or lack some of the fundamental features of the plan: Staunton and Fredericksburg, Va.; Norwood, Mass.; Inglewood and San Diego, Cal.; Glencoe and River Forest, Ill.; Grove City and Titusville, Pa.; Morris, Minn.; Clarinda and Iowa Falls, Iowa; Clark, S. Dak.; Tucson, Ariz., and Roswell, N. M.; Terrell, Tex.; Grand Haven, Mich. In Canada: Port Arthur, Ontario, and Maissonneuve, P. Q. There are State-wide laws permitting cities to adopt this plan in Massachusetts, New York, Virginia, Ohio, and Iowa.

THE DIXIE HIGHWAY.

The Dixie Highway, the most pretentious of the national road movements developed during the year 1915, was officially launched at the conference of Governors of the States interested called to meet at Chattanooga, Tenn., April 3, 1915, by Governor Samuel Itatson, of Indiana. The system of highways, as designated by two commissioners, each appointed by the Governors of the States of Michigan, Illinois, Indiana, Ohio, Kentucky, Tennessee, Georgia and Florida, consists of two divisions and one loop each in the States of Michigan and Florida, with connecting links. The western division starts at Chicago, and is routed through the cities of Danville, Ill.; Indianapolis, Ind.; Louisville, Ky.; Nashville and Chattanooga, Tenn.; Rome, Atlanta and Macon, Ga.; Tallahassee, Kissimmee, Bartow and Jupiter, Fla., where it connects with the eastern division. Indianapolis, Ind., is connected with a loop around the State of Michigan at South Bend, Ind. Joining the eastern end of the Michigan loop, which follows Lake Huron to Detroit, the eastern division of the highway is routed through the cities of Monroe, Mich.; Toledo, Dayton and Cincinnati, Ohio; Lexington, Ky.; Cumberland Gap and Knoxville, Tenn.; to Chattanooga, thence to Atlanta, Ga., via Dalton; thence to Macon, via McDonough; thence to Jacksonville, Fla., via Fitzgerald and Waycross, Ga., and along the east coast of Florida to Miami. A connecting link from Indianapolis on the western division to Dayton, Ohio, on the eastern division, and from Tallahassee, Fla., on the western division to Jacksonville, Fla., on the eastern division has also been designated.

The Dixie Highway has a total mileage of 4,206. In the eight States it traverses 193 counties. It will serve a territory with a population of almost forty million. There are over eight hundred thousand automobile owners in this territory, from

which the Dixie Highway can reasonably expect to attract tourists.

That remarkable progress has been made in the short history of the movement may be gleaned from the reports received from fifty counties, from which a conservative estimate was compiled which shows that approximately five million dollars has been expended in the past six months and that preparations have been made to expend during 1916 almost twenty million dollars. Starting with a highway, a large part of which consisted of bad country roads, the progress has been so rapid that there are only two serious barriers to through travel at the beginning of 1916. These barriers consist of about seventy miles of road yet to be constructed on the eastern division between Cincinnati, Ohio and Knoxville, Tenn., in the mountain counties of Kentucky, and about eighty miles of mountain road in Tennessee on the western division between Nashville and Chattanooga. Ample financial preparations have been made to have these sections of the highway completed by Fall of 1916.

Entire sections of the Dixie Highway are planning pared roads for their entire stretch. Notable among these are the sections of the highway between Chicago and Danville, Ill.; Toledo and Cincinnati, Ohio; Jacksonville and Miami, Fla., and from Tallahassee to Bartow, Fla.

The headquarters of the Dixie Highway Association are located at Chattanooga, Tenn. The officers are Judge M. M. Allison, President; C. H. Huston, First Vice-President; W. R. Long, Secretary and Treasurer; W. S. Gilbreath, Field Secretary, and V. D. L. Robinson, Assistant Secretary. The Executive Committee is composed of President Allison, Secretary Long, Richard Hardy, Chattanooga; Clark Howell, editor Atlanta Constitution, Atlanta, Ga., and Carl G. Fisher, Indianapolis, founder of both the Lincoln and Dixie Highway movements.

JUSTICES OF THE SUPREME COURT

The salaries of Justices of the Supreme Court are: First and Second Districts, \$17,500; remaining Districts, \$10,000; but non-resident Justices, sitting in the Appellate Divisions of the First and Second Departments, receive the same compensation as the Justices in those Departments; if assigned to duty in the First and Second Districts, other than in the Appellate Division, their additional compensation is \$10 per day.

MAYORS OF THE CITY OF NEW YORK.

BEFORE the Revolution the Mayor was appointed by the Governor of the Province; and from 1784 to 1820 by the Appointing Board of the State of New York, of which the Governor was the chief member. From 1820 to the amendment of the Charter, in 1830, the Mayor was appointed by the Common Council. In 1898 the term of the first Mayor of Greater New York (Van Wyck) began.

### DISTRICT OF COLUMBIA.

The Government of the District of Columbia is a municipality whose principal administrative agency is a board of three Commissioners, two of whom are appointed from civil life by the President of the United States and must be citizens of the District of Columbia and have resided there for three years immediately preceding their appointment as such, and during that period have claimed residence nowhere else. Their appointments must be confirmed by the Senate. The other Commissioner is an officer of the Corps of Engineers of the United States Army, whose lineal rank is senior to that of Captain, or who is a Captain who has served at least fifteen years in the Corps of Engineers of the Army. He is detailed for duty as such for an indefinite term by the President of the United States, subject to assignment to other duty at the President's pleasure. The term of the other Commissioners is three years.

The personnel of the Board of Commissioners and the dates of expiration of their appointments and the personnel of the principal offices of the Government of the District and of the Judiciary is as follows:

Commissioners Oliver P. Newman and Louis Brownlow, whose terms expire July 19, 1919, and January 22, 1918, respectively, and Major Charles W. Kutz, Corps of Engineers, United States Army, Secretary, Daniel J. Donovan, \$2,460 per annum, Offices of Commissioners' District Building, Washington, D. C.

The Judiciary—Court of Appeals: Chief Justice, Seth Shepard; Associate Justices, Charles H. Robb, J. A. van Orsdel, Supreme Court, Chief Justice, J. Harry Covington, Associate Justices, Ashley M. Gould, Wendell P. Stafford, Wakter J. McCoy, Frederick L. Siddons.
